

MANAGEMENT'S DISCUSSION AND ANALYSIS

Management's discussion and analysis ("MD&A") is dated August 10, 2016 and should be read in conjunction with the unaudited consolidated financial statements for the period ended June 30, 2016 and the audited consolidated financial statements for the year ended December 31, 2015 for a full understanding of the financial position and results of operations of Crescent Point Energy Corp. (the "Company" or "Crescent Point").

The unaudited consolidated financial statements and comparative information for the period ended June 30, 2016 have been prepared in accordance with International Financial Reporting Standards ("IFRS"), specifically International Accounting Standard ("IAS") 34, *Interim Financial Reporting*.

STRUCTURE OF THE BUSINESS

The principal undertaking of Crescent Point is to carry on the business of acquiring, developing and holding interests in petroleum and natural gas properties and assets related thereto through a general partnership and wholly owned subsidiaries. Amounts in this report are in Canadian dollars unless noted otherwise. References to "US\$" are to United States ("US") dollars.

Non-GAAP Financial Measures

Throughout this MD&A, the Company uses the terms "funds flow from operations", "adjusted net earnings from operations", "adjusted net earnings from operations per share", "adjusted net earnings from operations per share - diluted", "net debt", "netback", "market capitalization" and "enterprise value". These terms do not have any standardized meaning as prescribed by IFRS and, therefore, may not be comparable with the calculation of similar measures presented by other issuers.

Funds flow from operations is calculated based on cash flow from operating activities before changes in non-cash working capital, transaction costs and decommissioning expenditures. Management utilizes funds flow from operations as a key measure to assess the ability of the Company to finance dividends, operating activities, capital expenditures and debt repayments. Funds flow from operations as presented is not intended to represent cash flow from operating activities, net earnings or other measures of financial performance calculated in accordance with IFRS.

The following table reconciles cash flow from operating activities to funds flow from operations:

| (\$ millions) | Three months ended June 30 | | | Six months ended June 30 | | |
|-------------------------------------|----------------------------|-------|----------|--------------------------|-------|----------|
| | 2016 | 2015 | % Change | 2016 | 2015 | % Change |
| Cash flow from operating activities | 427.5 | 491.5 | (13) | 755.6 | 890.4 | (15) |
| Changes in non-cash working capital | (25.8) | 21.4 | (221) | 19.5 | 50.3 | (61) |
| Transaction costs | 0.3 | 8.8 | (97) | 0.6 | 9.7 | (94) |
| Decommissioning expenditures | 2.4 | 2.5 | (4) | 6.7 | 7.4 | (9) |
| Funds flow from operations | 404.4 | 524.2 | (23) | 782.4 | 957.8 | (18) |

Adjusted net earnings from operations is calculated based on net income before amortization of exploration and evaluation ("E&E") undeveloped land, impairment or impairment recoveries on property, plant and equipment ("PP&E"), unrealized derivative gains or losses, unrealized foreign exchange gain or loss on translation of hedged US dollar long-term debt, unrealized gains or losses on long-term investments and gains or losses on capital acquisitions and dispositions. Adjusted net earnings from operations per share and adjusted net earnings from operations per share - diluted are calculated as adjusted net earnings from operations divided by the number of weighted average basic and diluted shares outstanding, respectively. Management utilizes adjusted net earnings from operations to present a measure of financial performance that is more comparable between periods. Adjusted net earnings from operations as presented is not intended to represent net earnings or other measures of financial performance calculated in accordance with IFRS.

The following table reconciles net income to adjusted net earnings from operations:

| (\$ millions) | Three months ended June 30 | | | Six months ended June 30 | | |
|---|----------------------------|---------|----------|--------------------------|---------|----------|
| | 2016 | 2015 | % Change | 2016 | 2015 | % Change |
| Net income (loss) | (226.1) | (240.5) | (6) | (313.6) | (286.5) | 9 |
| Amortization of E&E undeveloped land | 48.9 | 47.6 | 3 | 99.2 | 94.8 | 5 |
| Unrealized derivative losses | 237.8 | 359.1 | (34) | 536.4 | 312.5 | 72 |
| Unrealized foreign exchange (gain) loss on translation of hedged US dollar long-term debt | 50.3 | (31.0) | (262) | (180.2) | 99.7 | (281) |
| Unrealized (gain) loss on long-term investments | (2.8) | 13.2 | (121) | (4.9) | (10.5) | (53) |
| Gain on capital acquisitions | - | (6.3) | (100) | - | (6.3) | (100) |
| Deferred tax relating to adjustments | (93.0) | (101.7) | (9) | (127.0) | (135.0) | (6) |
| Adjusted net earnings from operations | 15.1 | 40.4 | (63) | 9.9 | 68.7 | (86) |

Net debt is calculated as long-term debt plus accounts payable and accrued liabilities and dividends payable, less cash, accounts receivable, prepaids and deposits and long-term investments, excluding the unrealized foreign exchange on translation of hedged US dollar long-term debt. Management utilizes net debt as a key measure to assess the liquidity of the Company.

The following table reconciles long-term debt to net debt:

| (\$ millions) | June 30, 2016 | December 31, 2015 | % Change |
|---|---------------|-------------------|----------|
| Long-term debt ⁽¹⁾ | 4,233.9 | 4,452.0 | (5) |
| Accounts payable and accrued liabilities | 446.3 | 679.4 | (34) |
| Dividends payable | 15.2 | 50.5 | (70) |
| Cash | (4.2) | (24.7) | (83) |
| Accounts receivable | (259.1) | (327.0) | (21) |
| Prepays and deposits | (7.2) | (5.1) | 41 |
| Long-term investments | (35.2) | (30.3) | 16 |
| Excludes: | | | |
| Unrealized foreign exchange on translation of hedged US dollar long-term debt | (351.0) | (531.2) | (34) |
| Net debt | 4,038.7 | 4,263.6 | (5) |

(1) Includes current portion of long-term debt.

Netback is calculated on a per boe basis as oil and gas sales, less royalties, operating and transportation expenses and realized derivative gains and losses. Netback is used by management to measure operating results on a per boe basis to better analyze performance against prior periods on a comparable basis.

Market capitalization is calculated by applying the period end closing share trading price to the number of shares outstanding. Market capitalization is an indication of enterprise value.

Enterprise value is calculated as market capitalization plus net debt. Management uses enterprise value to assess the valuation of the Company. Refer to the Liquidity and Capital Resources section in this MD&A for further information.

Management believes the presentation of the Non-GAAP measures above provide useful information to investors and shareholders as the measures provide increased transparency and the ability to better analyze performance against prior periods on a comparable basis.

Production increased by 10 percent and 13 percent in the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015, primarily due to acquisitions completed in the second and third quarters of 2015, throughput commencing into a third party processing plant in southeast Saskatchewan in the first quarter of 2016 and the Company's successful capital development program, partially offset by natural declines. The Company's weighting to crude oil and NGLs in the three and six months ended June 30, 2016 remained consistent with the 2015 comparative periods.

The following is a summary of Crescent Point's production by area:

| Production By Area (boe/d) | Three months ended June 30 | | | Six months ended June 30 | | |

In the three and six months ended June 30, 2016, the Company drilled 14 (12.2 net) wells and 228 (214.2 net) wells, respectively, focused primarily in the Viewfield Bakken and Flat Lake resource plays in southeast Saskatchewan, the Viking resource play in west central Saskatchewan, the Shaunavon resource play in southwest Saskatchewan and the Uinta Basin resource play in northeast Utah.

(1) WTI refers to the West Texas Intermediate crude oil price.

(2) LSB refers to the Light Sour Blend crude oil price.

(3) WCS refers to the Western Canadian Select crude oil price.

(4) AECO refers to the Alberta Energy Company natural gas price.

In the second quarter of 2016, the Company's average selling price for oil decreased 20 percent from the same period in 2015, primarily as a result of a 21 percent decrease in the US\$ WTI benchmark price and a wider corporate oil price differential, partially offset by a weaker Canadian dollar. Crescent Point's corporate oil differential compared to Cdn\$ WTI for the second quarter of 2016 was \$8.15 per bbl, or 14 percent, compared to \$8.76 per bbl, or 12 percent, in the second quarter of 2015.

