NOTE REGARDING FORWARD-LOOKING STATEMENTS

This annual information form, the documents incorporated by reference herein, and other reports and filings made with the securities regulatory authorities include forward-looking statements. All forward-looking statements are based on our beliefs and assumptions based on information available at the time the assumption was made. The use of any of the words “anticipate”, “continue”, “estimate”, “expect”, “may”, “will”, “project”, “should”, “believe” and similar expressions are intended to identify forward-looking statements. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. Crescent Point (as defined herein) believes the expectations reflected in those forward-looking statements are reasonable but no assurance can be given that these expectations will prove to be correct and such forward-looking statements should not be unduly relied upon.

In particular, this annual information form contains forward-looking statements pertaining, among other things, to the following:

- anticipated financial performance;
- business prospects;
- oil and natural gas production levels;
- capital expenditure programs;
- the quantity of the oil and natural gas reserves;
- projections of commodity prices and costs;
- payment of monthly dividends;
- supply and demand for oil and natural gas;
- expectations regarding the ability to raise capital and to continually add to reserves through acquisitions and development; and
- treatment under governmental regulatory regimes.

By its nature, such forward-looking information is subject to various risks, uncertainties and other factors, including those material risks discussed in the AIF (as defined herein) under “*Risk Factors*” and in the MD&A (as defined herein) under “*Forward-Looking Information*”, which could cause our actual results and experience to differ materially from the anticipated results or other expectations expressed. The material assumptions in making these forward-looking statements are disclosed in the MD&A under the headings “*Cash Dividends*”, “*Capital Expenditures*”, “*Asset Retirement Obligation*”, “*Liquidity and Capital Resources*”, “*Forward Looking Information*”, “*Critical Accounting Estimates*” and “*Outlook*”.

This disclosure contains certain forward-looking estimates that involve substantial known and unknown risks and uncertainties, certain of which are beyond Crescent Point’s control, including the impact of general economic conditions; industry conditions including changes to laws and regulations including the adoption of new environmental laws and regulations and changes in how they are interpreted and enforced; increased competition and the lack of availability of qualified personnel or management; fluctuations in commodity prices; foreign exchange or interest rates; stock market volatility and obtaining required approvals of regulatory authorities. In addition, there are numerous risks and uncertainties associated with oil and gas operations and the evaluation of oil and gas reserves. Therefore, Crescent Point’s actual results, performance or achievement could differ materially from those expressed in, or implied by, these forward-looking estimates and if such actual results, performance or achievements transpire or occur, or if any of them do so, there can be no certainty as to what benefits Crescent Point will derive there from.

Readers are cautioned not to place undue reliance on the forward-looking information, which is given as of the date it is expressed in this AIF or otherwise. We do not undertake any obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required pursuant to applicable securities laws.

GLOSSARY

In this annual information form, the capitalized terms set forth below have the following meanings:

“**1275920**” means 1275920 Alberta Ltd., a corporation formed under the laws of the province of Alberta and a wholly-owned subsidiary of the Trust, a predecessor to CPGPC.

“**ABCA**” means the *Business Corporations Act*, R.S.A. 2000, c. B-9, as amended, including the regulations promulgated thereunder.

“**AIF**” means this annual information form of the Corporation dated March 31, 2010 for the year ended December 31, 2009.

“**Arrangement**” means the plan of arrangement involving the Trust, Crescent Point Energy Ltd., Tappit Resources Ltd., StarPoint Energy Ltd. and Crescent Point Acquisition Ltd. made effective September 5, 2003.

“**Common Shares**” means common shares in the capital of the Corporation.

“**Conversion Arrangement**” means the plan of arrangement effected on July 2, 2009 under section 193 of the ABCA pursuant to which the Trust effectively converted from an income trust to a corporate structure.

“**CPC Trust**” means Crescent Point Commercial Trust, a wholly-owned subsidiary of the Trust settled under the laws of the Province of Alberta that was dissolved pursuant to the Conversion Arrangement.

“**CPGPC**” means Crescent Point General Partner Corp., a corporation amalgamated under the ABCA that was dissolved pursuant to the Conversion Arrangement.

“**CPHI**” means Crescent Point Holdings Inc., a corporation incorporated under the ABCA.

“**CPRI**” means Crescent Point Resources Inc., a corporation incorporated under the ABCA that was dissolved pursuant to the Conversion Arrangement.

“**CPRL**” means Crescent Point Resources Ltd., a predecessor corporation to CPGPC.

“**Crescent Point**” or the “**Corporation**” means Crescent Point Energy Corp., formerly Wild River Resources Ltd., a corporation continued under the ABCA.

“**Gibraltar Arrangement**” means the plan of arrangement effected on July 3, 2009 under section 193 of the ABCA pursuant to which the Corporation acquired Gibraltar Exploration Ltd.

“**GLJ**” means GLJ Petroleum Consultants Ltd.

“**Greenhouse Gases**” or “**GHGs**” means any or all of carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulphur hexafluoride (SF₆).

“**Innova**” means Innova Exploration Ltd.

“**Landex**” means Landex Petroleum Corp.

“**Landex Arrangement**” means the plan of arrangement involving the Trust and Landex completed on March 26, 2008, as more particularly described under the heading “*General Development of the Business of the Corporation – History - 2008*”.

“**Limited Partnership**” means Crescent Point Resources Limited Partnership, a limited partnership formed under the laws of the Province of Alberta, having CPGPC as the general partner and the Trust and CPC Trust as limited partners, which was dissolved pursuant to the Conversion Arrangement.

“**MD&A**” means the management’s discussion and analysis of financial condition and results of operations of the Corporation for the year ended December 31, 2009.

“**Mission**” means Mission Oil & Gas Inc., a corporation incorporated under the ABCA.

“**Mission Arrangement**” means the plan of arrangement involving Mission, the Trust, 1275920 and CPGPC completed on February 9, 2007, as more particularly described under the heading “*General Development of the Business of the Corporation – History – 2007*”.

“**NI 51-101**” means “*National Instrument 51-101 – Standards for Disclosure for Oil and Gas Activities*”.

“**Painted Pony**” means Painted Pony Petroleum Ltd.

“**Partnership**” means Crescent Point Resources Partnership, a general partnership formed under the laws of the Province of Alberta, having CPHI and the Corporation as partners.

“**Pilot**” means Pilot Energy Ltd.

“**Pilot Arrangement**” means the plan of arrangement involving Pilot, the Trust and CPGPC completed on January 16, 2008, as more particularly described under the heading “*General Development of the Business of the Corporation – History – 2008*”.

“**Restricted Share Bonus Plan**” means an incentive bonus compensation plan for eligible participants including directors, officers, employees and consultants of the Corporation and its affiliates.

“**Shareholders**” means the holders from time to time of Common Shares.

“**Shelter Bay**” means Shelter Bay Energy Inc., a corporation incorporated pursuant to the ABCA.

“**Shelter Bay Reserve Report**” means the independent engineering evaluation of the crude oil, natural gas liquids and natural gas interests of Shelter Bay prepared by Sproule, dated February 17, 2010 and effective December 31, 2009.

“**Sproule**” means Sproule Associates Limited.

“**TriAxon**” means TriAxon Resources Ltd.

“**TriAxon Arrangement**” means the plan of arrangement under Section 192 of the *Canada Business Corporations Act* involving the Corporation, TriAxon and 7277083 Canada Inc. completed on December 15, 2009, as more particularly described under the heading “*General Development of the Business of the Corporation – History – 2009*”.

“**Trust**” means Crescent Point Energy Trust, an unincorporated open ended investment trust governed by the laws of the Province of Alberta that was dissolved pursuant to the Conversion Arrangement.

“**Trust Units**” means the trust units of the Trust.

“**TSX**” means the Toronto Stock Exchange.

“**Unitholders**” means holders of Trust Units.

“**U.S.**” means the United States of America;

“**Villanova**” means Villanova Energy Corporation.

“**Villanova Arrangement**” means the plan of arrangement under Section 193 of the ABCA involving Villanova Energy Corporation, the Trust and CPGPC completed on January 15, 2009, as more particularly described under the heading “*General Development of the Business of the Corporation – History – 2009*”.

“**Wave**” means Wave Energy Ltd.

“**Wave Arrangement**” means the plan of arrangement under Section 193 of the ABCA involving Wave and the Corporation completed on October 22, 2009, as more particularly described under the heading “*General Development of the Business of the Corporation – History – 2009*”.

In this annual information form, references to “dollars” and “\$” are to the currency of Canada, unless otherwise indicated.

SELECTED ABBREVIATIONS

In this annual information form, the abbreviations set forth below have the following meanings:

Oil and Natural Gas Liquids		Natural Gas	
bbbl	Barrel	Mcf	thousand cubic feet
bbls	Barrels	Mcfe	thousand cubic feet of gas equivalent converting one barrel of oil to 6 Mcf of natural gas equivalent
Mbbls	thousand barrels	MMcf	million cubic feet
MMbbls	million barrels	Mcf/d	thousand cubic feet per day
bbl/d	barrels per day	MMcf/d	million cubic feet per day
NGLs	natural gas liquids	MMBTU	million British Thermal Units
		Bcf	billion cubic feet
		GJ	Gigajoule

Other

API	American Petroleum Institute
API	an indication of the specific gravity of crude oil measured on the API gravity scale. Liquid petroleum with a specified gravity of 28° API or higher is generally referred to as light crude oil
boe	barrel of oil equivalent of natural gas and crude oil on the basis of 1 boe for 6 (unless otherwise stated) Mcf of natural gas (this conversion factor is an industry accepted norm and is not based on either energy content or current prices)
boe/d	barrel of oil equivalent per day
m ³	cubic metres
Mboe	thousand barrels of oil equivalent
MMboe	Million barrels of oil equivalent
WTI	West Texas Intermediate, the reference price paid in U.S. dollars at Cushing, Oklahoma for crude oil of standard grade

CURRENCY OF INFORMATION

The information set out in this renewal AIF is stated as at December 31, 2009 unless otherwise indicated. Capitalized terms used but not defined in the text are defined in the Glossary.

OUR ORGANIZATIONAL STRUCTURE

The Corporation

Crescent Point Energy Corp. (the “**Corporation**” and, together with its direct and indirect subsidiaries and partnerships, where appropriate, “**we**”, “**our**” or “**us**”) is the successor to the Trust, following the completion of the “conversion” of the Trust from an income trust to a corporate structure by way of a court-approved plan of arrangement under the ABCA on July 2, 2009. Pursuant to the Conversion Arrangement, on July 2, 2009, Unitholders of the Trust exchanged their Trust Units for Common Shares of the Corporation on a one-for-one basis. See “*General Development of the Business of the Corporation – 2009*”.

The Corporation was originally incorporated pursuant to the provisions of the *Company Act* (British Columbia) on April 20, 1994 as 471253 British Columbia Ltd. 471253 British Columbia Ltd. changed its name to Westport Research Inc. (“**Westport**”) on August 12, 1994. On August 1, 2006, Westport was continued into Alberta under the ABCA. On October 11, 2006, Westport changed its name to 1259126 Alberta Ltd. (“**1259126**”). On February 8, 2007, 1259126 amended its articles to change its name to Wild River Resources Ltd. (“**Wild River**”), to add a class of non-voting common shares, to change the number of authorized Common Shares from 1,000,000 to unlimited and to change the rights, privileges, restrictions and conditions attaching to such shares, to reorganize its share structure, to change the number of Wild River’s issued and outstanding shares on a *pro rata* basis to an aggregate of 5,000,000 Common Shares, to remove the restrictions on share transfer and to amend the “other provisions” section of the articles. On June 29, 2009, Wild River amended its articles to cancel the non-voting common shares and to change the rights, privileges, restrictions and conditions of the Common Shares to remove the references to the non-voting common shares. On July 2, 2009, in connection with the Conversion Arrangement, Wild River filed Articles of Amendment to give effect to the consolidation of the Common Shares on the basis of 0.1512 of a post-consolidation Common Share for each pre-consolidation Common Share and subsequent Articles of Amendment to change its name to Crescent Point Energy Corp.

The head and principal office of the Corporation is located at Suite 2800, 111 – 5th Avenue S.W., Calgary, Alberta, T2P 3Y6 and its registered office is located at Suite 3300, 421 – 7th Avenue S.W., Calgary, Alberta, T2P 4K9.

The Corporation is a conventional oil and gas producer with assets strategically focused in properties comprised of high quality, long life, operated, light and medium oil and natural gas reserves in Western Canada. In addition, we continually review and assess numerous corporate and asset acquisition opportunities as part of our ongoing acquisition program.

We make monthly cash dividends to Shareholders from our net cash flow. Our primary sources of cash flow are distributions from the Partnership.

Partnership

The Partnership is a general partnership governed by the laws of the Province of Alberta. As set forth in the diagram below under “Organizational Structure of the Corporation”, the partners of the Partnership are CPHI and the Corporation.

The existing business of the Corporation is carried on through the Partnership. The Partnership holds the Corporation’s material operating assets, from which we generate cash flow.

CPHI

CPHI is a wholly-owned subsidiary of the Corporation. CPHI acts as a partner of the Partnership.

Shelter Bay

As of the date of this AIF, the Corporation’s investment in Shelter Bay is approximately \$200 million, representing a 21 percent equity interest. Shelter Bay is a private crude oil and natural gas exploration and production company, operating primarily in Saskatchewan. Shelter Bay is managed through a management and technical services agreement with the Corporation (the “**Shelter Bay Management and Technical Services Agreement**”). The employees of Crescent Point who provide management and technical services to Shelter Bay pursuant to the Management and Technical Services Agreement follow a similar business plan as the Corporation, focusing Shelter Bay’s operations on developing, exploiting and acquiring light and medium oil and natural gas in western Canada.

Pursuant to NI 51-101, the Corporation is required to state the Corporation's share of Shelter Bay's oil and gas reserves and future net revenue separately from its own corresponding reserves data and other oil and gas information. Notwithstanding the equity accounting of the Corporation's investment in Shelter Bay, the Corporation has no right or entitlement to the reserves and future net revenue of Shelter Bay as a shareholder thereof. Set out in Appendix E to this AIF is Shelter Bay's oil and gas reserves and future net revenue as at December 31, 2009 as evaluated in the Shelter Bay Reserve Report. The Shelter Bay Reserve Report was prepared using assumptions and methodology guidelines outlined in the COGE Handbook and in accordance with NI 51-101. The pricing used in the forecast price evaluations is set forth in the notes to the tables. Readers are cautioned that as a result of the issuance by Shelter Bay of additional securities, the Corporation's interest in Shelter Bay's reserves will decrease, unless the Corporation participates in such issuances of securities.

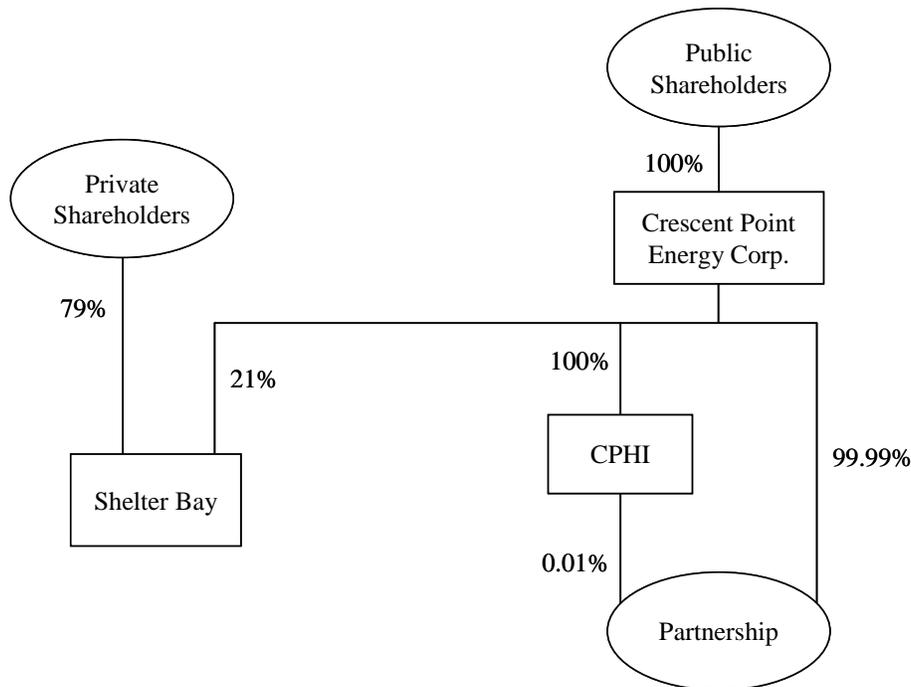

Intercorporate Relationships

The following table provides the name, the percentage of voting securities owned by the Corporation and the jurisdiction of incorporation, continuance or formation of the Corporation's material subsidiaries and the Corporation's investment in Shelter Bay as at the date hereof.

	<u>Percentage of voting securities (directly or indirectly)</u>	<u>Jurisdiction of Incorporation/ Formation</u>
CPHI	100%	Alberta
Crescent Point Resources Partnership	100%	Alberta
Shelter Bay Energy Inc.	21%	Alberta

Organizational Structure of the Corporation

The following diagram describes the intercorporate relationships among the Corporation and its material direct and indirect subsidiaries described above as at March 31, 2010. Reference should be made to the appropriate sections of this AIF for a complete description of the structure of the Corporation.

Note:

(1) Crescent Point Resources Partnership is an Alberta general partnership which holds all of the oil and natural gas assets of the Corporation and CPHI.

GENERAL DEVELOPMENT OF THE BUSINESS OF THE CORPORATION

History

The following is a description of the general development of the business of Crescent Point over the past three years.

2007

On February 9, 2007, the Trust and Mission completed the Mission Arrangement for a total consideration of approximately \$574.1 million paid through a combination of Trust Units, cash and assumed debt. The acquisition added 24.8 million boe of proved plus probable and 15.9 million boe of proved reserves and further consolidates the Trust's core areas of southeast Saskatchewan. See "*Description of Our Business - Reorganizations*".

On March 1, 2007, the Trust completed an internal reorganization involving the Trust and certain of its subsidiaries. As a result of the reorganization and the subsequent dissolution of Mission Oil & Gas Limited Partnership on March 2, 2007, all of the material oil and gas assets of the Trust rested in the Limited Partnership. CPRI became the administrator of the Trust and certain subsidiaries of the Trust were dissolved or amalgamated pursuant to the internal reorganization. See "*Description of our Business – Reorganization*".

On May 28, 2007, the Trust's bank syndicate increased the Trust's borrowing base from \$470 million to \$600 million, recognizing the Trust's reserves growth through acquisition and development.

On June 22, 2007, new legislation was passed (the "**SIFT Rules**") pursuant to which, certain distributions from specified investment flow-through trusts and partnerships ("**SIFTS**"), such as the Trust, will be subject to a trust-level tax, and will be characterized as dividends to the Unitholders, commencing January 1, 2011 (provided that the Trust experiences only "normal growth" and no "undue expansion" before then).

On September 5, 2007, the Trust completed an equity offering of 8.9 million Trust Units at \$18.55 per Trust Unit for gross proceeds of approximately \$165 million. The Trust used the net proceeds of the offering to reduce the Trust's outstanding indebtedness incurred prior to the October 31, 2006 federal government announcement on income trust taxation.

On October 22, 2007, the Trust completed the strategic Bakken consolidation acquisition of Innova for \$7.55 cash per Innova share, plus assumed debt, for a total consideration of approximately \$400 million. With the completion of the acquisition, the Trust acquired approximately 4,300 boe/d of high quality, high netback light oil and natural gas production, more than 97 net sections of undeveloped Bakken land, and 380 net low risk Bakken development drilling locations. See "*Description of our Business – Reorganization*".

In late October 2007, as part of the acquisition of Innova, the Trust's bank syndicate increased the borrowing base from \$600 million to \$800 million, recognizing the strong reserves growth through continued development and acquisition success as well as the stability of the Trust's continued risk management activities.

On December 11, 2007, the Trust suspended its Premium Distribution, Distribution Reinvestment and Optional Unit Purchase Plan (the "**DRIP**").

2008

On January 8, 2008, the Trust completed an equity offering of 5,155,000 Trust Units at \$24.25 per Trust Unit for aggregate gross proceeds of \$125 million.

On January 16, 2008, the Trust completed the Pilot Arrangement, through its wholly-owned subsidiary CPGPC, for total consideration of approximately \$78.5 million paid through the issuance of 0.1284 of a Trust Unit for each issued and outstanding Pilot common share. See "*Description of Our Business - Reorganizations*".

On March 26, 2008, the Trust announced the completion of a \$120 million commitment to Shelter Bay, a private Bakken light oil growth company, in association with Shelter Bay's closing of a \$625 million private placement. The Trust also announced the related closing of the Landex Arrangement, pursuant to which Shelter Bay acquired Landex in exchange for total consideration of approximately \$310 million, including approximately \$75 million in Trust Units. Following the closing of the Landex Arrangement, the Trust acquired Landex's non-Bakken assets from Shelter Bay for \$80 million. Through Crescent Point's equity investment in Shelter Bay, it has the right to 50% of Shelter Bay's returns above a minimum threshold. Crescent Point also has certain contingent rights to acquire the shares of Shelter Bay, or Shelter Bay's assets, before March 31, 2013 and certain other shareholders of Shelter Bay have the right to sell their interests in Shelter Bay to Crescent Point from April 1, 2013 to September 30, 2013. See "*Risk Factors – Potential Future Obligation to Issue Common Shares*".

On April 11, 2008, the Trust announced it acquired ownership of 21.2% of the issued and outstanding Class A shares of Painted Pony. The Class A shares were acquired in connection with the sale by the Trust to Painted Pony of certain natural gas properties in the Cameron River/Blair fairway in northeast British Columbia.

On May 26, 2008, the Trust increased the amount available under the combined credit facilities by \$200 million to \$1 billion.

On August 6, 2008, the Trust announced that it closed the sale of its 21.2% interest in the Class A shares of Painted Pony Petroleum Ltd. to Shelter Bay by way of private sale. The aggregate cash consideration was approximately \$18 million, which reflects the original cost of acquiring the shares plus accrued interest.

On October 1, 2008, the Trust and Shelter Bay announced the closing of a \$300 million private placement financing for Shelter Bay. Shelter Bay raised total proceeds of \$300 million through a private placement to existing Shelter Bay shareholders at a price of \$1.50 per share. The Trust's share of the private placement was \$78.7 million which was financed through the Trust's existing credit facilities. With the closing of the private placement, Crescent Point's aggregate investment in Shelter Bay is approximately \$200 million which equates to a 21 percent interest in Shelter Bay. See "*Interests of Management and Others in Material Transactions*".

On October 16, 2008, the Trust increased the amount available under the combined credit facilities by \$150 million to \$1.15 billion.

On December 15, 2008, the Trust announced that it had acquired a 17 percent ownership of Wild River for \$20 million.

On December 31, 2008, the Trust reinstated its DRIP.

2009

On January 9, 2009, the Trust announced the closing of its equity offering of 5,227,325 Trust Units at \$22.00 per Trust Unit for aggregate gross proceeds of \$115 million.

On January 15, 2009, the Trust closed the Villanova Arrangement for total consideration of approximately \$134.7 million, comprised of 4,625,294 Trust Units and assumed debt. See "*Description of Our Business – Reorganizations*".

On March 24, 2009, the Trust announced the closing of its equity offering of 10,825,000 Trust Units at \$21.25 per Trust Unit for aggregate gross proceeds of approximately \$230 million.

On June 1, 2009, the Trust closed the acquisition of assets in southeast Saskatchewan and Montana from Talisman Energy Canada for aggregate consideration of approximately \$362.9 million.

On June 1, 2009, the Trust increased the amount available under the combined credit facilities by \$50 million to \$1.2 billion.

On June 15, 2009, the Trust suspended its DRIP to facilitate the Trust's conversion to a dividend paying corporation.

On July 2, 2009, the Wild River, the Trust, CPGPC and certain other parties completed the Conversion Arrangement for total consideration of 4,363,316 shares. Pursuant to the Conversion Arrangement, the Corporation acquired all of the issued and outstanding Trust Units. Holders of Trust Units received, for each Trust Unit held, one Common Share of the Corporation. In addition, the Trust was liquidated and dissolved and the Corporation received all of the assets and assumed all of the liabilities of the Trust. In connection with the Conversion Arrangement, the Corporation adopted a new restricted share bonus plan under which all restricted units previously issued under the Trust's existing restricted unit bonus plan were amended and restated such that the holders thereof have, upon vesting, the right to acquire Common Shares instead of Trust Units, on a one-for-one basis and on substantially the same terms, under the restricted share bonus plan. Pursuant to the Conversion Arrangement, the Trust also assigned its DRIP and all associated agreements to the Corporation, and the Corporation subsequently amended and restated them so that, among other things, all participants in the DRIP were deemed to be participants in the amended and restated DRIP without any further action on their part and the holders of Common Shares were able to participate in the amended and restated DRIP with respect to any cash dividends declared and paid by the Corporation on the Common Shares. In connection with the Conversion Arrangement, the Corporation also changed its name to Crescent Point Energy Corp. Additional information relating to the Conversion Arrangement is contained in the Information Circular. See "*Description of Our Business – Reorganizations*" and "*Risk Factors – Possible Failure to Realize Anticipated Benefits of the Conversion*".

