Crescent Point Energy Trust Announces Fourth Quarter 2008 Results and Year End Reserves

March 16, 2009, CALGARY, ALBERTA. Crescent Point Energy Trust ("Crescent Point" or the "Trust") (TSX: CPG.UN) is pleased to announce its unaudited operating and financial results for the fourth quarter and year ended December 31, 2008.

FINANCIAL AND OPERATING HIGHLIGHTS

(\$000s except trust units, per trust unit and per boe amounts)	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change
Financial

The Crescent Point financial and operating results do not reflect the production or cash flows of Shelter Bay Energy Inc. ("Shelter Bay") other than the production and cash flows associated with the Trust's interests in the wells farmed out to Shelter Bay by the Trust. Crescent Point accounts for its investment in Shelter Bay using the equity method of accounting. Accordingly, the Trust records its share of Shelter Bay net income or loss in the "equity and other income" caption on the consolidated statements of operations, comprehensive income and deficit.

- (1) Funds flow from operations, payout ratio and net debt as presented do not have any standardized meaning prescribed by Canadian generally accepted accounting principles and, therefore, may not be comparable with the calculation of similar measures presented by other entities.
- (2) The per unit amounts (with the exception of per unit distributions) are the per unit – diluted amounts. The net income and funds flow per unit – diluted amounts exclude the cash portion of unit-based compensation.
- (3) The net income of \$361.4 million for the fourth quarter of 2008 includes unrealized derivative gains of \$416.8 million and net income of \$464.1 million for the year ended December 31, 2008 includes unrealized derivative gains of \$294.3 million.
- (4) Net debt includes bank indebtedness, working capital and long term investments, but excludes the risk management liabilities and assets.
- (5) Capital acquisitions represent total consideration for the transactions including bank debt and working capital assumed.
- (6) The average selling prices reported are before realized derivatives and transportation charges.
- (7) The realized derivative loss for the year ended December 31, 2008 excludes a \$34.5 million loss on the derivative crystallization of various oil contracts completed in the second quarter of 2008.
- (8) Fourth quarter 2008 funds flow from operations of \$109.6 million includes a \$19.4 million bad debt provision for SemCanada. Funds flow from operations and the net income for the year ended December 31, 2008 include the \$34.5 million loss on the derivative crystallization and \$19.4 million bad debt provision for SemCanada. Excluding these funds flow from operations for the year ended December 31, 2008 would be \$646.0 million or \$5.16 per unit – diluted, net income would be \$518.0 million or \$4.14 per unit – diluted and the payout ratio would be 50 percent and 51 percent per unit – diluted.

HIGHLIGHTS

In the fourth quarter of 2008, Crescent Point continued to execute its integrated business strategy of acquiring, exploiting and developing high quality, long life light and medium oil and natural gas properties.

- Crescent Point grew fourth quarter 2008 average daily production by 5 percent over third quarter 2008 and exceeded guidance by more than 2,800 boe/d. The Trust produced 39,554 boe/d for the quarter, up from 37,630 boe/d in the third quarter and up 19 percent from 33,351 boe/d in the fourth quarter of 2007.
- Crescent Point exceeded its original 2008 production guidance by more than 4,000 boe/d, or 13 percent, due to its expanded and successful drilling program. Including acquisitions, the Trust exceeded original guidance by more than 6,000 boe/d. Production averaged 37,397 boe/d in 2008.
- The Trust increased proved plus probable reserves by 14 percent to 191.0 million boe (“mmboe”) at year end 2008, increasing its reserve life index to 13.7 years from 13.3 years. Proved reserves also increased by 14 percent to 132.1 mmboe at year end 2008.
- Including the acquisition of Villanova Energy Corporation (“Villanova”), which closed January 15, 2009, the Trust’s reserves increased to 196.5 mmboe proved plus probable, and its reserve life index to 14.1 years.
- Crescent Point replaced 226 percent of 2008 production on a proved plus probable basis, excluding reserves added through acquisitions. This is the seventh straight year of strong positive technical reserve revisions.
- The Trust grew year end Bakken reserves by 35 percent over 2007 to 94.8 mmboe proved plus probable, which included 27.0 mmboe of technical revisions in 2008.
- Crescent Point achieved 2008 finding and development (“F&D”) costs of \$9.37 per proved plus probable boe and \$11.07 per proved boe of reserves, excluding capital expenditures on facilities, land and seismic. The Trust spent \$164.4 million in 2008 on facilities, land and seismic, approximately 36 percent of capital spending, in preparation for the long term growth of the Bakken resource play.
- Including facilities, land and seismic expenditures, F&D costs were \$14.67 per proved plus probable boe and \$17.33 per proved boe of reserves. This represents recycle ratios of 4.2 and 3.6 for proved plus probable and proved, respectively.
- Crescent Point achieved 2008 finding, development and acquisition (“FD&A”) costs of \$15.97 per proved plus probable boe and \$19.69 per proved boe, including expenditures on facilities, land and seismic. Recycle ratios were 3.9 and 3.1 for proved plus probable and proved, respectively.

Per boe, except Recycle Ratios	Proved plus Probable	Proved
F&D		
2008 cost, excluding change in FDC ⁽¹⁾	\$14.67	\$17.33
2008 average recycle ratio ⁽²⁾	4.2	3.6
2008 cost, including change in FDC	\$20.91	\$24.29
7-yr weighted avg cost, excluding change in FDC	\$9.49	\$12.85
FD&A		
2008 cost, excluding change in FDC	\$15.97	\$19.69
2008 average recycle ratio ⁽²⁾	3.9	3.1
2008 cost, including change in FDC	\$21.17	\$25.75
7-yr weighted avg cost, excluding change in FDC	\$13.85	\$18.47

(1) Future Development Capital.

(2) Based on 2008 average operating netback (excluding realized hedging losses) of \$61.70/boe.

- Crescent Point increased its net asset value (“NAV”) per unit by 16 percent to \$34.97 at year end 2008 from \$30.05 at year end 2007, based on independent engineering evaluations of reserves and escalated price assumptions discounted at 10 percent.
- The Trust spent \$92.9 million on development capital activities in the fourth quarter, including \$30.7 million on facilities, land and seismic. The Trust spent \$62.2 million on drilling and completions activities, including the drilling of 49 (33.7 net) wells with a 98 percent success rate.
- Crescent Point’s funds flow from operations decreased by 3 percent to \$109.6 million (\$0.87 per unit – diluted) in the fourth quarter of 2008, compared to \$112.6 million (\$0.99 per unit – diluted) in the fourth quarter of 2007. During the fourth quarter of 2008, the Trust recorded a provision of \$19.4 million in respect of its previously announced exposure

to SemCanada Crude Company ("SemCanada"). Excluding this provision, Crescent Point's funds flow from operations was \$129.0 million (\$1.02 per unit – diluted).

- The Trust's netback decreased to \$40.42 per boe in the fourth quarter from \$42.48 in the fourth quarter of 2007. During the quarter, the Trust realized an operating netback of \$48.21 per boe on its Bakken production.
- Crescent Point maintained consistent monthly distributions of \$0.23 per unit, totaling \$0.69 per unit for the fourth quarter of 2008. This is up from \$0.60 per unit paid in the fourth quarter of 2007 and resulted in a payout ratio of 79 percent on a per unit – diluted basis, up from 61 percent in 2007. Excluding the SemCanada provision, Crescent Point's payout ratio was 68 percent on a per unit – diluted basis.
- On January 15, 2009, the Trust closed the previously announced acquisition of Villanova, adding approximately 1,750 boe/d of focused, high netback oil production, 95 percent of which is in the Bakken play. The acquisition added 26 net sections of undeveloped Bakken land and 47 net low risk Bakken drilling locations to the Trust's inventory.
- In January of 2009, Crescent Point increased its calendar 2009 hedging position to provide increased certainty over cash flow and distributions for the year and to take advantage of rising prices in the forward market for crude oil. As at March 3, 2009, the Trust had hedged 57 percent, 42 percent, 27 percent and 14 percent of production, net of royalty interest, for the balance of 2009, 2010, 2011 and the first six months of 2012, respectively. Average quarterly hedge prices range from Cdn\$74 per boe to Cdn\$108 per boe.
- On January 9, 2009, Crescent Point closed a previously announced bought deal equity financing of 5.2 million trust units at \$22.00 per trust unit for gross proceeds of approximately \$115 million.
- During the fourth quarter, Crescent Point invested \$78.7 million in a private financing by Shelter Bay Energy Inc. ("Shelter Bay") and \$20.0 million in a private financing by Wild River Resources Ltd. ("Wild River"). The \$78.7 investment in Shelter Bay brings the Trust's total investment in Shelter Bay to approximately \$200 million or 21 percent ownership. The \$20.0 million investment in Wild River represents a 17 percent ownership of the private Bakken and Lower Shaunavon producer.
- During 2008, Crescent Point's borrowing base was increased to \$1.15 billion from \$800 million. The Trust's balance sheet remains strong with projected 2009 net debt to 12 month cash flow of 1.1 times.

OPERATIONS REVIEW

Forward-Looking Statements

Certain statements contained in this report constitute forward-looking statements. All forward-looking statements are based on Crescent Point's beliefs and assumptions based on information available at the time the assumption was made. The use of any of the words "anticipate", "continue", "estimate", "expect", "may", "will", "project", "should", "believe" and similar expressions are intended to identify forward-looking statements. By their nature, such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. Crescent Point believes that the expectations reflected in those forward-looking statements are reasonable but no assurance can be given that these expectations will prove to be correct and such forward-looking statements included in this report should not be unduly relied upon. These statements speak only as of the date of this report or, if applicable, as of the date specified in those documents specifically referenced herein.

In particular, this report contains forward-looking statements pertaining to the following: the performance characteristics of Crescent Point's oil and natural gas properties; oil and natural gas production levels; capital expenditure programs; the quantity of Crescent Point's oil and natural gas reserves and anticipated future cash flows from such reserves; projections of commodity prices and costs; supply and demand for oil and natural gas; expectations regarding the ability to raise capital and to continually add to reserves through acquisitions and development; and treatment under governmental regulatory regimes.

By their nature, such forward-looking statements are subject to a number of risks, uncertainties and assumptions, which could cause actual results or other expectations to differ materially from those anticipated, including those material risks discussed in our annual information form under "Risk Factors" and in our Managements Discussion and Analysis for the year ended December 31, 2007 under the "Business Risks and Prospects". The material assumptions are disclosed in the Results of Operations section of this press release under the headings "Cash Distributions", "Taxation of Cash Distributions", "Capital Expenditures", "Asset Retirement Obligation", "Liquidity and Capital Resources", "Critical Accounting Estimates", "New Accounting Pronouncements" and "Business Risks and Prospects". The actual results could differ materially from those anticipated in these forward-looking statements as a result of the material risks set forth under the noted headings, which include, but are not limited to: volatility in market prices for oil and natural gas; liabilities inherent in oil and natural gas operations; uncertainties associated with estimating oil and natural gas reserves; competition for, among other things, capital, acquisitions of reserves, undeveloped lands and skilled personnel; incorrect assessments of the value of acquisitions and exploration and development programs; geological, technical, drilling and processing problems; fluctuations in foreign exchange or interest rates and stock market volatility; failure to realize the anticipated benefits of acquisitions; general

business and market conditions; changes in income tax laws or changes in tax laws and incentive programs relating to the oil and gas industry.

Additional information on these and other factors that could affect Crescent Point's operations or financial results are included in Crescent Point's reports on file with Canadian securities regulatory authorities. Readers are cautioned not to place undue reliance on this forward-looking information, which is given as of the date it is expressed herein or otherwise and Crescent Point undertakes no obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise, unless required to do so pursuant to applicable law.

Fourth Quarter Operations Summary

During the fourth quarter of 2008, Crescent Point continued to aggressively implement management's business strategy of creating sustainable, value added growth in reserves, production and cash flow through acquiring, exploiting and developing high quality, long life light and medium oil and natural gas properties.

Crescent Point achieved another record quarter for production in the fourth quarter, averaging 39,554 boe/d, a 5 percent increase over the third quarter. The Trust participated in the drilling of 49 (33.7 net) oil wells, achieving a 98 percent success rate, and fracture stimulated a total of 30 (28.8 net) Bakken horizontal wells. The Trust's development activities in the quarter added in excess of 3,600 boe/d of initial interest production, not including approximately 1,000 boe/d of Crescent Point's share of initial production from Bakken wells drilled in the quarter by Shelter Bay on lands farmed in on the Trust.

Drilling Results

Three months ended December 31, 2008	Gas	Oil	D&A	Service	Standing	Total	Net	% Success
Southeast Saskatchewan	–	31	–	–	–	31	26.3	100
Southwest Saskatchewan	–	13	–	–	–	13	5.8	100
South/Central Alberta	–	4	–	–	–	4	0.8	100
Northeast BC and West Peace River Arch, Alberta	–	–	–	–	1	1	0.8	–
Total	–	48	–	–	1	49	33.7	98

Year ended December 31, 2008	Gas	Oil	D&A	Service	Standing	Total	Net	% Success
Southeast Saskatchewan	–	147	–	5	–	152	124.7	100
Southwest Saskatchewan	–	25	–	–	–	25	11.2	100
South/Central Alberta	–	7	–	–	–	7	3.5	100
Northeast BC and West Peace River Arch, Alberta	1	4	–	–	1	6	5.0	84
Total	1	183	–	5	1	190	144.4	99

Southeast Saskatchewan

In the fourth quarter of 2008, Crescent Point participated in the drilling of 31 (26.3 net) oil wells in southeast Saskatchewan, including 28 (23.3 net) horizontal wells in the southeast Saskatchewan Bakken light oil resource play and 3 (3.0 net) horizontal wells in the Frobisher zone above the Bakken play. Crescent Point also fracture stimulated a total of 30 (28.8 net) horizontal wells in the Bakken play. The Trust achieved a 100 percent success rate on its drilling and completion activities in southeast Saskatchewan and added initial interest production in excess of 3,300 boe/d, not including volumes added from wells drilled by Shelter Bay on lands farmed out by Crescent Point.

During the quarter, Shelter Bay drilled 21 Bakken horizontal wells on lands farmed out by the Trust. Crescent Point's share of initial production from these wells exceeded 1,000 boe/d. These wells are not included in the above totals.

Crescent Point successfully drilled and completed 3 (3.0 net) horizontal oil wells in the Frobisher zone above the Bakken play in the fourth quarter, adding nearly 1,000 boe/d of initial interest production. These wells, along with a fourth well drilled in the third quarter, prove up four new light oil pool discoveries in the shallower Frobisher zone above the Bakken. Three dimensional seismic and numerous oil shows in the zones above the Bakken suggest the potential for several additional new pool or pool extension discoveries. Crescent Point anticipates drilling up to 7 Frobisher wells above the Bakken play in 2009 in anticipation of extending and proving up additional light oil pool discoveries.

The Trust continued expansion activities in the fourth quarter at the Viewfield gas plant to accommodate the Trust's growing Bakken production. The expansion was subsequently completed and commissioned in early 2009, increasing the plant's inlet capacity from 9 mmcf/d to 18 mmcf/d. Crescent Point continues to work on design plans for a further expansion to 30 mmcf/d, construction of which is planned for 2010 and which will accommodate Bakken production growth from Crescent Point as well as Shelter Bay and other potential third parties. The Trust will earn processing revenues on any natural gas volumes processed on behalf of Shelter Bay or other third party producers.

The Trust commenced integration of the operations of Villanova late in the quarter in anticipation of the January closing of the acquisition. As of late February, the integration was largely complete.

Southwest Saskatchewan

At Battum in the fourth quarter, Crescent Point drilled 13 (5.8 net) wells with a 100 percent success rate and added nearly 300 boe/d of initial interest production. Through operational efficiencies and innovations, the Trust reduced the average drilling cost by \$65,000 per well or approximately 20 percent.

South/Central Alberta

The Trust participated in the drilling of 1 (0.4 net) well in the Chip Lake area targeting the Rock Creek formation and added initial interest production of 90 boe/d. The Trust is working with the operator to identify possible follow up locations, of which at least one is planned for the first quarter of 2009. The Trust also participated in 3 (0.4 net) wells in the Wildmere area of central Alberta.

The Trust received regulatory approval to down space the Sparky formation and commence a water flood at Sounding Lake. Water injection into four wells commenced late in the fourth quarter of 2008 and initial expectations for incremental recoveries are greater than 10 percent within the flood area.

Northeast British Columbia and Peace River Arch, Alberta

The Trust drilled 1 (0.8 net) well targeting the Doig formation in the TeePee Creek area. The well is currently standing pending further evaluation of initial inflow rates.

Acquisitions

On January 15, 2009, the Trust closed the previously announced acquisition of Villanova, adding approximately 1,750 boe/d of focused, high netback oil production, 95 percent of which is in the Bakken play. The acquisition added 26 net sections of undeveloped Bakken land and 47 low risk Bakken drilling locations to the Trust's inventory.

RESERVES

In 2008, Crescent Point replaced 226 percent of production on a proved plus probable basis, not including reserves added through acquisitions. Including acquisitions, the Trust increased its year end proved plus probable reserves by 14 percent to 191.0 mmbob and its proved reserves by 14 percent to 132.1 mmbob. Year end 2007 reserves were 167.5 mmbob proved plus probable and 115.7 mmbob proved.

- The Trust achieved F&D costs, excluding \$164.4 million of expenditures on facilities, land and seismic, of \$9.37 per proved plus probable boe and \$11.07 per proved boe. Including expenditures on facilities, land and seismic, F&D costs were \$14.67 per proved plus probable boe and \$17.33 per proved boe, generating proved plus probable and proved recycle ratios of 4.2 times and 3.6 times, respectively.
- Crescent Point's three year average F&D cost, including expenditures on facilities, land and seismic, is \$9.41 per proved plus probable boe and \$12.77 per proved boe. This highlights the Trust's technical ability to efficiently add value to its large resource in place asset base and accurately reflects the full cycle nature of investments in facilities, land and seismic.
- Crescent Point achieved FD&A costs of \$15.97 per proved plus probable boe and \$19.69 per proved boe, including expenditures on facilities, land and seismic. Recycle ratios were 3.9 and 3.1 times for proved plus probable and proved, respectively.
- Crescent Point achieved technical revisions on its core Viewfield Bakken assets of 27.0 mmbob proved plus probable and 22.2 mmbob proved. At year end 2008, the Trust had Bakken reserves of 94.8 mmbob proved plus probable and 64.7 mmbob proved.
- The Trust increased its net asset value ("NAV") per unit to \$34.97 at year end 2008 from \$30.05 at year end 2007, based on independent engineering evaluations of reserves and escalated price assumptions discounted at 10 percent. The Trust has increased NAV per unit every year since inception.
- Including the acquisition of Villanova, the Trust's reserves are expected to increase to 196.5 mmbob proved plus probable and its reserve life index to 14.1 years.