The Company's oil differential for the second quarter of 2016 was impacted by a widening of light oil and medium and heavy oil differentials. In the three months ended June 30, 2016, the Cdn\$ WTI - LSB differential widened to 10 percent from 8 percent and the Cdn\$ WTI - WCS differential widened to 29 percent from 20 percent in the same period of 2015. Light Sour Blend differentials continued to be impacted by the decrease in crude oil prices, with differentials decreasing slightly on an absolute dollar basis. Western Canadian Select differentials continued to be impacted by the oversupply in North American production and constraints to pipeline take away capacity out of the Western Canadian Sedimentary Basin.

In the six months ended June 30, 2016, the Company's average selling price for oil decreased 23 percent from the same period in 2015, primarily as a result of a 26 percent decrease in the US\$ WTI benchmark price and a wider corporate oil price differential, partially offset by a weaker Canadian dollar. The Company's corporate oil differential compared to Cdn\$ WTI for the six months ended June 30, 2016 was \$9.75 per bbl, or 18 percent, compared to \$10.11 per bbl, or 15 percent, in the same period of 2015.

The Company's corporate oil differential for the six months ended June 30, 2016 was impacted by a widening of medium and heavy oil differentials. In the six months ended June 30, 2016, the Cdn\$ WTI - WCS differential widened to 35 percent from 25 percent in the same period of 2015 while the Cdn\$ WTI - LSB differential remained consistent.

The Company's exposure to medium and heavy oil differentials is due to the Company's production base in southwest Saskatchewan, which is typically sold at a premium to WCS prices, and the Company's production base in the Uinta Basin which exposes the Company to Yellow wax crude and Black wax crude oil differentials.

To mitigate against price risks, the Company has an active 3½ year hedging program for Canadian dollar denominated WTI prices and for differentials where applicable. In addition, the Company continues to deliver crude oil through its various rail terminals to provide access to diversified markets and pricing.

The Company's average selling price for NGLs in the three and six months ended June 30, 2016, decreased 25 percent from \$18.99 per bbl to \$14.18 per bbl and 35 percent from \$17.56 per bbl to \$11.34 per bbl, respectively, primarily due to the significant weakening of propane, butane and condensate prices resulting from the decrease in crude oil prices and the continued oversupply of liquids in North America.

The Company's average selling price for gas in the three and six months ended June 30, 2016 decreased 43 percent from \$3.02 per mcf to \$1.72 per mcf and 39 percent from \$3.08 per mcf to \$1.88 per mcf, respectively, primarily as a result of the decreases in the AECO daily benchmark price driven by oversupply in the Western Canadian Sedimentary Basin.

(1) The crude oil realized derivative gain includes the realized derivative loss and the realized derivative gain on financial price differential contracts in the three and six months ended June 30, 2016, respectively. The average crude oil volumes hedged and average barrels of oil equivalent hedged do not include the hedged volumes related to financial price differential contracts.

(2) GJ/d is defined as gigajoules per day.

Management of cash flow variability is an integral component of Crescent Point's business strategy. Changing business and market conditions are monitored regularly and reviewed with the Board of Directors to establish risk management guidelines used by management in carrying out the Company's strategic risk management program. The risk exposure inherent in movements in the price of crude oil, natural gas and power, and fluctuations in the US/Cdn dollar exchange rate and interest rates are all proactively managed by Crescent Point through the use of derivatives with investment-grade counterparties.

The Company's crude oil and natural gas derivatives are referenced to WTI and the AECO monthly index, unless otherwise noted. Crescent Point utilizes a variety of derivatives, including swaps, collars and put options to protect against downward commodity price movements while providing the opportunity for some upside participation during periods of rising prices. For commodities, Crescent Point's risk management program allows for hedging a forward profile of 3½ years and up to 65 percent of net royalty interest production, unless otherwise approved by the Board of Directors.

With ongoing volatility of price differentials between WTI and western Canadian crude prices, Crescent Point hedges price differentials as a part of its risk management program. The Company uses a combination of financial derivatives and fixed differential physical contracts to hedge these price differentials. For price differential hedging, Crescent Point's risk management program allows for hedging a forward profile of 3½ years, and up to 35 percent net of royalty interest production.

The Company recorded total realized derivative gains of \$116.0 million and \$328.1 million for the three and six months ended June 30, 2016, respectively, compared to \$112.9 million and \$279.3 million for the same periods in 2015.

The Company's realized derivative gain for oil was \$107.9 million and \$315.8 million for the three and six months ended June 30, 2016, respectively, compared to \$109.7 million and \$274.0 for the same periods in 2015. The realized derivative gain in the second quarter of 2016 remained consistent compared to the same period in 2015, with the decrease in the Cdn\$ WTI benchmark price offset by the decreases in the Company's average derivative oil price and oil volumes hedged. The increased realized gain in the six months ended June 30, 2016 is largely attributable to the decrease in the Cdn\$ WTI benchmark price and the \$42.0 million realized gain from the unwind and settlement of a portion of the Company's 2017 and 2018 hedges, partially offset by the decreases in oil volumes hedged and the Company's average derivative oil price. During the three months ended June 30, 2016, the Company's average derivative oil price decreased by 10 percent or \$8.83 per bbl, from \$89.52 per bbl in 2015 to \$80.69 per bbl in 2016. During the six months ended June 30, 2016, the Company's average derivative oil price decreased by 7 percent or \$6.02 per bbl, from \$89.68 per bbl in 2015 to \$83.66 per bbl in 2016.

Crescent Point's realized derivative gain for gas was \$8.1 million and \$12.3 million for the three and six months ended June 30, 2016, respectively, compared to \$3.2 million and \$5.3 million for the same periods in 2015. The increased realized derivative gains in the three and six months ended June 30, 2016 are largely attributable to the decrease in the AECO monthly index price and the increase in gas volumes hedged as a result of increased production, partially offset by a decrease in the Company's average derivative gas price. During the three months ended June 30, 2016, the Company's average derivative gas price decreased by 4 percent or \$0.14 per GJ, from \$3.58 per GJ in 2015 to \$3.44 per GJ in 2016. During the six months ended June 30, 2016, the Company's average derivative gas price decreased by 3 percent or \$0.09 per GJ, from \$3.60 per GJ in 2015 to \$3.51 per GJ in 2016.

The Company has not designated any of its risk management activities as accounting hedges under IFRS 9, *Financial Instruments* and, accordingly, has recorded its derivatives at fair value with changes in fair value recorded in net income.

The following is a summary of the Company's unrealized derivative gain (loss):

| (\$ millions) | Three months ended June 30 | | | Six months ended June 30 | | |
|----------------------------------|----------------------------|---------|----------|--------------------------|---------|----------|
| | 2016 | 2015 | % Change | 2016 | 2015 | % Change |
| Crude oil | (291.8) | (302.6) | (4) | (382.3) | (390.8) | (2) |
| Natural gas | (17.1) | (1.8) | 850 | (8.1) | (0.2) | 3,950 |
| Interest | (0.4) | 1.3 | (131) | (3.0) | 1.9 | (258) |
| Power | 0.2 | 0.6 | (67) | 0.1 | 0.1 | - |
| Cross currency | 69.6 | (55.4) | (226) | (141.7) | 74.7 | (290) |
| Foreign exchange | 1.7 | (1.2) | (242) | (1.4) | 1.8 | (178) |
| Total unrealized derivative loss | (237.8) | (359.1) | (34) | (536.4) | (312.5) | 72 |

The Company recognized a total unrealized derivative loss of \$237.8 million for the three months ended June 30, 2016 compared to \$359.1 million in the same period in 2015, primarily due to a \$291.8 million unrealized derivative loss on crude oil contracts in the second quarter of 2016 compared to \$302.6 million in the second quarter of 2015. The unrealized oil derivative losses for the three months ended June 30, 2016 and June 30, 2015 are primarily attributable to the increase in the Cdn\$ WTI forward benchmark price at June 30, 2016 compared to March 31, 2016 and June 30, 2015 compared to March 31, 2015, respectively, and the maturity of in-the-money contract months.