On July 3, 2009, the Corporation closed the Gibraltar Arrangement for total consideration of approximately \$200.5 million, comprised of 4,112,272 Common Shares and assumed debt. See "*Description of Our Business – Reorganizations*".

On July 3, 2009, the Corporation completed the sale of 25% of the assets owned by the Corporation prior to the completion of the Conversion Arrangement and Gibraltar Exploration Ltd. to Shelter Bay for cash consideration of \$81.9 million.

On July 15, 2009, the Corporation announced the reinstatement of its amended and restated DRIP for shareholders on record as of July 31, 2009. See "Dividends" for a description of the new Dividend and Dividend Reinvestment Plan.

On July 7, 2009 and September 30, 2009, the Corporation completed the acquisition of approximately 1,000 Boe/d of high quality, long life natural gas production in southwest Saskatchewan and approximately 2,750 Boe/d of high quality, long life crude oil in southeast Saskatchewan for cash consideration of \$258.9 million.

On September 15, 2009, the Corporation completed an equity offering of 6,670,000 Common Shares at \$34.50 per Common Share for aggregate gross proceeds of approximately \$230 million.

On October 2, 2009, the Corporation purchased an aggregate of 32,166,667 shares of Reliable Energy Ltd. (“**Reliable**”), by way of a private placement, for the aggregate purchase price of \$4,825,000, which shares represented 19.9% of the issued and outstanding shares of Reliable.

On October 22, 2009, the Corporation closed the Wave Arrangement for a total consideration of approximately \$706.0 million, comprised of 17,497,643 Common Shares and assumed debt. See “*Description of Our Business – Reorganizations*”.

On October 26, 2009, the Corporation purchased 5,333,333 shares in a private oil and gas company for \$8,000,000, which represented approximately 20% of their issued and outstanding shares.

On November 3, 2009, the Corporation announced the closing of its equity offering of 15,444,500 common shares at \$37.25 per common share for aggregate gross proceeds of \$575.3 million.

On December 11, 2009, the Corporation increased the amount available under the combined credit facilities by \$400 million to \$1.6 billion. In addition, the terms of the credit facility were changed from secured to unsecured.

On December 15, 2009, the Corporation closed the TriAxon Arrangement for total consideration of approximately \$254.9 million, comprised of 6,276,775 million Common Shares and assumed debt. See “*Description of Our Business – Reorganizations*”.

2010

On January 15, 2010, the Corporation closed the acquisition of certain assets in southwest Saskatchewan from Penn West Energy Trust. The consideration was comprised of Crescent Point’s 100 percent working interest in the Pembina Cardium play which was acquired pursuant to the Corporation’s plan of arrangement with TriAxon, a 50 percent working interest in Crescent Point’s Dodsland Viking play and \$434 million cash.

On March 24, 2010, the Corporation closed an offering of senior unsecured notes in the United States and Canada on a private placement basis with an aggregate principal amount of U.S. \$260 million and \$50 million. The U.S. notes range from 5 to 10 years with a weighted average term of 8.5 years and coupon rates ranging from 4.71% to 6.03% and Canadian notes are a term of 5 years with a coupon of 4.92%.

DESCRIPTION OF OUR BUSINESS

General

The Corporation is an oil and gas exploration, development and production company. The Corporation is a conventional oil and gas producer with assets strategically focused in properties comprised of high quality, long life, operated, light and medium oil and natural gas reserves in Western Canada. In addition, we continually review and assess numerous corporate and asset acquisition opportunities as part of our ongoing acquisition program. The primary assets of the Corporation are currently the shares in CPHI and units in the Partnership. In addition, we continually review and assess numerous corporate and asset acquisition opportunities as part of our ongoing acquisition program.

The crude oil and natural gas properties and related assets generating income for the benefit of the Corporation are located in the provinces of Alberta, Saskatchewan, British Columbia and Manitoba and the state of Montana. The properties and assets consist of producing crude oil and natural gas reserves and proven plus probable crude oil and natural gas reserves not yet on production, land and possible reserves.

We pay monthly cash dividends to Shareholders from our net cash flow in accordance with our dividend policy. Our primary sources of cash flow are distributions from the Partnership. See “*Dividends*”.

Strategy

We strive to create sustainable, value-added growth in reserves, production and cash flow through the execution of management’s integrated strategy of acquiring, exploiting and developing high quality, long life, light oil and natural gas properties.

We continually investigate and search out producing properties that will result in meaningful reserve and production additions. We focus capital on higher-quality, longer-life reservoirs in proven growth areas that offer existing infrastructure, low cost drilling, multi-zone potential and year round access. Our goal is to acquire operational control of those properties that we believe offer significant exploitation and development potential.

We develop our properties through a detailed technical analysis of information including reservoir characteristics, original oil or gas in place, recovery factors and the applicability of enhanced recovery techniques. Our goal is to increase reserves and production in a cost effective manner through a number of techniques, including drilling infill and step-out wells, re-completing existing wells and implementing waterflood or pressure support schemes.

Risk Management and Marketing

Factors outside our control impact, to varying degrees, the prices we receive for production and the associated operating expenses we incur. These include but are not limited to:

- (a) world market forces, including the ability of the OPEC to set and maintain production levels and prices for crude oil;
- (b) political conditions, including the risk of hostilities in the Middle East and other regions throughout the world;
- (c) increases or decreases in crude oil quality differentials and their implications for prices received by us;
- (d) the impact of changes in the exchange rate between Canadian and U.S. dollars on prices received by us for our crude oil and natural gas;
- (e) North American market forces, most notably shifts in the balance between supply and demand for crude oil and natural gas and the implications for the price of crude oil and natural gas;
- (f) global and domestic economic and weather conditions;
- (g) price and availability of alternative fuels; and
- (h) the effect of energy conservation measures and government regulations.

Fluctuations in commodity prices, quality differentials and foreign exchange and interest rates, among other factors, are outside of our control and yet can have a significant impact on the level of cash we have available for payment of dividends to Shareholders.

To mitigate a portion of these risks, we actively initiate, manage and disclose the effects of our hedging activities. Our strategy for crude oil and natural gas production is to hedge up to 65% of our existing production, after crown royalties, on a rolling three and a half year basis, at the discretion of management. All hedging activities are governed by our Risk Management Policy and are regularly reviewed by the board of directors of the Corporation.

As part of our risk management strategy in 2009, total oil and gas hedged was approximately 49% of annual production, net of royalties, of which approximately 54% of annual crude oil production and approximately 15% of annual natural gas production was hedged, net of royalties. The hedging strategies we utilized included only financial instruments, with our primary objective being to enhance the stability of cash distributions. The following table summarizes our commitments under all hedging agreements as at March 18, 2010.

Financial WTI Crude Oil Contracts – Canadian Dollar

Term	Volume (bbls/d)	Average Swap Price (\$Cdn/bbl)	Average Collar Sold Call Price (\$Cdn/bbl)	Average Collar Bought Put Price (\$Cdn/bbl)	Average Bought Put Price (\$Cdn/bbl)	Average Put Premium (\$Cdn/bbl)
2010 Weighted Average	22,209	83.35	95.55	78.73	81.60	(7.82)
2011 Weighted Average	15,000	78.35	105.60	83.32	80.80	(11.35)
2012 Weighted Average	8,250	86.94	100.04	79.85	-	-
January 1 to June 30, 2013 Weighted Average	4,500	91.55	97.80	81.33	-	-

Financial AECO Natural Gas Contracts – Canadian Dollar

Term	Volume (GJ/d)	Average Swap Price (\$Cdn/GJ)
2010 Weighted Average	8,846	5.83
2011 Weighted Average	9,000	5.96

2012 Weighted Average	7,995	5.95
January 1 to March 31, 2013 Weighted Average	3,000	5.27

Financial Interest Rate Contracts – Canadian Dollar

<u>Term</u>	<u>Contract</u>	<u>Principal (\$Cdn)</u>	<u>Fixed Annual Rate (%)</u>
January 2010 to November 2010	Swap	75,000,000	4.35
January 2010 to November 2010	Swap	50,000,000	1.97
January 2010 to June 2011	Swap	75,000,000	3.89
January 2010 to May 2014	Swap	25,000,000	3.33
January 2010 to May 2014	Swap	25,000,000	2.69
January 2010 to May 2014	Swap	50,000,000	2.87
January 2011 to January 2014	Swap	50,000,000	3.58
June 2011 to June 2014	Swap	50,000,000	3.67

Beyond the hedging strategy, we also mitigate risk by having a well diversified marketing portfolio for oil and natural gas by transacting with a number of counterparties to limit our exposure to any one counterparty. The majority of our oil and natural gas volumes are sold into the Alberta and Saskatchewan index priced markets with terms of one year or less. Approximately 94% of our oil volumes are sold into the Saskatchewan market and 6% into the Alberta market. Approximately 61% of our natural gas volumes are sold into the Alberta market and 39% into the Saskatchewan market.

For 2009, our commodity mix was approximately 89% oil and NGLs and 11% natural gas.

The Corporation recorded a realized derivative gain on oil and gas hedge contracts of \$125.1 million in 2009.

Credit risk associated with the Corporation's portfolio of physical crude oil and natural gas sales and with the Corporation's commodity hedging portfolio is managed and mitigated by Crescent Point's Risk Management Committee and is governed by a Board approved Credit Policy that is formally reviewed by the Board of Directors on an annual basis. The Policy requires annual credit reviews of all trade counterparties with which the Corporation has, or expects to have, exposures greater than Cdn\$500,000. Credit limits are required to be set for all trade counterparties, and the Corporation is prohibited from exceeding these limits without adequate credit support being provided by the counterparty or without the purchase of the appropriate amount of credit insurance. Credit limits are set for each counterparty based on either a fixed dollar amount which is set annually at a minimum or a percentage of the Corporation's portfolio calculated monthly. Crescent Point utilizes a diversified approach in both its physical sales portfolio and its financial hedging portfolio. The physical sales portfolio consists of approximately 25 purchasers and its financial hedging portfolio consists of eight counterparties. The Corporation's portfolio of counterparty exposures is reviewed monthly by the Chief Financial Officer, the Vice President, Finance and Treasurer, and the Vice President, Marketing and Investor Relations. Counterparty exposures are also reviewed by the Risk Management Committee on a quarterly basis and by the Board of Directors on a quarterly basis.

To further mitigate credit risk associated with its physical sales portfolio, Crescent Point has secured credit insurance from a leading global credit insurance provider. This policy provides credit coverage for approximately 65 percent of the Corporation's physical sales portfolio.

Revenue Sources

For the year ended December 31, 2009, 5% of the revenue from our properties before hedging and royalties was derived from natural gas and 95% from crude oil and natural gas liquids.

For the year ended December 31, 2008, 7% of the revenue from our properties before hedging and royalties was derived from natural gas and 93% from crude oil and natural gas liquids.

For the year ended December 31, 2007, 8% of the revenue from our properties before hedging and royalties was derived from natural gas and 92% from crude oil and natural gas liquids.

Competition

We actively compete for capital reserve acquisitions, exploration leases, licences and concessions and skilled industry personnel with a substantial number of other oil and gas companies, many of which have significantly greater financial resources than we do. Our competitors include major integrated oil and natural gas companies, numerous other independent oil and natural gas companies and trusts and individual producers and operators.

Certain of our customers and potential customers are themselves exploring for oil and natural gas, and the results of such exploration efforts could affect our ability to sell or supply oil or gas to these customers in the future. Our ability to successfully bid on and acquire additional property rights, to discover reserves, to participate in drilling opportunities and to identify and enter into commercial arrangements with customers will be dependent upon developing and maintaining close working relationships with our industry partners and joint operators and our ability to select and evaluate suitable properties and to consummate transactions in a highly competitive environment.

Seasonal Factors

The development of oil and natural gas reserves is dependent on access to areas where production is to be conducted. Seasonal weather variations, including freeze-up and break-up, affect access in certain circumstances.

Personnel

As at December 31, 2009, we had 189 full-time employees and 47.5 consultants at our head office. In the field we had 166 full-time field staff, 3 part-time field staff and 50 consultants.

Reorganizations

On February 9, 2007, we completed the Mission Arrangement whereby we acquired all of Mission's issued and outstanding common shares in exchange for Trust Units and cash. Mission shares were exchanged for 0.695 trust units plus cash in the amount of \$0.78 per Mission common share.

On March 1, 2007, the Trust completed an internal reorganization involving the Trust and certain of its subsidiaries. As a result of this and the reorganization and the subsequent dissolution of Mission Oil & Gas Limited Partnership on March 2, 2007, all of the material oil and gas assets of the Trust rested in the Limited Partnership.

On September 5, 2007, the Trust announced the strategic Bakken consolidation acquisition of Innova for \$7.55 cash per Innova share, plus assumed debt, for a total consideration of approximately \$400 million. The Trust subsequently took effective control of Innova on October 22, 2007 when more than 97 percent of outstanding Innova shares were tendered to the offer. With the completion of the acquisition, the Trust acquired approximately 4,300 boe/d of high quality, high netback light oil and natural gas production, more than 97 net sections of undeveloped Bakken land, and 380 net low risk Bakken development drilling locations.

On January 16, 2008, the Trust completed the Pilot Arrangement, through its wholly-owned subsidiary CPGPC for total consideration of approximately \$78.5 million paid through the issuance of 0.1284 of a Trust Unit for each issued and outstanding Pilot common share.

As a result of internal reorganization steps taken subsequent to the acquisitions of Innova and Pilot, all of the material oil and gas assets of the Trust continued to rest in the Limited Partnership.

On January 15, 2009, the Trust completed the Villanova Arrangement for total consideration of approximately \$134.7 million, comprised of 4,625,294 million Trust Units and assumed debt. The Villanova consolidation acquisition extends the Trust's Bakken play in southeast Saskatchewan, adding 26 net sections of undeveloped Bakken land.

On July 2, 2009, the Wild River, the Trust, CPGPC and certain other parties completed the Conversion Arrangement for total consideration of 4,363,316 shares. Pursuant to the Conversion Arrangement, the Corporation acquired all of the issued and outstanding Trust Units. Holders of Trust Units received, for each Trust Unit held, one Common Share of the Corporation. In addition, the Trust was liquidated and dissolved and the Corporation received all of the assets and assumed all of the liabilities of the Trust. In connection with the Conversion Arrangement, the Corporation adopted a new restricted share bonus plan under which all restricted units previously issued under the Trust's existing restricted unit bonus plan were amended and restated such that the holders thereof have, upon vesting, the right to acquire Common Shares instead of Trust Units, on a one-for-one basis and on substantially the same terms, under the restricted share bonus plan. Pursuant to the Conversion Arrangement, the Trust also assigned its DRIP and all associated agreements to the Corporation, and the Corporation subsequently amended and restated them so that, among other things, all participants in the DRIP were deemed to be participants in the amended and restated DRIP without any further action on their part and the holders of Common Shares were able to participate in the amended and restated DRIP with respect to any cash dividends declared and paid by the Corporation on the Common Shares. In connection with the Conversion Arrangement, the Corporation also changed its name to Crescent Point Energy Corp.

On July 3, 2009, the Corporation closed the Gibraltar Arrangement for total consideration of approximately \$200.5 million, comprised of 4,112,272 Common Shares and assumed debt.

On October 22, 2009, the Corporation closed the Wave Arrangement for a total consideration of approximately \$706.0 million, comprised of 17,497,643 Common Shares and assumed debt.

On December 15, 2009, the Corporation closed the acquisition of TriAxon by way of plan of arrangement for total consideration of approximately \$254.9 million, comprised of 6,276,775 Common Shares and assumed debt.

Social and Environmental Policies

The Corporation established a reclamation fund to fund future asset retirement obligation costs and environmental emissions reduction costs. From January 1, 2007 to December 31, 2007, we allocated \$0.25 per boe of production. From January 1, 2008 to December 31, 2008, we allocated \$0.30 per boe of production as well as lump-sum contributions of \$1,000,000. From January 1, 2009 to December 31, 2009, we allocated \$0.30 per boe of production, as well as lump-sum contributions of \$1,000,000. Additional contributions can be made at the discretion of management.

STATEMENT OF RESERVES DATA AND OTHER OIL AND GAS INFORMATION

The Corporation

Disclosure of Reserves Data

In accordance with NI 51-101, the reserves data of the Corporation set forth below (the “**Reserves Data**”) is based upon evaluations by GLJ and Sproule with an effective date of December 31, 2009 contained in the consolidated report of GLJ dated March 9, 2010 (the “**Crescent Point Reserve Report**”). The Crescent Point Reserve Report evaluated, as at December 31, 2009, our crude oil, NGL and natural gas reserves. The tables below are a combined summary of our crude oil, NGL and natural gas reserves and the net present value of future net revenue attributable to such reserves as evaluated in the Crescent Point Reserve Report based on GLJ’s January 1, 2010 forecast price and cost assumptions. GLJ evaluated approximately 30 percent of the assigned total proved plus probable reserves and 29 percent of the total proved plus probable value discounted at 10 percent. Sproule evaluated approximately 70 percent of the assigned total proved plus probable reserves and 71 percent of the total proved plus probable value discounted at 10 percent. Sproule evaluated our Bakken properties in southeast Saskatchewan and our Lower Shaunavon, Cantuar and Battrum properties in southwest Saskatchewan. They had prepared a similar engineering report for the previous year. Sproule incorporated the GLJ forecast price and cost assumptions in their evaluation. GLJ prepared the Crescent Point Reserve Report by consolidating the GLJ evaluation with the Sproule evaluation, all run on the GLJ pricing and cost assumptions. The tables summarize the data contained in the Crescent Point Reserve Report and, as a result, may contain slightly different numbers than such report due to rounding. Also due to rounding, certain columns may not add exactly.

The net present value of future net revenue attributable to our reserves is stated without provision for interest costs, income taxes and general and administrative costs, but after providing for estimated royalties, production costs, capital taxes, development costs, other income, future capital expenditures, and well abandonment costs for only those wells assigned reserves by GLJ and Sproule. It should not be assumed that the undiscounted or discounted net present value of future net revenue attributable to our reserves estimated by GLJ and Sproule represent the fair market value of those reserves. Other assumptions and qualifications relating to costs, prices for future production and other matters are summarized herein. The recovery and reserve estimates of our crude oil, NGL and natural gas reserves provided herein are estimates only and there is no guarantee that the estimated reserves will be recovered. Actual reserves may be greater than or less than the estimates provided herein.

The Crescent Point Reserve Report is based on certain factual data supplied by us and GLJ and Sproule’s opinion of reasonable practice in the industry. The extent and character of ownership and all factual data pertaining to our petroleum properties and contracts (except for certain information residing in the public domain) were supplied by us to GLJ and Sproule, and were accepted without any further investigation. GLJ and Sproule accepted this data as presented and neither title searches nor field inspections were conducted.

Reserves Data – Forecast Prices and Costs

Summary of Oil and Gas Reserves⁽¹⁾

Future Net Revenue by Production Group ⁽¹⁾⁽²⁾

	Future Net Revenue Before Income Taxes (Discounted at 10%)		Unit Value	
	(M\$)	(\$/boe)	(\$/Mcf)	
Proved				
Light and Medium Oil	4,799,325	30.15	5.02	
Heavy Oil	49,065	23.16	3.86	
Natural Gas	61,565	13.92	2.32	
Total: Total Proved	4,909,955	29.62	4.94	

	Future Net Revenue Before Income Taxes (Discounted at 10%)		Unit Value	
	(M\$)	(\$/boe)	(\$/Mcf)	
Proved Plus Probable				
Light and Medium Oil	6,594,808	27.19	4.53	
Heavy Oil	66,340	22.72	3.79	
Natural Gas	82,894	13.60	2.27	
Total: Total Proved Plus Probable	6,744,042	26.81	4.47	

Notes:

- (1) Light, medium and heavy oil include solution gas and other by-products. Natural gas includes by-products but excludes solution gas.
- (2) Other company revenue and costs not related to specific production group have been allocated proportionately to production groups. Unit Values are based on Company Net Reserves.

For future net revenue of the total proved reserves, discounted at 10 percent, 98% of the revenue is from the light and medium oil, 1% from heavy oil, and 1% from natural gas. For the total proved plus probable reserves, 98% of the revenue is from the light and medium oil, 1% from heavy oil, and 1% from natural gas.

Notes and Definitions

In the tables set forth above in “*Disclosure of Reserves Data*” and elsewhere in this AIF, the following notes and other definitions are applicable.

Reserve Categories

The determination of oil and gas reserves involves the preparation of estimates that have an inherent degree of associated uncertainty. Categories of proved, probable and possible reserves have been established to reflect the level of these uncertainties and to provide an indication of the probability of recovery.

The estimation and classification of reserves requires the application of professional judgment combined with geological and engineering knowledge to assess whether or not specific reserves classification criteria have been satisfied. Knowledge of concepts including uncertainty and risk, probability and statistics, and deterministic and probabilistic estimation methods is required to properly use and apply reserves definitions.

- (a) “**Reserves**” are estimated remaining quantities of oil and natural gas and related substances anticipated to be recoverable from known accumulations, from a given date forward, based on (a) analysis of drilling, geological, geophysical, and engineering data; (b) the use of established technology; and (c) specified economic conditions, which are generally accepted as being reasonable and shall be disclosed. Reserves are classified according to the degree of certainty associated with the estimates.
- (b) “**Proved**” reserves are those reserves that can be estimated with a high degree of certainty to be recoverable. It is likely that the actual remaining quantities recovered will exceed the estimated proved reserves.
- (c) “**Developed Producing**” reserves are those reserves that are expected to be recovered from completion intervals open at the time of the estimate. These reserves may be currently producing or, if shut-in, they must have previously been on production, and the date of resumption of production must be known with reasonable certainty.
- (d) “**Developed Non-Producing**” reserves are those reserves that either have not been on production, or have previously been on production, but are shut-in, and the date of resumption of production is unknown.

- (e) “**Undeveloped**” reserves are those reserves expected to be recovered from known accumulations where a significant expenditure (e.g., when compared to the cost of drilling a well) is required to render them capable of production. They must fully meet the requirements of the reserves classification (proved, probable, possible) to which they are assigned. In multi-well pools, it may be appropriate to allocate total pool reserves between the developed and undeveloped categories or to sub-divide the developed reserves for the pool between developed producing and developed non-producing. This allocation should be based on the estimator’s assessment as to the reserves that will be recovered from specific wells, facilities and completion intervals in the pool and their respective development and production status.
- (f) “**Probable**” reserves are those additional reserves that are less certain to be recovered than proved reserves. It is equally likely that the actual remaining quantities recovered will be greater or less than the sum of the estimated proved plus probable reserves.

Levels of Certainty for Reported Reserves

The qualitative certainty levels referred to in the definitions above are applicable to individual reserve entities (which refers to the lowest level at which reserves calculations are performed) and to reported reserves (which refers to the highest level sum of individual entity estimates for which reserves are presented). Reported reserves should target the following levels of certainty under a specific set of economic conditions:

- At least a 90% probability that the quantities actually recovered will equal or exceed the estimated proved reserves; and
- At least a 50% probability that the quantities actually recovered will equal or exceed the sum of the estimated proved plus probable reserves.

A quantitative measure of the certainty levels pertaining to estimates prepared for the various reserves categories is desirable to provide a clearer understanding of the associated risks and uncertainties. However, the majority of reserves estimates will be prepared using deterministic methods that do not provide a mathematically derived quantitative measure of probability. In principle, there should be no difference between estimates prepared using probabilistic or deterministic methods.