The Trust's year end reserves were independently evaluated by GLJ Petroleum Consultants Ltd. and Sproule Associates Ltd. as at December 31, 2008.

Summary of Reserves (Escalated Pricing)

As at December 31, 2008 ⁽¹⁾

Description	RESERVES ⁽²⁾							
	Oil (mbbls)		Gas (mmscf)		NGL (mbbls)		Total (mboe)	
	Gross	Net	Gross	Net	Gross	Net	Gross	Net
Proved producing	67,998	55,910	42,466	37,190	2,122	1,884	77,197	63,991
Proved non-producing	47,336	43,078	26,195	23,213	3,251	3,028	54,952	49,979

Production	(11,925)	-	(11,925)	(10,571)	-	(10,571)	(13,687)	-	(13,687)
Development	19,114	9,233	28,347	6,245	4,066	10,311	20,155	9,911	30,066
Technical revisions	4,832	(4,827)	5	7,413	(1,981)	5,432	6,066	(5,156)	910
Closing balance December 31, 2008 ⁽²⁾	120,706	54,157	174,863	68,661	27,881	96,542	132,149	58,805	190,954

(1) Based on GLJ's January 1, 2009 escalated price forecast. "Gross reserves" are the Trust's working-interest share before deduction of any royalties and without including any royalty interests of the Trust.

(2) Numbers may not add due to rounding.

Finding, Development and Acquisition Costs (excluding future development costs)

For the year ended December 31, 2008

	CAPITAL EXPENDITURES ^{(1) (4)}		RESERVES ⁽³⁾				FINDING, DEVELOPMENT AND ACQUISITION COSTS ^{(1) (2)}	
			Total Proved		Proved Plus Probable		Proved	Proved Plus Probable
	\$000	%	mboe	%	mboe	%	\$/boe	\$/boe
Exploration development and revisions	\$454,533	77%	26,221	87%	30,976	83%	\$17.33	\$14.67
Acquisitions, net of dispositions	\$138,911	23%	3,911	13%	6,189	17%	\$35.52	\$22.44
Total	\$593,444	100%	30,132	100%	37,165	100%	\$19.69	\$15.97

(1) Exploration, Development and Revisions exclude the change during the most recent financial year in estimated future development costs relating to proved and proved plus probable reserves, respectively. These costs would add \$182.5 million and \$193.3 million, respectively, to the proved and proved plus probable reserves categories. Including these changes, the proved and proved plus probable finding and development costs are \$24.29 and \$20.91 per boe, respectively.

(2) Including change in future development costs, finding, development and acquisition costs are \$25.75 per proved boe and \$21.17 per proved plus probable boe.

(3) Gross Trust interest reserves are used in this calculation (interest reserves, before deduction of any royalties and without including any royalty interests of the Trust).

(4) The capital expenditures include the purchase price of corporate acquisitions rather than the amounts allocated to property, plant and equipment for accounting purposes. The capital expenditures also exclude capitalized administration costs and acquisition costs.

Summary of Reserves, Including First Quarter 2009 Acquisitions (Villanova) (Escalated Pricing)

As at January 1, 2009^{(1) (2)}

SUBSEQUENT EVENTS

On March 4, 2009, Crescent Point announced that it had entered into an agreement with affiliates of Talisman Energy Inc. ("Talisman") and TriStar Oil & Gas Ltd. ("TriStar") wherein Crescent Point and TriStar will jointly acquire all of Talisman's assets in southeast Saskatchewan and Montana for cash consideration of approximately \$720 million. The assets include more than 8,500 boe/d of high quality, high netback, long life, low decline crude oil and natural gas production in southeast Saskatchewan, including approximately 1,900 boe/d of production from the southeast Saskatchewan Bakken light oil resource play.

Crescent Point and TriStar agreed to sell a portion of the assets acquired to Shelter Bay for consideration of approximately \$71 million.

On a net basis, Crescent Point expects to acquire approximately 4,000 boe/d of high quality southeast Saskatchewan production, approximately 700 boe/d of which is in the Bakken resource play, for cash consideration of approximately \$325 million. Crescent Point anticipates funding the acquisition with proceeds from a \$230 million bought deal financing also announced on March 4, 2009, and the Trust's existing credit facilities. The bought deal financing, which is expected to close on or about March 24, 2009, is for 10.8 million trust units at \$21.25 per trust unit. The acquisition is expected to close on June 1, 2009.

Key attributes of the assets to be acquired by Crescent Point:

- 312 net sections of undeveloped Saskatchewan land, 25 of which are in the Bakken light oil resource play;
- 70 net low risk drilling locations, 37 of which are in the southeast Saskatchewan Bakken light oil resource play;
- Ownership of freehold mineral rights on 217 net sections of land, resulting in overall royalties of less than 16 percent;
- Tax pools estimated at more than \$324 million; and
- Approximately 21.1 mmboe of proved plus probable and 14.6 mmboe of proved reserves, independently evaluated as of March 31, 2009.

Including the assets acquired from Talisman and the first quarter 2009 acquisition of Villanova, Crescent Point's reserves are expected to increase to 217.6 mmboe proved plus probable and 150.4 mmboe proved. Crescent Point's reserve life index is expected to increase to 14.2 years on a proved plus probable basis and to 9.8 years on a proved basis.

Crescent Point also announced on March 4, 2009, that its Board of Directors had unanimously agreed to a strategic conversion (the "Conversion") to a dividend paying corporation. The Conversion, which the Trust expects to complete on or before May 31, 2009, will allow Crescent Point to continue to implement its proven business plan of growing value through its integrated strategy of acquiring, exploiting and developing high quality, long life reserves and will allow Crescent Point improved access to capital markets without the constraints of the Safe Harbour growth limitations placed on income trusts.

With the planned Conversion, Crescent Point's business model is expected to remain unchanged, with Crescent Point paying a monthly dividend instead of the current monthly distribution. The initial dividend is expected to be set at \$0.23 per share, which equals Crescent Point's current monthly distribution of \$0.23 per unit. Crescent Point's dividend policy is intended to be similar to the distribution policy currently in use by the Trust. It is Crescent Point's understanding that dividends paid in respect of shares held by Canadians outside of a Registered Retirement Savings Plan ("RRSP"), Registered Retirement Income Fund ("RRIF"), or Deferred Profit Sharing Plan ("DPSP") will be eligible for the Canadian Dividend Tax Credit. In such circumstances, under the intended monthly dividend of \$0.23 per share, Canadians holding shares outside of a RRSP, RRIF or DPSP will receive an increase on an after tax basis when they receive the intended dividend instead of the current distribution.

Under the planned Conversion, Crescent Point unitholders will receive one share in a dividend paying corporation for each Crescent Point trust unit they hold. The Conversion is intended to be tax deferred for Canadian and U.S. income tax purposes.

The planned Conversion requires the approval of Crescent Point unitholders, as well as customary court and regulatory approvals. To be implemented, the Conversion must be approved by not less than two-thirds of the votes cast by unitholders voting at the related unitholder meeting, which is expected to be scheduled on or before May 27, 2009. Closing of the Conversion is anticipated on or before May 31, 2009.

SHELTER BAY FOURTH QUARTER UPDATE

On October 1, 2008, Shelter Bay closed a \$300 million private placement equity financing, of which Crescent Point contributed \$78.7 million. The private placement financing, along with a \$60 million third quarter increase in Shelter Bay's credit facilities, position Shelter Bay well for significant growth in core Crescent Point areas, including the southeast Saskatchewan Bakken light oil resource play. In total, Shelter Bay raised more than \$1.0 billion of debt and equity from inception in the first quarter of 2008 to year end.

During the fourth quarter of 2008, Shelter Bay continued to aggressively pursue its business strategy of growth in core Crescent Point areas. Shelter Bay drilled 38 Bakken horizontal wells, including 21 on lands farmed out by the Trust. Crescent Point's share of production from all farmout wells averaged more than 1,000 boe/d for the quarter. In the Lower Shaunavon, Shelter Bay fracture stimulated three horizontal wells that were drilled in the third quarter. Shelter Bay also drilled and fracture stimulated 2 additional horizontal wells in the Lower Shaunavon in the fourth quarter, one of which was completed in the first quarter of 2009. Excluding the 2009 well, Shelter Bay added nearly 500 boe/d of initial interest production in the Lower Shaunavon in the fourth quarter. Shelter Bay's production averaged 4,376 boe/d for the fourth quarter.

Shelter Bay's credit facilities are expected to be increased from the current \$100 million upon renewal in March as a result of the successful drilling program and reserves growth during the year, with the potential for a further increase related to the acquisition from Crescent Point and TriStar.

Shelter Bay is poised for growth with its strong balance sheet and available cash and credit facilities of more than \$210 million, including the \$71 million acquisition of assets from Crescent Point and TriStar, to fund future expansion opportunities within Crescent Point's core areas. Shelter Bay currently has a development drilling inventory of more than 425 Bakken and Lower Shaunavon drilling locations. Exit 2009 production is forecast greater than 7,200 boe/d.

Including the October 2008 investment of \$78.7 million, Crescent Point's total investment in Shelter Bay is approximately \$200 million, which equates to a 21 percent interest. The Crescent Point financial and operating results do not reflect the production or cash flows of Shelter Bay other than the production and cash flows associated with the Trust's interests in the wells farmed out to Shelter Bay by the Trust. Crescent Point accounts for its investment in Shelter Bay using the equity method of

accounting. Accordingly, the Trust records its share of Shelter Bay net income or loss in the “equity and other income” caption on the consolidated statements of operations, comprehensive income and deficit.

OUTLOOK

Crescent Point continues to execute its proven business plan of creating value added growth in reserves, production and cash flow through management’s integrated strategy of acquiring, exploiting and developing high quality, long life, light and medium oil and natural gas properties. Crescent Point’s strong balance sheet, 3½ year risk management program and high quality asset base position the Trust well to maintain production and distributions through volatile commodity price cycles.

Pro forma with the assets acquired from Talisman, Crescent Point will have increased its low risk development drilling inventory to more than 1,600 net locations, representing more than 16 years of low risk drilling inventory to maintain production levels. Through infill drilling, production optimization and water flood implementation, management believes the Trust has the potential to more than double its proved plus probable reserves over time.

Since the third quarter of 2008, global financial markets have been trapped in a period of significant uncertainty marked by downward pressure on equities, overall tightening of credit markets and global economic recession. Prices for commodities, including crude oil and natural gas, have deteriorated.

During this period, Crescent Point was successful in entering into an agreement to acquire assets from Talisman, in raising \$115 million of equity in a bought deal financing and in entering into a bought deal arrangement in respect of a further \$230 million. The Trust’s credit facilities were increased by \$150 million with an additional increase expected in conjunction with the acquisition of the Talisman assets. Shelter Bay raised \$300 million of equity in a private placement in October 2008. The combined \$795 million of financing highlights the high quality nature of the asset bases and the robust economics of the opportunities that lie ahead for both Crescent Point and Shelter Bay.

Crescent Point’s development capital budget for 2009 was set in December 2008 at \$225 million, with average production forecast at 38,250 boe/d. Assuming the successful completion of the acquisition of the Talisman assets, Crescent Point has upwardly revised its average 2009 production guidance to 40,500 boe/d, while maintaining its \$225 million capital program for the year. Exit production is forecast greater than 42,000 boe/d.

With low benchmark oil prices early in 2009, the Trust has reduced first quarter drilling plans and focused on achieving significant cost reductions and increasing the number of expected fracture stimulation projects. The capital expenditure reduction in the first quarter has led to an expected 20 percent reduction in Bakken drilling and completions costs to approximately \$1.6 million per Bakken well. With these capital cost reductions, a typical Bakken horizontal well generates a 140 percent before tax rate of return at benchmark WTI oil prices of US\$45 per barrel and pays out in 10 months. These robust economics position the Trust well for potential capital budget and production increases in the second half of 2009 should benchmark WTI oil prices stabilize above US\$45 per barrel.

Crescent Point continues to implement its balanced 3½ year price risk management program, using a combination of swaps, collars and purchased put options with investment grade counter parties all within the Trust’s banking syndicate. Effective March 3, 2009, pro forma with the Talisman assets, the Trust had hedged 54 percent of production volumes net of royalty interests for the balance of 2009, 38 percent for 2010, 24 percent for 2011 and 12 percent for the first half of 2012. Quarterly floor prices range from Cdn\$74 per boe to Cdn\$108 per boe, with upside potential if prices strengthen above current levels. The Trust’s hedge position is significantly in the money, with a mark to market value of \$234 million as of March 3, 2009, including \$98 million for the balance of 2009.

Crescent Point intends to crystallize up to \$75 million of its 2011 and 2012 mark to market hedge value in the first quarter of 2009 and intends to reset those hedges at current market prices, expected to be in the Cdn\$75 per boe to Cdn\$80 per boe range. This capitalizes on the Trust’s strong 2011 and 2012 hedges while continuing to provide cash flow stability to Crescent Point over the next 3½ years. Assuming the completion of the crystallization and reset, Crescent Point expects that its 3½ year average hedge price would be in the range of Cdn\$75 to Cdn\$80 per boe while increasing 2009 cash flows by up to \$75 million.

Crescent Point is well positioned to withstand the current market uncertainty and to take advantage of acquisition opportunities. The Trust’s balance sheet is strong with projected 2009 net debt to 12 month cash flow of 1.1 times and its 3½ year risk management program provides cash flow stability. The Trust’s 16 year drilling inventory and current 100 well fracture stimulation inventory provide long term sustainability and capital investment flexibility even at low oil prices.

Crescent Point’s management believes that with the high quality reserve base and development inventory, excellent balance sheet and solid hedging program, the Trust is well positioned to continue generating strong operating and financial results and delivering sustainable distributions through 2009 and beyond.

2009 Guidance

Crescent Point's 2009 guidance is as follows:

Production	2009
Oil and NGL (bbls/d)	36,200
Natural gas (mcf/d)	25,800
Total (boe/d)	40,500
Funds flow from operations (\$000)	593,000
Combined funds flow per unit – diluted and per share – diluted (\$)	3.91
Combined cash distributions per unit and dividends per share (\$)	2.76
Payout ratio – per unit/share – diluted (%)	71
Capital expenditures (\$000) ⁽¹⁾	225,000
Wells drilled, net	82
Pricing	
Crude oil – WTI (US\$/bbl)	46.50
Crude oil – WTI (Cdn\$/bbl)	58.86
Natural gas – Corporate (Cdn\$/mcf)	5.00
Exchange rate (US\$/Cdn\$)	0.79

(1) The projection of capital expenditures excludes acquisitions, which are separately considered and evaluated.

ON BEHALF OF THE BOARD OF DIRECTORS

Scott Saxberg
President and Chief Executive Officer
March 16, 2009

RESULTS OF OPERATIONS

STRUCTURE OF THE TRUST

Crescent Point Energy Trust ("the Trust") is an open-ended unincorporated investment trust created on September 5, 2003 pursuant to a Declaration of Trust and Plan of Arrangement operating under the laws of the Province of Alberta. Olympia Trust Company is the trustee, Crescent Point Resources Inc. ("CPRI") is the administrator of the Trust and the beneficiaries of the Trust are the unitholders.

On March 1, 2007, the Trust completed a reorganization of the Trust and its subsidiaries. The reorganization resulted in the existing business of the Trust, which was carried on through a limited partnership and corporations, being carried on through a limited partnership, directly and indirectly owned by the Trust.

The principal undertaking of the Trust's operating entities, Crescent Point Resources Limited Partnership along with its general partner, Crescent Point General Partner Corp. is to acquire, hold directly or indirectly, interests in oil and gas properties. The administrator of the Trust's business is CPRI.

Non-GAAP Financial Measures

Throughout this discussion and analysis, the Trust uses the terms "funds flow from operations", "funds flow from operations per unit", "funds flow from operations per unit-diluted", "net debt", "market capitalization" and "total capitalization". These terms do not have any standardized meaning as prescribed by Canadian generally accepted accounting principles ("GAAP") and, therefore, may not be comparable with the calculation of similar measures presented by other issuers.

Funds flow from operations is calculated based on cash flow from operating activities before changes in non-cash working capital and asset retirement obligation expenditures. Funds flow from operations per unit-diluted is calculated based on cash flow from operating activities before changes in non-cash working capital and asset retirement obligation expenditures excluding the cash portion of unit-based compensation. Management utilizes funds flow from operations as a key measure to assess the ability of the Trust to finance distributions, operating activities, capital expenditures and debt repayments. Funds flow from operations as presented is not intended to represent cash flow from operating activities, net earnings or other measures of financial performance calculated in accordance with Canadian GAAP.

The following table reconciles the cash flow from operating activities to funds flow from operations:

(\$000)	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change
Cash flow from operating activities	125,625	99,070	27	584,955	332,605	76
Changes in non-cash working capital	(16,364)	12,623	(230)	4,860	21,450	(77)
Asset retirement expenditures	374	879	(57)	2,317	1,855	25
Funds flow from operations	109,635	112,572	(3)	592,132	355,910	66

Net debt is calculated as current liabilities plus bank indebtedness less current assets and long term investments but excludes risk management assets and liabilities. Management utilizes net debt as a key measure to assess the liquidity of the Trust. Market capitalization is calculated by applying the period end closing unit trading price to the number of trust units outstanding. Market capitalization is an indication of the enterprise value. Total capitalization is calculated as market capitalization and current liabilities plus bank indebtedness, less current assets, and long term investments, excluding the risk management assets and liabilities. Total capitalization is used by management to measure the proportion of net debt in the Trust's capital structure to assess the amount of debt leverage used in the Trust's capital structure.

Forward-Looking Information

Cautionary Statement Regarding Forward-Looking Information and Statements

Certain statements contained in this report constitute forward-looking statements and are based on the Trust's beliefs and assumptions based on information available at the time the assumption was made. By its nature, such forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. The Trust and CPRI, the administrator of the Trust, believe the expectations reflected in those forward-looking statements are reasonable but no assurance can be given that these expectations will prove to be correct and such forward-looking statements should not be unduly relied upon. These statements are effective only as of the date of this report.

The material assumptions in making these forward-looking statements are disclosed in this analysis under the headings "Cash Distributions", "Capital Expenditures", "Asset Retirement Obligation", "Liquidity and Capital Resources", "Critical Accounting Estimates", "New Accounting Pronouncements" and "Outlook".

