

Crescent Point

Crescent Point Energy Corp. is a conventional oil and natural gas company with assets strategically focused in properties comprised of high quality, long life, operated light oil and natural gas reserves in Western Canada. Crescent Point strives to create sustainable, value added growth in reserves, production and cash flow through the execution of management's integrated strategy of acquiring, exploiting and developing reserves in the Western Canada Sedimentary Basin.

Crescent Point is currently seeking to fill the following position:

Job Title: Senior Operations Engineer / Engineering Technologist
Location: Provost, Alberta
Reports to: Team Lead, Engineering

The following will provide you with basic guidelines as to the duties required of this position.

Purpose:

The Senior Operations Engineer / Engineering Technologist will be responsible for providing support for well servicing, capital development projects, recommending and executing production optimization opportunities as well as providing other technical support as needed. The successful candidate will work closely with both the Calgary based engineering teams and the field based development and operations teams. The candidate should reside in Provost area due to the location of the role.

Main Responsibilities & Activities:

- Manage service rig activity, including well servicing and well optimizations
- Lead production optimization activities including facility optimization/rationalization and other operating cost reduction initiatives
- Work with Calgary based engineers and field based development teams to ensure wells are on production and tied in as soon as possible after drilling and completion
- Identify facility/pipeline requirements for current and future capital development and work with Calgary based engineers to define project scopes
- Participate in the commissioning and the start-up of capital projects as needed
- Identify production reactivation candidates and prepare detailed economics to support these projects
- Participate in the yearly budgeting process for such items as maintenance capital and operating expenses
- Provide technical support by implementing best operating practices
- Mentor and supervise junior level staff

Knowledge, Skills & Abilities:

- Bachelor's degree in Engineering or nationally accredited 2 year Engineering Technology diploma
- Minimum 5 years of relevant experience is required
- Strong team player with excellent interpersonal and communication skills
- Experience in the Canadian upstream oil and gas industry including capital project planning and execution would be an asset
- Excellent computer skills with proficiency in: Microsoft Office applications, Accumap, AFE Navigator, Peep/Value Navigator, S-Rod
- Experience of working with best operating practices would be an asset
- Strong technical skills with the ability to work at both the field and corporate level
- Comfortable making presentations and facilitating meetings

Only qualified candidates of interest will be contacted