Additional Definitions

The following terms, used in the preparation of the Crescent Point Reserve Report and this AIF, have the following meanings:

- (a) “**associated gas**” means the gas cap overlying a crude oil accumulation in a reservoir.
- (b) “**crude oil**” or “**oil**” means a mixture that consists mainly of pentanes and heavier hydrocarbons, which may contain sulphur and other non-hydrocarbon compounds, that are recoverable at a well from an underground reservoir and that is liquid at the conditions under which its volume is measured or estimated. It does not include solution gas or natural gas liquids.
- (c) “**development costs**” means costs incurred to obtain access to reserves and to provide facilities for extracting, treating, gathering and storing the oil and gas from the reserves. More specifically, development costs, including applicable operating costs of support equipment and facilities and other costs of development activities, are costs incurred to:
 - (i) gain access to and prepare well locations for drilling, including surveying well locations for the purpose of determining specific development drilling sites, clearing ground, draining, road building, and relocating public roads, gas lines and power lines, to the extent necessary in developing the reserves;
 - (ii) drill and equip development wells, development type stratigraphic test wells and service wells, including the costs of platforms and of well equipment such as casing, tubing, pumping equipment and the wellhead assembly;
 - (iii) acquire, construct and install production facilities such as flow lines, separators, treaters, heaters, manifolds, measuring devices and production storage tanks, natural gas cycling and processing plants, and central utility and waste disposal systems; and
 - (iv) provide improved recovery systems.
- (d) “**development well**” means a well drilled inside the established limits of an oil or gas reservoir, or in close proximity to the edge of the reservoir, to the depth of a stratigraphic horizon known to be productive.
- (e) “**exploration costs**” means costs incurred in identifying areas that may warrant examination and in examining specific areas that are considered to have prospects that may contain oil and gas reserves, including costs of drilling exploratory wells and

exploratory type stratigraphic test wells. Exploration costs may be incurred both before acquiring the related property (sometimes referred to in part as “prospecting costs”) and after acquiring the property. Exploration costs, which include applicable operating costs of support equipment and facilities and other costs of exploration activities, are:

- (i) costs of topographical, geochemical, geological and geophysical studies, rights of access to properties to conduct those studies, and salaries and other expenses of geologists, geophysical crews and others conducting those studies (collectively sometimes referred to as “geological and geophysical costs”);
 - (ii) costs of carrying and retaining unproved properties, such as delay rentals, taxes (other than income and capital taxes) on properties, legal costs for title defence, and the maintenance of land and lease records;
 - (iii) dry hole contributions and bottom hole contributions;
 - (iv) costs of drilling and equipping exploratory wells; and
 - (v) costs of drilling exploratory type stratigraphic test wells.
- (f) **“exploratory well”** means a well that is not a development well, a service well or a stratigraphic test well.
- (g) **“F&D costs”** means finding and development costs.
- (h) **“field”** means an area consisting of a single reservoir or multiple reservoirs all grouped on or related to the same individual geological structural feature and/or stratigraphic condition. There may be two or more reservoirs in a field that are separated vertically by intervening impervious strata or laterally by local geologic barriers, or both. Reservoirs that are associated by being in overlapping or adjacent fields may be treated as a single or common operational field. The geological terms “structural feature” and “stratigraphic condition” are intended to denote localized geological features, in contrast to broader terms such as “basin”, “trend”, “province”, “play” or “area of interest”.
- (i) **“future prices and costs”** means future prices and costs that are:
- (i) generally accepted as being a reasonable outlook of the future;
 - (ii) if, and only to the extent that, there are fixed or presently determinable future prices or costs to which the Corporation is legally bound by a contractual or other obligation to supply a physical product, including those for an extension period of a contract that is likely to be extended, those prices or costs rather than the prices and costs referred to in paragraph (i).
- (j) **“future income tax expenses”** means future income tax expenses estimated (generally, year-by-year):
- (i) making appropriate allocations of estimated unclaimed costs and losses carried forward for tax purposes, between oil and gas activities and other business activities;
 - (ii) without deducting estimated future costs that are not deductible in computing taxable income;
 - (iii) taking into account estimated tax credits and allowances (for example, royalty tax credits); and
 - (iv) applying to the future pre-tax net cash flows relating to the Corporation’s oil and gas activities the appropriate year-end statutory tax rates, taking into account future tax rates already legislated.
- (k) **“future net revenue”** means the estimated net amount to be received with respect to the development and production of reserves (including synthetic oil, coal bed methane and other non-conventional reserves) estimated using forecast prices and costs.
- (l) **“gross”** means:
- (i) in relation to the Corporation’s interest in production or reserves, its “company gross reserves”, which are it’s working interest (operated or non-operated) share before deduction of royalties and without including any royalty interests of the Corporation;
 - (ii) in relation to wells, the total number of wells in which the Corporation has an interest; and

- (iii) in relation to properties, the total area of properties in which the Corporation has an interest.
- (m) **“natural gas”** means the lighter hydrocarbons and associated non-hydrocarbon substances occurring naturally in an underground reservoir, which under atmospheric conditions are essentially gases but which may contain natural gas liquids. Natural gas can exist in a reservoir either dissolved in crude oil (solution gas) or in a gaseous phase (associated gas or non-associated gas). Non-hydrocarbon substances may include hydrogen sulphide, carbon dioxide and nitrogen.
- (n) **“natural gas liquids”** means those hydrocarbon components that can be recovered from natural gas as liquids including, but not limited to, ethane, propane, butanes, pentanes plus, condensate and small quantities of non-hydrocarbons.
- (o) **“net”** means:
 - (i) in relation to the Corporation’s interest in production or reserves its working interest (operated or non-operated) share after deduction of royalty obligations, plus its royalty interests in production or reserves;
 - (ii) in relation to the Corporation’s interest in wells, the number of wells obtained by aggregating the Corporation’s working interest in each of its gross wells; and
 - (iii) in relation to the Corporation’s interest in a property, the total area in which the Corporation has an interest multiplied by the working interest owned by the Corporation.
- (p) **“non-associated gas”** means an accumulation of natural gas in a reservoir where there is no crude oil.
- (q) **“operating costs”** or **“production costs”** means costs incurred to operate and maintain wells and related equipment and facilities, including applicable operating costs of support equipment and facilities and other costs of operating and maintaining those wells and related equipment and facilities.
- (r) **“production”** means recovering, gathering, treating, field or plant processing (for example, processing gas to extract natural gas liquids) and field storage of oil and gas.
- (s) **“property”** includes:
 - (i) fee ownership or a lease, concession, agreement, permit, license or other interest representing the right to extract oil or gas subject to such terms as may be imposed by the conveyance of that interest;
 - (ii) royalty interests, production payments payable in oil or gas, and other non-operated interests in properties operated by others; and
 - (iii) an agreement with a foreign government or authority under which the Corporation participates in the operation of properties or otherwise serves as “producer” of the underlying reserves (in contrast to being an independent purchaser, broker, dealer or importer).

A property does not include supply agreements, or contracts that represent a right to purchase, rather than extract, oil or gas.
- (t) **“property acquisition costs”** means costs incurred to acquire a property (directly by purchase or lease, or indirectly by acquiring another corporate entity with an interest in the property), including:
 - (i) costs of lease bonuses and options to purchase or lease a property;
 - (ii) the portion of the costs applicable to hydrocarbons when land including rights to hydrocarbons is purchased in fee; and
 - (iii) brokers’ fees, recording and registration fees, legal costs and other costs incurred in acquiring properties.
- (u) **“proved property”** means a property or part of a property to which reserves have been specifically attributed.
- (v) **“reservoir”** means a porous and permeable underground formation containing a natural accumulation of producible oil or gas that is confined by impermeable rock or water barriers and is individual and separate from other reservoirs.

- (w) “**service well**” means a well drilled or completed for the purpose of supporting production in an existing field. Wells in this class are drilled for the following specific purposes: gas injection (natural gas, propane, butane or flue gas), water injection, steam injection, air injection, salt-water disposal, water supply for injection, observation, or injection for combustion.
- (x) “**solution gas**” means natural gas dissolved in crude oil.
- (y) “**stratigraphic test well**” means a drilling effort, geologically directed, to obtain information pertaining to a specific geologic condition. Ordinarily, such wells are drilled without the intention of being completed for hydrocarbon production. They include wells for the purpose of core tests and all types of expendable holes related to hydrocarbon exploration. Stratigraphic test wells are classified as (i) “exploratory type” if not drilled into a proved property; or (ii) “development type”, if drilled into a proved property. Development type stratigraphic wells are also referred to as “evaluation wells”.
- (z) “**support equipment and facilities**” means equipment and facilities used in oil and gas activities, including seismic equipment, drilling equipment, construction and grading equipment, vehicles, repair shops, warehouses, supply points, camps, and division, district or field offices.
- (aa) “**unproved property**” means a property or part of a property to which no reserves have been specifically attributed.
- (bb) “**well abandonment costs**” means costs of abandoning a well (net of salvage value) and of disconnecting the well from the surface gathering system. They do not include costs of abandoning the gathering system or reclaiming the wellsite.

Pricing Assumptions – Forecast Prices and Costs

GLJ and Sproule employed the following pricing, exchange rate and inflation rate assumptions as of December 31, 2009 in estimating our reserves data using forecast prices and costs.

Year	Natural Gas		Crude Oil			NGLs		Inflation Rate (%/yr)	Exchange Rate (\$US/\$Cdn)
	Henry Hub NYMEX (\$US/MMBTU)	AECO/NIT Spot (\$Cdn/MMBTU)	WTI at Cushing Oklahoma (\$US/bbl)	Edmonton (\$Cdn/bbl)	Pentanes Plus Edmonton (\$Cdn/bbl)	Butanes Edmonton (\$Cdn/bbl)	Propane Edmonton (\$Cdn/bbl)		
Forecast									
2010	6.00	5.96	80.00	83.26	84.93	64.11	52.46	2.0	0.950
2011	7.00	6.79	83.00	86.42	88.15	66.54	54.45	2.0	0.950
2012	7.10	6.89	86.00	89.58	91.37	68.98	56.43	2.0	0.950
2013	7.15	6.95	89.00	92.74	94.59	71.41	58.42	2.0	0.950
2014	7.35	7.05	92.00	95.90	97.82	73.84	60.42	2.0	0.950
2015	7.50	7.16	93.84	97.84	99.79	75.33	61.64	2.0	0.950
2016	7.75	7.42	95.72	99.81	101.81	76.85	62.88	2.0	0.950
2017	8.25	7.95	97.64	101.83	103.86	78.41	64.15	2.0	0.950
2018	8.79	8.52	99.59	103.88	105.96	79.99	65.45	2.0	0.950
2019	8.96	8.69	101.58	105.98	108.10	81.60	66.77	2.0	0.950
2020+	+2.0%/yr	+2.0%/yr	+2.0%/yr	+2.0%/yr	+2.0%/yr	+2.0%/yr	+2.0%/yr		

The weighted average realized sales prices before hedging for the year ended December 31, 2009 were \$4.11/Mcf for natural gas, and \$64.49/bbl for crude oil and NGLs.

Reconciliations of Changes in Reserves and Future Net Revenue

Reserves Reconciliation⁽¹⁾

The following table sets forth a reconciliation of the Corporation’s Total Working Interest reserves by total proved, probable and total proved plus probable reserves as at December 31, 2009 against such reserves as at January 1, 2009 based on forecast price and cost assumptions.

	Total Oil (Mbbbl)			Light and Medium Oil (Mbbbl)			Heavy Oil (Mbbbl)			Natural Gas Liquids (Mbbbl)

Notes:

- (1) The Corporation has no unconventional reserves (Bitumen, Synthetic Crude Oil, Natural Gas from Coal, Natural Gas from Hydrates, Shale Oil, Shale Gas, etc.)
(2) Numbers may not add due to rounding.

Undeveloped Reserves

The following discussion generally describes the basis on which we attribute proved and probable undeveloped reserves. Our plans for developing our undeveloped reserves are described in the section “Major Oil and Gas Properties”.

Proved Undeveloped Reserves

Proved undeveloped reserves are those reserves expected to be recovered from known accumulations where a significant expenditure is required to render them capable of production. In addition, such reserves may relate to planned infill drilling locations. The majority of these reserves are planned to be on stream within a three year timeframe. The following table provides the timing of the initial reserve assignments for the Corporation’s proved undeveloped gross reserves.

Timing of Initial Proved Undeveloped Reserve Assignment

	Light & Medium Oil (Mbbbl)		Heavy Oil (Mbbbl)		Natural Gas (MMcf)		Natural Gas Liquids (Mbbbl)		Oil Equivalent (Mboe)	
	First	Total at	First	Total at	First	Total at	First	Total at	First	Total at
	Attributed ⁽¹⁾	Year-end	Attributed ⁽¹⁾	Year-end	Attributed ⁽¹⁾	Year End	Attributed ⁽¹⁾	Year-end	Attributed ⁽¹⁾	Year-end
Prior	6,935	6,935	84	84	4,006	4,006	197	197	7,883	7,883
2007	29,183	35,268	95	180	15,752	18,990	2,685	2,794	34,588	41,407
2008	16,005	44,748	6	128	9,542	20,014	1,046	3,009	18,647	51,221
2009	15,495	62,431	-	122	9,113	30,012	745	3,551	17,758	71,106

Note:

- (1) First attributed refers to reserves first attributed at year end to corresponding fiscal year.

Probable Undeveloped Reserves

Probable undeveloped reserves are generally those reserves tested or indicated by analogy to be productive, infill drilling locations and lands contiguous to production. The majority of these reserves are planned to be on stream within a five year timeframe. The following table provides the timing of the initial reserve assignments for the Corporation’s probable undeveloped gross reserves.

Timing of Initial Probable Undeveloped Reserves Assignment

	Light & Medium Oil (Mbbbl)		Heavy Oil (Mbbbl)		Natural Gas (MMcf)		Natural Gas Liquids (Mbbbl)		Oil Equivalent (Mboe)	
	First Attributed ⁽¹⁾	Total at Year-end								
Prior	8,304	8,304	75	75	3,896	3,896	195	195	9,223	9,223
2007	16,916	22,601	24	96	7,912	9,936	1,342	1,422	19,601	25,775
2008	10,951	25,981	91	169	4,517	10,920	660	1,458	12,455	29,428
2009	22,743	47,334	-	167	10,976	15,871	1,090	2,014	25,663	52,161

Note:

(1) First attributed refers to reserves first attributed at year end of the corresponding fiscal year.

Significant Factors or Uncertainties Affecting Reserves Data

The process of estimating reserves is complex. It requires significant judgments and decisions based on available geological, geophysical, engineering, and economic data. These estimates may change substantially as additional data from ongoing development activities and production performance becomes available and as economic conditions impacting oil and gas prices and costs change. The reserve estimates contained herein are based on current production forecasts, prices and economic conditions. Our reserves are evaluated by GLJ and Sproule, each an independent engineering firm.

As circumstances change and additional data become available, reserve estimates also change. Estimates made are reviewed and revised, either upward or downward, as warranted by the new information. Revisions are often required due to changes in well performance, prices, economic conditions and governmental restrictions.

Although every reasonable effort is made to ensure that reserve estimates are accurate, reserve estimation is an inferential science. As a result, the subjective decisions, new geological or production information and a changing environment may impact these estimates. Revisions to reserve estimates can arise from changes in year-end oil and gas prices, and reservoir performance. Such revisions can be either positive or negative.

Future Development Costs

The table below sets out the development costs deducted in the estimation of future net revenue attributable to proved reserves and proved plus probable reserves (using forecast prices and costs).

Company Annual Capital Expenditures (M\$)		
Entity Description		
Year	Total Proved	Total Proved Plus Probable
2010	421,012	490,309
2011	409,741	496,428
2012	293,164	478,379
2013	165,770	252,742
2014	11,319	27,351
2015	3,792	6,323
2016	3,888	3,227

2019	4,247	2,306
2020	3,728	2,672
2021	3,596	3,981
Subtotal ⁽¹⁾	40,602	31,008
Remainder	99,869	144,828
Total ⁽¹⁾	140,471	175,837
10% Discounted	35,290	28,368

Note:

(1) Numbers may not add due to rounding.

We estimate that our internally generated cash flow will be sufficient to fund the future development costs disclosed above. We typically have available three sources of funding to finance our capital expenditure program: internally generated cash flow from operations, debt financing when appropriate and new equity issues (including proceeds from our distribution reinvestment plans), if available on favourable terms. Debt financing is available to us at market rate plus an applicable margin based on our debt to cash flow ratio. The current rate available to us under prime loan drawdowns is 3.75% per annum.

We expect to fund our total 2010 capital program with internally generated cash flow and although quarterly fluctuations in funding levels are expected, our objective is to reduce our current net debt level throughout 2010. Our objective is to maintain our net debt to cash flow ratio at 1.0 times estimated future annual cash flows.

Major Oil and Gas Properties

The following is a description of the Corporation's major oil and natural gas properties, plants, facilities and installations in which we have an interest and that are material to our operations and activities. The production numbers stated refer to our working interest share before deduction of Crown and freehold royalties. Unless otherwise noted, reserve amounts are stated before deduction of royalties, based on escalating cost and price assumptions as evaluated in the Crescent Point Reserve Report as at December 31, 2009.

Viewfield Bakken

As in 2008, Crescent Point focused the majority of its 2009 capital development activities on the southeast Saskatchewan Viewfield Bakken light oil resource play. The Corporation continued to consolidate and expand its dominant position in this play through development and exploration drilling, land sales and strategic acquisitions. In 2009, Crescent Point completed 6 strategic consolidation acquisitions in the play and increased its land holdings to 578 net sections. The Corporation drilled 120 (89.8 net) wells, fracture stimulated 131 (113.6 net) wells and significantly expanded its gas gathering and processing infrastructure across the property.

With these activities, Crescent Point continued to grow its Bakken light oil resource base. Proved plus probable reserves grew to 119.4 MMboe, 26 percent over year end 2008. Technical and development reserves additions represented 85 percent of the year-over-year increase. Since acquiring Mission in early 2007, the Corporation has added over 83.6 MMboe of positive proved plus probable technical and development reserves, or 70 percent of total of proved plus probable Bakken reserves at year end 2009.

The Corporation's low-risk Bakken drilling inventory totals more than 2,750 locations at a drilling density of eight wells per section, representing nearly 200,000 boe/d of risked production additions. Only 643 of these locations were booked to reserves as of year end 2009.

In 2009, Crescent Point successfully executed the first cemented liner fracture stimulation completion in the Viewfield Bakken play with encouraging results. Since then, the Corporation has completed 50 cemented liner fracture stimulations in the pool. The capital cost of the cemented liner system is slightly less than that of a comparable isolated packer-based fracture stimulation, and early production results are similar. A significant benefit of a cemented liner completion is that it facilitates the ability to re-enter the well in the future, to either apply

additional fracture stimulations or to provide any type of optimization. Crescent Point expects approximately 70 percent of the Bakken horizontal wells will be completed with cemented liners in 2010.

Also, in 2009, Crescent Point continued to monitor and improve its water flood pilot project in the Viewfield Bakken play. The pilot project has shown encouraging results, with increased oil production seen in offsetting producing wells and a significant decrease in decline rates. Based on these results, the Corporation initiated a second water flood pilot project in late 2009. The Corporation has plans to initiate up to four additional pilot projects across the field in the coming 12 months, each testing different patterns and completion techniques.

For 2010, Crescent Point plans to spend up to 60 percent of its capital development budget in the Bakken play, drilling up to 124 net wells. Up to \$65 million has been earmarked for facilities expenditures, primarily on further expansion of the Viewfield gas plant, construction of additional oil batteries and expansion of the gas gathering system. These facilities investments will accommodate Crescent Point's ongoing drilling program and future production growth in the area.

Lower Shaunavon

A prime objective in Crescent Point's 2009 acquisitions strategy was to consolidate the southwest Saskatchewan Lower Shaunavon crude oil resource play.

Through a series of acquisitions, including one in early 2010, and Crown land sales, Crescent Point increased its land holdings in the Lower Shaunavon to more than 450 net sections. At year end 2009, Crescent Point had a low-risk inventory of more than 1,250 locations at a drilling density of eight wells per section. Crescent Point's production has grown to more than 7,000 boe/d, which represented approximately 83 percent of total production in the play based on public data available at the end of 2009.

After completing the first of Crescent Point's Lower Shaunavon acquisitions early in the third quarter, Crescent Point initiated an active drilling program that resulted in 22 (17.9 net) oil wells with a 100 percent success rate. The Corporation also spent \$8.5 million on infrastructure investments in the area in the second half of the year, which included the construction of an oil battery and 75 kilometres of crude oil gathering infrastructure.

By year end 2009 and including the early 2010 acquisition, Crescent Point had booked Lower Shaunavon proved plus probable reserves of 60.1 MMboe, including 6.8 MMboe due to technical and development reserve additions. These bookings represent a recovery factor of 2.3 percent.

For 2010, the Corporation expects to spend approximately 20 percent of its capital development budget in the Lower Shaunavon. Crescent Point expects to drill upwards of 40 (38 net) Lower Shaunavon wells and spend up to \$23 million on facilities investments, including the expansion of crude oil gathering systems and the upgrading of key crude oil batteries. These facilities investments are expected to accommodate current and future growth in production volumes. Also during 2010, the Corporation expects to review long-term gas conservation requirements for the area.

Viewfield Frobisher

Every Viewfield Bakken well Crescent Point drills first penetrates the shallow zones of the Mississippian formation. With these penetrations, Crescent Point has identified and logged more than 75 oil and gas shows. In 2008, the Corporation correlated these shows to three-dimensional seismic data and identified several potential new Frobisher pool discoveries.

In late 2008 and into 2009, Crescent Point proved up five of these pools with the successful drilling of 15 (12.8 net) wells.

In 2010, Crescent Point expects to drill upwards of 9 (9 net) Frobisher wells in the Viewfield area to continue to develop these pools and to prove up additional new pool prospects.

Plato Viking and Doddsland Viking

With the acquisitions of Wave and TriAxon in late 2009, Crescent Point acquired a significant land position in the emerging Viking light oil resource play in the Plato and Doddsland areas of western Saskatchewan. The Viking play is another tight rock formation in Saskatchewan benefiting from multi-stage fracture stimulation technologies.

Crescent Point currently has more than 95 net sections of land in these two areas. In 2010, the Corporation expects to further delineate this resource play, quantify potential upside and increase production from the area, with plans to drill up to 20 (16 net) wells.

Batrum and Cantuar

During 2009, Crescent Point continued to optimize production and reserves at Batrum and Cantuar through water flood optimization, infill drilling and re-completions. Since acquiring the Batrum property in early 2006, the Corporation has increased proved plus probable reserves by

138 percent to a total of 13.2 MMboe at year end 2009. During the same time frame, the Corporation increased proved plus probable reserves at Cantuar by 74 percent to a total of 17.1 MMboe at year end 2009.

Also during 2009, Crescent Point achieved record production levels at Battrum of over 2,250 boe/d.

For 2010, the Corporation plans to continue with optimization projects at Battrum and Cantuar and to drill up to 18 (8.3 net) oil wells in Battrum.

Oil and Gas Wells

Producing Wells					
Area	Oil		Gas		
	Gross	Net	Gross	Net	
SE Saskatchewan	3,049	1,494	2	-	
SW Saskatchewan	477	304	128	102

Properties With No Attributed Reserves

The following table summarizes the gross and net acres of unproved properties in which we have an interest and also the number of net acres for which our rights to develop or exploit will, absent further action, expire within one year.

As of December 31, 2009

	Gross Acres	Net Acres	Net Acres Expiring Within One Year
British Columbia	4,180	3,004	-
Alberta	188,895	105,859	23,392
Saskatchewan	906,618	624,809	171,535
Manitoba	47,913	18,703	528
United States	534,709	419,853	42,242
Total	1,682,315	1,172,228	237,697

Drilling Activity

The following table summarizes the gross and net exploration and development wells in which we participated during the year ended December 31, 2009.

	Development Wells		Exploration Wells		Total Wells	
	Gross	Net	Gross	Net	Gross	Net
Oil wells	178	133	-	-	178	133
Natural Gas wells	-	-	-	-	-	-
Service wells	4	3	-	-	4	3
Standing Wells	-	-	-	-	-	-
Dry Holes	-	-	-	-	-	-
Total	182	136	-	-	182	136

For details on the most important current and likely exploration and development activities during 2009, see "Statement Of Reserves Data And Other Oil And Gas Information – Oil and Gas Properties".

Additional Information Concerning Abandonment and Reclamation Costs

We estimate well abandonment costs stereotypically area by area. Such costs are assigned to the reserve wells in the Crescent Point Reserve Report and are included as deductions in arriving at future net revenue. The expected total abandonment costs included in the Corporation's

Engineering Report for an estimated 3,323 net wells under the proved reserves category is \$140 million undiscounted (\$35 million discounted at 10%), of which a total of \$8 million is estimated to be incurred in 2010, 2011 and 2012.

Tax Horizon

Crescent Point has tax pools of approximately \$3.1 billion at December 31, 2009 to shelter future taxable income. Based on this pool balance and the forecast of cash flows using \$US 75.00 WTI and a 0.95 \$US/\$Cdn exchange rate, Crescent Point does not expect to be taxable until 2012.

Costs Incurred

The following table summarizes our property acquisition costs, exploration costs and development costs for the year ended December 31, 2009. The total capital costs were approximately \$2.4 billion in 2009.

	Acquisition Costs			
	Proved Properties	Unproved Properties	Exploration Costs	Development Costs
Total (M\$)	1,419,548	679,072	-	319,817

Production Estimates

The following table discloses for each product type the gross volume of production estimated by GLJ and Sproule for 2010 in the estimates of future net revenue with forecast pricing from proved reserves disclosed above under the heading "Disclosure of Reserves Data".