Certain statements contained in this report, including statements related to Crescent Point's capital expenditures, projected asset growth, view and outlook toward future commodity prices, drilling activity and statements that contain words such as "could", "should", "can", "anticipate", "expect", "believe", "will", "may", "projected", "sustain", "continues", "strategy", "potential", "projects", "grow", "take advantage", "estimate", "well positioned" and similar expressions and statements relating to matters that are not historical facts constitute "forward-looking information" within the meaning of applicable Canadian securities legislation. The material assumptions in making these forward-looking statements are disclosed in this analysis under the headings "Cash Distributions", "Capital Expenditures", "Asset Retirement Obligation", "Liquidity and Capital Resources", "Critical Accounting Estimates", "New Accounting Pronouncements" and "Outlook".

The following are examples of references to forward-looking information:

- Volumes and estimated value of the Trust's oil and gas reserves;
- The life of the Trust's reserves;
- Volume and product mix of the Trust's oil and gas production;
- Future oil and gas prices and interest rates in respect of the Trust's commodity risk management programs;
- The amount and timing of future asset retirement obligations;
- Future liquidity and financial capacity;
- Future interest rates;
- Future results from operations and operating metrics;
- Future development, exploration and other expenditures;
- Future costs, expenses and royalty rates;
- Future tax treatment of income trusts; and
- The Trust's tax pools.

This disclosure contains certain forward-looking estimates that involve substantial known and unknown risks and uncertainties, certain of which are beyond Crescent Point's control. Therefore, Crescent Point's actual results, performance or achievement could differ materially from those expressed in, or implied by, these forward-looking estimates and if such actual results, performance or achievements transpire or occur, or if any of them do so, there can be no certainty as to what benefits Crescent Point will derive therefrom.

Crescent Point is exposed to several operational risks inherent in exploiting, developing, producing and marketing crude oil and natural gas. These risks include but are not limited to:

- Economic risk of finding and producing reserves at a reasonable cost;
- Reliance on reserve estimates for the year as well as on acquisitions;
- Financial risk of marketing reserves at an acceptable price given market conditions;
- Fluctuations in commodity prices, foreign exchange and interest rates;
- Operational matters related to non-operated properties;
- Delays in business operations, pipeline restrictions, blowouts;
- Debt service, indebtedness may limit timing or amount of distributions as well as market price of trust units;
- The continued availability of adequate debt and equity financing and cash flow to fund planned expenditures;
- Sufficient liquidity for future operations;
- Cost of capital risk to carry out the Trust's operations;
- Unforeseen title defects;
- Aboriginal land claims;
- Increased competition and the lack of availability of qualified personnel or management;
- Loss of key personnel;
- Uncertainty of government policy changes;
- The risk of carrying out operations with minimal environmental impact;
- Operational hazards and availability of insurance;
- Industry conditions including changes in laws and regulations including the adoption of new environmental laws and regulations and changes in how they are interpreted and enforced;
- General economic, market and business conditions;
- Competitive action by other companies;
- The ability of suppliers to meet commitments;
- Stock market volatility;
- Obtaining required approvals of regulatory authorities;
- Financing the purchase of Shelter Bay in the event certain shareholders exercise their right to require the Trust to purchase the remaining Shelter Bay shares not owned by the Trust; and
- Creditworthiness of counterparties.

Crescent Point strives to manage or minimize these risks in a number of ways, including:

- Employing qualified professional and technical staff;
- Concentrating in a limited number of areas with low cost exploitation and development objectives;
- Utilizing the latest technology for finding and developing reserves;
- Constructing quality, environmentally sensitive, safe production facilities;
- Maximizing operational control of drilling and producing operations;
- Mitigating price risk through strategic hedging;
- Adhering to conservative borrowing guidelines;
- Monitoring counterparty creditworthiness; and
- Obtaining counterparty credit insurance.

In particular, forward-looking information and statements include, but are not limited to:

- The Trust's 2009 guidance as outlined in the Outlook section;
- Addition of new pool or pool extension discoveries in the Bakken play;
- Expansion of the Viewfield gas plant capacity to 18 mmcf/d and design work for further expansion to 30 mmcf/d;
- Earning of processing revenues on natural gas volumes processed at the Viewfield gas plant;
- Integration of Villanova operations and reserve base;
- Identification of possible follow up locations in the Chip Lake area;
- Incremental recoveries in excess of 10 percent within the flood area at Sounding Lake;
- Evaluation of initial inflow rates in the TeePee Creek area;
- Drilling inventory of 16 years and 100 well fracture stimulation inventory;
- Bakken horizontal well before tax rate of return;
- Stabilization of benchmark WTI oil prices above US\$45.00 per barrel;
- Pro forma statements related to the acquisition of Talisman assets and;
- Projected 2009 net debt to 12 month cash flow of 1.1 times.

All of which are stated under the headings "Results of Operations" and "Outlook" of this report.

A barrel of oil equivalent ("boe") is based on a conversion rate of six thousand cubic feet of natural gas to one barrel of oil.

Results of Operations

Production

Crescent Point grew fourth quarter 2008 average daily production by five percent over third quarter 2008 and exceeded guidance by more than 2,800 boe/d. The Trust produced 39,554 boe/d for the quarter, up from 37,630 boe/d in the third quarter and up 19 percent from 33,351 boe/d in the fourth quarter of 2007.

On October 22, 2007, the Trust closed the acquisition of Innova Exploration Ltd. ("Innova"), which added over 4,300 boe/d of light and natural gas assets, including more than 2,800 boe/d from the Viewfield Bakken resource play. On January 16, 2008, the Trust closed the acquisition of Pilot Energy Ltd. ("Pilot"), which added over 1,000 boe/d of high netback oil, 50 percent of which was in the Viewfield Bakken resource play. Lastly on March 26, 2008, the Trust closed the acquisition of light oil assets from Shelter Bay Energy Inc. ("Shelter Bay") in connection with the Shelter Bay's corporate acquisition of Landex Petroleum Corp. ("Landex"). This property acquisition added over 1,500 boe/d in the Trust's core area of southeast Saskatchewan.

Further contributing to the significant increase in production was the Trust's successful drilling program. During 2008 the Trust drilled 190 (144.4 net) wells primarily in southeast Saskatchewan and the Viewfield Bakken resource play. The Trust exceeded its original 2008 production guidance by more than 13 percent due to its expanded and successful drilling programs.

The Trust's weighting to oil during 2008 remained consistent with the comparative period.

	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change
Crude oil and NGL (bbls/d)	34,897	28,601	22	32,583	24,349	34
Natural gas (mcf/d)	27,941	28,500	(2)	28,883	22,610	28

Total (%)	100	100	-	100	100	-

Marketing and Prices

The Trust's selling price for oil for the three months ended December 31, 2008, decreased 20 percent compared to the same period in the prior year. This decrease is primarily the result of a 35 percent decrease in the US\$WTI benchmark price. The Trust's differential was \$11.63 per barrel during the fourth quarter of 2008 compared to \$13.54 per barrel during the fourth quarter of 2007. The Trust's differential as a percentage of Cdn\$ WTI was 16% percent compared to 15% 2007. This widening differential was due to temporary transportation issues on the Enbridge Pipeline (Saskatchewan) system that caused benchmark differentials between light crude oil in Western Canada and WTI to increase. These issues have been addressed and benchmark differentials have improved to date in the first quarter of 2009.

For the twelve months ended December 31, 2008, the Trust's selling price for oil increased 40 percent, from \$67.33 per bbl during 2007 to \$94.36 per bbl during the current year, primarily as a result of 38 percent increase in the US\$WTI benchmark price. The Trust's oil differential was \$11.65 per barrel during 2008 compared to \$10.52 per barrel in 2007. The Trust's differential as a percentage of Cdn\$ WTI was 11% in 2008 compared to 14% during 2007. This improvement is the result of the growth of high quality Bakken crude production from the Trust's successful acquisition and drilling programs partially offset by the fourth quarter 2008 temporary transportation issues discussed above.

During the three months ended December 31, 2008, the Trust's selling price for gas increased 14 percent from \$6.32 per mcf to \$7.23 during 2008. This is comparable to a nine percent increase in the AECO daily gas price for the three months ended December 31, 2008 compared to the same period in 2007. The differential in the Trust's gas price compared to the AECO daily price is the result of the Trust's portfolio of gas marketing contracts and the high heat content gas production associated with the Viewfield Bakken area.

The Trust's average selling price for gas increased 28 percent to \$8.36 per mcf in 2008 compared to \$6.52 per mcf in 2007. This is comparable to a 27 percent increase year-over-year in the AECO daily gas price. The differential in the Trust's gas price compared to the AECO daily price is consistent with the three months ended December 31, 2008.

Average Selling Prices ⁽¹⁾	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change

Derivatives and Risk Management

Management of cash flow variability is an integral component of Crescent Point's business strategy. Changing business conditions are monitored regularly and reviewed with the Board of Directors of CPRI, the administrators of the Trust, to establish risk management guidelines used by management in carrying out the Trust's strategic risk management program. The risk exposure inherent in movements in the price of crude oil and natural gas, fluctuations in the US/Cdn dollar exchange rate, changes in the price of power and interest rate movements on long-term debt are all proactively managed by Crescent Point through the use of derivatives with investment grade counterparties. The Trust considers these contracts to be an effective means to manage cash flow.

The Trust's crude oil and natural gas financial instruments are referenced to WTI and AECO, unless otherwise noted. Crescent Point utilizes a variety of financial instruments including swaps, collars and puts to protect against downward commodity price movements while providing the opportunity for some participation during periods of rising prices.

During the three months ended December 31, 2008, the Trust realized a hedging gain of \$9.9 million compared to a loss of \$11.3 million in the same period during 2007. This fluctuation is the result of a 19 percent decrease in the Cdn\$ WTI benchmark price during the three months ended December 31, 2008 compared to the same period in the previous year.

The Trust incurred total realized derivative losses of \$154.6 million during the twelve months ended December 31, 2008 compared to a loss of \$9.9 million during 2007. The total derivative losses consists of an operating realized derivative loss of \$120.1 million plus a \$34.5 million realized derivative loss relating to the Trust's derivative crystallization and reset program (discussed below).

Crescent Point's operating realized derivative loss for oil was \$119.7 million in 2008 compared to a loss of \$10.8 million during 2007. The increase in the loss is attributable to the significant increase in the Cdn\$ WTI benchmark price, a year-over-year increase of 36 percent. This increase is partially offset by an increase in the oil derivative prices. The Trust's effective financial instrument oil price increased 15 percent or \$10.99 per barrel, from \$75.22 per barrel in 2007 to \$86.21 per barrel in 2008.

Crescent Point's loss pursuant to its derivative crystallization and reset program ("derivative crystallization") announced June 16, 2008 was \$34.5 million. The Trust crystallized a portion of its forward mark-to-market losses on swaps for 2009 and 2010 and reset the derivatives using a combination of swaps and costless collars at market prices at the end of the second quarter, which were significantly higher than the Trust's average derivative price. The impact of resetting the 2009 and 2010 derivatives will increase the Trust's 2009 and 2010 funds flow from operations for derivative transactions.

The following is a summary of the realized derivative gains (losses) on oil and gas contracts:

(\$000, except per boe and volume amounts)	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change
Average crude oil volumes hedged (bbls/d)	16,750	12,250	37	16,520	11,190	48
Crude oil realized derivative gain (loss) per bbl	9,864 3.07	(11,594) (4.41)	185 170	(119,745) (10.04)	(10,752) (1.21)	1,014 730
Average natural gas volumes hedged (GJ/d)	674	2,674	(75)	1,667	3,173	(47)
Natural gas realized derivative gain (loss) per mcf	52 0.02	305 0.12	(83) (83)	(342) (0.03)	853 0.10	(140) (130)
Average barrels of oil equivalent hedged (boe/d)	16,857	12,672	33	16,783	11,691	44
Realized derivative gain (loss) per boe	9,916 2.72	(11,289) (3.68)	188 174	(120,087) (8.77)	(9,899) (0.96)	1,113 814
Derivative crystallization loss per boe	- -	- -	- -	(34,483) (2.52)	- -	- -
Total realized derivative gain (loss) per boe	9,916 2.72	(11,289) (3.68)	188 174	(154,570) (11.29)	(9,899) (0.96)	1,461 1,076

The Trust has not designated any of its risk management activities as accounting hedges under the Canadian Institute of Chartered Accountants (the "CICA") section 3855 and, accordingly, has marked-to-market its derivatives.

The Trust's risk management policy allows for hedging a forward profile of three and a half years, and up to 65 percent of net royalty interest production. As at March 3, 2009, the Trust had hedged 57 percent, 42 percent, 27 percent, and 14 percent of production, net of royalty interest, for the balance of 2009, 2010, 2011 and the first six months of 2012, respectively.

Crescent Point has the following derivative contracts in place as at March 3, 2009:

Financial WTI Crude Oil Contracts - Canadian Dollar ⁽¹⁾						
Term	Contract	Average Volume (bbls/d)	Average Swap Price (\$Cdn/bbl)	Average Collar Sold Call Price (\$Cdn/bbl)	Average Collar Bought Put Price (\$Cdn/bbl)	Average Put Premium (\$Cdn/bbl)

January 2010 – December 2010		3.0	80.75

Revenues

During the three months ended December 31, 2008, oil revenues decreased three percent compared to the same period in 2007. This decrease is primarily the result of a 35 percent decrease in US\$ WTI benchmark price during the last quarter of 2008 compared to the same period in 2007, partially offset by a 22 percent increase in production volumes as a result of the 2008 acquisition of Pilot Energy Ltd. and non-Bakken assets of Landex Petroleum Corp. ("Landex") as well as successful drilling results.

Oil revenues were \$1.1 billion for the twelve months ended December 31, 2008 compared to \$598.4 million in 2007. The 88 percent increase relates primarily to 38 percent increase in the US\$ WTI benchmark price for 2008 compared to 2007 and a 34 percent increase in production volumes as a result of the 2008 acquisition of Pilot Energy Ltd. and non-Bakken assets of Landex as well as the Trust's successful drilling program.

During the three months ended December 31, 2008, natural gas revenues increased 12 percent compared to the same period in 2007. This increase is the result of nine percent increase in the AECO daily gas price, partially offset by a two percent decline in production volumes.

Natural gas sales increased 64 percent in 2008 compared to 2007. The increase is the result of a 27 percent increase in the AECO daily gas price and a 28 percent increase in production volumes as a result of acquisitions and the Trust's successful drilling program.

On July 23, 2008, the Trust announced that it has a potential exposure to SemCanada Crude Company ("SemCanada"), a Canadian subsidiary of SemGroup, L.P. ("SemGroup"), relating to the marketing of a portion of the Trust's crude oil and liquids production. The contract pertaining to the majority of the production volumes purchased by SemCanada was previously terminated and does not represent an ongoing exposure for the Trust. SemGroup filed a voluntary petition for reorganization under Chapter 11 of the Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware and SemCanada also filed for creditor protection in Canada under The Companies' Creditors Arrangement Act. The Trust's actual exposure is approximately \$31.1 million based on confirmed production volumes and contract prices.

During the fourth quarter of 2008, the Trust recorded a \$19.4 million bad debt provision based on the Trust's estimate of uncollectible amounts from SemCanada at December 31, 2008.

(\$000) ⁽¹⁾	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change
Crude oil and NGL sales	192,684	198,174	(3)	1,125,300	598,364	88
Natural gas sales	18,580	16,574	12	88,376	53,811	64
Revenues	211,264	214,748	(2)	1,213,676	652,175	86

(1) Revenue is reported before transportation charges and realized derivatives.

Transportation Expense

During the three months ended December 31, 2008, transportation expenses were \$1.60 per boe compared to \$1.83 in the previous year. This decrease is the result of a reduction in pipeline capacity constraints in southeast Saskatchewan as described below.

For the twelve months ended December 31, 2008, transportation expense per boe increased eight percent compared to 2007. The increase relates to pipeline constraint issues in southeast Saskatchewan which began in the fourth quarter of 2006 and continued through until mid-2008. Growing production volumes in southeast Saskatchewan and incremental imports from other areas had exceeded capacity of the area's major oil gathering system, Enbridge Pipelines (Saskatchewan). Efforts to maintain crude sales led to incremental trucking costs throughout 2007 and most of 2008.

(\$000, except per boe amounts)	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change
Transportation expenses	5,813	5,626	3	25,608	17,725	44
Per boe	1.60	1.83	(13)	1.87	1.73	8

Royalty Expenses

During the three months ended December 31, 2008, royalties as a percentage of sales were 16 percent compared to 18 percent in the same period in 2007. This decrease is the result of the significant decrease in oil selling prices during the quarter combined with the impact of the royalty incentives associated with the Trust's drilling program in Saskatchewan.

Royalties as a percentage of sales were 18 percent during the twelve months ended December 31, 2008, consistent with the same period in 2007. Royalties per boe increased 39 percent during 2008 compared to 2007. This increase is primarily the result of the 40 percent increase in realized sales prices in 2008 compared to 2007.

(\$000, except per boe amounts)	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change
Total royalties	34,672	39,295	(12)	220,225	118,915	85
As a % of oil and gas sales	16%	18%	(2)	18%	18%	-
Per boe	9.53	12.81	(26)	16.09	11.59	39

Operating Expenses

Operating expenses per boe during the three months ended December 31, 2008 were consistent with the same period in 2007.

Operating expense per boe decreased by three percent from \$9.25 per boe in 2007 to \$9.01 per boe in 2008. This decrease in operating costs relates primarily to the growth of the high quality Bakken crude production which has lower average operating costs due to its geographical concentration, relatively new production and benefit of significant Trust infrastructure including an 18 mmcf/d gas processing plant and several batteries.

(\$000, except per boe amounts)	Three months ended December 31			Year ended December		
	2008	2007	% Change	2008	2007	% Change
Operating expenses	33,584	28,192	19	123,316	94,918	30
Per boe	9.23	9.19	-	9.01	9.25	(3)

Netbacks

During the three months ended December 31, 2008, Crescent Point's operating netback decreased five percent from \$42.48 per boe in 2007 to \$40.42 per boe in 2008. This decrease is primarily the result of the decrease in the average selling price as a result of a decrease in the US\$ WTI benchmark price, partially offset by a realized gain on derivatives during 2008 compared to a loss in the same period in 2007.

For the twelve months ended December 31, 2008, Crescent Point's operating netback, after realized loss on derivatives, increased 32 percent from \$40.02 per boe to \$52.93 per boe. This increase is primarily the result of the increase in the average selling price as a result of the increase in the US\$ WTI benchmark price, partially offset by realized derivative losses during 2008. The realized derivative losses did not completely offset the benefits of the increased average selling price due to the increase in average derivative prices for contracts maturing in 2008 and the Trust's policy to hedge up to a maximum of 65% of its after royalty production.