The total unrealized derivative loss in the second quarter of 2016 was partially offset by a \$69.6 million unrealized derivative gain on Cross Currency Swaps ("CCS") compared to an unrealized derivative loss of \$55.4 million in the same period in 2015. The unrealized CCS derivative gain for the three months ended June 30, 2016 is primarily the result of the slightly weaker forward Canadian dollar at June 30, 2016 compared to March 31, 2016 and the maturity of out-of-the-money contract months. The unrealized CCS derivative loss for the three months ended June 30, 2015 was primarily the result of the stronger forward Canadian dollar at June 30, 2015 compared to March 31, 2015.

During the six months ended June 30, 2016, the Company recognized a total unrealized derivative loss of \$536.4 million compared to \$312.5 million in the same period in 2015, primarily due to \$382.3 million unrealized derivative loss on crude oil contracts in the six months ended June 30, 2016 compared to \$390.8 million for the same period of 2015. The unrealized oil derivative loss for the six months ended June 30, 2016 is primarily attributable to the maturity of in-the-money contract months, the unwind and settlement of a portion of the Company's 2017 and 2018 hedges and the increase in the Cdn\$ WTI forward benchmark price at June 30, 2016 compared to December 31, 2015. The unrealized oil derivative loss for the six months ended June 30, 2015 was primarily attributable to the maturity of in-the-money contract months and the increase in the near-term Cdn\$ WTI forward benchmark price at June 30, 2015 compared to December 31, 2014.

The total unrealized derivative loss in the six months ended June 30, 2016 was also attributable to a \$141.7 million unrealized derivative loss on CCS compared to an unrealized derivative gain of \$74.7 million in the same period in 2015. The unrealized CCS derivative loss for the six months ended June 30, 2016 was primarily the result of the stronger forward Canadian dollar at June 30, 2016 compared to December 31, 2015. The unrealized CCS derivative gain for the six months ended June 30, 2015 was primarily the result of the weaker forward Canadian dollar at June 30, 2015 compared to December 31, 2014.

Revenues

| (\$ millions) ⁽¹⁾ | Three months ended June 30 | | | Six months ended June 30 | | |

| Crude oil sales | 607.6 | 738.5 | (18) | 1,082.8 | 1,317.5 | (18) |
| NGLs sales | 21.8 | 14.8 | 47 | 34.7 | 25.9 | 34 |
| Natural gas sales | 16.5 | 22.9 | (28) | 36.0 | 46.4 | (22) |
| Total oil and gas sales | 645.9 | 776.2 | (17) | 1,153.5 | 1,389.8 | (17) |

(1) Revenue is reported before realized derivatives.

Crude oil sales decreased 18 percent in the three months ended June 30, 2016, from \$738.5 million in 2015 to \$607.6 million in 2016, primarily due to the 20 percent decrease in realized prices, partially offset by the 3 percent increase in crude oil production. The decrease in realized prices is largely a result of the 18 percent decrease in the Cdn\$ WTI benchmark price as compared to the second quarter of 2015 and a wider corporate oil differential. The increased production in the second quarter of 2016 is primarily due to acquisitions completed in the second and third quarters of 2015 and the Company's successful capital development program.

Crude oil sales decreased 18 percent in the six months ended June 30, 2016, from \$1.3 billion in 2015 to \$1.1 billion in 2016, primarily due to the 23 percent decrease in realized prices, partially offset by the 6 percent increase in crude oil production. The decrease in realized prices is largely a result of the 20 percent decrease in the Cdn\$ WTI benchmark price as compared to the first half of 2015 and a wider corporate oil differential. The increased production in the six months ended June 30, 2016 is primarily due to acquisitions completed in the second and third quarters of 2015 and the Company's successful capital development program.

NGL sales increased 47 percent and 34 percent in the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015. The increases are primarily due to the 98 percent and 106 percent increase in NGL production, partially offset by the 25 percent and 35 percent decrease in realized NGL prices for the three and six months ended June 30, 2016, respectively. The increased production is primarily due to acquisitions completed in the second quarter of 2015 and throughput commencing into a third party processing plant in southeast Saskatchewan in the first quarter of 2016. Realized prices in the three and six months ended June 30, 2016 were negatively impacted by the significant weakening of prices for propane, butane and condensate resulting from the decrease in crude oil prices and the continued oversupply of liquids in North America.

Natural gas sales decreased 28 percent and 22 percent in the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015, primarily due to the 43 percent and 39 percent decrease in realized natural gas prices, respectively, partially offset by the 27 percent increase in natural gas production for the three and six months ended June 30, 2016. The decreases in the realized natural gas prices are largely due to the decreases in the AECO daily benchmark prices. The increased natural gas production in 2016 is primarily due to acquisitions completed in the second quarter of 2015.

Royalties

| (\$ millions, except % and per boe amounts) | Three months ended June 30 | | | Six months ended June 30 | | |
|---|----------------------------|-------|----------|--------------------------|-------|----------|
| | 2016 | 2015 | % Change | 2016 | 2015 | % Change |
| Royalties | 88.2 | 118.8 | (26) | 160.3 | 217.1 | (26) |
| As a % of oil and gas sales | 14 | 15 | (1) | 14 | 16 | (2) |
| Per boe | 5.79 | 8.60 | (33) | 5.10 | 7.85 | (35) |

Royalties decreased 26 percent in the three and six months ended June 30, 2016 compared to the same periods in 2015, largely due to the 17 percent decrease in oil and gas sales and the decreases in royalties as a percentage of sales. Royalties as a percentage of sales for the three and six months ended June 30, 2016 decreased primarily due to the impact of the decrease in benchmark prices on crown royalty formulas in Canada and the overall increase in the Company's production in Canada.

In 2016, the provincial government of Alberta announced the Modernized Royalty Framework ("MRF") that will be effective on January 1, 2017. The MRF will result in the modernization and simplification of the royalty structure with changes to the royalty framework for wells drilled after the effective date; no changes will be made to the royalty structure of wells drilled prior to January 2017 for a ten year period. In addition, wells drilled prior to January 1, 2017 can early opt in to the MRF as long as the well represents additional capital and it can be demonstrated that the well would not have been drilled otherwise in 2016. Crescent Point continues to assess the impact of the changes to the royalty structure and the Company expects the MRF will not have a significant impact on its operations.

Operating Expenses

| (\$ millions, except per boe amounts) | Three months ended June 30 | | | Six months ended June 30 | | |
|---------------------------------------|----------------------------|-------|----------|--------------------------|-------|----------|
| | 2016 | 2015 | % Change | 2016 | 2015 | % Change |
| Operating expenses | 165.3 | 162.3 | 2 | 331.0 | 326.5 | 1 |
| Per boe | 10.88 | 11.76 | (7) | 10.53 | 11.82 | (11) |

Operating expenses per boe decreased 7 percent and 11 percent in the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015, primarily due to the positive impact of the Company's cost reduction initiatives including improvements in chemical, labour and service costs and reduced maintenance activity levels, partially offset by higher associated operating costs from acquisitions completed in the second quarter of 2015. Operating expenses per boe in the six months ended June 30, 2016 were also impacted by favorable prior period adjustments related to service and utility costs.

Operating expenses remained consistent in the three and six months ended June 30, 2016 compared to the same periods in 2015. The growth in the Company's production from acquisitions completed in the second and third quarters of 2015 and the successful execution of the capital development program were offset by the decrease in per boe operating expenses as noted above.

Transportation Expenses

| (\$ millions, except per boe amounts) | Three months ended June 30 | | | Six months ended June 30 | | |
|---------------------------------------|----------------------------|------|----------|--------------------------|------|----------|
| | 2016 | 2015 | % Change | 2016 | 2015 | % Change |
| Transportation expenses | 33.3 | 32.1 | 4 | 69.3 | 64.7 | 7 |
| Per boe | 2.18 | 2.33 | (6) | 2.20 | 2.34 | (6) |

Transportation expenses per boe decreased 6 percent in the three and six months ended June 30, 2016 compared to the same periods in 2015. The decreases were primarily due to lower trucking costs as a result of decreases in trucking rates, the Company's investment in pipeline gathering systems, reduced oil deliveries through the Company's rail terminals and decreased tariff rates.