ADDITIONAL INFORMATION RESPECTING CRESCENT POINT

Directors and Officers

Crescent Point has a board of directors currently consisting of seven individuals. The directors are elected by the Corporation, at the direction of Shareholders by ordinary resolution, and hold office until the next annual meeting of the Corporation, which will be held on May 31, 2010.

The name, municipality of residence and principal occupation during the last five years of each of the directors and executive officers of the Corporation are as follows:

Name and Municipality of Residence	Position Held with the Corporation	Date First Elected or Appointed as Director
Scott Saxberg ⁽⁴⁾ Calgary, Alberta	President, Chief Executive Officer and Director	2003
Greg Tisdale Cochrane, Alberta	Chief Financial Officer	Not applicable
C. Neil Smith Calgary, Alberta	Vice President, Engineering and Business Development	Not applicable
Dave Balutis Calgary, Alberta	Vice President, Exploration	Not applicable
Brad Borggard Calgary, Alberta	Vice President, Corporate Planning	Not applicable
Derek Christie Calgary, Alberta	Vice President, Geosciences	Not applicable
Ryan Gritzfeldt Calgary, Alberta	Vice President, Engineering East	Not applicable
Ken Lamont Calgary, Alberta	Vice President, Finance and Treasurer	Not applicable
Tamara MacDonald Calgary, Alberta	Vice President, Land	Not applicable
Trent Stangl Calgary, Alberta	Vice President, Marketing and Investor Relations	Not applicable
Steven Toews Calgary, Alberta	Vice President, Engineering West	Not applicable
Mark Eade Calgary, Alberta	Corporate Secretary	Not applicable
Peter Bannister ^{(1), (3)} Calgary, Alberta	Director and Chairman	2003
Paul Colborne ^{(2), (4)} Calgary, Alberta	Director	2003
D. Hugh Gillard ^{(1), (2), (5)} Calgary, Alberta	Director	2003
Greg Turnbull ^{(2), (5)} Calgary, Alberta	Director	2003
Kenney F. Cugnet ^{(3), (4), (5)} Weyburn, Saskatchewan	Director	2003
Gerald A. Romanzin ^{(1), (3)} Calgary, Alberta	Director	2004

Notes:

- (1) Member of the Audit Committee.
- (2) Member of the Compensation Committee.
- (3) Member of the Reserves Committee.
- (4) Member of the Environment, Health and Safety Committee.
- (5) Member of Corporate Governance and Nominating Committee.

As at March 26, 2010, the directors and executive officers as a group beneficially owned, directly or indirectly, or exercised control or direction over 3,120,054 Common Shares, representing approximately 1.5% of the issued and outstanding Common Shares. Including restricted shares, ownership increases to 2.3% on a fully diluted basis.

Scott Saxberg, President, Chief Executive Officer and Director

Mr. Saxberg is currently the President, Chief Executive Officer and a director of the Corporation. From the date of the Arrangement, Mr. Saxberg served as the President, Chief Operating Officer and Director of CPRL, the former administrator of the Trust. Prior to the completion of the Arrangement, he was the Vice President, Operations of Crescent Point and was one of the founding shareholders of Crescent Point.

Prior to joining Crescent Point, Mr. Saxberg worked in various roles from 1991 to 1996 with Wascana Energy Inc. and Numac Energy Inc., both western crude oil and natural gas exploration and production companies whose shares traded on the TSX. In August 1996, Mr. Saxberg joined Magin Energy Inc. (“**Magin**”) as a senior engineer responsible for a multitude of engineering related duties, including drilling, completions, field staff, production operations, facilities design, reservoir engineering, reserves, budgeting, and acquisitions and divestitures. Mr. Saxberg became Western Area Manager in June 1997, responsible for Magin's production west of the fifth and sixth meridians. In August 1999, Mr. Saxberg was promoted to Manager of Business Development, responsible for the identification and evaluation of corporate and land acquisitions. In June 2001, Magin was acquired by NCE Petrofund, Inc.

Mr. Saxberg holds a Bachelor of Science in Mechanical Engineering from the University of Manitoba. He is a member of the Association of Professional Engineers, Geologists and Geophysicists of Alberta and has over nineteen years of experience in the oil and gas industry. Mr. Saxberg is also the Chief Executive Officer of Shelter Bay Energy Inc. and serves on the Board of Directors of Bellamont Exploration Ltd. and Wild Stream Resources Ltd. and on the Board of Directors of each of the general partners of Catapult Energy 2008 Inc. and Aston Hill Energy 2010 GP Inc. Mr. Saxberg also serves on the CAPP Saskatchewan Executive Policy Group and CAPP Board of Governors.

Greg Tisdale, Chief Financial Officer

Greg Tisdale is currently the Chief Financial Officer of the Corporation. Mr. Tisdale was the Chief Financial Officer of CPRI and CPRL, the former administrators of the Trust and prior to that Mr. Tisdale served as Vice President, Finance of Direct Energy Marketing Ltd. (“**Direct Energy**”), a multinational retail energy provider, since September 2003. In this role, Mr. Tisdale provided financial oversight of the gas and power trading activities in North America and the company's upstream oil and gas production in the Western Canadian Sedimentary Basin, and formed part of the management team responsible for any upstream asset acquisitions.

Prior to joining Direct Energy, Mr. Tisdale held senior management positions with AltaGas Services Inc. (“**AltaGas**”) from 2002 to 2003, Shell Trading Gas & Power Canada Ltd. (“**Shell Trading**”) from 1998 to 2002, and Engage Energy Inc. (“**Engage Energy**”) from 1994 to 1998.

In his position at AltaGas, Mr. Tisdale was responsible for the development of a corporate strategy around executing a power generation business line. This involved integrating the acquisition of a 353 megawatt (“**MW**”) power plant along with an additional 100 MW structured product. In his roles at Shell Trading and Engage Energy, Mr. Tisdale managed financial aspects surrounding all gas and power trading activities for the Canadian operations and was a member of the leadership teams that contributed to North American and global finance initiatives.

Mr. Tisdale holds a Bachelor of Commerce degree from University of Alberta (with distinction), is a Chartered Accountant, is a member of the Institute of Chartered Accountants of Alberta and is a member of the Financial Executive Institute. Mr. Tisdale also serves on the Board of Directors of Shelter Bay Energy Inc. and Enseco Energy Services Corp.

C. Neil Smith, Vice President, Engineering and Business Development

Mr. Smith is the Vice President, Engineering and Business Development of the Corporation. His duties include responsibility for all aspects of the Corporation's capital, operations and business development evaluation activities, as well as participating, with the executive team, in sourcing new value added growth opportunities. He is part of the team that has grown the Corporation from 7,000 boe/d to currently over 56,500 boe/d and has acquired over \$4.0 billion of high quality, long life assets. Prior to joining CPRL in August 2003, Mr. Smith spent six years as the Manager, Business Development at PrimeWest Energy Inc. He was directly responsible for overseeing the evaluation and due diligence in respect of over \$1 billion of corporate and property acquisitions, as well being the lead negotiator on over \$100 million of asset transactions. He was part of the team that developed and executed successful acquisition strategies that grew PrimeWest Energy Trust from 10,000 boe/d to over 34,000 boe/d. Mr. Smith has over twenty-three years of industry business and technical experience, including four years with Coles Gilbert Associates Ltd., the predecessor to GLJ Petroleum Consultants and Amoco Canada Resources Ltd. He is a registered professional engineer in the Province of Alberta and a member of the Canadian Institute of Mining's Petroleum Division.

Mr. Smith holds a Bachelor of Applied Science in Geological Engineering from the University of British Columbia and Masters in Business Administration majoring in Finance (Dean's list) from the University of Calgary. At December 31, 2007, Neil Smith was on the Board of Directors of Spear Exploration Inc., a private oil and gas company which subsequently was sold in February 2008. Mr. Smith is also the

President of Shelter Bay Energy Inc. and is a director of both the Small Explorers and Producers Association of Canada (SEPAC) and the Petroleum Acquisition and Disposition Association (PADA).

Dave Balutis, Vice President, Exploration

Mr. Balutis is currently Vice President, Exploration of the Corporation, prior to which he was the Vice President, Geosciences for the Corporation and CPRI and CPRL, the former administrators of the Trust. Previously, he was one of the founding shareholders and a senior development geologist of Crescent Point from July 2001 to the completion of the Arrangement. From September 1997 to June 2001, Mr. Balutis was employed as senior exploration and development geologist by Magin. From 1991 to 1997, Mr. Balutis was employed by Numac Energy Ltd., and its predecessor, in various levels of increasing responsibility including Team Leader, Project Manager and Manager of Development. His duties included implementation of exploration, development and acquisition strategies throughout southeast Saskatchewan and Alberta. Mr. Balutis commenced his career at Dome Petroleum Ltd. in 1981 as an exploration and development geologist working throughout Alberta.

Mr. Balutis graduated in 1981 from the University of Alberta with a Bachelor of Science in Geology (Hons.). Mr. Balutis is a member of the Association of Professional Engineers, Geologists and Geophysicists of Alberta and has over twenty-eight years of experience in the oil and gas industry.

Brad Borggard, Vice President, Corporate Planning

Mr. Borggard is the Vice President, Corporate Planning of the Corporation. He is involved in all aspects of strategic planning and financial modeling, including a specific focus on longer term capital budgeting and forecasting for the Corporation.

Prior to joining Crescent Point, Mr. Borggard held the position of Managing Director, Institutional Equity Research at CIBC World Markets (“CIBC”). During his time at CIBC, Mr. Borggard was ranked as the top Canadian Royalty Trust analyst four times, and the top Canadian E&P analyst twice, as per Brendan Wood International annual rankings. Prior to joining CIBC, Mr. Borggard worked in equity research at Scotia Capital Inc., and was previously employed at Gulf Canada Resources Ltd. within the Business Development & Strategic Planning group. Mr. Borggard has over eleven years of oil and gas industry related experience.

Mr. Borggard holds a Bachelor of Commerce (with Honours) degree from the University of Calgary, with a major in finance. He also holds a Chartered Financial Analyst (CFA) designation.

Derek Christie, Vice President, Geosciences

Mr. Christie is the Vice President, Geosciences of the Corporation. Previously, Mr. Christie was Manager, Geology at Crescent Point. Mr. Christie joined Crescent Point in February 2007 after Mission was acquired by Crescent Point. At Mission, Mr. Christie was Exploration Manager, responsible for the exploration and development of the Bakken play.

Prior to Mission, Mr. Christie was Exploration Manager at StarPoint Energy Ltd. until its conversion to a trust and concurrent formation of Mission. Previously he held senior geological positions with Vintage Petroleum Canada, Inc., Rio Alto Exploration Ltd., Renata Resources Inc., CS Resources Ltd. and Ballistic Energy Corp.

Mr. Christie graduated in 1991 from the University of Calgary with a Bachelor of Science in Geology. Mr. Christie is a member of the Association of Professional Engineers, Geologists and Geophysicists of Alberta and has over eighteen years of experience in the oil and gas industry. Mr. Christie is also the Vice President of Exploration of Shelter Bay Energy Inc.

Ryan Gritzfeldt, Vice President, Engineering East

Mr. Gritzfeldt is Vice President, Engineering East for the Corporation, responsible for all aspects of engineering for Crescent Point’s assets in southeast Saskatchewan. Previously, Mr. Gritzfeldt was Engineering Manager, South East Saskatchewan for Crescent Point. In this role, Mr. Gritzfeldt was responsible for capital planning, acquisition evaluations, and daily operations in the southeast Saskatchewan area, with a focus on the Bakken light oil resource play.

Prior to his role as Engineering Manager, South East Saskatchewan for Crescent Point, Mr. Gritzfeldt held the position of Engineering Manager for a private oil and gas company. Prior to that, he held various engineering and field related positions of increasing responsibility with Crescent Point and with Talisman Energy, a publicly traded senior oil and gas producer.

Mr. Gritzfeldt holds a Bachelor of Applied Science degree in Industrial Systems Engineering from the University of Regina. Mr. Gritzfeldt is a member of the Association of Professional Engineers, Geologists and Geophysicists of Alberta and has over twelve years experience in the oil and gas industry. Mr. Gritzfeldt is also Vice President, Production for Shelter Bay Energy Inc.

Ken Lamont, Vice President, Finance and Treasurer

Mr. Lamont is the Vice President Finance and Treasurer of the Corporation, prior to which he was Controller and Treasurer for Crescent Point and CPRI and CPRL, the former administrators of the Trust. Prior to joining Crescent Point in May 2005, Mr. Lamont was the Director of Finance, Energy Management Group of Direct Energy, where he was responsible for the financial supervision of gas and power trading activities for Direct Energy's Canadian operations and for upstream oil and gas production in the Western Canadian Sedimentary Basin.

Previously, Mr. Lamont held senior management positions with Shell Trading Gas & Power Canada Ltd., where he was responsible for all aspects of finance pertaining to Canadian operations, and with PricewaterhouseCoopers LLP, as a senior manager in the audit and business advisory practice.

Mr. Lamont graduated with distinction from the University of Alberta with a Bachelor of Commerce degree. He is a Chartered Accountant and member of the Institute of Chartered Accountants of Alberta. Mr. Lamont is also the Chief Financial Officer of Shelter Bay Energy Inc.

Tamara MacDonald, Vice President, Land

Ms. MacDonald is currently the Vice President, Land of the Corporation, prior to which she held the same position with CPRI and CPRL, the former administrators of the Trust. Prior to joining CPRL in September 2004, Ms. MacDonald was Senior Landman at Petrofund Energy Trust ("Petrofund"), a Calgary based energy trust. From December 1997 to August 2004, Ms. MacDonald actively participated in Petrofund's growth from 4,000 boe/d to 37,000 boe/d. While at Petrofund, Ms. MacDonald was also exposed to over 30 separate drilling limited partnerships under the governing entity NCE Resources Group Inc., and was responsible for the negotiation and management of lands within each of such limited partnerships.

From July 1997 to November 1997, Ms. MacDonald was responsible for Alberta negotiations at Merit Energy Ltd., and from January 1997 to June 1997, she was responsible for the southern Alberta negotiations at Tarragon Oil & Gas Ltd. From May 1992 to December 1996, Ms. MacDonald was employed by Northstar Energy Corporation as Landman with various responsibilities, including functions related to acquisitions and divestments.

Ms. MacDonald graduated in 1992 from the University of Calgary with a Bachelor of Commerce, majoring in Petroleum Land Management. Ms. MacDonald is a member of the Petroleum and Acquisition Association (PADA) and has over eighteen years of experience in exploration and land acquisitions in the oil and gas industry. Ms. MacDonald is also the Vice President of Land of Shelter Bay Energy Inc.

Trent Stangl, Vice President, Marketing & Investor Relations

Mr. Stangl is currently Vice President, Marketing & Investor Relations of the Corporation. Previously, he was Manager, Marketing & Investor Relations for Crescent Point. Prior to joining the Trust in 2006, Mr. Stangl was President, three dimes inc., a consulting firm specializing in the areas of oil and gas marketing and price risk management for junior oil and gas producers, marketers and pipelines.

From 1991 to 1997, Mr. Stangl held various positions at Wascana Energy Inc. (previously SaskOil), an exploration and production company whose shares traded on the TSX. From 1995 to 1997, he was a member of the Risk and Development Services team of the Marketing group, responsible for risk management strategy development, fundamental and technical analysis and commodity price forecasting. From 1994 to 1995, he was a Producer Services Representative managing a portfolio of third party producers in the Marketing Group. Previous to that, Mr. Stangl was a Planning and Development Analyst in the Corporate Planning group at Wascana Energy Inc.

Mr. Stangl holds a Bachelor of Arts (Honours) in Economics from the University of Saskatchewan and a Masters of Arts in Economics from the University of Western Ontario. He is a member of the Canadian Investor Relations Institute.

Steven Toews, Vice President, Engineering West

Mr. Toews is Vice President, Engineering West for the Corporation. He is responsible for all aspects of engineering for Crescent Point's assets in southwest Saskatchewan, Alberta and British Columbia. Previously, Mr. Toews was Engineering Manager for Crescent Point, a position he held from 2005.

Prior to joining Crescent Point, Mr. Toews held various engineering and leadership positions at operating companies including EnCana Corp., Talisman Energy Inc., International Colin Energy Corp., and Norcen Energy Resources Ltd. Mr. Toews has over twenty years of diversified experience in the oil and gas industry, including six years working internationally. Mr. Toews holds a Bachelor of Science degree in Mechanical Engineering from the University of Saskatchewan and is a member of the Association of Professional Engineers, Geologists and Geophysicists of Alberta.

Mark Eade, Corporate Secretary

Mr. Eade has been a partner with the law firm McCarthy Tétrault LLP since 2001 practicing in the area of corporate and securities law.

Mr. Eade received his Bachelor of Commerce Degree (Hons.) from the University of Saskatchewan in 1989 and his Bachelor of Laws Degree from the University of Saskatchewan in 1993. He was called to the Alberta bar in 1994. Mr. Eade is a member of the Law Society of Alberta and the Canadian Bar Association.

Peter Bannister, Director and Chairman

Peter Bannister is the President of Destiny Energy Inc., a privately-owned oil and gas company. Mr. Bannister is also currently Chairman of the Board of the Corporation, a Director of Cequence Energy Ltd. and Shelter Bay Energy Inc. Mr. Bannister was a Director of Breaker Energy Ltd. until its sale in December 2009. Until its sale in February 2007, Mr. Bannister was Vice President Exploration and a Director of Mission. Prior to joining Mission, he was Vice President Exploration of StarPoint Energy Inc. before its conversion to a royalty trust and President and a director of Impact Energy Inc. Mr. Bannister previously held the position of Vice President Corporate Development of Startech Energy until it was acquired by ARC Resources at the end of 2000 and also held positions as Vice President Exploration and Development and Director of both Boomerang Resources Ltd. and Laurasia Resources Limited, both publicly traded oil and gas companies. Mr. Bannister's experience prior to his involvement in public oil and gas companies was as a partner of Sproule Associates Limited, a worldwide petroleum consulting firm specializing in the evaluation of oil and gas properties where he spent twelve years specializing in oil and gas property evaluations and managing private equity investments in the oil and gas business in Western Canada. Mr. Bannister graduated in 1981 with a Bachelor of Science in Geology and has twenty-nine years of oil and gas related experience.

Paul Colborne, Director

Paul Colborne is currently the President of StarValley Oil and Gas Ltd., a private, Calgary-based oil and gas company since November 2005. Mr. Colborne is also the Chairman of Legacy Oil & Gas Inc., a 4,000 boe/d publicly traded oil and gas company. He also serves on the Board of Directors of the Corporation, Cequence Energy Ltd. and Wild Stream Exploration Inc. Until its sale in July of 2009, Mr. Colborne served as Chairman of TriStar Oil & Gas Ltd. Mr. Colborne was a director for Westfire Energy Ltd., Twin Butte Energy Ltd. and Chairman of Seaview Energy Inc. Until its sale in December of 2009, Mr. Colborne was a Director for Breaker Energy Inc. From September 2003 to January 2005, Mr. Colborne was the President and Chief Executive Officer of StarPoint Energy Ltd. until its reorganization into StarPoint Energy Trust, a 36,000 boe/d publicly traded energy trust. Prior thereto, Mr. Colborne was the President and Chief Executive Officer of Crescent Point Energy Ltd. until its reorganization into the Trust in September of 2003. From 1993 to 2001, Mr. Colborne was the President and Chief Executive Officer of Startech Energy Ltd. ("**Startech**"), an intermediate oil and gas exploration and production company. Under Mr. Colborne's leadership, Startech grew to 16,000 boe/d from its startup production rate of 120 boe/d. Listed on the TSX 300 sub-index as one of Canada's larger public oil and gas companies, Startech was acquired by ARC Energy Trust in February of 2001. Mr. Colborne's previous career included positions as a corporate finance and oil and gas lawyer with Wascana Energy Inc. and Husky Oil Ltd., and an associate with the legal firm Parlee McLaws. Mr. Colborne has twenty-four years of industry experience, and has specialized in creating shareholder value in the junior oil and gas sector in Western Canada.

D. Hugh Gillard, Director

Mr. Gillard has over thirty five years of business experience in the oil and gas industry and is the Principal of Saddleback Resources Ltd., a private company involved in equity investments and advisory roles in the energy sector. From June 2003 to March 2006, he was President, Chief Executive Officer and a director of Kelso Energy Inc., a publicly traded junior oil and gas company. Kelso Energy Inc. subsequently merged with COSTA Energy Ltd. where he continued to serve as a director until December 2006. From 1999 to 2000 he was President, Chief Operating Officer and a director of PrimeWest Energy Trust. From 1990 to 1998, he was employed by CanWest Gas Marketing Inc., a private producer owned gas marketing company. During this period Mr. Gillard initially served as Vice President, Gas Supply and then later as President and Chief Executive Officer. From 1972 to 1989, he held several senior positions with Ashland Oil Canada, Dome Petroleum and Amoco Canada.

Mr. Gillard currently also serves as a director (Chairman) of Petrowest Energy Services Trust, a publicly traded entity. He also served as a director of Creststreet Power Income Fund from April 2006 to June 2008 and as a director of Point North Energy Ltd. from October 2005 to November 2006.

Mr. Gillard is a graduate of the University of Calgary (Commerce) and the Stanford Business School Executive Program. He is a past member of the Management Advisory Council (University of Calgary).

Gregory G. Turnbull, Director

Mr. Turnbull has been a partner with the law firm of McCarthy Tétrault LLP since July 2002 and currently serves as the Regional Managing Partner of the Calgary office. Mr. Turnbull started his career with the law firm of MacKimmie Matthews in 1979. From 1987 to 2001, he was a partner with Gowlings LLP (formerly Code Hunter LLP). In 2001 and 2002, he was a partner with the law firm of Donahue LLP.

Mr. Turnbull is currently a director of Storm Exploration Inc., Heritage Oil plc, Seaview Energy Inc., Hawk Exploration Ltd., BNP Resources Inc. and Canadian Superior Energy Inc., all publicly traded entities listed on the London Stock Exchange, TSX or TSX Venture Exchange.

Throughout his career, he has served as an officer or director of Action Energy Inc., Ammonite Energy Ltd., Baytex Energy Ltd., Barrington Petroleum Ltd., Castle Rock Petroleum Ltd., Hawk Oil Inc., Hawk Energy Inc., Kensington Energy Ltd., Lexxor Energy Inc., Newquest Energy Inc., Mannville Oil & Gas Ltd., Petrostar Petroleums Inc., Pinnacle Resources Ltd., Quadron Resources Ltd., Quintex Energy Ltd., Rally Energy Ltd., ResoQuest Resources Ltd., Seventh Energy Ltd., Tri Ex Oil & Gas Ltd., Trigas Exploration Ltd., Trimox Energy Inc., Twin Energy Ltd. and Westward Energy Inc.

Mr. Turnbull received his Bachelor of Arts (Honours) Degree from Queen's University in 1976 and his Bachelor of Laws Degree from the University of Toronto in 1979. He was called to the Alberta bar in 1980. Mr. Turnbull is a member of the Law Society of Alberta, the Canadian Bar Association and the Calgary Bar Association.

Kenney F. Cugnet, Director

Since 1963, Mr. Cugnet has been the owner and operator of a grain and cattle farm near Weyburn, Saskatchewan, where he currently lives. He has been the President of Valleyview Petroleum Ltd., a private oil and gas company since 1979. He served as the Manager of Field Operations of Tappit Resources Ltd. ("Tappit") and was a director of Tappit from 1987 to 2003 and Chairman of the Board of Tappit from 2000 to 2003 until the company's merger with Crescent Point in September 2003. He has served on the Crescent Point board since its inception. Mr. Cugnet joined the Starpoint Energy Inc. board as a director until January 2005. He was a director of Mission from January 2005 to February 2007. Mr. Cugnet was a director of Medora Resources Inc. (a private company) from October 2005 to October 2009. Mr. Cugnet served as a member of the Saskatchewan Surface Rights Arbitration Board from June 1987 to April 1992. He was a director of Cypress Petroleum Corp. from November 1991 to May 1995. He is a director of Elkhorn Resources Inc. as of December 2009.

Gerald A. Romanzin

Gerald Romanzin is an independent Calgary businessman who serves as a director of Petrowest Energy Services Ltd. and Trimac Transportation Services Inc. He also serves as a trustee of Trimac Income Fund and a member of the independent advisory committee for Titan Funds Incorporated. Formerly, Mr. Romanzin served as a member of FET Resources Ltd., Ketch Resources Ltd., Ketch Resources Trust, Cadence Energy Inc., Kereco Energy Ltd. and Flowing Energy Corp. Mr. Romanzin was the Executive Vice President of the TSX Venture Exchange from November 1999 to April 2002 where he was responsible for overseeing the Corporate Finance group and regional operations. In addition, he assumed the role of Acting President of the TSX Venture Exchange from December 2001 to April 2002. Mr. Romanzin is a chartered accountant and was a financial analyst with the Alberta Securities Commission for four years prior to joining the Alberta Stock Exchange in 1987. Mr. Romanzin was the Executive Vice President of the Alberta Stock Exchange from June 1995 to its change to the TSX Venture Exchange in November 1999.