After adjusting for the Trust's derivative crystallization, the Trust's netback for the year was further reduced by \$2.52 per boe to \$50.41 per boe. As discussed earlier, this realized derivative crystallization loss will be recovered through higher reset derivative prices entered into in 2009 and 2010.

	Three months ended December 31				
	2008			2007	
	Crude Oil and NGL (\$/bbl)	Natural Gas (\$/mcf)	Total (\$/boe)	Total (\$/boe)	% Change
Average selling price	60.02	7.23	58.06	69.99	(17)

(1) The Trust realized a \$34.5 million loss in the second quarter of 2008 resulting from the crystallization of various oil contracts.

General and Administrative Expenses

General and administrative expenses increased 502 percent for the three months ended December 31, 2008 compared to the same period in 2007. This increase is the result of a \$19.4 million provision for uncollectible amounts from SemCanada as discussed above. Excluding this one time write-down, general and administrative expenses were \$1.14 per boe during the fourth quarter of 2008.

General and administrative expenses increased 167 percent for the twelve months ended December 31, 2008 compared to 2007. In addition to the fourth quarter bad debt provision, the year ended December 31, 2008 also has the special bonus award paid to employees of the Trust in the second quarter of 2008. Excluding the bad debt provision and special bonus award, general and administrative expenses were \$1.12 per boe for the year ended December 31, 2008.

(\$000, except per boe amounts)	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change

Restricted Unit Bonus Plan

The Trust has a Restricted Unit Bonus Plan and under the terms of this plan, the Trust may grant restricted units to directors, officers, employees and consultants. Restricted units vest at 33 1/3 percent on each of the first, second and third anniversaries of the grant date or at a date approved by the Board of Directors. Restricted unitholders are eligible for monthly distributions, immediately upon grant.

On May 30, 2008, at the annual general meeting, the unitholders approved an increase in the maximum number of trust units issuable under the Restricted Unit Bonus Plan from 5,000,000 units to 11,000,000 units. The Trust had 2,325,302 restricted units outstanding at December 31, 2008 compared with 1,486,050 units outstanding at December 31, 2007.

During the three months ended December 31, 2008, the Trust recorded compensation expense and contributed surplus of \$9.7 million, based on fair value of units on the date of grant, an increase of 156 percent over 2007. The cash distributions on restricted units increased from \$0.6 million for the three months ended December 31, 2007 to \$1.0 million for the same period in 2008. The total cash and non-cash unit based compensation recorded in the fourth quarter of 2008 was \$10.7 million

compared to \$4.3 million during 2007. This increase is the result of an increase in the number of restricted units granted (see below) and an increase in the fair value at the time of grant.

During the twelve months ended December 31, 2008, the Trust recorded compensation expense and contributed surplus of \$27.4 million in 2008, based on fair value of units on the date of grant, an increase of 91 percent over 2007. The cash distributions on restricted units increased from \$2.0 million for the 2007 year to \$3.3 million for the 2008 year. The total cash and non-cash unit based compensation recorded in the year 2008 was \$30.8 million, as compared to \$16.4 million in 2007, an increase of 88 percent. This increase is due to the issuance approved by the Board of Directors effective July 1, 2008 of 551,622 restricted units to employees of the Trust in conjunction with the special bonus award, an increase in the fair value per unit at the time of grant and the growth in the Trust's operations combined with industry pressures to retain and attract high quality employees.

(\$000, except per boe amounts)	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change
Cash unit-based compensation expense	1,000	559	79	3,343	1,997	67
Non-cash unit-based compensation expense	9,683	3,786	156	27,435	14,378	91
Total	10,683	4,345	146	30,778	16,375	88
Per boe	2.94	1.42	107	2.25	1.60	41

Interest Expense

Interest expense increased 20 percent and 54 percent for the three and twelve months ended December 31, 2008. This increase is attributable to increased amounts drawn on credit facilities throughout the year reflecting the growth of the Trust. This increase was partially offset by a decrease in the prime rate through the majority of the year. Crescent Point actively manages exposure to fluctuations in interest rates through interest rate swaps and short term banker's acceptances (refer to Derivatives and Risk Management section above).

(\$000, except per boe amounts)	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change
Interest expense	9,700	8,107	20	33,484	21,805	54
Per boe	2.67	2.64	1	2.45	2.12	16

Depletion, Depreciation and Amortization

The depletion, depreciation and amortization expense per boe were \$22.70 and \$23.05 for the three and twelve months ended December 31, 2008, respectively, and were consistent with the same periods in 2007. During 2008, the net capital acquisitions did not have a significant impact on the Trust's depletion rate.

(\$000, except per boe amounts)	Three months ended December 31			Year ended December 31

Taxes

Capital Tax and Other Expense

Capital and other tax expense consists of Saskatchewan Corporation Capital Tax Resource Surcharge. Capital and other tax expense for the fourth quarter of 2008 decreased 34 percent over 2007 due to a decrease in the Trust's realized oil price reflecting the lower market prices, partially offset by an increase in the Trust's Saskatchewan based production, primarily as a result of the acquisitions of Innova, Pilot and the non-Bakken assets of Landex completed over the past year and the Trust's development drilling program.

The Trust's capital and other tax expense for the year ended December 31, 2008 increased 30 percent over the comparable 2007 period due to higher realized oil prices and an increase in production levels.

Future Income Tax Expense

Future income tax expense increased from \$18.0 million in the fourth quarter of 2007 to \$73.9 million in the fourth quarter of 2008. The expense in the fourth quarter of 2008 relates primarily to a larger amount of temporary differences expected to reverse in 2011 and beyond and a larger distribution of income and temporary differences to corporate entities during the period, which are taxed at higher rates than the trust entities. In addition, the significant unrealized gain on derivatives of \$416.8 million also contributed to the increase in the future tax expense in the fourth quarter of 2008.

The future income tax expense for the year ended December 31, 2008 was \$77.3 million as compared to \$21.2 million in 2007. The expense in 2008 relates primarily to a larger amount of temporary differences expected to reverse in 2011 and beyond and a larger distribution of income and temporary differences to corporate entities during the period, which are taxed at higher rates than the trust entities. In addition, the significant unrealized gain on derivatives of \$294.3 million also contributed to the increase in the future tax expense in 2008.

At December 31, 2008, the Trust had tax pools of approximately \$1.3 billion (2007 - \$1.0 billion) consisting of intangible resource pools, tangible pools and trust unit issue costs.

Enactment of Tax on Income Trusts

On June 22, 2007, income trust tax legislation was passed resulting in tax on the distributions of publicly traded income trusts and limited partnerships, referred to as "Specified Investment Flow-Through" ("SIFT") entities, commencing in 2011 (the "SIFT Tax Rules"). The tax on distributions includes tax at the federal corporate income tax rate plus a deemed 13 percent provincial income tax at the Trust level. Currently, distributions paid to unitholders, other than returns of capital, are claimed as a deduction by the Trust in arriving at taxable income whereby tax is eliminated at the Trust level and is paid by the unitholders. The trust tax is not expected to impact the Trust until 2011, provided that the Trust does not exceed the normal growth guidelines announced by the Department of Finance.

On February 26, 2008, the federal government announced that beginning with the 2009 taxation year, the provincial component of the trust tax will be based on the general provincial corporate tax rate in each province in which the trust has a permanent establishment instead of the deemed 13 percent provincial tax rate. As the proposed rules were not substantively enacted as of December 31, 2008, the Trust has not reflected a reduced tax rate in the calculation of future income taxes in 2008.

On November 28, 2008, the Department of Finance released draft legislation to allow the conversion of SIFT trusts into corporations. The legislation has two main elements. The first allows unitholders to sell their units to a taxable Canadian corporation on a tax-deferred basis. The second element provides two alternatives for the tax-deferred elimination of trusts. The draft legislation provides that trusts will have a limited period of time, until December 31, 2012, to convert to corporations on a tax-deferred basis. The draft legislation also included draft income tax regulations regarding the calculation of the provincial tax rate which will apply as part of the SIFT tax. A Notice of Ways and Means that includes the proposed legislation to facilitate the conversion of income trusts into corporations was tabled by the Minister of Finance on February 1, 2009.

The Explanatory Notes released on December 4, 2008 in respect of the November 28, 2008 draft legislation, announced the elimination to the staging of the Safe Harbour limits for 2009 and 2010. Income trusts are now permitted to accelerate the utilization of their annual Safe Harbour limits for 2009 and 2010, without penalty. With the acquisition from Talisman, the Trust is close to its Safe Harbour limit.

The Board has agreed to a strategic conversion to a dividend paying corporation. The conversion, which the Trust expects to complete on or before May 31, 2009, will be subject to unitholder approval as well as customary court and regulatory approvals.

(\$000)	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change
Capital and other tax expense	3,233	4,874	(34)	20,031	15,394	30
Future income tax expense	73,850	17,965	311	77,308	21,173	265

Funds Flow, Cash Flow and Net Income

Funds flow from operations decreased to \$109.6 million in the fourth quarter of 2008 from \$112.6 million in the fourth quarter of 2007 and decreased to \$0.87 per unit – diluted from \$0.99 per unit – diluted, respectively. The decrease in funds flow from operations and funds flow from operations per unit – diluted is primarily the result of the \$19.4 million bad debt provision and the decrease in the operating netback, partially offset by increased production volumes. The Trust's operating netback decreased five percent primarily as a result of the decline in the Cdn\$ WTI benchmark pricing, partially offset by realized gains on derivatives and lower royalty costs.

In the twelve months ended December 31, 2008, funds flow from operations increased 66 percent to \$592.1 million compared to \$355.9 million in the same period during 2007. This increase is primarily the result of higher operating netbacks and increased production volumes. The operating netback increased 32 percent primarily the result of increases in the Cdn\$ WTI benchmark pricing, partially offset by increased losses on derivative contracts.

Cash flow from operating activities in the fourth quarter of 2008 increased to \$125.6 million from \$99.1 million during the fourth quarter 2008. Cash flow from operating activities per unit – diluted increased 14 percent to \$0.99 per unit – diluted in the fourth quarter of 2008 from \$0.87 per unit – diluted for the same period in 2007. The increase in cash flow from operating activities and cash flow from operating activities per unit – diluted is a result of the same factors above and further increased by fluctuations in operating working capital.

Cash flow from operating activities in the twelve months ended December 31, 2008 increased to \$585.0 million from \$332.6 million during 2007. Cash flow from operating activities per unit – diluted increased 42 percent to \$4.67 per unit – diluted during 2008 from \$3.28 per unit – diluted during 2007. The increase in cash flow from operating activities and cash flow from operating activities per unit – diluted is a result of the same factors above and further increased by fluctuations in operating working capital.

Net income for the fourth quarter of 2008 increased to \$361.4 million from a loss of \$90.3 million during the fourth quarter of 2007. The increase is primarily the result of realized derivative gains of \$9.9 million and unrealized derivative gains of \$416.8 million during 2008 compared to realized derivative losses of \$11.3 million and unrealized derivative losses of \$112.2 million during the fourth quarter of 2008. The trend in net income per unit – diluted was also driven by the same factors.

The Trust recorded net income of \$464.1 million during the twelve months ended December 31, 2008 compared to a loss of \$32.2 million during 2007. This increase is the result of higher operating netbacks, increased production and unrealized

derivative gains of \$294.3 million, partially offset by realized derivative losses of \$154.6 million during 2008. The trend in net income per unit – diluted was also driven by the same factors.

Excluding the derivative crystallization of \$34.5 million and \$19.4 million bad debt provision for SemCanada: funds flow from operations for the twelve months ended December 31, 2008 would have been \$646.0 million or \$5.16 per unit – diluted; cash flow from operations for 2008, would have been \$638.9 million or \$5.10 per unit – diluted; and net income would have been \$518.0 million or \$4.14 per unit – diluted. Lastly, excluding the \$34.5 million derivative crystallization, the realized derivative loss would have been \$120.1 million.

As noted in the Derivatives and Risk Management section, the Trust has not designated any of its risk management activities as accounting hedges under the CICA Handbook section 3855 and, accordingly, has marked-to-market its derivatives.

Crescent Point uses financial derivatives, including swaps, costless collars and put options, to reduce the volatility of the selling price of its crude oil and natural gas production. This provides a measure of stability to the Trust's cash flows and distributions over time.

The Trust's derivatives portfolio extends out 3½ years from the current quarter.

The CICA Handbook section 3855 "Financial Instruments – Recognition and Measurement", gives guidelines for mark to market accounting for financial derivatives. Financial derivatives that have not settled during the current quarter are marked to market each quarter. The change in mark to market from the previous quarter represents a gain or loss that is recorded on the income statement. As such, if benchmark oil and natural gas prices rise during the quarter, the Trust records a loss based on the change in price multiplied by the volume of oil and natural gas hedged. If prices fall during the quarter, the Trust records a gain. The prices used to record the actual gain or loss are subject to an adjustment for volatility, then the resulting gain (asset) or loss (liability) is discounted to a present value using a risk-free rate adjusted for counterparty risk.

The Trust's underlying physical reserves are not marked to market each quarter, hence no gain or loss associated with price changes is recorded; the Trust realizes the benefit/detriment of any price increase/decrease in the period which the physical sales occur.

The Trust's financial results should be viewed with the understanding that the future gain or loss on financial derivatives is recorded in the current period's results, while the future value of the underlying physical sales is not.

(\$000, except per unit amounts)	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change
Funds flow from operations	109,635	112,572	(3)	592,132	355,910	66
Funds flow from operations per unit – diluted ⁽¹⁾	0.87	0.99	(12)	4.73	3.51	35
Cash flow from operating activities	125,625	99,070	27	584,955	332,605	76
Cash flow from operating activities per unit–diluted ⁽¹⁾	0.99	0.87	14	4.67	3.28	42
Net income	361,411	(90,348)	500	464,102	(32,167)	1,543
Net income per unit – diluted ⁽¹⁾	2.84	(0.80)	455	3.71	(0.32)	1,259

(1) Per unit – diluted is calculated by excluding the cash portion of unit based compensation.

Cash Distributions

In June 2008, the Trust increased its monthly distribution from \$0.20 per unit to \$0.23 per unit.

Distributions for the year ending December 31, 2008 were \$2.61 per unit, compared to \$2.40 per unit during 2007. The distribution increase is the result of Crescent Point's growing cash flow per unit, which was due to higher than expected commodity prices throughout the majority of 2008, increased production levels and higher netbacks resulting from the Trust's successful Bakken drilling program. Crescent Point believes it is well positioned to maintain its current monthly distribution over time as the Trust continues to exploit and develop its current base. The Trust's risk management strategy minimized corporate price volatility and provides a measure of sustainability to distributions through periods of fluctuating market prices.

The Trust's derivative crystallization and reset program, discussed above, will provide further certainty to 2009 and 2010 cash flows and distributions. The impact of resetting the 2009 and 2010 derivatives will increase the Trust's 2009 and 2010 average hedge prices. The cash outflow from the derivative crystallization and reset program during the year ended December 31, 2008 was \$34.5 million.

Cash distributions increased 27 percent and 33 percent, respectively, for the three and twelve months ended December 31, 2008 compared to 2007. The rise in distributions is the result of increases in the distribution rate and the number of units outstanding, resulting from the Pilot acquisition in the first quarter of 2008 along with bought deal financings which closed in September 2007 and January 2008.

The following table provides a reconciliation of cash distributions:

(\$000, except per unit amounts)	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change
Accumulated cash distributions, beginning of period	774,057	467,579	66	535,550	290,442	84
Cash distributions declared to unitholders ⁽¹⁾	86,314	67,971	27	324,821	245,108	33
Accumulated cash distributions, end of period	860,371	535,550	61	860,371	535,550	61
Accumulated cash distributions per unit, beginning of period	11.58	9.06	28	9.66	7.26	33
Cash distributions declared to unitholders per unit ⁽¹⁾	0.69	0.60	15	2.61	2.40	9
Accumulated cash distributions per unit, end of period	12.27	9.66	27	12.27	9.66	27

(1) Cash distributions reflect the sum of the amounts declared monthly to unitholders, including distributions under the DRIP and Premium DRIP plans.

For the three and twelve months ended December 31, 2008, cash flow from operating activities of \$125.6 million and \$585.0 million, respectively, exceeded cash distributions of \$86.3 million and \$324.8 million, respectively. This trend was consistent for 2007 and 2006.

Net income for the three month period ended December 31, 2008 of \$361.4 million exceeded cash distributions of \$86.3 million, primarily due to the significant unrealized gain on derivatives of \$416.8 million.

Net income for the twelve months ended December 31, 2008 of \$464.1 million exceeded cash distributions of \$324.8 million, primarily due to the significant unrealized gain on derivatives of \$294.3 million. Net income includes significant non-cash income or charges that do not impact the cash flow which in the fourth quarter were a net \$251.8 million of non-cash income and net \$128.0 million of non-cash charges for the twelve months ended December 31, 2008. The non-cash fluctuations include changes in future income taxes due to changes in the tax rates and tax rules, unrealized gains on derivatives, depletion and unit based compensation.

Crescent Point does not anticipate cash distributions will exceed cash flow from operating activities however it is likely they will exceed net income as noted above given the significant non-cash items that are recorded such as future income taxes, depletion, unit-based compensation and unrealized gains (losses) on derivatives. Further, the cash flow from operating activities can be significantly impacted by large fluctuations in working capital that may vary quarter-to-quarter but level out over the period.

An objective of the Trust's distribution policy is to provide unitholders with relatively stable and predictable monthly distributions. An additional objective is to retain a portion of funds flow from operations to fund ongoing development and optimization projects designed to enhance the sustainability of the Trust's funds flow from operations.

Although the Trust strives to provide unitholders with stable and predictable funds flow from operations, the percentage of funds flow from operations paid to unitholders each month may vary according to a number of factors, including fluctuations in resource prices, exchange rates and production rates, reserves growth, the size of development drilling programs and the portion thereof funded from funds flow from operations and the overall level of debt of the Trust. The actual amounts of the distributions are at the discretion of the Board of Directors. In the event that commodity prices are higher than anticipated and a cash surplus develops, such surplus may be used to increase distributions, reduce debt and/or increase the capital program.

The Trust has a strong balance sheet and a balanced three and a half year derivative profile and is, therefore, well positioned to sustain distributions over time as Crescent Point continues to exploit and develop its asset base and actively identify and evaluate acquisition opportunities. As discussed above, there are many factors impacting the Trust's ability to sustain distributions. The Trust continues to monitor these factors in connection with setting long term sustainable distribution levels.