Transportation expenses increased 4 percent and 7 percent in the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015. The increases were primarily due to the growth in the Company's production from acquisitions completed in the second and third quarters of 2015 and the successful execution of the capital development program, partially offset by the decrease in per boe transportation expenses as noted above.

| Netback | 31.22 | 41.74 | (25) | 29.30 | 38.36 | (24) |

(1) The dominant production category for the Company's properties is crude oil. These properties include associated natural gas and NGL volumes, therefore, the total netback has been presented.

The Company's netback for the three months ended June 30, 2016 decreased 25 percent to \$31.22 per boe from \$41.74 per boe in 2015. The decrease in the Company's netback is primarily the result of the decrease in average selling price largely due to the decrease in the Cdn\$ WTI benchmark price supplemented by a wider corporate oil differential and the decrease in realized gain on derivatives, partially offset by the decreases in royalties, operating and transportation expenses.

The Company's netback for the six months ended June 30, 2016 decreased 24 percent to \$29.30 per boe from \$38.36 per boe in 2015. The decrease in the Company's netback is primarily the result of the decrease in average selling price largely due to the decrease in the Cdn\$ WTI benchmark price supplemented by a wider corporate oil differential, partially offset by the decreases in royalties, operating and transportation expenses and the increase in realized gain on derivatives.

General and Administrative Expenses

| Per boe | 1.70 | 1.60 | 6 | 1.63 | 1.57 | 4 |

General and administrative expenses increased 17 percent and 18 percent in the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015, primarily due to the decrease in overhead recoveries from partners associated with lower capital spending and the increase in employee related costs, partially offset by decreases in insurance and information technology costs.

General and administrative expenses per boe increased 6 percent and 4 percent in the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015. The increases are primarily due to the increase in general and administrative expenses noted above, partially offset by the increase in production volumes.

Transaction costs incurred in the three and six months ended June 30, 2016 relate primarily to minor property acquisitions. Refer to the Capital Acquisitions section in this MD&A for further information.

Interest Expense

| (\$ millions, except per boe amounts) | Three months ended June 30 | | | Six months ended June 30 | | |
|---------------------------------------|----------------------------|------|----------|--------------------------|------|----------|

| Per boe | 2.57 | 2.41 | 7 | 2.56 | 2.42 | 6 |

In the three months ended June 30, 2016, interest expense per boe and interest expense increased 7 percent and 17 percent, respectively, compared to the same period in 2015, reflecting the Company's higher average debt balance, partially offset by a lower effective interest rate. The Company's effective interest rate in the three months ended June 30, 2016 decreased to 3.90 percent from 4.13 percent due to the Company's management of its credit facilities through a combination of bankers' acceptance loans and US dollar denominated LIBOR loans and lower underlying market interest rates.

In the six months ended June 30, 2016, interest expense per boe and interest expense increased 6 percent and 20 percent, respectively, compared to the same period in 2015. The increases are primarily due to the Company's higher average debt balance, partially offset by a lower effective interest rate. The Company's effective interest rate in the six months ended June 30, 2016 decreased to 4.04 percent from 4.34 percent due to the Company's management of its credit facilities through a combination of bankers' acceptance loans and US dollar denominated LIBOR loans and lower underlying market interest rates.

Crescent Point actively manages interest rate exposure through a combination of interest rate swaps and a debt portfolio including short-term floating rate bank debt and long-term fixed rate senior guaranteed notes. At June 30, 2016, 59 percent of the Company's long-term debt had fixed interest rates.

The Company has US dollar denominated debt including LIBOR loans under its bank credit facilities and US dollar senior guaranteed notes. Concurrent with the drawdown of US\$1.60 billion of LIBOR loans and the issuance of US\$1.42 billion senior guaranteed notes, the Company entered into various CCS to hedge its foreign exchange exposure. Under the terms of the CCS, the US dollar amounts of the LIBOR loans and senior guaranteed notes were fixed for purposes of interest and principal repayments at notional amounts of \$2.08 billion and \$1.51 billion, respectively. Concurrent with the issuance of US\$30.0 million senior guaranteed notes, the Company entered a foreign exchange swap which fixed the principal repayment at a notional amount of \$32.2 million. The unrealized derivative gains and losses on the CCS and foreign exchange swap are recognized in derivative losses. Refer to the Derivatives section in this MD&A for further information.

During the three and six months ended June 30, 2016, the Company realized a gain of \$1.9 million and \$3.3 million, respectively, on the settlement of the CCS associated with interest payments made on US dollar long-term debt, compared to \$1.3 million and \$2.4 million in the same periods in 2015. The increased realized gains for the three and six months ended June 30, 2016 are primarily due to the weaker Canadian dollar in the three and six months ended June 30, 2016 compared to the same periods in 2015. In addition, the Company realized fully offsetting gains and losses on the maturity of its hedged US dollar long-term debt and settlement of the associated CCS. The realized foreign exchange gain on the maturity of US dollar LIBOR loans for the three and six months ended June 30, 2016 include a \$3.8 million loss from the maturity of an unhedged US dollar LIBOR loan.

The Company records unrealized foreign exchange gains or losses on the revaluation of the US dollar long-term debt and related accrued interest. During the three and six months ended June 30, 2016, the Company recorded an unrealized foreign exchange loss of \$44.0 million and an unrealized foreign exchange gain of \$197.6 million, respectively, on the translation of US dollar long-term debt and accrued interest compared to an unrealized gain of \$31.0 million and an unrealized loss of \$99.7 million, respectively, in the same periods in 2015. The unrealized foreign exchange loss from the translation of US dollar long-term debt and accrued interest in the second quarter of 2016 is attributable to a slightly weaker Canadian dollar at June 30, 2016 as compared to March 31, 2016. The unrealized foreign exchange gain from the translation of US dollar long-term debt and accrued interest for the six months ended June 30, 2016 is attributable to a stronger Canadian dollar at June 30, 2016 as compared to December 31, 2015.

During the three months ended June 30, 2016, share-based compensation costs remained consistent compared to the same period in 2015. During the six months ended June 30, 2016, the Company recorded share-based compensation costs of \$41.7 million, a decrease of 9 percent compared to the same 2015 period. The decrease is primarily due to the decrease in expenses associated with incentive awards and base compensation restricted shares as a result of the decrease in the Company's share price.

During the three months ended June 30, 2016, capitalized share-based compensation costs remained consistent compared to the same period in 2015. During the six months ended June 30, 2016, the Company capitalized share-based compensation costs of \$8.0 million, a decrease of 23 percent compared to the same 2015 period. The decrease is primarily due to the decrease in expenses associated with incentive awards and base compensation restricted shares as a result of the decrease in the Company's share price.

The Company's depletion, depreciation and amortization ("DD&A") rate decreased 10 percent to \$26.89 per boe for the three months ended June 30, 2016 from \$29.91 per boe in the same period in 2015. In the six months ended June 30, 2016, the DD&A rate decreased 10 percent to \$26.84 per boe from \$29.83 for the same 2015 period. These decreases are primarily due to reserve additions and reduced future development costs as a result of the Company's successful execution of the capital development program and impairment expense of \$1.4 billion recorded during the year ended December 31, 2015. The increase in DD&A in the six months ended June 30, 2016 compared to the same period in 2015 was due to the growth in the Company's production from acquisitions completed in the second and third quarters of 2015 and the successful execution of the capital development program, partially offset by the decrease in the DD&A rate as noted above.

Other Income (Loss)

The Company recorded other income of \$5.6 million and \$7.7 million in the three and six months ended June 30, 2016, respectively, compared to other losses of \$6.2 million and other income of \$17.5 million, respectively, in the same periods in 2015. The deferred tax recoveries in the three and six months ended June 30, 2016 relate primarily to the \$308.9 million and \$390.4 million, respectively, of unrealized derivative losses on oil and gas derivatives. The deferred tax recoveries recorded in the three and six months ended June 30, 2015 relate primarily to the net losses before income tax, partially offset by the impact of the two percent increase in the Alberta corporate income tax rate.