Mr. Romanzin obtained a Bachelor of Commerce degree from the University of Calgary and is a member of the Institute of Chartered Accountants of Alberta.

Bankruptcies and Cease Trade Orders

Other than as described below, no director, executive officer or shareholder holding a sufficient number of securities to affect materially the control of the Corporation is, as of the date of this AIF, or has been, within the last 10 years, been a director or executive officer of any company (including the Corporation) that, while such person was acting in that capacity, was the subject of a cease trade or similar order or an order that denied the company access to any statutory exemption for a period of more than 30 consecutive days or was declared a bankrupt or made a voluntary assignment in bankruptcy, made a proposal under any legislation relating to bankruptcy or been subject to or instituted any proceedings, arrangement or compromise with creditors or had a receiver, receiver-manager or trustee appointed to hold the assets of that person.

D. Hugh Gillard

Mr. Gillard was a director of Point North Energy Ltd. ("Point North") from November 2, 2005 until November 22, 2006. In September 2006, Point North filed for, and the Court of Queen's Bench of Alberta granted an initial order to Point North for, creditor protection under the Companies' Creditors Arrangement Act due to circumstances arising from events that occurred prior to Mr. Gillard being appointed to the Point

North board of directors. In September 2007, a successful plan of arrangement was approved by the creditor of Point North and as a result, Point North emerged from Companies' Creditors Arrangement Act protection.

Gregory G. Turnbull

Mr. Turnbull was a director of Mobilift Inc., a corporation engaged in the development, system integration and commercialization of innovative fall prevention technology. Mobilift Inc. was placed into receivership in September, 2001 by its major creditor after Mr. Turnbull left the board in August, 2001.

Penalties or Sanctions

No director, executive officer or shareholder holding a sufficient number of securities to affect materially the control of the Corporation, within the last 10 years, has been subject to any penalties or sanctions imposed by a court or securities regulatory authority relating to trading in securities, promotion or management of a publicly traded issuer or theft or fraud.

Personal Bankruptcies

No director, executive officer or shareholder holding a sufficient number of securities to affect materially the control of the Corporation, or a personal holding company of any such persons, has, within the 10 years preceding the date of this AIF, become bankrupt, made a proposal under any legislation relating to bankruptcy or insolvency, or being subject to or instituted any proceedings, arrangement or compromise with creditors or had a receiver, receiver manager or trustee appointed to hold the assets of the individual.

Share Capital

The Corporation is authorized to issue an unlimited number of Common Shares.

Common Shares

Each Common Share entitles its holder to receive notice of and to attend all meetings of the shareholders of the Corporation and to one vote at such meetings. The holders of Common Shares are, at the discretion of the board of directors of the Corporation and subject to applicable legal restrictions, entitled to receive any dividends declared by the board of directors on the Common Shares. The holders of Common Shares are entitled to share equally in any distribution of the assets of the Corporation upon the liquidation, dissolution, bankruptcy or winding up of the Corporation or other distribution of its assets among its shareholders for the purpose of winding up its affairs. Such participation is subject to the rights, privileges, restrictions and conditions attaching to any other shares having priority over the Common Shares.

Premium Dividend and Dividend Reinvestment Plan

Under the Corporation's Premium Dividend and Dividend Reinvestment Plan (the "**DRIP Plan**"), eligible Shareholders may, at their option, reinvest their cash dividends to purchase additional Common Shares at 95% of the average market price (as defined in the DRIP Plan) of a Common Share on the applicable distribution date. The DRIP Plan also provides an alternative where eligible Shareholders may elect, under the premium dividend component, to receive a premium cash distribution equal to 102% of the reinvested cash dividends that such Shareholders would have otherwise been entitled to receive on the applicable dividend date. Generally, no commissions, service charges or brokerage fees will be payable by Shareholders who participate in the DRIP Plan. We have reserved the right to determine how much new equity is available under the Plan on any particular distribution date. Accordingly, participation in the DRIP Plan may be pro-rated in certain circumstances.

Registered and beneficial owners of Common Shares who are not resident in Canada are not eligible to participate in the DRIP Plan.

From October 31, 2006 to December 2007, the Trust used the proceeds from the issuance of Trust Units under the DRIP Plan to reduce the Trust's then outstanding debt. The operation of the DRIP Plan was suspended in December 2007 and was reinstated as of December 31, 2008. The DRIP plan was in effect through the year of 2009 except for June 2009.

Restricted Share Bonus Plan

Under the terms of the Corporation's Restricted Share Bonus Plan, any director, officer, consultant or employee of the Corporation who, in each case, in the opinion of the Board of Directors of the Corporation, hold an appropriate position with the Corporation to warrant participation in the Restricted Share Bonus Plan (collectively, the "**Participants**") may be granted restricted shares ("**Restricted Shares**") which vest over time and, upon vesting, can be redeemed by the holder for cash or Common Shares. The Restricted Share Bonus Plan is administered by the Board of Directors. The Restricted Share Bonus Plan authorizes the Corporation to issue up to a maximum of 11,000,000 Common Shares pursuant to the redemption of Restricted Shares granted under the Restricted Share Bonus Plan.

Unless otherwise determined by the Board of Directors of the Corporation at the time of a particular grant, Restricted Shares will vest and become available for redemption as to 33 1/3% on each of the first, second and third anniversaries of the grant date. Upon redemption, the Corporation will be required to pay to the Participant the fair market value of the redeemed Restricted Shares, based on the weighted average of the prices at which the Common Shares traded on the TSX for the five trading days immediately preceding the redemption date, plus any accrued but unpaid dividend amounts in respect of such Restricted Shares (the **“Payout Amount”**). The Payout Amount may be satisfied by the Corporation making a cash payment, the Corporation purchasing Common Shares in the market and delivering such Common Shares to the Participant or by issuing Common Shares from treasury.

Credit Facilities

The Corporation has credit facilities (the **“Credit Facilities”**) which provide for a \$1.5 billion extendible revolving loan facility (the **“Credit Facility”**) and a \$100 million operating loan facility (the **“Bi-Lateral Credit Facility”**). The Credit Facility’s interest rate is based on either Canadian prime rate, alternate base rate, London Interbank Offer Rate or bankers acceptance rates at the Corporation’s option subject to certain basis point or stamping fee adjustments ranging from 1.5% to 4.5% depending on the Corporation’s senior debt to EBITDA ratio. The Credit Facilities are guaranteed by certain material restricted subsidiaries currently being CPHI and the Partnership. The Credit Facilities are unsecured. The Credit Facilities are subject to review on an annual basis, with the next review anticipated to take place by May 24, 2010. Various borrowing options are available under the Credit Facilities, including Canadian prime rate-based advances, U.S. base rate-based advances, libor loans and bankers’ acceptance loans. The Credit Facilities constitute a revolving facility for a 364 day term which is extendible annually for a further 364 day revolving period, subject to a one year term maturity should the lenders not agree to an annual extension. The Credit Facilities contain standard commercial covenants for facilities of this nature. Distributions to Shareholders are not permitted if the Corporation is in default of the Credit Facilities if the making of such distribution would cause an event of default. The Corporation does not have a borrowing base restriction respecting its Credit Facilities.

INDUSTRY CONDITIONS

The oil and natural gas industry is subject to extensive controls and regulations imposed by various levels of government. It is not expected that any of these controls or regulations will affect our operations in a manner materially different than they would affect other oil and gas companies and trusts of similar size. All current legislation is a matter of public record, and we are unable to predict what additional legislation or amendments may be enacted.

Pricing and Marketing – Natural Gas

In Canada, the price of natural gas sold intra-provincially or to the United States is determined by negotiation between buyers and sellers. Natural gas exported from Canada is subject to regulation by the National Energy Board (**“NEB”**) and the government of Canada. Exporters are free to negotiate prices and other terms with purchasers, provided that the export contracts continue to meet certain criteria prescribed by the NEB and the government of Canada. Natural gas exports for a term of less than two years requires a general short term export license while terms greater than two years require a specific license for the particular gas sold (in quantities of not more than 30,000 m³/d). Any natural gas export to be made pursuant to a contract of longer duration (to a maximum of 25 years) or a larger quantity requires an exporter to obtain an export licence from the NEB and the issue of such a licence requires the approval of the Governor in Council.

The governments of Alberta and Saskatchewan also regulate the volume of natural gas, which may be removed from those provinces for consumption elsewhere based on such factors as reserve availability, transportation arrangements and market considerations.

Pricing and Marketing – Oil

In Canada, producers of oil negotiate sales contracts directly with oil purchasers. Oil prices are primarily based on worldwide supply and demand. The specific price paid depends in part on oil quality, prices of competing fuels, distance to market, the value of refined products and the supply/demand balance. Oil exports may be made pursuant to export contracts with terms not exceeding one year in the case of light crude oil, and not exceeding two years in the case of heavy crude oil, provided that an order approving any such export has been obtained from the NEB. Any oil export to be made pursuant to a contract of longer duration (to a maximum of 25 years) requires an exporter to obtain an export licence from the NEB and the issue of such a licence requires the approval of the Governor in Council.

The North American Free Trade Agreement

On January 1, 1994, the North American Free Trade Agreement (**“NAFTA”**) among the governments of Canada, the U.S. and Mexico became effective. The NAFTA carries forward most of the material energy terms contained in the Canada-U.S. Free Trade Agreement. In the context of energy resources, Canada continues to remain free to determine whether exports to the U.S. or Mexico will be allowed provided that any export restrictions do not: (i) reduce the proportion of energy resource exported relative to domestic use (based upon the proportion prevailing in the most recent 36-month period), (ii) impose an export price higher than the domestic price; and (iii) disrupt normal channels of supply. All three countries are prohibited from imposing minimum export or import price requirements.

The NAFTA contemplates the reduction of Mexican restrictive trade practices in the energy sector and prohibits discriminatory border restrictions and export taxes. The agreement also contemplates clearer disciplines on regulators to ensure fair implementation of any regulatory changes, and to minimize disruption of contractual arrangements, which is important for Canadian natural gas exports.

Royalties and Incentives

In addition to federal regulation, each province has legislation and regulations, which govern land tenure, royalties, production rates, environmental protection and other matters. In all Canadian jurisdictions, where we operate, producers of oil and natural gas are required to pay annual rental payments in respect of Crown leases and royalties and freehold production taxes in respect of oil and natural gas produced from Crown and freehold lands, respectively. The royalty regime is a significant factor in the profitability of oil and natural gas production. Royalties payable on production from lands other than Crown lands are determined by negotiations between the mineral owner and the lessee. Crown royalties are determined by governmental regulation and are generally calculated as a percentage of the value of the gross production, and the rate of royalties payable generally depends in part on prescribed reference prices, well productivity, geographical location, field discovery date and the type or quality of the petroleum product produced.

Alberta

In terms of oil or natural gas production from Crown lands, royalties are payable to the Province of Alberta. On February 16, 2007, the Government of Alberta announced a review of the province's royalty and tax regime (including income tax and freehold mineral rights tax) pertaining to oil, natural gas and oil sands to be conducted by a panel of experts, with the assistance of individual Albertans and key stakeholders. The purpose of this process was to ensure that Albertans are receiving a fair share from energy development through royalties, taxes and fees.

On October 25, 2007, the Government of Alberta unveiled a new royalty regime for determining Crown royalty rates in Alberta (the "**Royalty Framework**"), effective January 1, 2009. The new Royalty Framework introduced new royalties applicable to all conventional oil and natural gas wells and bitumen production, with the exception of those subject to the transitional royalty rate discussed below.

The new Royalty Framework eliminated the previous tier system for conventional oil, which was based on the vintage or discovery date of the oil, and implemented a sliding rate formula based on both the commodity price of oil and well production. Subject to certain available incentives, royalty rates for conventional oil production under the Royalty Framework range from a base rate of 0% to a cap of 50%. This represents an increase from the previous rate cap of 35% under the tier system. New royalty rates will be determined on a monthly basis.

The new Royalty Framework also eliminated the previous tier system for natural gas, which was also based on the vintage or discovery date of the gas, and implemented a sliding rate formula based on both the commodity price of the gas and well production. This eliminated the option to use a corporate average reference price. The natural gas royalty formula also provides for a reduction based on the measured depth of the well below 2,000 metres (the "**Depth Factor Adjustment**"), as well as the acid gas content of the produced gas (the "**Acid Gas Adjustment**"). Subject to certain available incentives, royalty rates for natural gas production under the Royalty Framework range from a base rate of 5% to a cap of 50%. This represents an increase from the previous rate cap of 35% under the tier system.

Under the new Royalty Framework, the royalty rate applicable to natural gas liquids is a flat rate of 40% for pentanes and 30% for butanes and propane.

On March 11, 2010, the Government of Alberta announced that it will modify the conventional oil and natural gas royalty rates implemented in the Royalty Framework, with such modifications to come into effect on January 1, 2011, in an effort to advance Alberta's competitiveness in the upstream oil and gas sector. As part of such modifications, the maximum royalty rate for conventional oil will be reduced from 50% to 40% and the maximum royalty rate for conventional and unconventional natural gas will be reduced from 50% to 36%. The announced modifications have not yet been adopted in legislation or regulation, and are subject to further review and amendment. The March 11, 2010 announcement indicated that all modified royalty curves will be finalized and announced by May 31, 2010. The modified rates are expected to provide an enhanced risk-reward balance to investors and are thought to improve Alberta's competitive position relative to other domestic and international jurisdictions.

In terms of oil and natural gas production obtained from lands other than Crown lands, taxes are payable to the Province of Alberta. Approximately 19% of the mineral rights in the Province of Alberta are freehold mineral rights not owned by the Crown. The tax levied in respect of freehold oil and gas production in the Province of Alberta is calculated annually based on a rate dependent on the prescribed tax rate, the quantity of produced oil or gas, and the unit value of the produced oil or gas.

Transitional Incentive

In late November of 2008, the Alberta government announced details of an optional five-year transitional royalty program (the "**Transitional Program**") applicable to conventional oil and natural gas wells drilled to measured depths from 1,000 to 3,500 meters, with a spud date on or

after November 19, 2008. For each eligible well, the producer can make a one-time election to produce the well under the Transitional Program royalty rates or the new Royalty Framework rates. The Transitional Program royalty rates would only apply to production from January 1, 2009 until December 31, 2013. As of January 1, 2014, all production subject to the Transitional Program will revert to the new Royalty Framework regime. Operators electing the Transitional Program rates are not eligible for the Depth Factor Adjustment or the Acid Gas Adjustment, which are specific to the Royalty Framework, but are otherwise not excluded from available incentive programs, subject to eligibility as discussed below. On March 11, 2010, the Government of Alberta announced that the Transitional Program would continue until its originally announced expiration, however, effective January 1, 2011, no new wells would be eligible for the selection of the Transitional Program royalty rates. Wells which have already opted for the Transitional Program royalty rates prior to January 1, 2011 will have the option to either lock in the Transitional Program royalty rates until the expiry of the Transitional Program, or switch to the modified royalty rates announced on March 11, 2010 with effect on January 1, 2011.

Incentive Programs

From time to time the governments of Canada, Alberta, British Columbia and Saskatchewan have established incentive programs which have included royalty rate reductions, royalty holidays and tax credits for the purpose of encouraging oil and natural gas exploration or enhanced planning projects. Such programs are generally introduced when commodity prices are low, and are designed to encourage exploration and development activity by improving earnings and cash flow within the industry. These programs reduce the amount of Crown royalties otherwise payable.

Oil and natural gas royalty holidays and reductions for specific wells reduce the amount of Crown royalties paid to the provincial governments. Prior to 2007, the Alberta Royalty Tax Credit (“**ARTC**”) program provided a rebate on Alberta Crown royalties paid in respect of eligible producing properties, having the effect of increasing net income. Under the ARTC, a producer of oil or natural gas was entitled to a tax credit against the royalties payable to the Crown, however this program was phased out on December 31, 2006.

The Royalty Framework also eliminated some previously available incentives, and introduced certain revised or updated incentive programs.

With respect to conventional oil, the Royalty Framework eliminated the Third Tier Exploratory Well Royalty Exemption, the Re-activated Well Royalty Reduction, the Low Productivity Well Royalty Reduction, the Horizontal Re-entry Well Royalty Program, and the Experimental Project Petroleum Royalty.

With respect to natural gas, the Royalty Framework eliminated the Deep Gas Royalty Holiday and the Royalty Adjustment Program for Deep Marginal Gas Wells.

Pursuant to the new Royalty Framework, the Deep Oil Exploratory Well Program, the Enhanced Recovery of Oil Royalty Reduction Program (“**EOR Program**”), the Natural Gas Deep Drilling Program, and the Innovative Energy Technologies Program (the “**IETP**”) were either created or retained.

The *Deep Oil Exploratory Well Regulation* provides a limited royalty exemption for qualifying exploratory oil wells spudded or deepened between January 1, 2009 and December 31, 2013 that are deeper than 2,000 metres and have a producing interval below 2,000 metres. Existing oil wells approved under the discontinued Third Tier Exploratory Well Royalty Exemption and qualifying for the Deep Oil Exploratory Well Program were transitioned into the new program on January 1, 2009.

With respect to the EOR Program, the *Enhanced Recovery of Oil Royalty Reduction Regulation* provides that Alberta Energy may approve royalty reductions for qualifying enhanced oil recovery projects.

The *Natural Gas Deep Drilling Regulation* provides a limited royalty reduction for qualifying exploratory natural gas wells spudded or deepened between October 25, 2007 and January 1, 2014, where the top of the producing zone is deeper than 2,500 metres.

The IETP was originally intended to promote producers’ investment in research, technology and innovation for the purposes of improving environmental performance while creating commercial value. This program has been retained under the new Royalty Framework. The IETP provides royalty reductions which are presumed to reduce financial risk. Alberta Energy will determine which projects qualify for the IETP, as well as the level of support that will be provided. The deadline for the IETP’s fifth round of applications was November 15, 2009.

On March 3, 2009, the Government of Alberta announced an additional incentive program, the Drilling Royalty Credit (the “**DRC**”), in respect of conventional oil and gas wells drilled on Alberta Crown lands. On June 25, 2009, the Government of Alberta announced the extension of the DRC for one additional year, expiring on April 1, 2011. The *Drilling Royalty Credit Regulation* provides that for qualifying wells drilled for the purpose of extracting conventional oil or natural gas and with a spud date and finish drill date between April 1, 2009 and April 1, 2011, the operator will receive a royalty credit of \$200 per metre drilled, up to a prescribed maximum percentage of the operator’s royalties. The maximum percentage will be determined on a sliding scale ranging from 10% to 50%, based on the operator’s production, with a higher

maximum percentage available to lower producing operators. The DRC is only available to companies that are or will be recognized as having royalty payment obligations pursuant to applicable regulation. Any DRC royalty credits not used prior to March 31, 2011 will be forfeited.

On March 3, 2009, the Government of Alberta also announced the New Well Royalty Reduction (the “**NWRR**”) incentive program, and on June 25, 2009 announced the extension of the NWRR for one additional year beyond its original expiration date. The *New Well Royalty Reduction Regulation* provides that the NWRR will be available to qualifying new wells that first begin producing conventional oil or natural gas between April 1, 2009 and March 31, 2011. Pursuant to the *New Well Royalty Reduction Regulation*, the NWRR will reduce royalties on production from qualifying wells to a maximum royalty rate of 5% until the earlier of either 12 calendar months from date of first production or the date that the first 7949 cubic metres of eligible oil or oil equivalent is produced. On March 11, 2010, as part of a larger modification of royalty rates under the Royalty Framework, the Government of Alberta announced that the NWRR will become a permanent feature of Alberta’s royalty regime.

Both the DRC and NWRR will apply to wells under the Royalty Framework as well as those wells electing the Transitional Program rates. In relation to conventional oil wells eligible for both the NWRR and the Deep Oil Exploratory Well Program, the date constraints and volume limits under each program will run concurrently. In relation to natural gas wells eligible for both the NWRR and the Natural Gas Deep Well Drilling Program, the date constraints will run concurrently for both programs, but the royalty reductions under the Natural Gas Deep Drilling Program will only be available once the NWRR is no longer available. In addition, the NWRR will reduce the royalty reduction that is available for wells under the EOR Program and the IETP.

The implementation of the changes to the royalty regime in Alberta is subject to certain risks and uncertainties. The significant changes to the royalty regime require new and amended legislation, and development of proprietary software to support the calculation and collection of royalties. Additionally, certain proposed changes contemplate further public and/or industry consultation. There may be modifications introduced to the proposed royalty structure.

The new royalty regime could increase the Corporation’s average royalty rate commencing January 1, 2009. The proposed changes to royalties could also have a negative impact on net earnings, funds from operations, cash flow from operating activities, operating netbacks, and reserve values, which could create uncertainty as to the recoverability of the carrying value of the Corporation’s petroleum and natural gas assets. Nonetheless, the Corporation expects the economics of production from its properties will be acceptable under the new royalties.

Saskatchewan

With respect to production obtained from Crown lands in the Province of Saskatchewan, the amount payable as a royalty in respect of crude oil depends on the vintage of the oil, the type of oil, the quantity of oil produced in a month, and the price of the oil. For both Crown royalty and freehold production tax purposes, crude oil is categorized by oil type as either "heavy oil", "southwest designated oil", or "non-heavy oil other than southwest designated oil". Additionally, the oil in each category is subdivided according to the conventional royalty and production tax classifications as either "fourth tier oil" (introduced October 1, 2002), "third tier oil", "new oil", or "old oil". Depending on the categorization and classification of the oil, monthly production, and a prescribed reference price determined monthly by Saskatchewan Energy and Resources, the royalty reserved to the Crown ranges from 0% to 45%.

Similarly, the amount payable as a royalty in respect of natural gas in the Province of Saskatchewan depends on the vintage of the gas, the type of gas production, the quantity of gas produced in a month, and the price of the gas. For both Crown royalty and freehold production tax purposes, natural gas is categorized as either non-associated gas or associated gas, the former being produced from gas wells and the latter being produced from oil wells. Additionally, the gas is divided according to the royalty and production tax classifications as either “fourth tier gas” (introduced October 1, 2002), “third tier gas”, “new gas”, or “old gas”. Depending on the categorization and classification of the natural gas, monthly production, and a reference price, the royalty reserved to the Crown ranges from 0% to 45%. Subject to certain restrictions, the operator may elect to use either a prescribed reference price determined monthly by Saskatchewan Energy and Resources, or a reference price based on the operator’s average gas price in a month. As an incentive for the production and marketing of natural gas which may have been flared, the royalty rate on associated gas is less than on non-associated natural gas.

Approximately one-fifth of the mineral rights in the Province of Saskatchewan are freehold mineral rights not owned by the Crown. With respect to production from lands other than Crown lands, the tax levied in respect of freehold oil and gas production in the Province of Saskatchewan is determined by reducing the Crown royalty rate that would otherwise be payable if the lands were Crown lands by a fixed amount. Currently, this reduction ranges from 6.9% to 12.5% depending on the classification of the oil or gas.

Incentives

On October 1, 2002, a modified system of incentive volumes and maximum royalty/tax rates applicable to the initial production from qualifying oil wells and gas wells in the Province of Saskatchewan with a finished drilling date on or after October 1, 2002, was introduced. The incentive volumes are applicable to various well types and are subject to a maximum royalty rate of 2.5% and a freehold production tax rate of 0%. The October 1, 2002 changes also eliminated the re-entry and short section horizontal oil well royalty/tax categories. All horizontal oil wells with a finished drilling date on or after October 1, 2002, will receive the “fourth tier” royalty/tax rates and new incentive volumes.

In 1975 the Government of Saskatchewan introduced a Royalty Tax Rebate (“**RTR**”) as a response to the federal government disallowing the deduction of crown royalties and similar taxes as a business expense for income tax purposes. As of January 1, 2007, the RTR was allowed to wind down as a result of the federal government’s initiative to reintroduce the full deduction of crown royalties in computing income for federal and provincial income tax purposes in respect of taxation years commencing after 2006. Commencing January 1, 2007, the carry forward period for any outstanding RTR balance was limited to 7 years.