The following table provides a reconciliation of distributable cash:

(\$000)	Three months ended December 31		Year ended December 31		
	2008	2007	2008	2007	2006
Cash flow from operating activities	125,625	99,070	584,955	332,605	177,426
Net income (loss)	361,411	(90,348)	464,102	(32,167)	68,947
Cash distributions paid or payable	86,314	67,971	324,821	245,108	150,277
Excess of cash flows from operating activities over cash distributions paid	39,311	31,099	260,134	87,497	27,149
Excess (shortfall) of net income (loss) over cash distributions paid	275,097	(158,319)	139,281	(277,275)	(81,330)

Taxation of Cash Distributions

Cash distributions are comprised of a return on capital portion (taxable) and a return of capital portion (tax deferred). For cash distributions received by Canadian residents outside of a registered pension or retirement plan in the 2008 taxation year, the distributions are 100 percent taxable.

The following table outlines the breakdown of the cash distributions per unit paid or payable by the Trust with respect to the record dates from January 31, 2008 to December 31, 2008 for Canadian income tax purposes:

Record Date	Payment Date	Taxable Amount (Box 26 Other Income)	Tax Deferred Amount (Box 42 Return of Capital)	Total Cash Distribution
January 31, 2008	February 15, 2008	\$0.20	-	\$0.20
February 29, 2008	March 17, 2008	\$0.20	-	\$0.20
March 31, 2008	April 15, 2008	\$0.20	-	\$0.20
April 30, 2008	May 15, 2008	\$0.20	-	\$0.20
May 31, 2008	June 16, 2008	\$0.20	-	\$0.20
June 30, 2008	July 15, 2008	\$0.23	-	\$0.23
July 31, 2008	August 15, 2008	\$0.23	-	\$0.23
August 31, 2008	September 15, 2008	\$0.23	-	\$0.23
September 30, 2008	October 15, 2008	\$0.23	-	\$0.23
October 31, 2008	November 17, 2008	\$0.23	-	\$0.23
November 30, 2008	December 15, 2008	\$0.23	-	\$0.23
December 31, 2008	January 15, 2009	\$0.23	-	\$0.23
TOTAL PER UNIT		\$2.61	-	\$2.61

Investments in Marketable Securities

During the year ended December 31, 2007, the Trust owned shares of publicly traded exploration and production companies. In accordance with new accounting standards for financial instruments, the Trust marked-to-market its investment in marketable securities in the first quarter of 2007. The carrying amount of \$0.1 million at December 31, 2006 was increased to \$1.6 million at January 1, 2007 to reflect the fair value of the investment. The unrealized gain of \$1.5 million at January 1, 2007 was recorded through retained earnings. In the second quarter of 2007, the Trust sold the securities for a realized gain of \$1.4 million.

In the fourth quarter of 2007, the Trust received 1.5 million shares of a publicly traded exploration and production company for \$1.00 per share or \$1.5 million in connection with a disposition of properties. The fair value at December 31, 2007 was \$1.4 million, resulting in an unrealized loss on investment of \$0.1 million recorded through the income statement. Throughout 2008, the Trust continued to hold these shares and recorded an unrealized loss of \$1.4 million and \$0.8 million, for the three months and twelve months ended Dec 31, 2008, respectively.

Long-Term Investments

a) Wild River Resources Ltd.

On December 15, 2008, the Trust announced that it had acquired a 17 percent ownership of Wild River Resources Ltd., a private oil and gas producer with assets in the southeast Saskatchewan Bakken light oil resource play and in the emerging southwest Saskatchewan Lower Shaunavon resource play. The total investment of \$20.0 million was acquired through a private placement financing.

b) Shelter Bay Energy Inc.

During the first quarter of 2008, the Trust invested in Shelter Bay, a private Bakken light oil growth company. At that time, the Trust also entered into a Call Obligation Agreement with Shelter Bay in exchange for Special Voting Shares. Pursuant to the agreement, the Trust committed to subscribe for additional Class A Common Shares of Shelter Bay if so requested by Shelter Bay for approximately \$45.4 million. In connection with this capital commitment, the Trust received 45.4 million Special Voting Shares. Other major investors of Shelter Bay also entered into similar Call Obligation Agreements with Shelter Bay. As a result, the Trust's equity interest would not change significantly in connection with the Call Obligation Agreement.

The Trust accounts for its investment in Shelter Bay using the equity method.

The Trust's initial investment of \$76.3 million was comprised of 72.6 million Class A Common Shares and 3.5 million Non-Voting Common Shares, issued for \$1.00 per share.

During the second quarter of 2008, the Trust, pursuant to the Call Obligation Agreement, invested a further \$20.0 million in Shelter Bay in return for an additional 20.0 million Class A Common Shares.

During the third quarter of 2008, Shelter Bay exercised its remaining call rights under the Call Obligation Agreements. As a result the Trust subscribed for approximately 25.4 million Class A Common Shares for \$25.4 million in July 2008. This subscription satisfied in full the Trust's commitment under the Call Obligation Agreement. On September 5, 2008, the Trust exchanged with Shelter Bay 3.5 million Non-Voting Common Shares of Shelter Bay for 3.5 million Class A Common Shares of Shelter Bay.

In the fourth quarter of 2008, the Trust invested a further \$78.7 million in Shelter Bay through participation in private placement financing for an additional 52.4 million Class A Common Shares.

At December 31, 2008, the Trust's investment of \$200.4 million consists of 173.9 million Class A Common Shares, which represents an interest of 21 percent.

Under the terms of the unanimous shareholders' agreement governing Shelter Bay (the "Shelter Bay USA"), the Trust has a right to purchase all, but not less than all, of the shares of Shelter Bay not already owned by the Trust (the "Call Right") at a price equal to the market value of the shares, as defined in the Shelter Bay USA. The Call Right is exercisable at (i) any time before April 1, 2011, provided that the proceeds from such a transaction (including cumulative distributions) would result in the initial investors in Shelter Bay receiving realized proceeds equal to at least two times the amount of the aggregate capital invested by the initial investors and the Trust in Shelter Bay, or (ii) any time on or after April 1, 2011 and on or before March 31, 2013.

Upon exercise of the Call Right, and acceptance by 66 2/3 percent or greater of the shares held by Shelter Bay shareholders (excluding the Trust), the Trust will have the right to acquire all of the Shelter Bay shares it does not own. In the event of acceptance by less than 66 2/3 percent of the shares held by Shelter Bay shareholders (excluding the Trust), the Trust shall have the right to purchase all of the assets (the "Asset Call Right") of Shelter Bay for 105% of the market value of the assets, as defined in the Shelter Bay USA.

In the event Crescent Point exercises its Call Right or Asset Call Right, Class B and C Common Share shareholders will be entitled to receive 100 percent of all proceeds from the sale transaction up to their original investment in Shelter Bay plus a 10 percent return on investment. Class A Common Share shareholders would then receive 100 percent of their original investment in the Company plus a 10 percent return on investment. Subsequent proceeds up to and until a 25 percent return on investment to all Common Shareholders, would be shared on a pro rata basis by shareholders in accordance with the number of shares held by each shareholder. Following receipt of a 25 percent return on investment by all Common Shareholders, the remaining proceeds would be shared 50 percent by Crescent Point and 50 percent by all Common Shareholders on a pro rata basis.

As at December 31, 2008, no conditions exist which would require the Trust to record a liability pursuant to the Shelter Bay USA.

Also under the Shelter Bay USA, between April 1, 2013 and September 30, 2013, certain Shelter Bay shareholders shall have a separate right to require that the Trust acquire all of the shares of Shelter Bay then owned by such shareholder for a purchase price equal to 85% of the market value of such shares, as defined in the Shelter Bay USA (the "Put Right"). If the Put Right is exercised, the Trust will be obligated to provide all of the other shareholders in Shelter Bay with a similar right to put their shares to the Trust on the same terms.

The purchase price for the Shelter Bay shares may be settled, at the Trust's election, in cash or the issuance of Trust Units; however, the Shelter Bay shareholders shall have certain rights to receive their consideration for their Shelter Bay shares in the form of Trust Units.

Notwithstanding the foregoing, the Trust shall have no obligation to cause to be issued Trust Units under the Shelter Bay USA in an amount that would cause the Trust to lose its grandfathered status under the SIFT Rules by violating the "normal growth" guidelines. Given the terms of the Shelter Bay USA, there can be no assurance that the Trust will not be required to, or will not elect to purchase the shares of Shelter Bay not already owned by the Trust or the assets of Shelter Bay and further, there can be no assurance that the Trust will have the capital resources to satisfy such Call Right or Put Right or that it will be able to issue Trust Units to Shelter Bay shareholders in association with the exercise of the Call Right or Put Right described herein, which number of Trust Units may be material to the Trust at the time of issuance and which issuance may be dilutive to existing holders of Trust Units at such time.

Related Party Transactions

At December 31, 2008, the Trust's investment of \$200.4 million consisted of 173.9 million Class A Common Shares, which represents an interest of 21 percent, plus the equity earnings of \$4.5 million.

The following related party transactions occurred between Crescent Point and Shelter Bay during 2008:

- *Management and Technical Services Agreement* - The Trust entered into a Management and Technical Services Agreement with Shelter Bay, effective January 11, 2008. The purpose of this agreement is to reimburse Crescent Point for costs incurred while overseeing the responsibilities relating to the managing, administering and operating the assets and business of Shelter Bay. The services are provided in exchange for a monthly management fee. Crescent Point billed management fees of \$2.5 million to Shelter Bay for the year ended December 31, 2008.
- *Farm-Out Agreement* - Effective January 11, 2008, the Trust entered into a farm-out agreement with Shelter Bay. Under the agreement, Shelter Bay has the right to farm-in on 22 net sections of Viewfield Bakken lands owned by the Trust. Shelter Bay is responsible for paying 100 percent of the capital costs and earns a 50 percent interest in production from the property, while the Trust retains the other 50 percent production interest. This agreement gives Crescent Point the means to drill this undeveloped land and receive 50% of the production for no capital cost or risk.
- *Farm-Out Note* - During the first quarter of 2008, as Shelter Bay commenced operations, the Trust entered into a farm-out note with Shelter Bay to finance Shelter Bay's capital activities. The principal amount of the note was \$23.5

million and interest on the note was equivalent to the Canadian Chartered Bank Prime Rate plus 2 percent. The principal amount of the note was re-paid on March 26, 2008, subsequent to Shelter Bay's closing of a private placement. Interest of \$0.2 million was charged by Crescent Point during the first quarter and collected at the end of April 2008.

- *Capital Commitment* – Pursuant to Shelter Bay's private placement, the Trust entered into a Call Obligation Agreement with Shelter Bay in association with its subscription for Special Voting Shares. Pursuant to the agreement, the Trust committed to subscribe for additional Class A Common Shares of Shelter Bay for approximately \$45.4 million. In exchange for this capital commitment, the Trust received 45.4 million Special Voting Shares. Other major investors of Shelter Bay also entered into similar Call Obligation Agreements with Shelter Bay and may, at Shelter Bay's discretion be required to subscribe for additional shares of Shelter Bay. As a result, the Trust's equity interest would not change significantly in connection with the Call Obligation Agreement. On May 15, 2008 and July 31, 2008, the Trust subscribed for approximately, 20.0 million Class A Common shares for \$20.0 million and 25.4 million Class A Common Shares for \$25.4 million, respectively. These subscriptions satisfied in full the Trust's commitment under the Call Obligation Agreement.
- *Property Acquisition and Trust Unit Issuance* – In conjunction with the closing of Shelter Bay's acquisition of Landex Petroleum Corp. ("Landex") on March 26, 2008, the Trust issued 3.1 million trust units valued at \$75 million and cash of \$5 million to Shelter Bay in exchange for an \$80 million note. The Trust subsequently completed a Saskatchewan property acquisition from Shelter Bay for total consideration of \$80 million, in exchange for settlement of the note. The trust unit issuance was recorded at \$75 million as this was equivalent to the fair value of the consideration received. The property acquisition was recorded at the exchange amount of \$80 million. The Saskatchewan properties are within Crescent Point's core operating area and a strategic fit to the Trust's operations.
- *Property Disposition* - On March 26, 2008, the Trust disposed of undeveloped land to Shelter Bay for cash consideration of \$31.3 million. The transaction was recorded at the exchange amount. Certain Bakken undeveloped land acquired by the Trust was sold to Shelter Bay to enable Shelter Bay to further drill and exploit the resource play.
- *Property Acquisition* – On December 11, 2008, Crescent Point purchased undeveloped land from the Shelter Bay for cash consideration of \$12.3 million. The transaction was recorded at the exchange amount. This land was purchased by the Trust to align with strategic investment in core assets.
- *Amounts Owning From / Due To* – At December 31, 2008, the Trust had \$3.6 million receivable from Shelter Bay for management fees and operating activity paid for by the Trust on Shelter Bay's behalf. These receivables were collected by the Trust at the end of January 2009.
- *Painted Pony Petroleum Ltd. ("Painted Pony") Share Disposition* - The Trust entered into an agreement with Shelter Bay to dispose of the Painted Pony shares for \$17.8 million. The transaction was recorded at the exchange amount. The Trust received shares of Painted Pony as consideration for an asset disposal and sold these shares to Shelter Bay which further increased Shelter Bay's investment in Painted Pony.

Capital Expenditures

Major Capital Acquisitions

There were no major acquisitions in the fourth quarter of 2008.

Major acquisitions for the year ended December 31, 2008 included Pilot Energy Ltd. and the non-Bakken assets of Landex Petroleum Corp.

Pilot Energy Ltd.

On January 16, 2008, the Trust purchased all the issued and outstanding shares of Pilot Energy Ltd., a publicly traded company with properties in the Viewfield area of southeast Saskatchewan for total consideration of approximately \$78.5 million, including assumed bank debt and working capital (\$93.3 million was allocated to property, plant and equipment). The purchase was paid for through the issuance of approximately 2.6 million trust units and was accounted for as a business combination using the purchase method of accounting. The Trust owned 2.0 million shares of Pilot Energy Ltd. prior to the closing which it purchased for \$2.90 per share or \$5.9 million in November 2007.

Non-Bakken Assets of Landex Petroleum Corp.

On March 26, 2008, the Trust closed the acquisition of the non-Bakken assets of Landex Petroleum Corp. from Shelter Bay for consideration of approximately \$80.0 million (\$81.4 million was allocated to property, plant and equipment). The purchase was paid for with approximately 3.1 million trust units and \$5.0 million of cash from the Trust's existing bank line.

Minor Property Acquisitions and Dispositions

During the three months ended December 31, 2008, the Trust closed three property acquisitions for consideration of approximately \$1.5 million (\$1.9 was allocated to property plant and equipment) and also closed five property dispositions for consideration of approximately \$1.3 million (\$1.4 was recorded as reduction to property, plant and equipment). Purchase price adjustments recorded were recoveries of \$0.9 million on previously closed acquisitions for the three months ended December 31, 2008.

During the year ended December 31, 2008, the Trust closed five minor property acquisitions for \$10.8 million (\$11.9 million was allocated to property, plant and equipment), and several property dispositions for a net consideration of approximately \$30.0 million (\$31.8 million was recorded as reduction to property, plant and equipment). The Trust also recorded purchase price adjustments of \$1.6 million on previously closed acquisitions.

Subsequent Events

On January 9, 2009, the Trust and a syndicate of underwriters closed a bought deal equity financing pursuant to which the syndicate sold 5,227,325 trust units for gross proceeds of \$115.0 million (\$22.00 per trust unit).

On January 15, 2009, the Trust closed the acquisition of Villanova Energy Corporation, a private company with properties in the Bakken area of southeast Saskatchewan by way of a Plan of Arrangement for total consideration of 4.625 million trust units plus the assumption of approximately \$23.6 million of Villanova debt. Total consideration was approximately \$123.1 million based on a value of \$21.51 per trust unit.

On March 4, 2009, the Trust announced the acquisition of the Talisman Energy Inc. ("Talisman") assets in southeast Saskatchewan and Montana for cash consideration of approximately \$720 million effective April 1, 2009. Under the terms of the agreement, Crescent Point and TriStar Oil & Gas Ltd. ("TriStar") will jointly and severally acquire the assets. Crescent Point and TriStar have agreed that each party will acquire 50 percent working interests in the assets for approximately \$360 million. The Trust's share of the acquisition will be financed with existing credit facilities and through a \$230 million bought deal financing (10,825,000 trust units at \$21.25 per trust unit).

Crescent Point and TriStar have also entered into an agreement with Shelter Bay, under which Crescent Point and TriStar will sell to Shelter Bay a portion of the Bakken assets (the "Bakken Assets"). Consideration to be received for the Bakken Assets is approximately \$71 million, of which Crescent Point and TriStar will each receive approximately \$35.5 million.

In addition, the Trust announced an intention to convert to a corporation with a \$0.23 monthly dividend.

Development Capital

(\$000)	Three months ended December 31			Year ended December 31		
	2008	2007	% Change	2008	2007	% Change
Capital acquisitions (net) ⁽¹⁾	(705)	408,377	(100)	140,851	1,068,406	(87)
Development capital expenditures	92,855	95,385	(3)	454,533	227,923	99
Capitalized administration	2,785	1,488	87	11,181	4,607	143
Office equipment	180	981	(82)	1,181	3,258	(64)
Total	95,115	506,231	(81)	607,746	1,304,194	(53)

(1) Capital acquisitions represent total consideration for the transactions including bank debt and working capital assumed.

The Trust's budgeted capital program for 2009 is approximately \$225 million, not including acquisitions. The Trust searches for opportunities that align with strategic parameters and evaluates each prospect on a case-by-case basis. The Trust's acquisitions are expected to be financed through bank debt and new equity issuances where applicable within the federal government's Safe Harbour Limits on equity issuance.

Goodwill

The goodwill balance of \$68.4 million as at December 31, 2008 is attributable to the corporate acquisitions of Tappit Resources Ltd., Capio Petroleum Corporation and Bulldog Energy Inc. during the period 2003 through 2005. The Trust performed a goodwill impairment test at December 31, 2008 and no impairment of goodwill exists.

Asset Retirement Obligation

The asset retirement obligation increased by \$1.2 million during the fourth quarter of 2008. This increase relates to liabilities of \$0.2 million recorded in respect of acquisitions and drilling, partially offset by liabilities disposed of \$0.1 million. Accretion expense of \$1.4 million was also recognized, however was partially offset by \$0.3 million of liabilities settled.