Funds flow from operations decreased to \$404.4 million in the second quarter of 2016 from \$524.2 million in the same period in 2015. The decrease is primarily the result of the decrease in the netback, partially offset by the increase in production volumes. The decrease in the Company's netback is primarily the result of the decrease in average selling price, largely due to the decrease in the Cdn\$ WTI benchmark price and a wider corporate oil differential, and the decrease in realized gain on derivatives, partially offset by the decreases in royalties, operating and transportation expenses. Production volumes increased due to acquisitions completed in the second and third quarters of 2015 and the Company's successful capital development program.

Funds flow from operations decreased to \$782.4 million in the six months ended June 30, 2016 from \$957.8 million in the same period in 2015. The decrease is primarily the result of the decrease in the netback, partially offset by the increase in production volumes. The netback decreased due to the decrease in average selling price largely due to the decrease in the Cdn\$ WTI benchmark price and a wider corporate oil differential, partially offset by the decreases in royalties, operating and transportation expenses and the increase in realized gain on derivatives. Production volumes increased due to acquisitions completed in the second and third quarters of 2015 and the Company's successful capital development program.

Cash flow from operating activities decreased 13 percent to \$427.5 million in the second quarter of 2016 compared to \$491.5 million in the same period in 2015, for the same reasons as discussed above and fluctuations in working capital, transaction costs and decommissioning expenditures. Cash flow from operating activities per share - diluted decreased 21 percent to \$0.84 per share - diluted in the second quarter of 2016, primarily due to the reasons discussed above and the impact of shares issued through the June 2015 equity offering. In the six months ended June 30, 2016, cash flow from operating activities decreased 15 percent to \$755.6 million compared to \$890.4 million in the same period in 2015, for the same reasons as discussed above and fluctuations in working capital, transaction costs and decommissioning expenditures. Cash flow from operating activities per share - diluted decreased 24 percent to \$1.49 per share - diluted in the six months ended June 30, 2016, primarily due to the reasons discussed above and the impact of shares issued through the June 2015 equity offering.

The Company reported adjusted net earnings of \$15.1 million in the second quarter of 2016 compared to \$40.4 million in the same period in 2015, primarily as a result of the decrease in funds flow from operations, partially offset by the fluctuations in deferred taxes and foreign exchange on translation of unhedged US dollar long-term debt, and the decrease in transaction costs. Adjusted net earnings from operations per share - diluted decreased 67 percent to \$0.03 per share - diluted in the second quarter of 2016 primarily due to the same reasons discussed above and the impact of shares issued through the June 2015 equity offering.

Adjusted net earnings for the six month period ended June 30, 2016 was \$9.9 million compared to \$68.7 million in the same period in 2015, primarily as a result of the decrease in funds flow from operations and the increase in depletion expense, partially offset by the fluctuations in deferred taxes and foreign exchange on translation of unhedged US dollar long-term debt, and the decrease in transaction costs. Adjusted net earnings from operations per share - diluted decreased 87 percent to \$0.02 per share - diluted in the six months ended June 30, 2016 primarily due to the same reasons discussed above and the impact of shares issued through the June 2015 equity offering.

The Company reported a net loss of \$226.1 million in the second quarter of 2016 compared to a net loss of \$240.5 million in the same period in 2015, primarily as a result of the decreases in unrealized derivative losses and transaction costs, other income and fluctuations in deferred taxes, partially offset by the decrease in funds flow from operations and foreign exchange losses. In the six month period ended June 30, 2016, the Company reported a net loss of \$313.6 million compared to a net loss of \$286.5 million in the same period in 2015, primarily as a result of the increases in unrealized derivative losses and depletion, depreciation and amortization, and the decreases in funds flow from operations and other income, partially offset by the foreign exchange gains and fluctuations in deferred taxes.

As noted in the Derivatives section, the Company has not designated any of its risk management activities as accounting hedges under IFRS 9, *Financial Instruments*, and, accordingly, has recorded its derivatives at fair value with changes in fair value recorded in net income.

Crescent Point uses financial commodity derivatives, including swaps, collars and put options, to reduce the volatility of the selling price of its crude oil and natural gas production. This provides a measure of stability to the Company's cash flow and the ability to fund dividends over time. The Company's commodity derivatives portfolio extends out 3½ years from the current quarter.

IFRS 9, *Financial Instruments*, gives guidelines for accounting for financial derivatives not designated as accounting hedges. Financial derivatives that have not settled during the current quarter are fair valued. The change in fair value from the previous quarter represents a gain or loss that is recorded in net income. As such, if benchmark oil and natural gas prices rise during the quarter, the Company records a loss based on the change in price multiplied by the volume of oil and natural gas hedged. If prices fall during the quarter, the Company records a gain. The prices used to record the actual gain or loss are subject to an adjustment for volatility and the resulting gain (asset) or loss (liability) is discounted to a present value using a risk free rate adjusted for counterparty credit risk.

Crescent Point's underlying physical reserves are not fair valued each quarter, hence no gain or loss associated with price changes is recorded; the Company realizes the benefit/detriment of any price increase/decrease in the period in which the physical sales occur.

The Company's financial results should be viewed with the understanding that the estimated future gain or loss on financial derivatives is recorded in the current period's results, while the estimated future value of the underlying physical sales is not.

Dividends

The following table provides a reconciliation of dividends:

| (\$ millions, except per share amounts) | Three months ended June 30 | | | Six months ended June 30 | | |
|--|----------------------------|---------|----------|--------------------------|---------|----------|
| | 2016 | 2015 | % Change | 2016 | 2015 | % Change |
| Accumulated dividends, beginning of period | 7,068.5 | 6,247.7 | 13 | 6,950.6 | 5,930.2 | 17 |
| Dividends declared to shareholders | 46.0 | 330.4 | (86) | 163.9 | 647.9 | (75) |
| Accumulated dividends, end of period | 7,114.5 | 6,578.1 | 8 | 7,114.5 | 6,578.1 | 8 |
| | | | | | | |
| Accumulated dividends per share, beginning of period | 31.17 | 29.52 | 6 | 30.94 | 28.83 | 7 |

| Accumulated dividends per share, end of period | 31.26 | 30.21 | 3 | 31.26 | 30.21 | 3 |

Dividends decreased 86 percent and 75 percent in the three and six months ended June 30, 2016, respectively, compared to the same periods in 2015. The decreases in dividends relate to the reduction in the dividends declared to shareholders to \$0.09 per share and \$0.32 per share in the three and six months ended June 30, 2016, respectively, from \$0.69 per share and \$1.38 per share in the same periods in 2015. This was partially offset by the increase in the number of shares outstanding primarily due to the bought deal financing which closed in June 2015 and the issuance of shares on the acquisitions of Legacy Oil + Gas Inc. and Coral Hill Energy Ltd.

The Company's net debt to funds flow from operations ratio at June 30, 2016 was 2.3 times, compared to 2.2 times at December 31, 2015. This increase is largely due to the drop in commodity prices which has resulted in lower funds flow from operations and higher leverage. Crescent Point's objective is to manage net debt to funds flow from operations to be well positioned to maximize shareholder return with long-term growth plus dividend income.

The Company has a syndicated unsecured credit facility with sixteen banks and an operating credit facility with one Canadian chartered bank totaling \$3.6 billion. (2) Senior debt is calculated as the sum of amounts drawn on the combined facilities, outstanding letters of credit and the principal amount of the senior guaranteed notes.

(3) Total debt is calculated as the sum of senior debt plus subordinated debt. Crescent Point does not have any subordinated debt.

(4) Capital is calculated as the sum of senior debt and shareholder's equity and excludes the effect of unrealized derivative gains or losses.

Crescent Point's development capital budget for 2016 is \$950.0 million including the contribution from its recent acquisitions and dispositions, with average 2016 production forecast at 165,000 boe/d.

Crescent Point's management believes that with the high quality reserve base and development inventory, solid hedging program and significant liquidity and financial flexibility, the Company is well positioned to execute its business strategy. The Company remains committed to maintaining a strong financial position while continuing to maximize shareholder return through its total return strategy of long-term growth plus dividend income.