Manitoba

Provincial Crown Royalties and Freehold Production Tax

Crown Royalties – Oil

In Manitoba, the royalty amount payable on oil produced from Crown land depends on the classification of the oil produced. Production is divided into the following categories: (i) “old oil” (being oil produced from a well drilled prior to April 1, 1974 that does not qualify as new oil or third tier oil); (ii) “new oil” (being oil that is not third tier oil and is produced from a well drilled on or after April 1, 1974 and prior to April 1, 1999, from an abandoned well re-entered during that period, from an old oil well as a result of an enhanced recovery project implemented during that period, or from a horizontal well); (iii) “third tier oil” (being oil produced from a vertical well drilled after April 1, 1999, an abandoned well re-entered on or after that date, an inactive vertical well activated after that date, a marginal well that has undergone a major workover, or from an old oil well or a new oil well as a result of an enhanced recovery project implemented after that date); or (iv) “holiday oil” (being oil that is exempt from any royalty or tax payable).

Royalty rates are calculated on a sliding scale and based on the monthly oil production from a spacing unit, or oil production allocated to a unit tract under a unit agreement or unit order from the Minister. For horizontal wells, the royalty on oil produced from Crown lands is calculated per spacing unit based on the amount of oil production allocated to the spacing units within the drainage unit of a well in accordance with the applicable regulations.

Crown Royalties – Gas

Royalties payable on natural gas production from Crown lands are equal to 12.5% of the volume of natural gas sold.

Freehold Production Tax

Manitoba legislation levies a tax on production from freehold oil and gas rights and provides that the operator of a well is responsible for the payment of such tax. The freehold production tax payable on oil is calculated on a sliding scale based on the monthly production volume and the classification of oil as old oil, new oil, third tier oil or holiday oil. Producers of natural gas from freehold lands in Manitoba are required to pay a monthly freehold production tax equal to 1.2% of the volume sold. There is no freehold production tax payable on gas consumed as lease fuel.

Incentives

The Government of Manitoba maintains a Drilling Incentive Program (the “**Program**”) with the intent of promoting investment in the sustainable development petroleum resources. The Program provides the licensee of newly drilled wells, or qualifying wells where a major workover has been completed, with a “holiday oil volume” pursuant to which no Crown royalties or freehold production taxes are payable until the holiday oil volume has been produced. Under the Program, wells drilled for purposes of injection (or wells converted to injection prior to producing predetermined volumes of oil) in an approved enhanced oil recovery project earn a one-year holiday for portions of the project area.

The Program consists of the following components:

- *New Well Incentive* provides licensees of newly drilled, non-horizontal wells drilled prior to January 1, 2014 with a holiday oil volume of 10,000 m³;
- *Deep Drilling Incentive* provides licensees who drill a well to a total depth sufficient to penetrate the Devonian Duperow formation with a holiday oil volume of 20,000 m³, and licensees who drill a well deeper than the Devonian Three Forks formation can make a one-time assignment of up to 10,000 m³ of holiday oil volume earned through previous drilling or major workovers to such well’s holiday oil volume;
- *Horizontal Well Initiative* provides licensees of horizontal wells drilled prior to January 1, 2014 with a holiday oil volume of 10,000 m³, and a horizontal leg drilled from an existing horizontal well on or after January 1, 2009 and prior to January 1, 2014 will earn an additional holiday royalty volume of 3,000 m³;

- *Marginal Well Major Workover Incentive* provides licensees of marginal wells where a major workover is completed prior to January 1, 2014 with a holiday oil volume of 500 m³, with a marginal oil well defined as an abandoned well or a well that was either not operated over the previous 12 months or produced oil at an average rate of less than 1 m³ per operating day;
- *Injection Well Incentive* provides a one year exemption from the payment of Crown royalties or freehold production taxes on production allocated to a unit tract in which a well is drilled or converted to water injection;

Further, holiday oil volumes earned by a newly drilled well, or a marginal well that has undergone a major workover can be transferred to a “holiday oil volume account” at the request of the licensee, the purpose of which is to optimize the value of holiday oil volumes earned by providing a company with the flexibility of allocating holiday oil volumes earned among new wells.

Environmental Regulation and Protection Requirements

All phases of the oil and natural gas business present environmental risks and hazards and are subject to environmental regulation pursuant to international conventions and national, provincial, and municipal laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases, discharges, or emissions of various substances produced or used in association with oil and gas operations, as well requirements with respect to oilfield waste handling and storage, habitat protection, and minimum setbacks of oil and gas activities from fresh water bodies.

Environmental legislation in the Province of Alberta is, for the most part, set out in the *Environmental Protection and Enhancement Act* and the *Oil and Gas Conservation Act*, which impose strict environmental standards with respect to releases of effluents and emissions, including monitoring and reporting obligations, and impose significant penalties for non-compliance. For example, regulations enacted thereunder target sulphur oxide and nitrous oxide emissions from oil and gas operations. Environmental legislation in the Province of Saskatchewan is, for the most part, set out in the *Environmental Management and Protection Act, 2002* and the *Oil and Gas Conservation Act*, which regulate harmful or potentially harmful activities and substances, any release of such substances, and remediation obligations in Saskatchewan. Certain development activities in Saskatchewan, depending on the location and potential environmental impact, may require a screening or an environmental impact assessment under the provincial *Environmental Assessment Act*. Environmental legislation in the Province of British Columbia is, for the most part, set out in the *Environmental Management Act* (“**EMA**”) and the *Petroleum and Natural Gas Act*, which regulate the storage, discharge and disposal of air contaminants, effluent and hazardous waste into the environment. Specifically, the *Oil and Gas Waste Regulation* under the EMA regulates hydrogen sulphide and nitrogen oxide emissions from oil and gas facilities. The EMA provides for the imposition of significant penalties in the event of non-compliance and for the remediation of contaminated sites. New oil and gas projects, or modifications to existing projects, may be subject to a review under the Environmental Assessment Act.

Environmental legislation also requires that wells and facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material, or in the suspension or revocation of necessary licences and approvals. Crescent Point may also be subject to civil liability for damage caused by pollution. Certain environmental protection legislation may subject Crescent Point to statutory strict liability in the event of an accidental spill or discharge from a licensed facility, meaning that fault on the part of Crescent Point need not be established if such a spill or discharge is found to have occurred.

As at December 31, 2009, Crescent Point owned approximately 10,945 gross (5,249 net) wells for which abandonment and reclamation costs are expected to be incurred. During the 2009 financial year, Crescent Point spent approximately \$1.8 million on well abandonments and environmental remediation activities. Crescent Point estimates that it will spend approximately \$5.0 million on well abandonments and environmental remediation and reclamation activities in 2010, and has budgeted accordingly. Crescent Point has estimated the net present value (discounted at eight percent per annum) of its total asset retirement obligations (wells and facilities) to be approximately \$139.4 million as at December 31, 2009, based on a future liability (inflated at two percent per annum) of approximately \$282.4 million. Crescent Point estimates abandonment and reclamation costs by taking into consideration the costs associated with decommissioning, abandonment, remediation, and reclamation, all adjusted according to its working interest and discounted in accordance with NI 51-101. Asset retirement obligation cost estimates are based on information published by the Energy Resources Conservation Board (“**ERCB**”) and the Saskatchewan Energy and Resources Ministry (“**SER**”) Licensee Liability Rating Guidelines (“**LLRG**”).

Environmental legislation is evolving in a manner expected to result in stricter standards and enforcement, larger fines and liability, and potentially increased capital expenditures and operating costs. The discharge of oil, natural gas, or other pollutants into the air, soil or water may give rise to liabilities to third parties and may require Crescent Point to incur costs to remedy such a discharge in an event not covered by Crescent Point's insurance, which insurance is in line with industry practice. Furthermore, Crescent Point expects incremental future costs associated with compliance with increasingly complex environmental protection requirements with respect to GHG emissions or otherwise, some of which may require the installation of emissions monitoring and measuring devices, the verification and reporting of emissions data and additional financial expenditures to comply with GHG emissions reduction requirements.

Greenhouse Gas (GHG) Emissions

In Alberta, new GHG emissions regulations became effective July 1, 2007, namely the *Specified Gas Emitters Regulation* pursuant to the *Climate Change and Emissions Management Act*. These regulations require Alberta facilities that emit more than 100,000 tonnes of GHG per year to reduce emissions intensity by 12% below an average baseline taken from a facility's 2003 - 2005 emissions. Companies may meet requirements through improvements to their operations; by purchasing Alberta based credits; or by contributing to the provincial Climate Change and Emissions Management Fund. Crescent Point does not operate any facilities that are regulated by the provincial GHG emissions regulations. The Province of Alberta also published a climate change action plan in January of 2008 wherein it set an objective to deliver a 50% reduction in GHG emissions from business as usual by 2050 by employing: (a) mandatory carbon capture and storage ("CCS") for certain facilities; (ii) energy efficiency and conservation; and (iii) research and investment in clean energy technologies, including carbon separation technologies to assist CCS.

On December 1, 2009, the Province of Saskatchewan re-introduced its climate change legislation originally introduced in May of 2009. Bill 95 establishes a framework of the provinces strategy to meet its target of reducing GHG emissions by 20% from 2006 levels by 2020 and fosters innovation in low-carbon technologies. So far, there has been no word on when Bill 95 is expected to come into force, and the potential impact of this legislation is uncertain as most of the operational details will be contained within the regulations following passage of the bill. These regulatory details include the baseline year, the anticipated reductions and the characterization of those regulated emitters to whom the targets apply. In addition, Bill 95 is unclear as to whether or not Saskatchewan will adopt an intensity-based approach similar to that in effect in Alberta, and so the operational effects of this legislation in the Province of Saskatchewan remain to be seen

Crescent Point is involved in the re-development of the proposed Saskatchewan environmental protection legislation and is currently working with the Government of Saskatchewan. No financial and operational effects of the proposed legislation are currently known due to its preliminary nature.

Crescent Point's facilities and other operations emit GHG emissions, making it possible that Crescent Point will be subject to federal and provincial GHG emissions controls or reduction requirements if its facilities or operations are above applicable thresholds, particularly in B.C. where a cap and trade regime is pending. In the near term, Crescent Point does not expect to have any facilities subject to reporting based on these preliminary regulations.

At the end of 2009, the United Nations Climate Change Conference, commonly known as the Copenhagen Accord, was held in Copenhagen, Denmark. While an accord that endorses, among other things, the continuation of the Kyoto Protocol and the need for global emissions reductions was generally accepted by the member countries at the Copenhagen Accord, the accord is generally viewed as not being legally binding and does not contain any binding commitments for reducing carbon dioxide emissions. In January 2010, the Government of Canada announced that it had submitted its 2020 emissions reduction target under the Copenhagen Accord, although it has not indicated how it will achieve such gas reduction. Canada's target, a 17% reduction from 2005 levels by the year 2020, is purportedly aligned with the U.S. target and is subject to adjustment to remain consistent.

There remains ongoing uncertainty regarding Canada's short-term and long-term emissions reduction targets and whether such targets will be absolute or intensity based. For a number of Canadian and North American political and economic reasons, it is now uncertain whether the proposed approach, or a variation thereof, will result in federal GHG regulations reflecting this approach. The Government of Canada is now evaluating both domestic and North American options for a cap and trade regulatory regime. Facility owners across Canada await further information regarding Canada's approach to regulating GHG emissions. Although the timing and nature of federal GHG regulations are unknown at this time, Crescent Point anticipates that, based on current production levels, Government of Canada GHG regulations will apply to its operations in the future and as a result additional costs will be incurred to comply with reduction requirements and to perform necessary monitoring, measurement, verification, and reporting of GHG emissions. Proposed federal compliance mechanisms included: early offset credits, credits for federal Technology Fund contributions, credits obtained from other regulated entities which improved beyond legal requirements, offset credits obtained from non-regulated entities which reduced or removed GHGs; or international Clean Development Mechanism Credits. Crescent Point's facilities may use a number of strategies to meet federal requirements, including emissions trading, in house reductions, or investments in a technology fund to research and develop GHG reduction technologies.

As part of Crescent Point's ongoing commitment to reduce GHG emissions, the Trust established an Environmental Emissions Reduction Fund in 2007. Currently \$0.15 per produced boe is allocated into this fund. To date, \$6.6 million has been allocated to the fund and \$6.8 million has been expended in order to reduce GHG emissions and to meet and exceed provincial and proposed federal targets.

Crescent Point anticipates changes in environmental legislation may require reductions in emissions from its operations and result in increased capital expenditures. Further changes in environmental legislation could occur, which may result in stricter standards and enforcement, larger fines and liability and increased capital expenditures and operations costs, which could have a material adverse effect on our financial condition and results of operations.

We are committed to meeting our responsibilities to protect the environment wherever we operate and anticipate making increased expenditures of both a capital and expense nature as a result of the increasingly stringent laws relating to the protection of the environment. Our internal procedures are designed to ensure that the environmental aspects of new developments are taken into account prior to proceeding.

Health, Safety and Environment

The health and safety of employees, contractors, visitors and the public, as well as the protection of the environment, is of utmost importance to Crescent Point. Crescent Point endeavours to conduct its operations in a manner that will minimize both adverse effects and consequences of emergency situations by operations in a manner that will minimize both adverse effects and consequences of emergency situations by:

- Complying with government regulations and standards;
- Conducting operations consistent with industry codes, practices and guidelines;
- Ensuring prompt, effective response and repair to emergency situations and environmental incidents;
- Providing training to employees and contractors to ensure compliance with Corporation safety and environmental rules and procedures;
- Promoting the aspects of careful planning, good judgment, implementation of the Corporation's procedures, and monitoring Corporation activities;
- Communicating openly with members of the public regarding our activities; and
- Amending the Corporation's policies and procedures as may be required from time to time.

Crescent Point believes that all employees have a vital role in achieving excellence in, health safety and environmental performance. This is best achieved through careful planning and the support and active participation of everyone involved.

Crescent Point believes that it is in material compliance with environmental legislation in the jurisdictions in which it operates at this time. Crescent Point's practice is to do all that it reasonably can to ensure that it remains in material compliance with applicable environmental protection legislation. Crescent Point also believes that it is reasonably likely that the trend towards stricter standards in environmental legislation and regulation will continue. Crescent Point is committed to meeting its responsibilities to protect the environment wherever it operates and will take such steps as required to ensure compliance with environmental legislation. Crescent Point anticipates increased capital and operating expenditures as a result of increasingly stringent laws relating to the protection of the environment. No assurance can be given however that environmental laws will not result in a curtailment of production or a material increase in the costs of production, the development or exploration activities, or otherwise adversely affect Crescent Point's financial condition, capital expenditures, results of operations, competitive position or prospects.

RISK FACTORS

The following are certain risk factors relating to our business which prospective investors should carefully consider before deciding whether to purchase Common Shares.

Reserve Estimates

The reserve and recovery information contained in the Crescent Point Reserve Report are only an estimates and the actual production and ultimate reserves from our properties may be greater or less than the estimates prepared by GLJ and Sproule. Ultimately, actual reserves attributable to our properties will vary from estimates, and those variations may be material. The reserve figures contained herein are only estimates. A number of factors are considered and a number of assumptions are made when estimating reserves. These factors and assumptions include, among others:

- historical production in the area compared with production rates from similar producing areas;
- future commodity prices, production and development costs, royalties and capital expenditures;
- initial production rates;
- production decline rates;
- ultimate recovery of reserves;
- success of future development activities;
- marketability of production;

- effects of government regulation; and
- other government levies that may be imposed over the producing life of reserves.

Reserve estimates are based on the relevant factors, assumptions and prices on the date the relevant evaluations were prepared. Many of these factors are subject to change and are beyond our control. If these factors, assumptions and prices prove to be inaccurate, actual results may vary materially from reserve estimates and such variations may affect the market price of our Common Shares and payments of dividends to Shareholders.

Volatility of Oil and Natural Gas Prices

Our results of operations and financial condition are dependent on the prices received for our oil and natural gas production. Oil and natural gas prices have fluctuated widely during recent years and are subject to fluctuations in response to relatively minor changes in supply, demand, market uncertainty and other factors that are beyond our control. These factors include, but are not limited to, worldwide political instability, foreign supply of oil and natural gas, the level of consumer product demand, government regulations and taxes, the price and availability of alternative fuels and the overall economic environment. Any decline in crude oil or natural gas prices may have a material adverse effect on our operations, financial condition, borrowing ability, reserves and the level of expenditures for the development of oil and natural gas reserves. Any resulting decline in our cash flow could reduce dividends.

We use financial derivative instruments and other hedging mechanisms to try to limit a portion of the adverse effects resulting from changes in natural gas and oil commodity prices. To the extent we hedge our commodity price exposure, we forego some of the benefits we would otherwise experience if commodity prices were to increase. In addition, our commodity hedging activities could expose us to losses. Such losses could occur under various circumstances, including where the other party to a hedge does not perform its obligations under the hedge agreement, the hedge is imperfect or our hedging policies and procedures are not followed. Furthermore, we cannot guarantee that such hedging transactions will fully offset the risks of changes in commodities prices.

In addition, we regularly assess the carrying value of our assets in accordance with Canadian generally accepted accounting principles under the full cost method. If oil and natural gas prices become depressed or decline, the carrying value of our assets could be subject to downward revision.

Operating Costs and Production Levels

An increase in operating costs or a decline in our production level could have a material adverse effect on our results of operations and financial condition and, therefore, could reduce dividends to Shareholders as well as affect the market price of the Common Shares.

Higher operating costs for our underlying properties will directly decrease the amount of cash flow received by the Corporation and, therefore, may reduce dividends to our Shareholders. Electricity, chemicals, supplies, reclamation and abandonment and labour costs are a few of the operating costs that are susceptible to material fluctuation.

The level of production from our existing properties may decline at rates greater than anticipated due to unforeseen circumstances, many of which are beyond our control. A significant decline in our production could result in materially lower revenues and cash flow and, therefore, could reduce the amount available for dividends to Shareholders.

Reinvestment of Cash Flow to Fund Ongoing Operations

Dividends may be reduced during periods in which we make capital expenditures or debt repayments using cash flow, which could also affect the market price of our Common Shares. To the extent that we use cash flow to finance acquisitions, development costs and other significant expenditures, the net cash flow that the Corporation receives that is available for dividends to Shareholders will be reduced. Hence, the timing and amount of capital expenditures may affect the amount of net cash flow received by the Corporation and, as a consequence, the amount of cash available to distribute to Shareholders. Therefore, dividends may be reduced, or even eliminated, at times when significant capital or other expenditures are made.

The board of directors of CPRI has the discretion to determine the extent to which cash flow from CPRI will be allocated to the payment of debt service charges as well as the repayment of outstanding debt, including under the credit facility. As a consequence, the amount of funds used to pay debt service charges or reduce debt will reduce the amount of cash available for dividends to Shareholders during those periods in which funds are so retained.

Marketing of Oil and Natural Gas Production

A decline in our ability to market our oil and natural gas production could have a material adverse effect on production levels or on the prices that we receive for our production which, in turn, could reduce dividends to Shareholders and affect the market price of our Common Shares.

Our business depends in part upon the availability, proximity and capacity of oil and gas gathering systems, pipelines and processing facilities. Canadian federal and provincial, as well as United States federal and state, regulation of oil and gas production, processing and transportation, tax and energy policies, general economic conditions, and changes in supply and demand could adversely affect our ability to produce and market oil and natural gas. If market factors change and inhibit the marketing of our production, overall production or realized prices may decline, which could reduce dividends to our Shareholders.

Fluctuations in Foreign Currency Exchange Rates

Fluctuations in foreign currency exchange rates could adversely affect our business, and could affect the market price of our Common Shares and payments of dividends to Shareholders. The price that we receive for a majority of our oil and natural gas is based on United States dollar denominated benchmarks, and, therefore, the price that we receive in Canadian dollars is affected by the exchange rate between the two currencies. A material increase in the value of the Canadian dollar relative to the United States dollar may negatively impact net production revenue by decreasing the Canadian dollars received for a given United States dollar price, negatively impacting future dividends and the future value of the Corporation's reserves as determined by independent evaluators. We could be subject to unfavourable price changes to the extent that we have engaged, or in the future engage, in risk management activities related to foreign exchange rates, through entry into forward foreign exchange contracts or otherwise.

Acquisition of Additional Reserves

If we are unable to acquire additional reserves, the value of our Common Shares and payments of dividends to Shareholders may decline. We do not actively explore for oil and natural gas reserves. Instead, we add to our oil and natural gas reserves primarily through development, exploitation and acquisitions. As a result, future oil and natural gas reserves are highly dependent on our success in exploiting existing properties and acquiring additional reserves. We also distribute the majority of our net cash flow to Shareholders rather than reinvesting it in reserve additions. Accordingly, if external sources of capital, including the issuance of additional Common Shares, become limited or unavailable on commercially reasonable terms, our ability to make the necessary capital investments to maintain or expand our oil and natural gas reserves will be impaired. To the extent that we are required to use cash flow to finance capital expenditures or property acquisitions, the level of cash flow available for payment of dividends to Shareholders will be reduced. Additionally, we cannot guarantee that we will be successful in developing additional reserves or acquiring additional reserves on terms that meet our investment objectives. Without these reserve additions, our reserves will deplete and as a consequence, either production from, or the average reserve life of, our properties will decline. Either decline may result in a reduction in the value of our Common Shares and in a reduction in cash available for dividends to Shareholders.

Risks Relating to the Corporation's Investment in Shelter Bay

The Corporation owns 21 percent of the outstanding common shares of Shelter Bay and currently has three representatives on the board of directors of Shelter Bay. The Corporation's ownership is not sufficient to elect a majority of the board of directors of Shelter Bay and the Corporation has no contractual rights related thereto. Additionally, Shelter Bay's management is not independent of the Corporation's management. However, the directors and officers of Shelter Bay have a fiduciary obligation to act in the best interest of Shelter Bay. This fiduciary obligation is modified by the Shelter Bay USA which creates an exception for those directors and officers who are also directors, officers and employees of the Corporation. The Shelter Bay USA states that should those individuals become aware of certain opportunities in the Corporation's core areas, those opportunities will first be offered and discussed with management of the Corporation and then, should the Corporation decide not to pursue the opportunities; Shelter Bay will be presented with the opportunity. Notwithstanding the foregoing, the decisions made by the directors and/or officers of Shelter Bay may cause Shelter Bay to undertake strategies or courses of action that may not be consistent with the Corporation's short or long term objectives.

In addition, if the Crescent Point nominees on the Shelter Bay Board or the Shelter Bay officers are unable to devote their full time and undivided attention to the Corporation's affairs it may have a material adverse effect on the Corporation.

Scope of Operations

If we expand our operations beyond oil and natural gas production in western Canada, with minor operations in Montana, we may face new challenges and risks. If we were unsuccessful in managing these challenges and risks, our results of operations and financial condition could be adversely affected, which could affect the market price of our Common Shares and payment of dividends to Shareholders.

Our operations and expertise are currently focused on conventional oil and gas production and development in the Western Canadian Sedimentary Basin. In the future, we may acquire oil and gas properties outside this geographic area. In addition, we could acquire other energy

related assets, such as oil and natural gas processing plants or pipelines. Expansion of our activities into new areas may present challenges and risks that we have not faced in the past. If we do not manage these challenges and risks successfully, our results of operations and financial condition could be adversely affected.

Reliance on Reserve Estimates

In determining the purchase price of acquisitions, we rely on both internal and external assessments relating to estimates of reserves that may prove to be materially inaccurate. Such reliance could adversely affect the market price of our Common Shares and payment of dividends to Shareholders.

The price we are willing to pay for reserve acquisitions is based largely on estimates of the reserves to be acquired. Actual reserves could vary materially from these estimates. Consequently, the reserves we acquire may be less than expected, which could adversely impact cash flows and dividends to Shareholders. An initial assessment of an acquisition may be based on a report by engineers or firms of engineers that have different evaluation methods and approaches than those of our engineers, and these initial assessments may differ significantly from our subsequent assessments.

Operational Matters

Some of our properties are not operated by us and, therefore, results of operations may be adversely affected by the failure of third-party operators, which could affect the market price of our Common Shares and dividends to Shareholders.

The continuing production from a property, and to some extent the marketing of that production, is dependent upon the ability of the operators of those properties. At December 31, 2009, approximately 14% of our daily production was from properties operated by third parties. To the extent a third-party operator fails to perform its functions efficiently or becomes insolvent, our revenue may be reduced. Third party operators also make estimates of future capital expenditures more difficult.

Further, the operating agreements which govern the properties not operated by us typically require the operator to conduct operations in a good and “workmanlike” manner. These operating agreements generally provide, however, that the operator has no liability to the other non-operated working interest owners, such as Shareholders, for losses sustained or liabilities incurred, except for liabilities that may result from gross negligence or wilful misconduct.

Delays in Business Operations

Delays in business operations could adversely affect dividends to Shareholders and the market price of our Common Shares. In addition to the usual delays in payment by purchasers of oil and natural gas to the operators of our properties, and the delays of those operators in remitting payment to us, payments between any of these parties may also be delayed by:

- restrictions imposed by lenders;
- accounting delays;
- delays in the sale or delivery of products;
- delays in the connection of wells to a gathering system;
- restrictions due to limited pipeline capacity;
- blowouts or other accidents;
- adjustments for prior periods;
- recovery by the operator of expenses incurred in the operation of the properties; or
- the establishment by the operator of reserves for these expenses.