The asset retirement obligation increased by \$2.7 million during 2008. The increase relates to liabilities of \$7.3 million recorded in respect of acquisitions and drilling, partially offset by dispositions of \$1.8 million. Accretion expense of \$5.4 million was also recognized, however was partially offset by actual expenditures incurred in the year of \$2.3 million. In addition, there was a reduction of \$5.9 million relating to changes in prior year estimates as a result of the increased reserve lives in the Viewfield area due to new technology enhancing recoverability.

The reclamation fund increased by \$0.2 million during the fourth quarter of 2008, this increase is the result of contributions of \$1.1 million offset by expenditures of \$0.9 million.

The reclamation fund increased \$1.6 million during 2008. This increase relates to an increase in contributions of \$5.1 million offset by expenditures of \$3.5 million. Contributions to the fund were \$0.30 per barrel of production throughout the year. The Board of Directors and Management review the adequacy of the fund annually and adjust contributions as necessary.

Liquidity and Capital Resources

At December 31, 2008, the Trust had a syndicated credit facility with ten banks and an operating credit facility with one Canadian chartered bank. As at December 31, 2008, the Trust had bank debt of \$918.6 million, leaving unutilized borrowing capacity of \$231.4 million. The credit facility matures in May 2010, however, the Trust anticipates renegotiating the terms of this facility in May 2009.

As at December 31, 2008, Crescent Point was capitalized with 19 percent net debt and 81 percent equity, consistent with the capitalization at December 31, 2007. The Trust's net debt to funds flow from operations ratio at December 31, 2008 was 1.2 times (December 31, 2007 – 1.8 times).

Since the third quarter of 2008, global financial markets have been trapped in a period of significant uncertainty marked by downward pressure on equities, overall tightening of credit markets and global economic recession. Prices for commodities, including crude oil and natural gas, have deteriorated.

During this period, Crescent Point was successful in entering into an agreement to acquire assets from Talisman, in raising \$115 million of equity in a bought deal financing and in entering into a bought deal arrangement in respect of a further \$230 million. The Trust's credit facilities were increased by \$150 million with an additional increase expected in conjunction with the acquisition of the Talisman assets. Shelter Bay raised \$300 million of equity in a private placement in October 2008. The combined \$795 million of financing highlights the high quality nature of the asset bases and the robust economics of the opportunities that lie ahead for both Crescent Point and Shelter Bay.

Crescent Point's development capital budget for 2009 was set in December 2008 at \$225 million, with average production forecast at 38,250 boe/d. Assuming the successful completion of the acquisition of the Talisman assets, Crescent Point has upwardly revised its average 2009 production guidance to 40,500 boe/d, while maintaining its \$225 million capital program for the year. Exit production is forecast greater than 42,000 boe/d.

With low benchmark oil prices early in 2009, the Trust has reduced first quarter drilling plans and focused on achieving significant cost reductions and increasing the number of expected fracture stimulation projects. The capital expenditure reduction in the first quarter has led to an expected 20 percent reduction in Bakken drilling and completions costs to approximately \$1.6 million per Bakken well. With these capital cost reductions, a typical Bakken horizontal well generates a 140 percent before tax rate of return at benchmark WTI oil prices of US\$45 per barrel and pays out in 10 months. These robust economics position the Trust well for potential capital budget and production increases in the second half of 2009 should benchmark WTI oil prices stabilize above US\$45 per barrel.

Crescent Point continues to implement its balanced 3½ year price risk management program, using a combination of swaps, collars and purchased put options with investment grade counter parties all within the Trust's banking syndicate. Effective March 3, 2009, pro forma with the Talisman assets, the Trust had hedged 54 percent of production volumes net of royalty interests for the balance of 2009, 38 percent for 2010, 24 percent for 2011 and 12 percent for the first half of 2012. Quarterly floor prices ranged from Cdn\$74 per boe to Cdn\$108 per boe, with upside potential if prices strengthen above current levels. The Trust's hedge position is significantly in the money, with a mark to market value of \$234 million as of March 3, 2009, including \$98 million for the balance of 2009.

Crescent Point intends to crystallize up to \$75 million of its 2011 and 2012 mark to market hedge value in the first quarter of 2009 and intends to reset those hedges at current market prices, expected to be in the Cdn\$75 per boe to Cdn\$80 per boe range. This capitalizes on the Trust's strong 2011 and 2012 hedges while continuing to provide cash flow stability to Crescent Point over the next 3½ years. Assuming the completion of the crystallization and reset, Crescent Point's 3½ year average hedge price would be in the range of Cdn\$75 to Cdn\$80 per boe while increasing 2009 cash flows by up to \$75 million.

Crescent Point is well positioned to withstand the current market uncertainty and to take advantage of acquisition opportunities. The Trust's balance sheet is strong with projected 2009 net debt to 12 month cash flow of 1.1 times and its 3½ year risk management program provides cash flow stability. The Trust's 16 year drilling inventory and current 100 well fracture stimulation inventory provide long term sustainability and capital investment flexibility even at low oil prices.

Crescent Point's management believes that with the high quality reserve base and development inventory, excellent balance sheet and solid hedging program, the Trust is well positioned to continue generating strong operating and financial results and delivering sustainable distributions through 2009 and beyond.

Capitalization Table (\$000, except unit, per unit and percent amounts)	December 31, 2008	December 31, 2007
Bank debt	918,626	595,984
Working capital ⁽¹⁾	(187,694)	54,104
Net debt ⁽¹⁾	730,932	650,088
Trust units outstanding ⁽²⁾	125,678,681	113,760,732
Market price at end of period (per unit)	24.09	24.81
Market capitalization	3,027,599	2,822,404
Total capitalization	3,758,531	3,472,492
Net debt as a percentage of total capitalization (%)	19	19
Annual funds flow from operations	592,132	355,910
Net debt to funds flow from operations ⁽³⁾	1.2	1.8

(1) Working capital and net debt include long-term investments and bank indebtedness, but exclude the risk management liabilities and assets.

(2) The trust units outstanding balance at December 31, 2008 includes 586,881 of units to be issued on January 15, 2009 pursuant to the DRIP program reinstated in December 2008.

(3) The net debt reflects the financing of acquisitions, however the funds flow from operations only reflects funds flow from operations generated from the acquired properties since the closing dates of the acquisitions.

Unitholders' Equity

At December 31, 2008, Crescent Point had 125.7 million trust units issued and outstanding compared to 113.8 million trust units at December 31, 2007. The increase by 11.9 million trust units relates primarily to the bought deal financing and the acquisition of Pilot in January 2008, combined with the issuance of units for a property acquisition in March 2008:

- The Trust and a syndicate of underwriters closed a bought deal equity financing on January 8, 2008 pursuant to which the syndicate sold 5.2 million trust units at \$24.25 per trust unit for gross proceeds of \$125.0 million.
- The Trust issued 2.6 million trust units to Pilot shareholders at a price of \$23.12 per trust unit on closing of the acquisition on January 16, 2008.
- On March 26, 2008, the Trust issued 3.1 million trust units at \$24.08 per unit in respect of the southeast Saskatchewan property acquisition from Shelter Bay, which was completed in conjunction with Shelter Bay's closing of the Landex acquisition.

In December 2007, the Trust announced that as a result of the federal government Safe Harbour Limits on equity issuances for income trusts, the DRIP, Premium DRIP and Optional Unit Purchase programs would be suspended until further notice beginning the month of December 2007.

On December 15, 2008, the Trust announced that the DRIP, Premium DRIP and Optional Unit Purchase programs would be reinstated for unitholders of record on December 31, 2008 with payments commencing January 15, 2009.

Crescent Point's total capitalization increased to \$3.8 billion at December 31, 2008 compared to \$3.5 billion at December 31, 2007, with the market value of the trust units representing 81 percent of the total capitalization. The increase in capitalization is attributable to the increase in the number of units outstanding partially offset by a three percent decline in the unit trading price.

Contractual Obligations and Commitments

The Trust has assumed various contractual obligations and commitments in the normal course of operations. The following table summarizes the Trust's contractual obligations and commitments as at December 31, 2008:

Contractual Obligations Summary (\$000)	Expected Payout Date				
	Total	2009	2010-2011	2012-2013	After 2013
Operating Leases ⁽¹⁾⁽²⁾	104,225	8,398	19,266	16,466	60,095
Premiums on Put Contracts	13,059	7,176	5,883	-	-

(1) Operating leases includes leases for office space, equipment and vehicles.

(2) Included in operating leases are recoveries of rent expense on office space the Trust has acquired through various acquisitions and has subleased out to other tenants.

Off Balance Sheet Arrangements

The Trust has off-balance sheet financing arrangements consisting of various lease agreements. All leases have been treated as operating leases whereby the lease payments are included in operating expenses or general and administrative expenses depending on the nature of the lease. No asset or liability value has been assigned to these leases in the balance sheet as of December 31, 2008. All of the lease agreement amounts have been reflected in the Contractual Obligations and Commitments table above, which were entered into in the normal course of operations.

Critical Accounting Estimates

The preparation of the Trust's financial statements requires management to adopt accounting policies that involve the use of significant estimates and assumptions. These estimates and assumptions are developed based on the best available information and are believed by management to be reasonable under the existing circumstances. New events or additional

information may result in the revision of these estimates over time. A summary of the significant accounting policies used by Crescent Point can be found in Note 2 to the December 31, 2008 consolidated financial statements. The following discussion outlines what management believes to be the most critical accounting policies involving the use of estimates and assumptions.

Depletion, Depreciation and Amortization (“DD&A”)

Crescent Point follows the CICA accounting guideline AcG-16 on full cost accounting in the oil and gas industry to account for oil and gas properties. Under this method, all costs associated with the acquisition of, exploration for and the development of natural gas and crude oil reserves are capitalized and costs associated with production are expensed. The capitalized costs are depleted using the unit-of-production method based on estimated proved reserves using management’s best estimate of future prices (see Oil and Gas Reserves discussion below).

Reserve estimates can have a significant impact on earnings, as they are a key component in the calculation of depletion. A downward revision in a reserve estimate could result in a higher DD&A charge to earnings. In addition, if net capitalized costs are determined to be in excess of the calculated ceiling, which is based largely on reserve estimates (see Asset Impairment discussion below), the excess must be written off as an expense charged against earnings. In the event of a property disposition, proceeds are normally deducted from the full cost pool without recognition of a gain or loss unless there is a change in the DD&A rate of 20 percent or greater.

Asset Retirement Obligation

Upon retirement of its oil and gas assets, the Trust anticipates incurring substantial costs associated with asset retirement activities. Estimates of the associated costs are subject to uncertainty associated with the method, timing and extent of future retirement activities. A liability for these costs and a related asset are recorded using the discounted asset retirement costs and the capitalized costs are depleted on a unit-of-production basis over the associated reserve life. Accordingly, the liability, the related asset and the expense are impacted by changes in the estimates and timing of the expected costs and reserves (see Oil and Gas Reserves discussion below).

Asset Impairment

Producing properties and unproved properties are assessed annually, or as economic events dictate, for potential impairment. Impairment is assessed by comparing the estimated undiscounted future cash flows to the carrying value of the asset. The cash flows used in the impairment assessment require management to make assumptions and estimates about recoverable reserves (see Oil and Gas Reserves discussion below), future commodity prices and operating costs. Changes in any of the assumptions, such as a downward revision in reserves, a decrease in anticipated future commodity prices, or an increase in operating costs could result in an impairment of an asset’s carrying value.

Purchase Price Allocation

Business acquisitions are accounted for by the purchase method of accounting. Under this method, the purchase price is allocated to the assets acquired and the liabilities assumed based on the fair value at the time of acquisition. The excess purchase price over the fair value of identifiable assets and liabilities acquired is goodwill. The determination of fair value often requires management to make assumptions and estimates about future events. The assumptions and estimates with respect to determining the fair value of property, plant and equipment acquired generally requires the most judgment and include estimates of reserves acquired (see Oil and Gas Reserves discussion below), future commodity prices, and discount rates. Changes in any of the assumptions or estimates used in determining the fair value of acquired assets and liabilities could impact the amounts assigned to assets, liabilities, and goodwill in the purchase price allocation. Future net earnings can be affected as a result of changes in future depletion and depreciation, asset impairment or goodwill impairment.

Goodwill Impairment

Goodwill is subject to impairment tests annually, or as economic events dictate, by comparing the fair value of the reporting entity to its carrying value, including goodwill. If the fair value of the reporting entity is less than its carrying value, a goodwill impairment loss is recognized as the excess of the carrying value of the goodwill over the implied value of the goodwill. The determination of fair value requires management to make assumptions and estimates about recoverable reserves (see Oil and Gas Reserves discussion below), future commodity prices, operating costs, production profiles, and discount rates. Changes in any of these assumptions, such as a downward revision in reserves, a decrease in future commodity prices, an increase in operating costs or an increase in discount rates could result in an impairment of all or a portion of the goodwill carrying value in future periods.

Oil and Gas Reserves

Reserves estimates, although not reported as part of the Trust’s financial statements, can have a significant effect on net earnings as a result of their impact on depletion and depreciation rates, asset retirement provisions, asset impairments, purchase price allocations, and goodwill impairment (see discussion of these items above). Independent petroleum reservoir engineering consultants perform evaluations of the Trust’s oil and gas reserves on an annual basis. However, the estimation of reserves is an inherently complex process requiring significant judgment. Estimates of economically recoverable oil and gas reserves are based upon a number of variables and assumptions such as geoscientific interpretation, commodity prices, operating and capital costs and production forecasts, all of which may vary considerably from actual results. These estimates are expected to be revised upward or downward over time, as additional information such as reservoir performance becomes available, or as economic conditions change.

Future Income Taxes

The determination of the Trust's income and other tax liabilities requires interpretation of complex laws and regulations often involving multiple jurisdictions. All tax filings are subject to audit and potential reassessment after the lapse of considerable time. Accordingly, the actual income tax liability may differ significantly from that estimated and recorded.

The Trust Tax Legislation results in a tax applicable at the trust level on certain income from publicly traded mutual fund trusts at rates of tax comparable to the combined federal and provincial corporate tax and treats distributions as dividends to the Unitholders. Existing trusts will have a transition period and the new tax will apply in January 2011.

New Accounting Pronouncements

Accounting Changes in the Current Period

Financial Instruments

On January 1, 2008, the Trust adopted the following CICA Handbook sections:

- Section 3862 "Financial Instruments – Disclosures" and Section 3863 "Financial Instruments – Presentation". The new disclosure standards increase the Trust's disclosure regarding the nature and extent of the risks associated with financial instruments and how those risks are managed (see Note 17 to the unaudited interim consolidated financial statements for the quarter ended December 31, 2008).
- Section 1535 "Capital Disclosures". The new standard requires the Trust to disclose objectives, policies and processes for managing its capital structure (see Note 12 to the unaudited interim consolidated financial statements for the quarter ended December 31, 2008).

Future Accounting Pronouncements

The CICA issued Section 3064, "Goodwill and Other Intangible Assets", replacing Section 3062, "Goodwill and Other Intangible Assets" and Section 3450, "Research and Development Costs". Section 3064 establishes standards for the recognition, measurement, presentation and disclosure of goodwill and intangible assets subsequent to its initial recognition and is effective on January 1, 2009. The Trust does not expect these new standards to have a material impact on its financial statements.

International Financial Reporting Standards (IFRS)

On February 13, 2008, the Accounting Standards Board confirmed that the transition date to International Financial Reporting Standards ("IFRS") from Canadian GAAP will be January 1, 2011 for publicly accountable enterprises. Therefore the Trust will be required to report its results in accordance with IFRS starting in 2011, with comparative IFRS information for the 2010 fiscal year.

The Trust is assessing the potential impacts of this changeover and is developing its implementation plan accordingly, however, at this time, the impact on our future financial position and results of operations is not reasonably determinable.

The Trust has commenced the conversion project and will establish a functional steering committee consisting of managers from accounting, land, engineering, information technology, investor relations, among others. Regular reporting is provided to our executive management team and to the Audit Committee of our Board of Directors.

Our project consists of four phases: impact assessment, planning & solution development, implementation and post implementation review.

We have completed the impact assessment which included a diagnostic of the major differences between current Canadian GAAP and IFRS. The area which will have the highest impact on the financial statements and require the highest implementation effort will be accounting for and assessing depletion and impairment of property, plant and equipment.

We are currently in the planning & solution development phase which has included working on the definition of cash generating units and depletion components, examining the elective exemptions from retroactive restatement offered in IFRS 1 and defining changes required to accounting and operations information systems.

During the implementation phase, activities will include executing the required changes to accounting and operational information systems as well as to disclosure controls and internal controls over financial reporting, writing accounting policies and training employees.

The post implementation review will include the compilation of IFRS compliant financial statements and make any required process changes.

The Trust will also continue to monitor the IFRS conversion efforts of many of its peers and will participate in any related industry initiatives, as appropriate.

Outstanding Trust Unit Data

As at March 10, 2009, the Trust had 136,690,984 trust units outstanding.

Selected Annual Information

(\$000 except per unit amounts)	2008	2007	2006
Total oil and gas sales	1,213,676	652,175	427,491
Net income (loss) ⁽¹⁾	464,102	(32,167)	68,947
Net income (loss) per unit ⁽¹⁾	3.74	(0.32)	1.12
Net income (loss) per unit – diluted ^{(1) (4)}	3.71	(0.32)	1.05
Cash flow from operating activities	584,955	332,605	177,426
Cash flow from operating activities per unit	4.72	3.30	2.88
Cash flow from operating activities per unit – diluted ⁽⁴⁾	4.67	3.28	2.79
Funds flow from operations	592,132	355,910	189,135
Funds flow from operations per unit	4.78	3.54	3.07
Funds flow from operations per unit – diluted ⁽⁴⁾	4.73	3.51	2.98
Working capital ⁽²⁾	187,694	(54,104)	26,533
Total assets	3,307,688	2,613,432	1,373,466
Total liabilities	1,462,876	1,196,429	467,086
Net debt ⁽²⁾	730,932	650,088	227,905
Total long-term risk management liabilities	5,216	59,652	11,697
Weighted average trust units (thousands) ⁽³⁾	125,944	102,059	63,569
Cash distributions	324,821	245,108	150,277
Cash distributions per unit	2.61	2.40	2.40

(1) Net income and net income before discontinued operations and extraordinary items are the same.

(2) Working capital and net debt include long-term investments, but exclude the risk management liabilities and assets.

(3) The trust units issuable on conversion of the exchangeable shares reflect the weighted average exchangeable shares outstanding converted at the exchange ratio in effect at the end of the period. For the 2006 amounts, the exchangeable share ratio applied is the one in effect for the October 27, 2006 redemption.