Critical Accounting Estimates

Further information on the Company's critical accounting policies and estimates can be found in the notes to the annual consolidated financial statements and MD&A for the year ended December 31, 2015.

Changes in Accounting Policies

In future accounting periods, the Company will adopt the following IFRS:

The standard is required to be adopted either retrospectively or using a modified transaction approach. In September 2015, the IASB amended IFRS 15, deferring the effective date of the standard by one year to annual periods beginning on or after January 1, 2018 with early adoption still permitted. IFRS 15 will be adopted by the Company on January 1, 2018 and the Company is currently evaluating the impact of the standard on the consolidated financial statements.
- IFRS 9 *Financial Instruments* - IFRS 9 was amended in July 2014 to include guidance to assess and recognize impairment losses on financial assets based on an expected loss model. The amendments are effective for fiscal years beginning on or after January 1, 2018 with earlier adoption permitted. This amendment will be adopted by the Company on January 1, 2018 and the Company is currently evaluating the impact of the amendment on the consolidated financial statements.
- IFRS 16 *Leases* - IFRS 16 was issued January 2016 and replaces IAS 17 *Leases*. The standard introduces a single lessee accounting model for leases with required recognition of assets and liabilities for most leases. The standard is effective for fiscal years beginning on or after January 1, 2019 with early adoption permitted if the Company is also applying IFRS 15 *Revenue from Contracts with Customers*. IFRS 16 will be adopted by the Company on January 1, 2019 and the Company is currently evaluating the impact of the standard on the consolidated financial statements.

Capital acquisitions represent total consideration for the transactions including long-term debt and working capital assumed, and excludes transaction costs.

Over the past eight quarters, the Company's oil and gas sales have fluctuated due to changes in production, movement in the Cdn\$ WTI benchmark price and fluctuations in corporate oil price differentials. The Company's production has generally increased due to its successful capital development program and several business combinations.

Net income has fluctuated primarily due to changes in funds flow from operations, unrealized derivative gains and losses, which fluctuate with the changes in forward market prices, and impairments to PP&E recorded in the third and fourth quarters of 2015 and the fourth quarter of 2014, along with associated fluctuations in the deferred tax expense (recovery).

Adjusted net earnings from operations has fluctuated over the past eight quarters primarily due to changes in funds flow from operations, depletion and share-based compensation expense along with associated fluctuations in the deferred tax expense (recovery).

Capital expenditures fluctuated through this period as a result of timing of acquisitions and the Company's capital development program. Funds flow from operations and cash flow from operating activities throughout the last eight quarters has allowed the Company to pay monthly dividends.

The material assumptions and factors in making these forward-looking statements are disclosed in this MD&A under the headings "Derivatives", "Reclamation Fund", "Liquidity and Capital Resources", "Changes in Accounting Policies" and "Outlook".

In particular, forward-looking statements include:

- The expected impact of the MRF on Alberta's royalty structure and framework and Crescent Point's ongoing assessment thereof;
- Crescent Point's approach to proactively manage risks inherent in movements in the price of crude oil, natural gas and power, fluctuations in the US/Cdn dollar exchange rate and interest rates movements;
- Crescent Point's 2016 production and capital expenditure guidance as outlined in the Outlook section;
- The ability of the Company to execute its business strategy;
- The Company's objective to manage net debt to funds flow from operations to be well positioned to maximize shareholder return;
- Anticipated timing of reclamation fund expenditures; and
- Expected adoption of new accounting policies.

All of the material assumptions underlying these statements are noted in the "Liquidity and Capital Resources" section of this report.

This information contains certain forward-looking estimates that involve substantial known and unknown risks and uncertainties, certain of which are beyond Crescent Point's control. Such risks and uncertainties include, but are not limited to: financial risk of marketing reserves at an acceptable price given market conditions; volatility in market prices for oil and natural gas; delays in business operations, pipeline restrictions, blowouts; the risk of carrying out operations with minimal environmental impact; industry conditions including changes in laws and regulations including the adoption of new environmental laws and regulations and changes in how they are interpreted and enforced; uncertainties associated with estimating oil and natural gas reserves; risks and uncertainties related to oil and gas interests and operations on tribal lands; economic risk of finding and producing reserves at a reasonable cost; uncertainties associated with partner plans and approvals; operational matters related to non-operated properties; increased competition for, among other things, capital, acquisitions of reserves and undeveloped lands; competition for and availability of qualified personnel or management; incorrect assessments of the value of acquisitions and exploration and development programs; unexpected geological, technical, drilling, construction, processing and transportation problems; availability of insurance; fluctuations in foreign exchange and interest rates; stock market volatility; general economic, market and business conditions; uncertainties associated with regulatory approvals; uncertainty of government policy changes; uncertainties associated with credit facilities and counterparty credit risk; changes in income tax laws, tax laws, crown royalty rates and incentive programs relating to the oil and gas industry; and other factors, many of which are outside the control of the Company. Therefore, Crescent Point's actual results, performance or achievement could differ materially from those expressed in, or implied by, these forward-looking estimates and if such actual results, performance or achievements transpire or occur, or if any of them do so, there can be no certainty as to what benefits or detriments Crescent Point will derive therefrom.

Barrels of oil equivalent ("boe") may be misleading, particularly if used in isolation. A boe conversion ratio of 6 Mcf : 1 Bbl is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Given that the value ratio based on the current price of crude oil as compared to natural gas is significantly different from the energy equivalency of oil, utilizing a conversion on a 6:1 basis may be misleading as an indication of value.

(1) The Company entered into cross currency swaps and a foreign exchange swap concurrent with the issuance of the US senior guaranteed notes to fix the US dollar amount of the notes for the purpose of principal repayment at Canadian dollar notional amounts. At June 30, 2016, the total principal due on the maturity of the senior guaranteed notes is \$1.74 billion (December 31, 2015 - \$1.79 billion).

Bank Debt

The Company has combined credit facilities of \$3.6 billion, including a \$3.5 billion syndicated unsecured credit facility with sixteen banks and a \$100.0 million unsecured operating credit facility with one Canadian chartered bank. The syndicated unsecured credit facility totals \$3.5 billion until June 8, 2018, after which it reduces to thirteen banks and \$3.08 billion through to a maturity date of June 10, 2019. The syndicated unsecured credit facility also includes an accordion feature that allows the Company to increase the facility by up to \$500.0 million under certain conditions. The current maturity date of the unsecured operating credit facility is June 10, 2019. Both of these facilities constitute revolving credit facilities and are extendible annually.

The credit facilities bear interest at the applicable market rate plus a margin based on a sliding scale ratio of the Company's senior debt to earnings before interest, taxes, depletion, depreciation, amortization and impairment, adjusted for certain non-cash items including unrealized derivatives, unrealized foreign exchange, share-based compensation expense and accretion ("EBITDA").

The credit facilities and senior guaranteed notes have covenants which restrict the Company's ratio of senior debt to EBITDA to a maximum of 3.5:1.0, the ratio of total debt to EBITDA to a maximum of 4.0:1.0 and the ratio of senior debt to capital, adjusted for certain non-cash items as noted above, to a maximum of 0.55:1.0. The Company is in compliance with all debt covenants at June 30, 2016.

The Company had letters of credit in the amount of \$8.5 million outstanding at June 30, 2016.

The Company manages its credit facilities through a combination of bankers' acceptance loans, US dollar LIBOR loans and interest rate swaps.

Senior Guaranteed Notes

The Company has closed private offerings of senior guaranteed notes raising total gross proceeds of US\$1.45 billion and Cdn\$197.0 million. The notes are unsecured and rank *pari passu* with the Company's bank credit facilities and carry a bullet repayment on maturity. The senior guaranteed notes have financial covenants similar to those of the combined credit facilities described above. The terms, rates, amounts due on maturity and carrying amounts of the Company's outstanding senior guaranteed notes are detailed below:

(1) Includes underlying derivatives which manage the Company's foreign exchange exposure on its US dollar senior guaranteed notes. The Company considers this to be the economic amount due at maturity instead of the financial statement carrying amount.