Any of these delays could reduce the amount of cash available for dividends to Shareholders in a given period and expose us to additional third party credit risks.

Counterparty Risk

Although the Corporation monitors the credit worthiness of third parties it contracts with through a formal risk management policy and maintains third party credit insurance, there can be no assurance that the Corporation will not experience a loss for non-performance by any

counterparty with whom it has a commercial relationship. Such events may result in material adverse consequences on the business of the Corporation.

In early 2009, the Corporation purchased trade credit insurance to partially protect against credit risk with financial counterparties.

Debt Service

We may, from time to time, finance a significant portion of our operations through debt. Our indebtedness may limit the timing or amount of the dividends that are paid to Shareholders, and could affect the market price of our Common Shares.

The payments of interest and principal, and other costs, expenses and disbursements to our lenders reduces amounts available for dividends to Shareholders. Variations in interest rates and scheduled principal repayments could result in significant changes to the amount of the cash flow required to be applied to the debt before payment of any amounts to the Shareholders. The agreements governing our credit facility provide that if we are in default under the credit facility or fail to comply with certain covenants, we must repay the indebtedness at an accelerated rate, and the ability to make payment of dividends to Shareholders may be restricted.

If we are unable to pay the debt service charges or otherwise commit an event of default, such as bankruptcy, our lenders may receive a judgment and have an unsecured claim on the properties. The proceeds of any sale would be applied to satisfy amounts owed to the creditors. Only after the proceeds of that sale were applied towards the debt would the remainder, if any, be available for dividends to Shareholders.

Potential Future Obligation to Issue Common Shares

Under the terms of the unanimous shareholders' agreement governing Shelter Bay (the "**Shelter Bay USA**") and the unanimous shareholders' agreement amending agreement (the "**Shelter Bay USA Amending Agreement**"), the Corporation has a right to purchase all, but not less than all, of the shares of Shelter Bay not already owned by the Corporation (the "**Call Right**") at a price equal to the market value of the shares, as defined in the Shelter Bay USA. The Call Right is exercisable at (i) any time before April 1, 2011, provided that the proceeds from such a transaction (including cumulative dividends) would result in the initial investors in Shelter Bay receiving realized proceeds equal to at least two times the amount of the aggregate capital invested by the initial investors and the Corporation in Shelter Bay, or (ii) any time on or after April 1, 2011 and on or before March 31, 2013. In certain circumstances where the initial shareholders have received a return on investment in excess of 25%, the purchase price will be reduced by an amount equal to a performance incentive paid to the Corporation and those Corporation employees who assist the Corporation in providing services to Shelter Bay.

Upon exercise of the Call Right, and acceptance by 66 2/3% or greater of the shares held by Shelter Bay shareholders (excluding the Corporation), the Corporation will have the right to acquire all of the Shelter Bay shares it does not own. In the event of acceptance by less than 66 2/3% of the shares held by Shelter Bay shareholders (excluding the Corporation), the Corporation shall have the right to purchase all of the assets of Shelter Bay for 105% of the market value of the assets, as defined in the Shelter Bay USA.

Also under the Shelter Bay USA, between April 1, 2013 and September 30, 2013, certain Shelter Bay shareholders shall have a separate right to require that the Corporation acquire all of the shares of Shelter Bay then owned by such shareholder for a purchase price equal to 85% of the market value of such shares, as defined in the Shelter Bay USA (the "**Put Right**"). If the Put Right is exercised, the Corporation will be obligated to provide all of the other shareholders in Shelter Bay with a similar right to put their shares to the Corporation on the same terms.

The purchase price for the Shelter Bay shares may be settled, at the Corporation's election, in cash or the issuance of Common Shares; however, the Shelter Bay shareholders shall have certain rights to receive their consideration for their Shelter Bay shares in the form of Common Shares.

Given the terms of the Shelter Bay USA, there can be no assurance that the Corporation will not be required to, or will not elect to purchase the shares of Shelter Bay not already owned by the Corporation or the assets of Shelter Bay and further, there can be no assurance that the Corporation will have the capital resources to satisfy such Call Right or Put Right or that it will be able to issue Common Shares to Shelter Bay shareholders in association with the exercise of the Call Right or Put Right described herein, which number of Common Shares may be material to the Corporation at the time of issuance and which issuance may be dilutive to existing holders of Common Shares at such time.

Liquidity

Our current credit facilities and any replacement credit facilities may not provide sufficient liquidity. The amounts available under our existing credit facilities may not be sufficient for future operations, or we may not be able to obtain additional financing on economic terms attractive to us, if at all. We currently have a syndicated \$1.5 billion extendible revolving loan facility (the "**Credit Facility**") with certain banks and a \$100 million operating loan facility with one Canadian chartered bank. The interest charged on the Credit Facility is calculated based on a sliding scale ratio of the Corporation's senior debt to EBITDA ratio. Repayment of all outstanding amounts under the syndicated credit facility may be demanded on relatively short notice if an event of default occurs, which is continuing. If this occurs, we may need to obtain alternate financing.

Any failure to obtain suitable replacement financing may have a material adverse effect on our business, and dividends to Shareholders may be materially reduced.

Competition

The oil and natural gas industry is highly competitive. We compete for capital, acquisitions of reserves, undeveloped lands, skilled personnel, access to drilling rigs, service rigs and other equipment, access to processing facilities, pipeline and refining capacity and in many other respects with a substantial number of other organizations, many of which may have greater technical and financial resources than we do. Some of these organizations not only explore for, develop and produce oil and natural gas but also carry on refining operations and market oil and other products on a worldwide basis. As a result of these complementary activities, some of our competitors may have greater and more diverse competitive resources to draw on than we do. Given the highly competitive nature of the oil and natural gas industry, this could adversely affect the market price of our Common Shares and dividends to Shareholders.

Operational Hazards and the Availability of Insurance

The industry in which we operate exposes us to potential liabilities that may not be covered by insurance. Our operations are subject to all of the risks associated with the operation and development of oil and natural gas properties, including the drilling of oil and natural gas wells, and the production and transportation of oil and natural gas. These risks include encountering unexpected formations or pressures, premature declines of reservoirs, blow-outs, equipment failures and other accidents, cratering, sour gas releases, uncontrollable flows of oil, natural gas or well fluids, adverse weather conditions, pollution, other environmental risks, fires and spills. A number of these risks could result in personal injury, loss of life, or environmental and other damage to our property or the property of others. We cannot fully protect against all of these risks, nor are all of these risks insurable. We may become liable for damages arising from these events against which we cannot insure or against which we may elect not to insure because of high premium costs or other reasons. Any costs incurred to repair these damages or pay these liabilities would reduce funds available for payment of dividends to Shareholders.

Environmental Concerns

Many aspects of the oil and natural gas business present environmental risks and hazards, including the risk that Crescent Point may be in non-compliance with an environmental law, regulation, permit, licence, or other regulatory approval, possibly unintentionally or without knowledge. Such risks may expose Crescent Point to fines or penalties, third party liabilities or to the requirement to remediate, which could be material. The operational hazards associated with possible blowouts, accidents, oil spills, gas leaks, fires, or other damage to a well or a pipeline may require Crescent Point to incur costs and delays to undertake corrective actions, and could result in environmental damage or contamination for which Crescent Point could be liable. Oil and gas operations are also subject to specific operational risks which may have a material operational and financial impact on Crescent Point should they occur, such as drilling into unexpected formations or unexpected pressures; premature decline of reservoirs; and water invasion into producing formations.

Compliance with environmental laws and regulations could materially increase our costs. We may incur substantial capital and operating costs to comply with increasingly complex laws and regulations covering the protection of the environment and human health and safety. In particular, we may be required to incur significant costs to comply with future federal GHG emissions reduction requirements or other GHG emissions regulations compliance costs, if enacted. Although we record a provision in our financial statements relating to our estimated future environmental and reclamation obligations, we cannot guarantee that we will be able to satisfy our actual future environmental and reclamation obligations.

Although the Corporation maintains insurance consistent with prudent industry practice, we are not fully insured against certain environmental risks, either because such insurance is not available or because of high premium costs. In particular, insurance against risks from environmental pollution occurring over time (as opposed to sudden and catastrophic damages) is not available on economically reasonable terms.

Accordingly, our properties may be subject to liability due to hazards that cannot be insured against, or that have not been insured against due to prohibitive premium costs or for other reasons. It is also possible that changing regulatory requirements or emerging jurisprudence could render such insurance of less benefit to Crescent Point. Any site reclamation or abandonment costs actually incurred in the ordinary course of business in a specific period will be funded out of our reclamation fund and, if required, out of cash flow and, therefore, will reduce the amounts available for payment of dividends to Shareholders. Should we be unable to fully fund the cost of remedying an environmental problem, we might be required to suspend operations or enter into interim compliance measures pending completion of the required remedy.

Unforeseen Title Defects

Unforeseen title defects may result in a loss of entitlement to production and reserves. Although we conduct title reviews in accordance with industry practice prior to any purchase of resource assets, such reviews do not guarantee that an unforeseen defect in the chain of title will not arise and defeat our title to the purchased assets. If such a defect were to occur, our entitlement to the production from such purchased assets could be jeopardized and, as a result, dividends to Shareholders may be reduced.

Aboriginal Land Claims

The economic impact on us of claims of aboriginal title is unknown. Aboriginal people have claimed aboriginal title and rights to a substantial portion of western Canada. We are unable to assess the effect, if any, that any such claim would have on our business and operations.

Changes in Tax and Other Laws

Changes in tax and other laws may adversely affect Shareholders. Income tax laws, other laws or government incentive programs relating to the oil and gas industry, such as the treatment of mutual fund trusts and resource allowance, may in the future be changed or interpreted in a manner that adversely affects the Corporation and Shareholders. Tax authorities having jurisdiction over the Corporation or the Shareholders may disagree with the manner in which we calculate our income for tax purposes or could change their administrative practices to our detriment or the detriment of Shareholders.

Changes to Accounting Policies, including the Adoption of International Financial Reporting Standards (“IFRS”)

In February 2008, the CICA Accounting Standards Board confirmed that IFRS will replace Canadian generally accepted accounting principles (“GAAP”) in 2011 for Canadian publicly accountable enterprises. While IFRS uses a conceptual framework similar to Canadian GAAP, there are significant differences that are being evaluated. The implementation of IFRS may result in significant adjustments to our financial statements, which could negatively impact our business. At this time, Crescent Point cannot reasonably quantify the full impact that adopting IFRS will have on its financial statements.

Market Factors

Changes in market-based factors may adversely affect the trading price of our Common Shares. The market price of our Common Shares is primarily a function of anticipated dividends to Shareholders and the value of our properties. The market price of our Common Shares is therefore sensitive to a variety of market based factors, including, but not limited to, interest rates and the comparability of our Common Shares to other yield oriented securities. Any changes in these market-based factors may adversely affect the trading price of the Common Shares.

Ability to Pay Dividends

Any future dividends will be reviewed by the board of directors and adjusted from time to time to reflect current business conditions. The ability of the Corporation to pay dividends and the actual amount of such dividends will be dependent upon, among other things, the financial performance of the Corporation and its subsidiaries, its debt covenants and obligations, its ability to refinance its debt obligations on similar terms and at similar interest rates, its working capital requirements, its future tax obligations and its future capital requirements.

Availability of Future Debt and Equity Financing

The success of Crescent Point’s business in the future is dependant on its ability to obtain debt and equity financing to maintain and grow its operations. As a growth oriented corporation, Crescent Point continues to invest in property, plant and equipment to grow its operations. This investment requires adequate financing that Crescent Point obtains through both internal operating cash flows and external debt and equity financings. There can be no assurance additional financing will be available in the future when needed or on terms acceptable to Crescent Point. The inability to access financing to support future growth opportunities could limit Crescent Point’s future growth and have a material adverse impact on Crescent Point’s liquidity position, including its ability to pay obligations as they come due.

Loss of Key Personnel

Our operations are entirely independent from the Shareholders and loss of key management and other personnel could impact our business. Shareholders are entirely dependent on our management with respect to the acquisition of oil and gas properties and assets, the development and acquisition of additional reserves, the management and administration of all matters relating to our oil and natural gas properties. The loss of the services of key individuals who currently comprise the management team could have a detrimental effect on the Corporation. Investors should carefully consider whether they are willing to rely on the existing management before investing in the Common Shares.

Dilution

There may be future dilution. One of our objectives is to continually add to our reserves through acquisitions and through development. Since we do not reinvest a material portion of our cash flow, our success is, in part, dependent on our ability to raise capital from time to time by selling additional Common Shares. Shareholders will suffer dilution as a result of these offerings if, for example, the cash flow, production or reserves from the acquired assets do not reflect the additional number of Common Shares issued to acquire those assets. Shareholders may also suffer dilution in connection with future issuances of Common Shares to effect acquisitions.

Availability of an Active Market for the Common Shares

There may not always be an active trading market for the Common Shares. While there is currently an active trading market for our Common Shares in Canada, we cannot guarantee that an active trading market will be sustained.

Failure to Realize Anticipated Benefits of Prior Acquisitions

The Corporation, and the Trust prior to the Conversion Arrangement, have completed a number of acquisitions since December 31, 2008, which acquisitions were completed to strengthen its position in the oil and natural gas industry and to create the opportunity to realize certain benefits, including, among other things, potential cost savings. In order to achieve the benefits of these and future acquisitions, the Corporation will be dependent upon its ability to successfully consolidate functions and integrate operations, procedures and personnel in a timely and efficient manner and to realize the anticipated growth opportunities and synergies from combining the acquired assets and operations with those of the Corporation. The integration of acquired assets and operations requires the dedication of management effort, time and resources, which may divert management's focus and resources from other strategic opportunities and from operational matters during this process. The integration process may result in the disruption of ongoing business and customer relationships that may adversely affect the Corporation's ability to achieve the anticipated benefits of such prior acquisitions.

Possible Failure to Realize Anticipated Benefits of the Conversion

Achieving the anticipated benefits of the Conversion Arrangement will depend in part on the Corporation's ability to realize the anticipated growth opportunities from reorganizing the Corporation into a corporate structure. The realization of the anticipated benefits of the conversion will require the dedication of substantial management effort, time and resources. There can be no assurance that management will be successful in refocusing the continuing entity into a growth-oriented entity.

DIVIDENDS

The Corporation has established a dividend policy of paying monthly dividends to Shareholders. An objective of the Corporation's dividend policy is to provide Shareholders with relatively stable and predictable monthly dividends. An additional objective is to retain a portion of cash flow to fund ongoing development and optimization projects designed to enhance the sustainability of the Corporation's cash flow.

The amount of cash dividends to be paid on the Common Shares, if any, will be subject to the discretion of the Board of Directors and may vary depending on a variety of factors, including the prevailing economic and competitive environment, results of operations, fluctuations in working capital, the price of oil and gas, the taxability of Crescent Point, Crescent Point's ability to raise capital, the amount of capital expenditures and other conditions existing from time to time. There can be no guarantee that Crescent Point will maintain its dividend policy.

Although the Corporation strives to provide Shareholders with stable and predictable cash flows, the percentage of cash flow from operations paid to Shareholders each month may vary according to a number of factors, including, fluctuations in resources prices, exchange rates and production rates, reserves growth, the size of development drilling programs and the portion thereof funded from cash flow and the overall level of debt of the Corporation.

The agreements governing the Credit Facilities provide that distributions to Shareholders are not permitted if the Corporation is in default of such Credit Facilities or the payment of such distribution would cause an event of default.

In 2009 the Corporation's payout ratio on a per Common Share diluted basis was 67%.

The following table sets forth the amount of monthly cash distributions paid per Trust Unit by the Trust for the periods indicated.

	Distribution per Trust Unit
January 2007 – December 2007	\$0.20
January 2008 – May 2008	\$0.20
June 2008 – December 2008	\$0.23
January 2009 – July 2009	\$0.23

The following table sets forth the amount of monthly cash dividends paid per Common Share by the Corporation for the periods indicated.

	Dividend per Common Share
July 2009 – December 2009	\$0.23

The Corporation pays cash dividends on the 15th day of each month (or the first business day thereafter) to Shareholders of record on the immediately preceding dividend record date.

MARKET FOR SECURITIES

The outstanding Common Shares are traded on the TSX under the trading symbol “CPG”. Prior to the Conversion Arrangement, the Trust Units were listed for trading on the TSX under the symbol “CPG.UN”.

The following table sets forth the price range and trading volume of the Trust Units as reported by the TSX for the periods indicated.

	<u>High (\$)</u>	<u>Low (\$)</u>	<u>Volume (000s)</u>
<u>2009</u>			
January	27.41	21.87	14,112
February.....	24.19	20.49	13,657
March.....	28.00	21.52	23,099
April	29.17	25.45	11,827
May.....	32.25	28.25	12,752
June	34.32	29.98	13,294
July 1-6 ⁽²⁾	33.92	31.60	4,469

Notes:

- (1) The Trust Units commenced trading on the TSX on September 10, 2003.
- (2) Upon completion of the Conversion Arrangement, the Trust Units were delisted on July 6, 2009.

The following table sets forth the price range and trading volume of the Common Shares as reported by the TSX for the periods indicated.

	<u>High (\$)</u>	<u>Low (\$)</u>	<u>Volume (000's)</u>
<u>2009</u>			
July 7-31 ⁽¹⁾	35.98	30.58	20,863
August	37.74	33.45	19,115
September	38.23	35.52	19,031
October	38.80	34.85	21,696
November	39.97	36.52	23,122
December	39.80	38.20	15,733
<u>2010</u>			
January	39.70	37.68	18,956
February	39.44	37.06	13,039
March (1-30)	39.50	38.44	14,290

Note:

- (1) Upon completion of the Conversion Arrangement, the Common Shares commenced trading on the TSX on July 7, 2009.

CONFLICTS OF INTEREST

Circumstances may arise where members of the board of directors or officers of the Corporation are directors or officers of corporations which are in competition to the interests of the Corporation. No assurances can be given that opportunities identified by such board members or officers will be provided to the Corporation. In accordance with the ABCA, a director or officer who is a party to a material contract or proposed material contract with the Corporation or is a director or an officer of or has a material interest in any person who is a party to a material contract or proposed material contract with the Corporation shall disclose to the Corporation the nature and extent of the director's or officer's interest. In addition, a director shall not vote on any resolution to approve a contract of the nature described except in limited circumstances. Management of the Corporation is not aware of any existing or potential material conflicts of interest between the Corporation or a subsidiary of the Corporation and a director or officer of the Corporation or any other subsidiary of the Corporation.

Mr. Greg Turnbull, a director of the Corporation and Mr. Mark Eade, an officer of the Corporation, are each partners of McCarthy Tétrault LLP, a law firm that provides services to the Corporation and its subsidiaries. The board of directors of the Corporation do not believe that any of the activities undertaken by either of Messrs. Turnbull or Eade or by McCarthy Tétrault LLP interfere, or could be perceived to interfere, in any material way with their ability to act with a view to the best interests of the Corporation.

LEGAL PROCEEDINGS

There are no outstanding legal proceedings material to the Corporation to which we are a party or in respect of which any of our properties are subject, nor are any such proceedings known to be contemplated.

AUDIT COMMITTEE

General

The Corporation has established an Audit Committee (the “**Audit Committee**”) comprised of three members: Gerald A. Romanzin (Chair), D. Hugh Gillard and Peter N. Bannister, each of whom is considered “independent” and “financially literate” within the meaning of Multilateral Instrument 52-110 – Audit Committees.

Mandate of the Audit Committee

The mandate of the Audit Committee is to assist the board or directors of the Corporation in its oversight of the integrity of the financial and related information of the Corporation and their subsidiaries and related entities, including the financial statements, internal controls and procedures for financial reporting and the processes for monitoring compliance with legal and regulatory requirements. In doing so, the Audit Committee oversees the audit efforts of our external auditors and, in that regard, is empowered to take such actions as it may deem necessary to satisfy itself that our external auditors are independent of us. It is the objective of the Audit Committee to have direct, open and frank communications throughout the year with management, other Committee chairmen, the external auditors, and other key committee advisors or the Corporation’s staff members, as applicable.

The Audit Committee’s function is oversight. Management of the Corporation is responsible for the preparation, presentation and integrity of the financial statements of the Corporation. Management is responsible for maintaining appropriate accounting and financial reporting principles and policy and internal controls and procedures that provide for compliance with accounting standards and applicable laws and regulations.

While the Audit Committee has the responsibilities and powers set forth above, it is not the duty of the Audit Committee to plan or conduct audits or to determine whether the financial statements of the Corporation are complete and accurate and are in accordance with generally accepted accounting principles. This is the responsibility of management and the external auditors, on whom the members of the Committee are entitled to rely upon in good faith.

The Audit Committee Terms of Reference are attached hereto as Appendix A.

Relevant Education and Experience of Audit Committee Members

The following is a brief summary of the education or experience of each member of the Audit Committee that is relevant to the performance of his responsibilities as a member of the Audit Committee, including any education or experience that has provided the member with an understanding of the accounting principles used by us to prepare our annual and interim financial statements.

Name of Audit Committee Member	Relevant Education and Experience
Gerald A. Romanzin	<p>Gerald Romanzin is an independent Calgary businessman who serves as a director of Petrowest Energy Services Ltd. and Trimac Transportation Services Inc. He also serves as a trustee of Trimac Income Fund and a member of the independent advisory committee for Titan Funds Incorporated. Formerly, Mr. Romanzin served as a member of FET Resources Ltd., Ketch Resources Ltd., Ketch Resources Trust, Cadence Energy Inc., Kereco Energy Ltd. and Flowing Energy Corp. Mr. Romanzin was the Executive Vice President of the TSX Venture Exchange from November 1999 to April 2002 where he was responsible for overseeing the Corporate Finance group and regional operations. In addition, he assumed the role of Acting President of the TSX Venture Exchange from December 2001 to April 2002. Mr. Romanzin is a chartered accountant and was a financial analyst with the Alberta Securities Commission for four years prior to joining the Alberta Stock Exchange in 1987. Mr. Romanzin was the Executive Vice President of the Alberta Stock Exchange from June 1995 to its change to the TSX Venture Exchange in November 1999.</p> <p>Mr. Romanzin obtained a Bachelor of Commerce degree from the University of Calgary and is a member of the Institute of Chartered Accountants of Alberta.</p>
D. Hugh Gillard	<p>Mr. Gillard has over thirty-five years of business experience in the oil and gas industry and is the Principal of Saddleback Resources Ltd., a private company involved in equity investments and advisory roles in the energy sector. From June 2003 to March 2006, he was President, Chief Executive Officer and a director of Kelso Energy Inc., a publicly traded junior oil and gas company. Kelso Energy Inc. subsequently merged with COSTA Energy Ltd. where</p>

Name of Audit Committee Member	Relevant Education and Experience
	<p>he continued to serve as a director until December 2006. From 1999 to 2000 he was President, Chief Operating Officer and a director of PrimeWest Energy Trust. From 1990 to 1998, he was employed by CanWest Gas Marketing Inc., a private producer owned gas marketing company. During this period Mr. Gillard initially served as Vice President, Gas Supply and then later as President and Chief Executive Officer. From 1972 to 1989, he held several senior positions with Ashland Oil Canada, Dome Petroleum and Amoco Canada.</p> <p>Mr. Gillard currently also serves as a director (Chairman) of Petrowest Energy Services Trust, a publicly traded entity. He also served as a director of Creststreet Power Income Fund from April 2006 to June 2008 and as a director of Point North Energy Ltd. from October 2005 to November 2006.</p> <p>Mr. Gillard is a graduate of the University of Calgary (Commerce) and the Stanford Business School Executive Program. He is a past member of the Management Advisory Council (University of Calgary).</p>
Peter N. Bannister	<p>Peter Bannister is the President of Destiny Energy Inc., a privately-owned oil and gas company. Mr. Bannister is also currently Chairman of the Board of the Corporation, a Director of Cequence Energy Ltd. and Shelter Bay Energy Inc. Mr. Bannister was a Director of Breaker Energy until its sale in December 2009. Until its sale in February 2007, Mr. Bannister was Vice President Exploration and a Director of Mission. Prior to joining Mission, he was Vice President Exploration of StarPoint Energy Inc. before its conversion to a royalty trust and President and a director of Impact Energy Inc. Mr. Bannister previously held the position of Vice President Corporate Development of Startech Energy Ltd. until it was acquired by ARC Resources Trust at the end of 2000 and also held positions as Vice President Exploration and Development and Director of both Boomerang Resources Ltd. and Laurasia Resources Limited, both publicly traded oil and gas companies. Mr. Bannister's experience prior to his involvement in public oil and gas companies was as a partner of Sproule Associates Limited, a worldwide petroleum consulting firm specializing in the evaluation of oil and gas properties where he spent twelve years specializing in oil and gas property evaluations and managing private equity investments in the oil and gas business in Western Canada. Mr. Bannister graduated in 1981 with a Bachelor of Science in Geology and has twenty-nine years of oil and gas related experience.</p>

External Auditor Services Fees

For services provided to the Corporation and its subsidiaries the years ended December 31, 2009 and 2008 PricewaterhouseCoopers LLP billed approximately \$625,000 and \$348,200, respectively, as detailed below:

	Year ended December 31	
	2009	2008
PricewaterhouseCoopers		
Audit fees	\$ 346,000	\$ 212,500
Audit-related fees ⁽¹⁾	\$ 240,600	\$ 105,700
Tax Fees	\$ 5,000	\$ -
All other fees	\$ 33,400	\$ 30,000
Total	<u>\$ 625,000</u>	<u>\$ 348,200</u>

Note:

(1) Fees include the costs related to public financings and related reporting to regulators.