(4) Per unit – diluted is calculated excluding the cash portion of unit-based compensation.

Crescent Point's revenue, cash flow from operations and assets have increased significantly from the year ended December 31, 2006 through the year December 31, 2008 due to numerous corporate and property acquisitions and the Trust's successful drilling program, which have resulted in higher production volumes. This factor combined with favourable commodity prices resulting from higher market prices and narrower corporate oil differentials have produced the increases realized in the table noted above. Net income through 2006 to 2008 has fluctuated primarily due to unrealized financial instrument gains and losses on oil and gas contracts, which fluctuate with changes in market conditions along with fluctuations in the future income tax expense and recovery.

Summary of Quarterly Results

(\$000, except per unit amounts)	2008				2007			
	Q4	Q3	Q2	Q1	Q4	Q3	Q2	Q1

(1) Per unit – diluted is calculated excluding the cash portion of unit – based compensation. Net income per unit diluted is calculated using the net income before non-controlling interest.

(2) Working capital and net debt include bank indebtedness and long-term investments, but exclude the risk management liabilities and assets.

(3) Capital expenditures include capital acquisitions. Capital acquisitions represent total consideration for the transactions including bank debt and working capital assumed. Prior period results have been restated to conform to current period presentation.

(4) Net income for the first quarter of 2007 includes the \$158.8 million future income tax recovery resulting from the March 1, 2007 reorganization. Net income for the second quarter of 2007 includes the \$152.3 million future income tax expense resulting from the June 12, 2007 Bill C-52 Budget Implementation Act that was substantively enacted.

(5) The second quarter of 2008's net loss, cash flow from operating activities and funds flow from operations include a realized derivative loss of \$34.5 million for the crystallization of various oil derivative contracts. The fourth quarter of 2008 net income, cash flow from operating activities and funds flow from operations include a bad debt provision of \$19.4 million.

Crescent Point's revenue has increased due to several corporate and property acquisitions completed over the past two years and the Trust's successful drilling program. Significant increases in the Cdn\$ WTI benchmark price and narrower corporate oil differentials also contributed to the increase in revenues.

The overall growth of the Trust's asset base also contributed to the general increase in funds flow from operations and cash flow from operating activities. Higher market oil prices and narrower corporate oil differentials also contributed to this trend.

Net income through 2007 and 2008 has fluctuated primarily due to unrealized derivative gains and losses on oil and gas contracts, which fluctuate with the changes in forward market conditions along with fluctuations in the future income tax expense (recovery). The March 1, 2007 internal reorganization resulted in a \$158.8 million future tax recovery in the first quarter of 2007. Bill C-52 became substantively enacted on June 12, 2007, resulting in the future tax expense of \$152.3 million in the second quarter of 2007.

Capital expenditures fluctuated through this period as a result of timing of acquisitions and the development drilling program. The general increase in funds flow from operations and cash flow from operating activities throughout the last eight quarters has allowed the Trust to maintain stable monthly cash distributions over the past two years.

Fourth Quarter Review

The following are the main highlights for the fourth quarter of 2008:

- The Trust spent \$92.9 million on development capital activities in the fourth quarter, including the drilling of 49 (33.7 net) wells with a 98 percent success rate.
- Crescent Point grew fourth quarter 2008 average daily production by five percent over third quarter 2008 and exceeded guidance by more than 2,800 boe/d. The Trust produced 39,554 boe/d for the quarter, up from 37,630 boe/d in the third quarter and up 19 percent from 33,351 boe/d in the fourth quarter of 2007.

- Crescent Point's funds flow from operations decreased by three percent to \$109.6 million in the fourth quarter of 2008, compared to \$112.6 million in the fourth quarter of 2007. The decrease is primarily the result of the \$19.4 million bad debt provision, the decrease in the operating netback, partially offset by increased production volumes.
- Crescent Point maintained consistent monthly distributions of \$0.23 per unit, totaling \$0.69 per unit for the fourth quarter of 2008.
- The Trust continued to execute its core strategy of managing commodity price risk using a combination of fixed price swaps, costless collars, and put option instruments. As at March 3, 2009, the Trust had hedged 57 percent, 42 percent, 27 percent and 14 percent production, net of royalty interest, for 2009, 2010, 2011 and the first six months of 2012, respectively.
- During the fourth quarter, Crescent Point invested \$78.7 million in a private financing by Shelter Bay Energy Inc. ("Shelter Bay") and \$20.0 million in a private financing by Wild River Resources Ltd. ("Wild River"). The \$78.7 investment in Shelter Bay brings the Trust's total investment in Shelter Bay to approximately \$200 million or 21 percent ownership. The \$20.0 million investment in Wild River represents a 17 percent ownership of the private Bakken and Lower Shaunavon producer.
- In October 2008, the amount available under the Trust's credit facility was increased from \$1.0 billion to \$1.15 billion.

Disclosure Controls and Procedures

Disclosure controls and procedures ("DC&P"), as defined in National Instrument 52-109 *Certification of Disclosure in Issuers' Annual and Interim Filings*, are designed to provide reasonable assurance that information required to be disclosed in reports filed with, or submitted to, securities regulatory authorities is recorded, processed, summarized and reported within the time periods specified under Canadian securities law. The Chief Executive Officer and the Chief Financial Officer of Crescent Point evaluated the effectiveness of the Trust's DC&P. Based on that evaluation, the executive and financial officers concluded that Crescent Point's DC&P were effective as of December 31, 2008.

Internal Controls over Financial Reporting

Internal control over financial reporting ("ICFR"), as defined in National Instrument 52-109, includes policies and procedures that:

1. pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets of Crescent Point;
2. provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles; and
3. provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Trust's assets that could have a material effect on the financial statements.

The Chief Executive Officer and the Chief Financial Officer are responsible for establishing and maintaining internal ICFR for Crescent Point. They have, as at the financial year ended December 31, 2008, designed ICFR, or caused it to be designed under their supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Canadian GAAP. The control framework Crescent Point's officers used to design the Trust's ICFR is the Internal Control - Integrated Framework ("COSO Framework") published by The Committee of Sponsoring Organizations of the Treadway Commission ("COSO").

Under the supervision of the Chief Executive Officer and the Chief Financial Officer, Crescent Point conducted an evaluation of the effectiveness of the Trust's ICFR as at December 31, 2008 based on the COSO Framework. Based on this evaluation, the officers concluded that as of December 31, 2008, Crescent Point's ICFR does provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Canadian GAAP.

It should be noted that while Crescent Point's officers believe that the Trust's controls provide a reasonable level of assurance with regard to their effectiveness, they do not expect that the DC&P and ICFR will prevent all errors and fraud. A control system, no matter how well conceived or operated, can provide only reasonable, but not absolute, assurance that the objectives of the control system are met.

There were no changes in Crescent Point's ICFR during the year ended December 31, 2008 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Health, Safety and Environment Policy

The health and safety of employees, contractors, visitors and the public, as well as the protection of the environment, is of utmost importance to Crescent Point. The Trust endeavours to conduct its operations in a manner that will minimize both adverse effects and consequences of emergency situations by:

- Complying with government regulations and standards;

- Conducting operations consistent with industry codes, practices and guidelines;
- Ensuring prompt, effective response and repair to emergency situations and environmental incidents;
- Providing training to employees and contractors to ensure compliance with Trust safety and environmental rules and procedures;
- Promoting the aspects of careful planning, good judgment, implementation of the Trust's procedures, and monitoring Trust activities;
- Communicating openly with members of the public regarding our activities; and
- Amending the Trust's policies and procedures as may be required from time to time.

Crescent Point believes that all employees have a vital role in achieving excellence in environmental, health and safety performance. This is best achieved through careful planning and the support and active participation of everyone involved.

As part of Crescent Point's ongoing commitment to reduce greenhouse gas emissions, the Trust established an Environmental Emissions Reduction Fund in 2007. Currently \$0.15 per produced boe is directed into this fund. To date, \$3.1 million has been contributed to the fund and \$2.2 million has been expended in order to reduce greenhouse gas emissions and to meet and exceed provincial and federal targets. These targets relate to the Government of Canada's April 26, 2007 "Turning the Corner: An Action Plan to Reduce Greenhouse Gases and Air Pollution" and to the Government of Alberta's March 8, 2007 Bill 3: Climate Change and Emissions Management Amendment Act and its accompanying Gas Emitters Regulation.

Outlook

Crescent Point's 2009 guidance is as follows:

Production	2009
Oil and NGL (bbls/d)	36,200
Natural gas (mcf/d)	25,800
Total (boe/d)	40,500
Funds flow from operations (\$000)	593,000
Combined funds flow per unit – diluted and per share – diluted (\$)	3.91
Combined cash distributions per unit and dividends per share (\$)	2.76
Payout ratio – per unit/share – diluted (%)	71
Capital expenditures (\$000) ⁽¹⁾	225,000
Wells drilled, net	82
Pricing	
Crude oil – WTI (US\$/bbl)	46.50
Crude oil – WTI (Cdn\$/bbl)	58.86
Natural gas – Corporate (Cdn\$/mcf)	5.00
Exchange rate (US\$/Cdn\$)	0.79

(1) The projection of capital expenditures excludes acquisitions, which are separately considered and evaluated.

Additional information relating to Crescent Point, including the Trust's annual information form, is available on SEDAR at www.sedar.com.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

December 31, 2008 and 2007 (UNAUDITED)

1. STRUCTURE OF THE TRUST

Crescent Point Energy Trust ("the Trust") is an open-ended unincorporated investment trust created on September 5, 2003 pursuant to a Declaration of Trust and Plan of Arrangement operating under the laws of the Province of Alberta. Olympia Trust Company is the trustee, Crescent Point Resources Inc. ("CPRI") is the administrator of the Trust and the beneficiaries of the Trust are the unitholders.

On March 1, 2007, the Trust completed a reorganization of the Trust and its subsidiaries. The reorganization resulted in the existing business of the Trust, which was carried on through a limited partnership and corporations, being carried on through a limited partnership, directly and indirectly owned by the Trust.

The principal undertaking of the Trust's operating entities, Crescent Point Resources Limited Partnership along with its general partner, Crescent Point General Partner Corp. is to acquire, hold directly or indirectly, interests in oil and gas properties. The administrator of the Trust's business is CPRI.

2. SIGNIFICANT ACCOUNTING POLICIES

a) Principles of Consolidation

The consolidated financial statements have been prepared by management in accordance with generally accepted accounting principles in Canada and they include the accounts of the Trust and its subsidiaries. Any reference to "the Trust" throughout these consolidated financial statements refers to the Trust and its subsidiaries. All transactions between the Trusts and its subsidiaries have been eliminated.

b) Joint Ventures

Certain of the Trust's development and production activities are conducted jointly with others through unincorporated joint ventures. The accounts of the Trust reflect its proportionate interest in such activities.

c) Property, Plant and Equipment

The Trust follows the full cost method of accounting for petroleum and natural gas properties and equipment, whereby all costs of acquiring petroleum and natural gas properties and related development costs are capitalized and accumulated in one cost centre. Such costs include lease acquisition costs, geological and geophysical expenditures, costs of drilling both productive and non-productive wells, related plant and production equipment costs and related overhead charges. Maintenance and repairs are charged against income, whereas renewals and enhancements which extend the economic life of the properties and equipment are capitalized.

Gains and losses are not recognized upon disposition of petroleum and natural gas properties unless such a disposition would alter the rate of depletion by 20 percent or more.

Depletion, Depreciation and Amortization

Depletion of petroleum and natural gas properties is calculated using the unit-of-production method based on the estimated proved reserves before royalties, as determined by independent engineers. Natural gas reserves and production are converted to equivalent barrels of oil based upon the relevant energy content (6:1). The depletion base includes capitalized costs, plus future costs to be incurred in developing proven reserves and excludes the unimpaired cost of unproved land. Costs associated with unproved properties are not subject to depletion and are assessed periodically to ascertain whether impairment has occurred. When proved reserves are assigned or the value of the unproved property is considered to be impaired, the cost of the unproved property or the amount of impairment is added to costs subject to depletion.

Tangible production equipment is depreciated on a straight-line basis over its estimated useful life of 15 years. Office furniture, equipment and motor vehicles are depreciated on a declining balance basis at rates ranging from 10 percent to 30 percent.

Ceiling Test

A limit is placed on the aggregate carrying value of property, plant and equipment that may be amortized against revenues of future periods (the "ceiling test"). The ceiling test is an impairment test whereby the carrying amount of the PP&E is compared to the sum of the undiscounted cash flows expected to result from the Trust's proved reserves. Impairment is recognized if the carrying amount of the PP&E exceeds the sum of the undiscounted cash flows expected to result from the Trust's proved reserves. Cash flows are calculated based on third party quoted forward prices, adjusted for the Trust's contract prices and quality differentials. Upon recognition of impairment, the Trust measures the amount of impairment by comparing the carrying amounts of PP&E to an amount equal to the estimated net present value of future cash flows from proved and probable reserves. The Trust's risk-free interest rate is used to determine the net present value of the future cash flows. Any excess carrying value above the net present value of the Trust's future cash flows would be recorded as a permanent impairment and charged against net income. The cost of unproved properties is excluded from the impairment test described above and subject to a separate impairment test.

d) Reclamation Fund

The Trust established a reclamation fund effective July 1, 2004 to fund future asset retirement obligation costs and environmental emissions reduction costs. The Board of Directors has approved contributions of \$0.30 per barrel of production beginning January 1, 2008. Prior to January 1, 2008, contributions ranged from \$0.15 to \$0.25 per barrel of production. Additional contributions are made at the discretion of management.

e) Asset Retirement Obligation

The Trust recognizes the fair value of an asset retirement obligation in the period in which it is incurred. The obligation is recorded as a liability on a discounted basis when incurred using the Trust's average credit-adjusted risk-free rate, with a corresponding increase to the carrying amount of the related asset. Over time the liabilities are accreted for the change in their present value and the capitalized costs are depleted on a unit-of-production basis over the life of the reserves. Revisions to the estimated timing of cash flows or the original estimated undiscounted cost would also result in an increase or decrease to the obligation and related asset.

f) Goodwill

The Trust must record goodwill relating to a corporate acquisition when the total purchase price exceeds the fair value for accounting purposes of the net identifiable assets and liabilities of the acquired company. The goodwill balance is assessed for impairment annually at year-end or as events occur that could result in an impairment. Impairment is recognized based on the fair value of the reporting entity ("consolidated Trust") compared to the book value of the reporting entity. If the fair value of the consolidated Trust is less than the book value, impairment is measured by allocating the fair value of the consolidated Trust to the identifiable assets and liabilities as if the Trust has been acquired in a business combination for a purchase price equal to its fair value. The excess of the fair value of the consolidated Trust over the amounts assigned to the identifiable assets and liabilities is the implied value of the goodwill. Any excess of the book value of goodwill over the implied value of goodwill is the impairment amount. Impairment is charged to earnings and is not tax affected, in the period in which it occurs. Goodwill is stated at cost less impairment and is not amortized.

g) Unit-based Compensation

The fair value based method of accounting is used to account for the restricted units granted under the Restricted Unit Bonus Plan. Compensation expense is determined based on the estimated fair value of trust units on the date of grant. The compensation expense is recognized over the vesting period, with a corresponding increase to contributed surplus. At the time the restricted units vest, the issuance of units is recorded with a corresponding decrease to contributed surplus and increase to unitholders' equity.

h) Income Taxes

The Trust follows the liability method of accounting for income taxes. Under this method, income tax liabilities and assets are recognized for the estimated tax consequences attributable to differences between the amounts reported in the financial statements of the Trust and its corporate subsidiaries and their respective tax base, using enacted or substantively enacted future income tax rates. The effect of a change in income tax rates on future tax liabilities and assets is recognized in income in the period in which the change occurs. Temporary differences arising on acquisitions result in future income tax assets and liabilities. Currently, the Trust is a taxable entity under the Income Tax Act (Canada) and is taxable only on income that is not distributed or distributable to the unitholders. Effective in 2011, the Trust's distributions are taxable. Accordingly, income tax liabilities and assets have been recognized on the Trust's temporary differences at the substantively enacted rate applicable to the periods in which the temporary differences reverse.

i) Financial Instruments

The Trust uses financial instruments and physical delivery commodity contracts from time to time to reduce its exposure to fluctuations in commodity prices, foreign exchange rates and interest rates. The Trust also makes investments in corporations from time to time in connection with the Trust's acquisition and divesture activities.

All financial assets must be classified as held-for-trading, available-for-sale, held-to-maturity, or loans and receivables and all financial liabilities must be classified as held-for-trading or other. Financial assets and financial liabilities classified as held-for-trading are measured at fair value with changes in those fair values recognized in earnings. Financial assets held-to-maturity, loans and receivables, and other financial liabilities are measured at amortized cost using the effective interest method of amortization. Available-for-sale financial assets are measured at fair value with unrealized gains and losses, including changes in foreign exchange rates, being recognized in other comprehensive income. Investments in equity instruments classified as available-for-sale that do not have a quoted market price in an active market are measured at cost.

Derivative instruments are always carried at fair value and reported as assets where they have a positive fair value and as liabilities where they have a negative fair value. Derivatives may be embedded in other financial instruments or contractual arrangements. Derivatives embedded in other instruments are valued as separate derivatives when their economic characteristics and risks are not clearly and closely related to those of the host contract; the terms of the embedded derivative are the same as those of a free standing derivative and the combined contract is not held-for-trading. When an entity is unable to measure the fair value of the embedded derivative separately, the combined contract is treated as a financial asset or liability that is held-for-trading and measured at fair value with changes therein recognized in earnings.

The fair value of a financial instrument on initial recognition is normally the transaction price, i.e. the fair value of the consideration given or received. Subsequent to initial recognition, the fair values are based on quoted market price where available from active markets, otherwise fair values are estimated based upon market prices at reporting date for other similar assets or liabilities with similar terms and conditions, or by discounting future payments of interest and principal at estimated interest rates that would be available to the Trust at the reporting date.

The Trust has not designated any of its risk management activities as accounting hedges and accordingly marks-to-market its financial instruments with the resulting gains and losses recorded in the statement of operations.

The Trust has elected to classify its investments in marketable securities and long term investments as held for trading, and accordingly, marks-to-market the investments with the resulting gain or loss being recorded in the statement of operations.

j) Revenue Recognition

Revenues associated with sales of crude oil, natural gas and natural gas liquids are recognized when title passes to the purchaser.

k) Cash and Cash Equivalents

Cash and cash equivalents include short-term investments with a maturity of three months or less when purchased.

l) Measurement Uncertainty

Certain items recognized in the financial statements are subject to measurement uncertainty. The recognized amounts of such items are based on the Trust's best information and judgment. Such amounts are not expected to change materially in the near term. They include the amounts recorded for future income taxes, depletion, depreciation, amortization and asset retirement costs which depend on estimates of oil and gas reserves or the economic lives and future cash flows from related assets.