Concurrent with the issuance of US\$1.42 billion senior guaranteed notes, the Company entered into cross currency swaps ("CCS") to manage the Company's foreign exchange risk. The CCS fix the US dollar amount of the notes for purposes of interest and principal repayments at a notional amount of \$1.51 billion. Concurrent with the issuance of US\$30.0 million senior guaranteed notes, the Company entered a foreign exchange swap which fixed the principal repayment at a notional amount of \$32.2 million. See additional information in Note 22 - "Financial Instruments and Derivatives".

The estimated cash flows have been discounted using an average risk free rate of approximately 1.75 percent and an inflation rate of 2 percent (December 31, 2015 - approximately 2.25 percent and 2 percent, respectively).

The following table reconciles the decommissioning liability:

| (\$ millions) | June 30, 2016 | December 31, 2015 |
|---|-----------------|-------------------|
| Long-term debt | 4,233.9 | 4,452.0 |

| Unrealized foreign exchange on translation of hedged US dollar long-term debt | (351.0) | (531.2) |
| Net debt | 4,038.7 | 4,263.6 |
| Shareholders' equity | 9,567.9 | 10,125.0 |
| Total capitalization | 13,606.6 | 14,388.6 |

(1) Working capital deficiency is calculated as accounts payable and accrued liabilities plus dividends payable, less cash, accounts receivable, prepaids and deposits and long-term investments.

Crescent Point's objective for managing capital is to maintain a strong balance sheet and capital base to provide financial flexibility, position the Company to fund future development projects and pay dividends. The Company seeks to maximize stakeholder value through its total return strategy of long-term growth plus dividend income.

Crescent Point manages and monitors its capital structure and short-term financing requirements using a measure not defined in IFRS, the ratio of net debt to funds flow from operations. Net debt is calculated as long-term debt plus accounts payable and accrued liabilities and dividends payable, less cash, accounts receivable, prepaids and deposits and long-term investments, excluding the unrealized foreign exchange on translation of hedged US dollar long-term debt. Funds flow from operations is calculated as cash flow from operating activities before changes in non-cash working capital, transaction costs and decommissioning expenditures. Net debt to funds flow from operations is used to measure the Company's overall debt position and to measure the strength of the Company's balance sheet. Crescent Point's objective is to manage this metric to be well positioned to pay monthly dividends and to continue to exploit and develop its resource plays. Crescent Point monitors this ratio and uses this as a key measure in making decisions regarding financing, capital spending and dividend levels. The Company's net debt to funds flow from operations ratio at June 30, 2016 was 2.3 times (December 31, 2015 - 2.2 times). The funds flow from operations only reflects funds flow from operations generated on acquired properties since the closing date of the acquisitions.

Crescent Point strives to fund its capital expenditures, decommissioning expenditures and dividends over time by managing risks associated with the oil and gas industry. To accomplish this, the Company maintains a conservative balance sheet with significant unutilized lines of credit, manages its exposure to fluctuating interest rates and foreign exchange rates on its long-term debt, and actively hedges commodity prices using a 3½ year risk management program. Unless otherwise approved by the Board of Directors, the Company can hedge benchmark prices on up to 65 percent of after royalty volumes using a portfolio of swaps, collars and put option instruments and can hedge price differentials on up to 35 percent of after royalty volumes using a combination of financial derivatives and fixed differential physical contracts. See Note 22 - "Financial Instruments and Derivatives" for additional information regarding the Company's derivative contracts.

Crescent Point is subject to certain financial covenants on its credit facility and senior guaranteed notes agreements and is in compliance with all financial covenants as at June 30, 2016. See Note 11 - "Long-term Debt" for additional information regarding the Company's financial covenant requirements.

22. FINANCIAL INSTRUMENTS AND DERIVATIVES

The Company's financial assets and liabilities are comprised of cash, accounts receivable, long-term investments, reclamation fund, derivative assets and liabilities, accounts payable and accrued liabilities, dividends payable and long-term debt.

Crescent Point's derivative assets and liabilities are transacted in active markets. Crescent Point's long-term investments are transacted in active and non-active markets. The Company classifies the fair value of these transactions according to the following fair value hierarchy based on the amount of observable inputs used to value the instrument:

- Level 1 - Values are based on unadjusted quoted prices available in active markets for identical assets or liabilities as of the reporting date.
- Level 2 - Values are based on inputs, including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the marketplace. Prices in Level 2 are either directly or indirectly observable as of the reporting date.
- Level 3 - Values are based on prices or valuation techniques that are not based on observable market data.

Accordingly, Crescent Point's derivative assets and liabilities are classified as Level 2. Long-term investments are classified as Level 1, Level 2 or Level 3 depending on the valuation methods and inputs used and whether the applicable company is publicly traded or private. Assessment of the significance of a particular input to the fair value measurement requires judgment and may affect the placement within the fair value hierarchy.

Crescent Point's valuation of the investment in a private company is based primarily on recent trading activity in the relevant company's common shares. The Company's finance department is responsible for performing the valuation of financial instruments, including the calculation of Level 3 fair values.

Discussions of the fair values and risks associated with financial assets and liabilities, as well as summarized information related to derivative positions are detailed below:

a) Carrying Amount and Fair Value of Financial Instruments

The fair value of cash, accounts receivable, reclamation fund, accounts payable and accrued liabilities and dividends payable approximate their carrying amount due to the short-term nature of those instruments. The fair value of the amounts drawn on bank credit facilities is equal to its carrying amount as the facilities bear interest at floating rates and credit spreads that are indicative of market rates. These financial instruments are classified as financial assets and liabilities at amortized cost and are reported at amortized cost.

The following table summarizes the carrying value of the Company's remaining financial assets and liabilities as compared to their respective fair values as of June 30, 2016:

| | June 30, 2016 (\$ millions) | June 30, 2016 Carrying Value | Quoted prices in active markets for identical assets (Level 1) | Significant other observable inputs (Level 2) | Significant unobservable inputs (Level 3) |

(1) Long-term investments are comprised of equity securities in public and private oil and gas companies.

(2) The senior guaranteed notes are classified as financial liabilities at amortized cost and are reported at amortized cost. The notes denominated in US dollars are translated to Canadian dollars at the period end exchange rate. The fair value of the notes is calculated based on current interest rates and is not recorded in the financial statements.

The fair value of the notes is calculated based on current interest rates and is not recorded in the financial statements.

Derivative assets and liabilities

Derivative assets and liabilities arise from the use of derivative contracts. The Company's derivative financial instruments are classified as fair value through profit or loss and are reported at fair value with changes in fair value recorded in net income.

The following table summarizes the fair value as at June 30, 2016 and the change in fair value for the six months ended June 30, 2016:

| | Commodity contracts ⁽¹⁾ (\$ millions) | Interest contracts | CCS contracts | Foreign exchange contracts | Total |

Offsetting Financial Assets and Liabilities

Financial assets and liabilities are only offset if the Company has the legal right to offset and intends to settle on a net basis or settle the asset and liability simultaneously. The Company offsets derivative assets and liabilities when the counterparty, commodity, currency and timing of settlement are the same. The following table summarizes the gross asset and liability positions of the Company's financial derivatives by contract that are offset on the balance sheet as at June 30, 2016 and December 31, 2015:

| (\$ millions) | June 30, 2016 | | | December 31, 2015 | | |
|---------------|---------------|-----------|-------|-------------------|-----------|---------|
| | Asset | Liability | Net | Asset | Liability | Net |

| Net amount | 506.8 | (14.7) | 492.1 | 1,030.6 | (2.1) | 1,028.5 |

b) Risks Associated with Financial Assets and Liabilities

The Company is exposed to financial risks from its financial assets and liabilities. The financial risks include market risk relating to commodity prices, interest rates and foreign exchange rates as well as credit and liquidity risk.

Market Risk

Market risk is the risk that the fair value or future cash flows of a derivative will fluctuate because of changes in market prices. Market risk is comprised of commodity price risk, interest rate risk and foreign exchange risk as discussed below.

Commodity Price Risk

The Company is exposed to commodity price risk on crude oil and natural gas revenues as well as power on electricity consumption. As a means to mitigate the exposure to commodity price volatility, the Company has entered into various derivative agreements and physical contracts. The use of derivative instruments is governed under formal policies and is subject to limits established by the Board of Directors.