The Chairman of the Audit Committee has the authority to pre-approve non-audit services which may be required from time to time.

Audit Committee Oversight

At no time since the commencement of our most recently completed financial year, has a recommendation of the Audit Committee to nominate or compensate an external auditor not been adopted by the board of directors of the Corporation.

INTEREST OF MANAGEMENT AND OTHERS IN MATERIAL TRANSACTIONS

As at March 30, 2010, the directors and executive officers as a group beneficially owned, directly or indirectly, or exercised control or direction over 6,402,356 common shares of Shelter Bay, representing approximately 0.8% of the issued and outstanding Shelter Bay common shares. See "Our Organizational Structure – Shelter Bay", "General Development of Our Business of the Corporation – History" and "Risk Factors – Risks Relating to the Corporation's Investment in Shelter Bay".

TRANSFER AGENT AND REGISTRARS

Our auditors are PricewaterhouseCoopers LLP, Chartered Accountants, 3100, 111 – 5th Avenue S.W., Calgary, Alberta, T2P 5L3.

The transfer agent and registrar for our Common Shares is Olympia Trust Company in Calgary, Alberta.

MATERIAL CONTRACTS

Set out below are agreements that may be considered material to us:

1. Premium Dividend and Dividend Reinvestment Plan. See “Additional Information Respecting Crescent Point – Premium Dividend and Dividend Reinvestment Plan”.
2. Shelter Bay USA. See “*Potential Future Obligation to Issue Common Shares*”.
3. Shelter Bay USA Amending Agreement. See “*Potential Future Obligation to Issue Common Shares*”.
4. Shelter Bay Management and Technical Services Agreement. See “*Our Organizational Structure – Shelter Bay*”.

INTERESTS OF EXPERTS

PricewaterhouseCoopers LLP, the auditors of the Corporation, has audited the consolidated financial statements of the Corporation for the year ended December 31, 2009, as forth in the Annual Consolidated Financial Statements of the Corporation. PricewaterhouseCoopers LLP has confirmed that it is independent of the Corporation, in accordance with the relevant rules and related interpretation prescribed by the Institute of Chartered Accountants of Alberta.

Reserve estimates contained in this AIF are derived from reserve reports prepared by GLJ and Sproule. As of the date hereof, GLJ, as a group and Sproule, as a group, do not beneficially own, directly or indirectly, any Common Shares.

ADDITIONAL INFORMATION

Additional financial information is available on SEDAR at www.sedar.com and on our website at www.crescentpointenergy.com.

Additional information including directors’ and officers’ remuneration and indebtedness, principal holders of the Corporation’s securities, options to purchase securities and securities authorized for issuance under equity compensation plans, if applicable, is contained in our information circular in respect of the annual and special meeting of Unitholders held on June 29, 2009. Additional financial information is provided in our comparative financial statements and management’s discussion and analysis for our most recently completed financial year ended December 31, 2009.

For additional copies of this AIF please contact:

Crescent Point Energy Corp.

APPENDIX A

AUDIT COMMITTEE TERMS OF REFERENCE

Corporate Policies & Procedures

I. The Board of Directors' Mandate for the Audit Committee

1. **The Board of Directors** ("Board") has responsibility for the stewardship of Crescent Point Corp. ("Crescent Point") and its subsidiaries or related entities (collectively referred to herein as the "Corporation"). To discharge that responsibility, the Board is obligated by the Alberta Business Corporations Act to supervise the management of the business and affairs of the Corporation. The Board's supervisory function involves Board oversight or monitoring of all significant aspects of the management of the Corporation's business and affairs.

Public financial reporting and disclosure by the Corporation are fundamental to the Corporation's business and affairs and to its status as a publicly listed enterprise. The objective of the Board's monitoring of the Corporation's financial reporting and disclosure is to gain reasonable assurance of the following:

- (a) that the Corporation complies with all applicable laws, regulations, rules, policies and other requirements of governments, regulatory agencies and stock exchanges relating to financial reporting and disclosure;
- (b) that the accounting principles, significant judgements and disclosures which underlie or are incorporated in the Corporation's financial statements are the most appropriate in the prevailing circumstances;
- (c) that the Corporation's quarterly and annual financial statements and Annual Information Forms ("AIF") are accurate within a reasonable level of materiality and present fairly the Corporation's financial position and performance in accordance with generally accepted accounting principles ("GAAP"); and
- (d) that appropriate information concerning the financial position and performance of the Corporation is disseminated to the public in a timely manner in accordance with corporate and securities law and with stock exchange regulations.

The Board is of the view that monitoring of the Corporation's financial reporting and disclosure policies and procedures cannot be reliably met unless the following activities (the "Fundamental Activities") are conducted effectively:

- (i) the Corporation's accounting functions are performed in accordance with a system of internal financial controls designed to capture and record properly and accurately all of the Corporation's financial transactions and properly certified;
- (ii) the internal financial controls are regularly assessed for effectiveness and efficiency;
- (iii) the Corporation's quarterly and annual financial statements are properly prepared by management to comply with GAAP; and
- (iv) the Corporation's quarterly and annual financial statements and Management Discussion and Analysis ("MD&A") are reported on by an external auditor appointed by the securityholders of the Corporation.

To assist the Board in its monitoring of the Corporation's financial reporting and disclosure and to conform to applicable corporate and securities law, the Board has established the Audit Committee (the "Committee") of the Board.

2. Role of the Committee

The role of the Committee is to assist the Board in its oversight of the integrity of the financial and related information of the Corporation, including its financial statements, the internal controls and procedures for financial reporting and the processes for monitoring compliance with legal and regulatory requirements and to review the independence, qualifications and performance of the external auditor of the Corporation. Management is responsible for establishing and maintaining those controls, procedures and processes and the Committee is appointed by the Board to review and monitor them.

3. Composition of Committee

- (a) **Size** The Committee shall be appointed annually by the Board and consist of at least three members from among the directors of the Corporation.
- (b) **Qualifications** – All members of the committee (the “Members”) must be “independent” under Multilateral Instrument 52-110. All Members must be “financially literate” (i.e., have the ability to read and understand a balance sheet, an income statement and a cash flow statement). At least one Member of the Committee should have “accounting or related financial expertise” (i.e., the ability to analyze and interpret a full set of financial statements, including the notes attached thereto, in accordance with Canadian GAAP).
- (c) The Board shall designate the Chairman of the Committee.
- (d) In the event of a vacancy arising in the Committee or a loss of independence of any Member, the Committee will fill the vacancy within six weeks or by the following annual shareholders’ meeting if sooner.

4. Reliance on Experts

In contributing to the Committee’s discharging of its duties under this mandate, each Member of the Committee shall be entitled to rely in good faith upon:

- (a) financial statements of the Corporation represented to him by an officer of the Corporation or in a written report of the external auditors to present fairly the financial position of the Corporation in accordance with GAAP; and
- (b) any report of a lawyer, accountant, engineer, appraiser or other person whose profession lends credibility to a statement made by any such person.

5. Limitations on The Committee’s Duties

In contributing to the Committee’s discharging of its duties under Terms of Reference, each Member shall be obliged only to exercise the care, diligence and skill that a reasonably prudent person would exercise in comparable circumstances. Nothing in these Terms of Reference is intended, or may be construed, to impose on any Member a standard of care or diligence that is in any way more onerous or extensive than the standard to which all Board members are subject. The essence of the Committee’s duties is monitoring and reviewing to gain reasonable assurance (but not to ensure) that the Fundamental Activities are being conducted effectively and that the objectives of the Corporation’s financial reporting are being met and to enable the Committee to report thereon to the Board.

II. Audit Committee Terms of Reference

These Terms of Reference outline how the Committee will satisfy the requirements set forth by the Board in its mandate.

1. Operating Principles

The Committee shall fulfill its responsibilities within the context of the following principles.

Committee Values

The Committee expects the management of the Corporation to operate in compliance with corporate policies; reflecting laws and regulations governing the Corporation; and to maintain strong financial reporting and control processes.

Communications

The Committee and its Members expect to have direct, open and frank communications throughout the year with management, other Committee Chairmen, the external auditors, and other key Committee advisors or Company staff members as applicable.

Annual Audit Committee Plan

The Committee, in consultation with management and the external auditors, shall develop an annual Audit Committee plan responsive to the Committee's responsibilities as set out in these Terms of Reference. In addition, the Committee, in consultation with management and the external auditors, shall develop and participate in a process for review of important financial topics that have the potential to impact the Corporation's financial disclosure.

The plan will be focused primarily on the annual and interim financial statements and MD&A of the Corporation; however, the Committee may at its sole discretion, or the discretion of the Board, review such other matters as may be necessary to satisfy the Committee's Terms of Reference.

Meeting Agenda

Committee meeting agendas shall be the responsibility of the Chairman of the Committee in consultation with other Members, senior management and the external auditors.

Committee Expectations and Information Needs

The Committee shall communicate its expectations to management and the external auditors with respect to the nature, timing and extent of its information needs. The Committee expects that written materials will be received from management and the external auditors at a reasonable time in advance of meeting dates.

Access to Independent Advisors

To assist the Committee in discharging its responsibilities, the Committee may at its discretion, in addition to the external auditors, at the expense of the Corporation, retain one or more persons, firms or corporations having special expertise.

In Camera Meetings

At the discretion of the Committee, the Members shall meet in private session with the external auditors and with management only.

Reporting to the Board

The Committee, through its Chairman, shall report after each Committee meeting to the Board at the Board's next regular meeting.

Evaluation

The Committee will conduct and present to the Board an annual evaluation of the performance of the Committee and the adequacy of these Terms of Reference and recommend any proposed changes to the Board for approval.

The External Auditors

The Committee expects that, in discharging their responsibilities to the shareholders, the external auditors shall be accountable to the Board through the Committee. The external auditors shall report all material issues or potentially material issues, either specific to the Corporation or to the financial reporting environment in general, to the Committee.

2. Operating Procedures

The Committee shall meet at least four times annually, or more frequently as circumstances dictate. Meetings shall be held at the call of the Chairman, upon the request of two (2) Members or at the request of the external auditors.

A quorum shall be a majority of the Members.

Unless the Committee otherwise specifies, the Secretary (or his or her depute) of the Corporation shall act as Secretary of all meetings of the Committee.

In the absence of the Chairman of the Committee, the Members shall appoint an acting Chairman.

A copy of the minutes of each meeting of the Committee shall be provided to each Member and to each director of the Corporation in a timely fashion.

3. Specific Responsibilities and Duties

To fulfill its responsibilities and duties, the Committee shall:

Financial Information and Reporting

- (a) Review, prior to public release, the Corporation's annual and quarterly financial statements with management and the external auditors to gain reasonable assurance that the statements are accurate within reasonable levels of materiality, complete, represent fairly the Corporation's financial position and performance and are in accordance with GAAP and report thereon to the Board before such financial statements are approved by the Board;
- (b) Receive from the external auditors reports on their review of the annual and quarterly financial statements;
- (c) Receive from management a copy of the representation letter provided to the external auditors and receive from management any additional representations required by the Committee;
- (d) Review, prior to public release, all news releases issued by the Corporation with respect to the Corporation's annual and quarterly financial statements;
- (e) Review prospectuses, material change disclosures of a financial nature, management discussion and analysis, AIF and similar disclosure documents to be issued by the Corporation;

Accounting Policies

- (a) Review with management and the external auditors the appropriateness of the Corporation's accounting policies, disclosures, reserves, key estimates and judgments, including changes or variations thereto;
- (b) Obtain reasonable assurance that the accounting policies, disclosures, reserves, key estimates and judgments are in compliance with GAAP from management and external auditors and report thereon to the Board;
- (c) Review with management and the external auditors the degree of conservatism of the Corporation's underlying accounting policies, key estimates and judgments and reserves along with quality of financial reporting;
- (d) Participate, if requested, in the resolution of disagreements between management and the external auditors;

Risk and Uncertainty

- (e) Acknowledging that it is the responsibility of the Board, in consultation with management, to identify the principal business risks facing the Corporation, determine the Corporation's tolerance for risk and approve risk management policies, the Committee shall focus on financial risk and gain reasonable assurance that financial risk is being effectively managed or controlled by:
 - (i) reviewing with management the Corporation's tolerance for financial risks;
 - (ii) reviewing with management its assessment of the significant financial risks facing the Corporation;
 - (iii) reviewing with management the Corporation's policies and any proposed changes thereto for managing those significant financial risks; and
 - (iv) reviewing with management its plans, processes and programs to manage and control such risks;

- (f) Review policies and compliance therewith that require significant actual or potential liabilities, contingent or otherwise, to be reported to the Board in a timely fashion;
- (g) Review foreign currency, interest rate and commodity price risk mitigation strategies, including the use of derivative financial instruments;
- (h) Review the adequacy of insurance coverages maintained by the Corporation;
- (i) Review regularly with management, the external auditors and the Corporation's legal counsel, any legal claim or other contingency, including tax assessments, that could have a material effect upon the financial position or operating results of the Corporation and the manner in which these matters have been disclosed in the financial statements;

Financial Controls and Control Deviations

- (a) Review the plans of the external auditors to gain reasonable assurance that the evaluation and testing of internal financial controls is comprehensive, coordinated and cost effective;
- (b) Receive regular reports from management and the external auditors on all significant deviations from GAAP or other Company internal control processes or indications which may suggest fraud and the corrective activity undertaken in respect thereto;
- (c) Institute a procedure that will permit any employee, including management employees, to bring to the attention of the Board or the Committee concerns relating to financial controls and reporting which are material in scope and which cannot be addressed, in the employee's judgement, through existing reporting structures in the Corporation.

Compliance with Laws and Regulations

- (a) Receive and review regular reports from management and others (e.g. external auditors) with respect to the Corporation's compliance with laws and regulations having a material impact on the financial statements including:
 - (i) tax and financial reporting laws and regulations;
 - (ii) legal withholding requirements; and
 - (iii) other laws and regulations which expose directors to liability;
- (b) Review the filing status of the Corporation's tax returns and those of its subsidiaries or related entities;

Relationship with External Auditors

- (a) Recommend to the Board the nomination of the external auditors;
- (b) Pre approve the remuneration and the terms of engagement of the external auditors as set forth in the Engagement Letter. The Chairman of the Committee hereby has the authority to pre approve non audit services which may be required from time to time;
- (c) Review the performance of the external auditors annually or more frequently as required;
- (d) Receive annually from the external auditors an acknowledgement in writing that the securityholders, as represented by the Board and the Committee, are their primary client;
- (e) Receive a report annually from the external auditors with respect to their independence, such report to include a disclosure of all engagements (and fees related thereto) for non audit services by the Corporation;
- (f) Review with the external auditors the scope of the audit, the areas of special emphasis to be addressed in the audit, and the materiality levels which the external auditors propose to employ;
- (g) Meet with the external auditors at least once a year in the absence of management to determine, inter alia, that no management restrictions have been placed on the scope and extent of the audit examinations by the external auditors or the reporting of their findings to the Committee;

- (h) Establish effective communication processes with management and the Corporation's external auditors to assist the Committee to monitor objectively the quality and effectiveness of the relationship among the external auditors, management and the Committee;
- (i) Establish a reporting relationship between the external auditors and the Committee such that the external auditors can bring directly to the Committee matters that, in the judgement of the external auditors, merit the Committee's attention. In particular, the external auditors will advise the Committee of any disagreements between management and the external auditors regarding financial reporting and how such disagreements were resolved;

Relationship with Internal Auditor

- (a) Review the internal audit staff functions, including:
 - (i) the purpose, authority and organizational reporting lines;
 - (ii) the annual audit plan, budget and staffing; and
 - (iii) the appointment and compensation of any person with the responsibility for the Internal Audit;
- (b) Review, with the Chief Financial Officer, controller or others, as appropriate, the Corporation's internal system of audit controls and the results of internal audits;

Other Responsibilities and Procedures

- (a) After consultation with the Chief Financial Officer and the external auditors, gain reasonable assurance, at least annually, of the quality and sufficiency of the Corporation's accounting and financial personnel and other resources;
- (b) Investigate any matters that, in the Committee's discretion, fall within the Committee's duties; and
- (c) Perform such other functions as may from time to time be assigned to the Committee by the Board.

III. Hiring Guidelines for Independent Auditor Employees

1. Guidelines

The Committee has adopted the following guidelines regarding the hiring of any partner, employee, reviewing tax professional or other person providing audit assurance to the external auditor of the Corporation on any aspect of its certification of the Corporation's financial statements:

- (a) No senior member of the audit team that is auditing a business of the Corporation can be hired into that business or into a position to which that business reports for a period of two years after the audit;
- (b) No former partner or employee of the external auditor may be made an officer of the Corporation or any of its subsidiaries for two years following association with the external auditor;
 - (i) The Chief Executive Officer must approve all office hires from the external auditor; and
 - (ii) The Chief Financial Officer must report annually to the Committee on any hires within these guidelines during the preceding year.

2. Audit Partner Rotation

The Committee will ensure that the head audit partner assigned by the external auditor to the Corporation, as well as the audit partner charged with reviewing the audit of the Corporation, are changed at least every five years.

3. Process for Handling Complaints about Accounting Matters

The Committee will establish the following procedure for the receipt and treatment of any complaint received by the Corporation regarding accounting, internal accounting controls or auditing matters:

- (a) The Corporation will publish on its website special mail and e-mail addresses and a toll-free telephone number for receiving complaints regarding accounting, internal accounting controls or auditing matters;
- (b) Copies of complaints received will be sent to the Members of the Committee;
- (c) All complaints will be investigated by the Corporation's finance and legal staffs in the normal manner, except as otherwise directed by the Committee. The Committee may request that outside advisors be retained to investigate any complaint; and
- (d) The status of each complaint will be reported on a quarterly basis to the Committee and, if the Committee so directs, to the full board.

APPENDIX B

RESERVES COMMITTEE TERMS OF REFERENCE

Corporate Policies & Procedures

1. Reserves Committee Purpose

The Reserves Committee (the “Committee”) is appointed by the Board of Directors of Crescent Point Energy Corp. (the “Board”) to assist the Board in fulfilling its responsibility for the stewardship of Crescent Point Energy Corp. (“Crescent Point”) and its subsidiaries or related entities (collectively referred to herein as the “Corporation”). The Committee’s primary duties and responsibilities are to assume responsibility for assisting the Board in respect of the annual independent review of Crescent Point’s petroleum and natural gas reserves and reporting to the Board in respect thereof.

2. Reserves Committee Composition, Procedures and Organization

The Committee shall consist of at least two directors as determined by the Board, the majority of whom shall be independent (as required by National Instrument 51-101 *Standards and Disclosure for Oil and Gas Activities* (“NI 51-101”). Committee members shall also meet the independence requirements of the regulatory bodies to which the Corporation may be subject to. The Board shall appoint the members of the Committee and may at any time remove or replace any member of the Committee and may fill any vacancy in the Committee. If a Committee Chair is not designated by the Board, or is not present at a meeting of the Committee, the members of the Committee may designate a chair by majority vote of the Committee membership. The Secretary of the Corporation, shall act as Secretary of the Committee. The quorum for meetings shall be a majority of the members of the Committee present in person or by telephone or other telecommunications device that permits all persons participating in the meeting to speak and to hear each other. The Committee shall meet at least annually at such times and at such locations as may be requested by the chair of the Committee and at such times as any member of the Committee may request.

3. Reserves Committee Responsibilities and Duties

The overall duties and responsibilities of the Committee shall be as follows:

- (a) in conjunction with the Corporation’s senior engineering management, meet with the independent evaluating engineers being considered for appointment to review their qualifications and independence to ensure the independent evaluating engineers being considered for appointment are technically qualified and competent, are independent of management and to establish the terms of their engagement;
- (b) after consultation with the Corporation’s senior engineering management, recommend to the Board the appointment of the independent evaluating engineers to assist the Corporation in the annual review of its petroleum and natural gas reserves;
- (c) in consultation with the Corporation’s senior engineering management determine the scope of the annual review of the petroleum and natural gas reserves by the independent evaluating engineers, having regard to regulatory reporting requirements;
- (d) review, with reasonable frequency, the Corporation’s procedures for providing petroleum and natural gas reserves information to the qualified independent evaluating engineers who report on reserves data for the purposes of NI 51-101, and the information used by the independent evaluating engineers to enable the independent evaluating engineers to provide a report that will meet regulatory reporting requirements;
- (e) in consultation with the Corporation’s senior engineering management and the independent evaluating engineers:

- determine whether any restrictions affect the ability of the independent evaluating engineers to report on reserve data without reservations; and
 - review the reserves data and the report of the independent evaluating engineers.
- (f) ensure the disclosure to the public on the Corporation's petroleum and natural gas reserves is in compliance with regulatory requirements;
- review any proposal to change the independent evaluating engineers and/or resolve any differences between the independent evaluating engineers and management;
 - meet on an annual basis with the Corporation's senior engineering management and/or the independent evaluating engineers of the Corporation to review and consider the evaluation of the Corporation's petroleum and natural gas reserves;
 - meet separately with the independent evaluating engineers and/or senior engineering management when the Committee deems it desirable and advise the Board on the results of such meeting;
 - co ordinate meetings with the Audit Committee of the Corporation, the Corporation's senior engineering management, independent evaluating engineers and auditors as required to address matters of mutual concern in respect of the Corporation's evaluation of petroleum and natural gas reserves;
 - review annually the Committee charter and recommend any changes to the Board; and
 - to maintain minutes of meetings and periodically report to the Board on significant results of the foregoing activities.

Appendix C

FORM 51-101F2
REPORT ON RESERVES DATA
BY
INDEPENDENT QUALIFIED RESERVES
EVALUATOR OR AUDITOR

To the board of directors of Crescent Point Energy Corp. (the "Company"):

1. We have prepared an evaluation of the Corporation's reserves data as at December 31, 2009. The reserves data are estimates of proved reserves and probable reserves and related future net revenue as at December 31, 2009 estimated using forecast prices and costs.
2. The reserves data are the responsibility of the Company's management. Our responsibility is to express an opinion on the reserves data based on our evaluation.

We carried out our evaluation in accordance with standards set out in the Canadian Oil and Gas Evaluation Handbook (the "COGE Handbook") prepared jointly by the Society of Petroleum Evaluation Engineers (Calgary Chapter) and the Canadian Institute of Mining, Metallurgy & Petroleum (Petroleum Society).

3. Those standards require that we plan and perform an evaluation to obtain reasonable assurance as to whether the reserves data are free of material misstatement. An evaluation also includes assessing whether the reserves data are in accordance with principles and definitions in the COGE Handbook.
4. The following table sets forth the estimated future net revenue (before deduction of income taxes) attributed to proved plus probable reserves, estimated using forecast prices and costs and calculated using a discount rate of 10 percent, included in the reserves data of the Company evaluated by us for the year ended December 31, 2009 and identifies the respective portions thereof that we have audited, evaluated and reviewed and reported on to the Company's board of directors:

Independent Qualified Reserves Evaluator	Description and Preparation Date of Evaluation Report	Location of Reserves (Country or Foreign Geographic Area)	Net Present Value of Future Net Revenue (before income taxes, 10% discount rate - \$MM)			
			Audited	Evaluated	Reviewed	Total
GLJ Petroleum Consultants	February 2, 2010	Canada	-	1,937	-	1,937

5. In our opinion, the reserves data respectively evaluated by us have, in all material respects, been determined and are in accordance with the COGE Handbook.
6. We have no responsibility to update our reports referred to in paragraph 4 for events and circumstances occurring after their respective preparation dates.
7. Because the reserves data are based on judgements regarding future events, actual results will vary and the variations may be material. However, any variations should be consistent with the fact that reserves are categorized according to the probability of their recovery.

Executed as to our report referred to above:

GLJ Petroleum Consultants Ltd., Calgary, Alberta, Canada, March 9, 2010