Crude oil - To partially mitigate exposure to crude oil commodity price risk, the Company enters into option contracts and swaps to manage the Cdn\$ WTI price fluctuations. The Company also enters physical delivery and derivative WTI price differential contracts which manage the spread between US\$ WTI and various stream prices. The Company manages physical delivery contracts on a month-to-month spot and on a term contract basis. As at June 30, 2016, Crescent Point had committed, on a term contract basis, to deliver an average of approximately 19,500 bbl/d of crude oil from July 2016 to December 2016, 6,000 bbl/d of crude oil for calendar 2017, 5,500 bbl/d of crude oil for calendar 2018 and 2,500 bbls/d of crude oil for calendar 2019.

Natural gas - To partially mitigate exposure to natural gas commodity price risk, the Company enters into AECO natural gas swaps, which manage the AECO natural gas price fluctuations.

Power - To partially mitigate exposure to electricity price changes, the Company enters into swaps or fixed price physical delivery contracts which fix the power price.

The following table summarizes the sensitivity of the fair value of the Company's derivative positions as at June 30, 2016 and June 30, 2015 to fluctuations in commodity prices or differentials, with all other variables held constant. When assessing the potential impact of these commodity price or differential changes, the Company believes a 10 percent near-term volatility is a reasonable measure. Fluctuations in commodity prices or differentials potentially would have resulted in unrealized gains (losses) impacting income before tax as follows:

| (\$ millions) | Impact on Income Before Tax Three and six months ended June 30, 2016 | | Impact on Income Before Tax Three and six months ended June 30, 2015 | |
|------------------------|--|--------------|--|--------------|
| | Increase 10% | Decrease 10% | Increase 10% | Decrease 10% |
| Commodity price | | | | |
| Crude oil | (114.7) | 111.3 | (264.1) | 264.8 |
| Natural gas | (8.6) | 8.6 | (6.7) | 6.7 |
| Power | 0.1 | (0.1) | 0.3 | (0.3) |
| Differential | | | | |
| Crude oil | 0.1 | (0.1) | - | - |

Interest Rate Risk

The Company is exposed to interest rate risk on bank credit facilities to the extent of changes in market interest rates. Based on the Company's floating rate debt position at June 30, 2016, a one percent increase or decrease in the interest rate on floating rate debt would amount to an impact on income before tax of \$4.4 million and \$8.7 million in the three and six months ended June 30, 2016, respectively.

The Company partially mitigates its exposure to interest rate changes by entering into interest rate swap transactions. The following sensitivities show the resulting unrealized gains (losses) and the impact on income before tax of the respective changes in the applicable forward interest rates as at June 30, 2016 and June 30, 2015 with all other variables held constant:

| (\$ millions) | Impact on Income Before Tax Three and six months ended June 30, 2016 | | Impact on Income Before Tax Three and six months ended June 30, 2015 | |
|------------------------------------|--|------------------------------------|--|------------------------------------|
| | Forward interest rates | Interest rate swaps ⁽¹⁾ | Forward interest rates | Interest rate swaps ⁽¹⁾ |
| Forward interest rates | Increase 10% | Decrease 10% | Increase 10% | Decrease 10% |
| Interest rate swaps ⁽¹⁾ | 1.2 | (1.2) | - | - |

(1) The impact on income before tax for the three and six months ended June 30, 2015 was nominal.

Foreign Exchange Risk

Foreign exchange risk arises from changes in foreign exchange rates that may affect the fair value or future cash flows of the Company's financial assets or liabilities. As the Company operates in Canada and the U.S., fluctuations in the exchange rate between the US/Canadian dollars can have a significant effect on reported results. The Company is exposed to foreign exchange risk in relation to its US dollar denominated long-term debt, investment in U.S. subsidiaries and in relation to its crude oil sales. Crescent Point entered into various CCS and foreign exchange swaps to hedge its foreign exchange exposure on its US dollar denominated long-term debt.

The Company can partially mitigate its exposure to foreign exchange rate changes by entering into US dollar swaps. To partially mitigate the foreign exchange risk relating to crude oil sales, the Company has fixed crude oil contracts to settle in Cdn\$ WTI.

The following sensitivities show the resulting unrealized gains (losses) and the impact on income before tax of the respective changes in the period end and applicable forward foreign exchange rates at June 30, 2016 and June 30, 2015 with all other variables held constant:

| (\$ millions) | Exchange Rate | Impact on Income Before Tax Three and six months ended June 30, 2016 | | Impact on Income Before Tax Three and six months ended June 30, 2015 | |
|--------------------------|---------------|--|--------------|--|--------------|
| | | Increase 10% | Decrease 10% | Increase 10% | Decrease 10% |
| Cdn\$ relative to US\$ | Period End | 397.6 | (397.6) | 187.8 | (187.8) |
| US dollar long-term debt | Forward | (427.7) | 427.7 | (207.9) | 207.9 |
| Cross currency swaps | Forward | (5.6) | 5.6 | (3.6) | 3.6 |
| Foreign exchange swaps | | | | | |

Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. A substantial portion of the Company's accounts receivable are with customers in the oil and gas industry and are subject to normal industry credit risks. The Company monitors the creditworthiness and concentration of credit with customers of its physical oil and gas sales. To mitigate credit risk associated with its physical sales portfolio, Crescent Point obtains financial assurances such as parental guarantees, letters of credit and third party credit insurance. Including these assurances, approximately 96% of the Company's oil and gas sales are with entities considered investment grade.

The Company is authorized to transact derivative contracts with counterparties rated A (or equivalent) or better, based on the lowest rating of the three ratings providers. Should one of the Company's financial counterparties be downgraded below the A rating limit, the Chief Financial Officer will advise the Audit Committee and provide recommendations to minimize the Company's credit risk to that counterparty. The maximum credit exposure associated with accounts receivable is the total carrying amount and the maximum exposure associated with the derivative instruments approximates their fair value.

Approximately 4 percent of the Company's accounts receivable balance at June 30, 2016 was outstanding for more than 90 days and the Company considers the entire balance to be collectible.

Liquidity Risk

The timing of undiscounted cash outflows relating to the financial liabilities outstanding at June 30, 2016 is outlined in the table below:

| (\$ millions) | 1 year | 2 to 3 years | 4 to 5 years | More than 5 years | Total |
|--|--------|--------------|--------------|-------------------|---------|
| Accounts payable and accrued liabilities | 446.3 | - | - | - | 446.3 |
| Dividends payable | 15.2 | - | - | - | 15.2 |
| Derivative liabilities ⁽¹⁾ | 2.5 | 2.3 | 0.8 | - | 5.6 |
| Senior guaranteed notes ⁽²⁾ | 149.9 | 275.6 | 476.1 | 1,345.0 | 2,246.6 |
| Bank credit facilities ⁽³⁾ | 82.1 | 2,221.8 | - | - | 2,303.9 |

(1) These amounts exclude undiscounted cash outflows pursuant to the CCS and foreign exchange swap.

(2) These amounts include the notional principal and interest payments pursuant to the related CCS and foreign exchange swap, which fix the amounts due in Canadian dollars.

(3) These amounts include interest based on debt outstanding and interest rates effective as at June 30, 2016. The Company expects that the facilities will continue to be renewed and extended prior to their maturity dates.

Liquidity risk is the risk that the Company will encounter difficulty in meeting obligations associated with financial liabilities. The Company manages its liquidity risk through managing its capital structure and continuously monitoring forecast cash flows and available credit under existing banking arrangements as well as other potential sources of capital.

At June 30, 2016, the Company had available unused borrowing capacity on bank credit facilities of approximately \$1.4 billion, including \$8.5 million letters of credit drawn on the facility. Crescent Point believes it has sufficient liquidity to meet its foreseeable spending requirements.

c) Derivative Contracts

The Company enters into fixed price oil, gas, power, interest rate, cross currency, foreign exchange and crude oil differential contracts to manage its exposure to fluctuations in the price of crude oil, gas, power, foreign exchange and interest on debt.