3. CHANGES IN ACCOUNTING POLICIES

On January 1, 2008, the Trust adopted the following Canadian Institute of Chartered Accountants ("CICA") Handbook sections:

- Section 3862 "Financial Instruments – Disclosures" and Section 3863 "Financial Instruments – Presentation". The new disclosure standards increase the Trust's disclosure regarding the nature and extent of the risks associated with financial instruments and how those risks are managed (see Note 17).
- Section 1535 "Capital Disclosures". The new standard requires the Trust to disclose objectives, policies and processes for managing its capital structure (see Note 12).

On January 1, 2007, the Trust adopted the CICA Handbook sections 3855 "Financial Instruments Recognition and Measurement", 3865 "Hedges", 3861 "Financial Instruments – Disclosure and Presentation", 1530 "Comprehensive Income," and 3251 "Equity". Other than the effect on the Investment in Marketable Securities as described in the section below, the adoption of the financial instruments standards has not affected the current or comparative period balances on the consolidated financial statements as all financial instruments identified have been fair valued.

In 2007, the Trust elected to classify the investment in marketable securities as held-for-trading. Accordingly, the investment in marketable securities balance of \$0.1 million at January 1, 2007 consisting of an investment in a publicly traded exploration and production company, was fair valued at January 1, 2007 to \$1.6 million. Under prospective application, the \$1.5 million gain was recorded as an adjustment to opening retained earnings.

4. FUTURE ACCOUNTING PRONOUNCEMENTS

The CICA issued Section 3064, "Goodwill and Other Intangible Assets", replacing Section 3062, "Goodwill and Other Intangible Assets" and Section 3450, "Research and Development Costs". Section 3064 establishes standards for the recognition, measurement, presentation and disclosure of goodwill and intangible assets subsequent to its initial recognition and is effective on January 1, 2009. The Trust does not expect these new standards to have a material impact on its financial statements.

On February 13, 2008, the Accounting Standards Board confirmed that the transition date to International Financial Reporting Standards ("IFRS") from Canadian GAAP will be January 1, 2011 for publicly accountable enterprises. Therefore the Trust will be required to report its results in accordance with IFRS starting in 2011, with comparative IFRS information for the 2010 fiscal year.

The Trust is assessing the potential impacts of this changeover and is developing its implementation plan accordingly, however, at this time, the impact on our future financial position and results of operations is not reasonably determinable.

The Trust has commenced the conversion project and will establish a functional steering committee consisting of managers from accounting, land, engineering, information technology, investor relations, among others. Regular reporting is provided to our executive management team and to the Audit Committee of our Board of Directors.

Our project consists of four phases: impact assessment, planning & solution development, implementation and post implementation review.

We have completed the impact assessment which included a diagnostic of the major differences between current Canadian GAAP and IFRS. The area which will have the highest impact on the financial statements and require the highest implementation effort will be accounting for and assessing depletion and impairment of property, plant and equipment.

We are currently in the planning & solution development phase which has included working on the definition of cash generating units and depletion components, examining the elective exemptions from retroactive restatement offered in IFRS 1 and defining changes required to accounting and operations information systems.

During the implementation phase, activities will include executing the required changes to accounting and operational information systems as well as to disclosure controls and internal controls over financial reporting, writing accounting policies and training employees.

The post implementation review will include the compilation of IFRS compliant financial statements and make any required process changes. The Trust will also continue to monitor the IFRS conversion efforts of many of its peers and will participate in any related industry initiatives, as appropriate.

5. LONG TERM INVESTMENT

a) Wild River Resources Ltd.

On December 15, 2008, the Trust announced that it had acquired a 17 percent ownership of Wild River Resources Ltd., a private oil and gas producer with assets in the southeast Saskatchewan Bakken light oil resource play and in the emerging southwest Saskatchewan Lower Shaunavon resource play. The total investment of \$20.0 million was acquired through a private placement financing.

b) Shelter Bay Energy Inc.

During the first quarter of 2008, the Trust invested in Shelter Bay Energy Inc. ("Shelter Bay"), a private light oil company. The Trust's initial \$76.3 million investment was comprised of 72.6 million Class A Common Shares and 3.5 million Non-Voting Common Shares issued for \$1.00 per share and representing an interest of 17 percent.

During the second quarter of 2008, the Trust invested a further \$20.0 million in Shelter Bay in return for an additional 20.0 million Class A Common Shares.

In the third quarter of 2008, the Trust invested an additional \$25.4 million in Shelter Bay for a further 25.4 million Class A Common Shares. On September 5, 2008, the Trust exchanged with Shelter Bay 3.5 million Non-Voting Common Shares of Shelter Bay for 3.5 million Class A Common Shares of Shelter Bay.

In the fourth quarter of 2008, the Trust invested a further \$78.7 million in Shelter Bay through participation in private placement financing for an additional 52.4 million Class A Common Shares.

At December 31, 2008, the Trust's investment of \$200.4 million consisted of 173.9 million Class A Common Shares, that represents an interest of 21 percent, plus the equity earnings of \$4.5 million.

Under the terms of the unanimous shareholders' agreement governing Shelter Bay (the "Shelter Bay USA"), the Trust has a right to purchase all, but not less than all, of the shares of Shelter Bay not already owned by the Trust (the "Call Right") at a price equal to the market value of the shares, as defined in the Shelter Bay USA. The Call Right is exercisable at (i) any time before April 1, 2011, provided that the proceeds from such a transaction (including cumulative distributions) would result in the initial investors in Shelter Bay receiving realized proceeds equal to at least two times the amount of the aggregate capital invested by the initial investors in Shelter Bay, or (ii) any time on or after April 1, 2011 and on or before March 31, 2013.

Upon exercise of the Call Right, and acceptance by 66 2/3% or greater of the shares held by Shelter Bay shareholders (excluding the Trust), the Trust will have the right to acquire all of the Shelter Bay shares it does not own. In the event of acceptance by less than 66 2/3% of the shares held by Shelter Bay shareholders (excluding the Trust), the Trust shall have the right to purchase all of the assets (the "Asset Call Right") of Shelter Bay for 105% of the market value of the assets, as defined in the Shelter Bay USA.

In the event Crescent Point exercises its Call Right or Asset Call Right, Class B and C Common Share shareholders will be entitled to receive 100 percent of all proceeds from the sale transaction up to their original investment in the Company plus a 10 percent return on investment. Class A Common Share shareholders would then receive 100 percent of their original investment in Shelter Bay plus a 10 percent return on investment. Subsequent proceeds up to and until a 25 percent return on investment to all Common Shareholders, would be shared on a pro rata basis by shareholders in accordance with the number of shares held by each shareholder. Following receipt of a 25 percent return on investment by all Common Shareholders, the remaining proceeds would be shared 50 percent by Crescent Point and 50 percent by all Common Shareholders on a pro rata basis.

As at December 31, 2008, no conditions exist which would require the Trust to record a liability pursuant to the Shelter Bay USA.

Also under the Shelter Bay USA, between April 1, 2013 and September 30, 2013, certain Shelter Bay shareholders shall have a separate right to require that the Trust acquire all of the shares of Shelter Bay then owned by such shareholder for a purchase price equal to 85% of the market value of such shares, as defined in the Shelter Bay USA (the "Put Right"). If the Put

Right is exercised, the Trust will be obligated to provide all of the other shareholders in Shelter Bay with a similar right to put their shares to the Trust on the same terms.

The purchase price for the Shelter Bay shares may be settled, at the Trust's election, in cash or the issuance of Trust Units; however, the Shelter Bay shareholders shall have certain rights to receive their consideration for their Shelter Bay shares in the form of Trust Units.

Notwithstanding the foregoing, the Trust shall have no obligation to cause to be issued Trust Units under the Shelter Bay USA in an amount that would cause the Trust to lose its grandfathered status under the SIFT Rules by violating the "normal growth" guidelines. Given the terms of the Shelter Bay USA, there can be no assurance that the Trust will not be required to, or will not elect to purchase the shares of Shelter Bay not already owned by the Trust or the assets of Shelter Bay and further, there can be no assurance that the Trust will have the capital resources to satisfy such Call Right or Put Right or that it will be able to issue Trust Units to Shelter Bay shareholders in association with the exercise of the Call Right or Put Right described herein, which number of Trust Units may be material to the Trust at the time of issuance and which issuance may be dilutive to existing holders of Trust Units at such time.

Variable Interest Entity

Shelter Bay is considered a variable interest entity under Accounting Guideline 15. However, the Trust is not the primary beneficiary of this variable interest entity, and, accordingly, the Trust accounts for its investment in Shelter Bay using the equity accounting method. Therefore, the Trust has recorded its share of Shelter Bay's net income (loss) as an increase (decrease) to the Trust's net income and as an increase (decrease) to the cost of its investment. The Trust's maximum exposure to loss as a result of its involvement in Shelter Bay is approximately \$200.4 million, which includes the carrying value of the Trust's investment.

Related Party Transactions

Management and Technical Services Agreement - The Trust entered into a Management and Technical Services Agreement with Shelter Bay, effective January 11, 2008. Crescent Point is responsible for managing, administering and operating the assets and business of Shelter Bay. The services are provided in exchange for a monthly management fee. Crescent Point billed management fees to Shelter Bay of \$2.5 million for the year ended December 31, 2008.

Farm-Out Agreement – Effective January 11, 2008, the Trust entered into a farm-out agreement with Shelter Bay. Under the agreement, Shelter Bay has the right to farm-in on 22 net sections of Viewfield Bakken lands owned by the Trust. Shelter Bay is responsible for paying 100 percent of the capital costs and earns a 50 percent interest in production from the property, while the Trust retains the other 50 percent production interest.

In the first quarter of 2008, there were two wells drilled by Crescent Point immediately prior to the effective date of the farm-out agreement, and pursuant to the agreement, these wells were sold by Crescent Point to Shelter Bay in exchange for a reimbursement of capital costs, which totaled \$3.6 million. As this transaction was not in the normal course of operations, the disposition of the wells was recorded at the carrying amount.

Farm-Out Note – During the first quarter of 2008, as Shelter Bay commenced operations, the Trust entered into a farm-out note with Shelter Bay to finance Shelter Bay's capital activities. The principal amount of the note was \$23.5 million and interest on the note was equivalent to the Canadian Chartered Bank Prime Rate plus 2 percent. The principal amount of the note was re-paid on March 26, 2008, subsequent to Shelter Bay's closing of a private placement. Interest of \$0.2 million was charged by Crescent Point during the first quarter and collected at the end of April 2008.

Capital Commitment – Pursuant to Shelter Bay's private placement, the Trust entered into a Call Obligation Agreement with Shelter Bay in association with its subscription for Special Voting Shares. Pursuant to the agreement, the Trust committed to subscribe for additional Class A Common Shares of Shelter Bay for approximately \$45.4 million. In exchange for this capital commitment, the Trust received 45.4 million Special Voting Shares. Other major investors of Shelter Bay also entered into similar Call Obligation Agreements with Shelter Bay and may, at Shelter Bay's discretion be required to subscribe for additional shares of Shelter Bay. As a result, the Trust's equity interest would not change significantly in connection with the Call Obligation Agreement.

On May 15, 2008 Shelter Bay exercised in part its call rights under the Call Obligation Agreements. As a result the Trust subscribed for 20.0 million Class A Common Shares of Shelter Bay for \$20.0 million.

On July 31, 2008 Shelter Bay exercised its remaining call rights under the Call Obligation Agreements. As a result the Trust subscribed for approximately 25.4 million Class A Common Shares for \$25.4 million. This subscription satisfied in full the Trust's commitment under the Call Obligation Agreement.

On September 5, 2008 the Trust exchanged with Shelter Bay 3.5 million Non-Voting Common Shares of Shelter Bay for 3.5 million Class A Common Shares of Shelter Bay.

On October 1, 2008, the Trust and Shelter Bay announced the closing of a \$300.0 million private placement financing for Shelter Bay. Crescent Point's participation in the private placement was \$78.7 million. With the closing of this private placement, Crescent Point's aggregate investment in Shelter Bay is approximately \$200.4 million which equates to a 21 percent interest.

Property Acquisition and Trust Unit Issuance – In conjunction with the closing of Shelter Bay’s acquisition of Landex Petroleum Corp. (“Landex”) on March 26, 2008, the Trust issued 3.1 million trust units valued at \$75 million and cash of \$5 million to Shelter Bay in exchange for an \$80 million note. The Trust subsequently completed a Saskatchewan property acquisition from Shelter Bay for total consideration of \$80 million, in exchange for settlement of the note.

The trust unit issuance was recorded at \$75 million as this was equivalent to the fair value of the consideration received. The property acquisition was recorded at the exchange amount of \$80 million.

Property Disposition - On March 26, 2008, the Trust disposed of undeveloped land to Shelter Bay for cash consideration of \$31.3 million. The transaction was recorded at the exchange amount.

Property Acquisition – On December 11, 2008, Crescent Point purchased undeveloped land from the Shelter Bay for cash consideration of \$12.3 million. The transaction was recorded at the exchange amount.

Amounts Owning From / Due To – At December 31, 2008, the Trust had \$3.6 million receivable from Shelter Bay for management fees and operating activity paid for by the Trust on Shelter Bay’s behalf. These receivables were collected by the Trust at the end of January 2009.

Painted Pony Petroleum Ltd. (“Painted Pony”) Share Disposition - The Trust entered into an agreement with Shelter Bay to dispose of the Painted Pony shares for \$17.8 million. The transaction was recorded at the exchange amount.

6. CAPITAL ACQUISITIONS AND DISPOSITIONS

a) Major acquisitions

There were no major acquisitions in the fourth quarter of 2008.

Major acquisitions in the year ended December 31, 2008 included Pilot Energy Ltd. and the non-Bakken assets of Landex.

Pilot Energy Ltd.

On January 16, 2008, the Trust purchased all the issued and outstanding shares of Pilot Energy Ltd., a publicly traded company with properties in the Viewfield area of southeast Saskatchewan for total consideration of approximately \$78.5 million, including assumed bank debt and working capital (\$93.3 million was allocated to property, plant and equipment). The purchase was paid for through the issuance of approximately 2.6 million trust units and was accounted for as a business combination using the purchase method of accounting. The Trust owned 2.0 million shares of Pilot Energy Ltd. prior to the closing which it purchased for \$2.90 per share or \$5.9 million in November 2007.

	(\$000)
Net assets acquired	
Working capital	1,678
Property, plant and equipment	93,310
Bank debt	(13,025)
Asset retirement obligation	(3,341)
Future income taxes	(11,494)
Total net assets acquired	67,128
Consideration	
Cash	5,912
Trust units issued (2,628,269 trust units)	60,766
Acquisition costs	450
Total purchase price	67,128

Non-Bakken Assets of Landex Petroleum Corp.

On March 26, 2008, the Trust closed the acquisition of the non-Bakken assets of Landex from Shelter Bay Energy Inc. for consideration of approximately \$80.0 million (\$81.4 million was allocated to property, plant and equipment). The purchase was paid for with approximately 3.1 million trust units and \$5.0 million of cash from the Trust’s existing bank line. See Note 5 for further disclosures regarding the property acquisition.

b) Minor Property Acquisitions and Dispositions

During the year ended December 31, 2008, the Trust closed five property acquisitions for \$10.8 million (\$11.9 million was allocated to property, plant and equipment), and several property dispositions for a net consideration of approximately \$30.0 million (\$31.8 million was recorded as reduction to property, plant and equipment). The Trust also recorded purchase price adjustments of \$1.6 million on previously closed acquisitions.

7. PROPERTY, PLANT AND EQUIPMENT

December 31, 2008 (\$000)	Cost	Accumulated depletion, depreciation and amortization	Net
Petroleum and natural gas properties	2,782,298	715,642	2,066,656
Production equipment	772,096	110,800	661,296
Office furniture and equipment	8,418	3,903	4,515
	3,562,812	830,345	2,732,467
December 31, 2007 (\$000)	Cost	Accumulated depletion, depreciation and amortization	Net
Petroleum and natural gas properties	2,330,613	448,101	1,882,512
Production equipment	606,418	63,878	542,540
Office furniture and equipment	7,237	2,883	4,354
	2,944,268	514,862	2,429,406

At December 31, 2008, unproved land costs of \$333.9 million (2007 – \$312.7 million) have been excluded from costs subject to depletion. Future development costs of \$918.9 million (2007 – \$719.6 million) are included in costs subject to depletion.

Direct general and administrative expenses capitalized by the Trust during the year were \$11.2 million (2007 – \$4.6 million). The capitalized administration costs do not include any related unit-based compensation costs.

The ceiling test calculation at December 31, 2008 indicated that the net recoverable amount from proved reserves exceeded the net carrying value of the petroleum and natural gas properties and equipment. The following are the prices that were used in the December 31, 2008 ceiling test:

	Average Price Forecast ⁽¹⁾										2019+ ⁽²⁾
	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	
WTI (\$US/bbl)	57.50	68.00	74.00	85.00	92.01	93.85	95.73	97.64	99.59	101.59	2%
Exchange rate	0.83	0.85	0.88	0.93	0.95	0.95	0.95	0.95	0.95	0.95	0.95
WTI (\$Cdn/bbl)	68.61	78.94	83.54	90.92	95.91	97.84	99.82	101.83	103.89	105.99	2%
AECO (\$Cdn/mcf)	7.58	7.94	8.34	8.70	8.95	9.14	9.34	9.54	9.75	9.95	2%

(1) The benchmark prices listed above are adjusted for quality differentials, heat content, distance to market and other factors in performing our ceiling test.

(2) Percentage change represents the change in each year after 2018 to the end of the reserve life.

8. RECLAMATION FUND

The following table reconciles the reclamation fund:

(\$000)	2008	2007
Balance, beginning of year	2,436	1,725
Contributions	3,877	2,566
Actual expenditures	(2,317)	(1,855)
Balance, end of year	3,996	2,436

9. BANK INDEBTEDNESS

The Trust has a syndicated credit facility with ten banks and an operating credit facility with one Canadian chartered bank. During the year ended December 31, 2008, the amount available under the combined credit facilities was increased from \$800.0 million to \$1.15 billion. The Trust has letters of credit in the amount of \$0.9 million outstanding at December 31, 2008.

The credit facilities bear interest at the prime rate plus a margin based on a sliding scale ratio of the Trust's debt to cash flows. The Trust also manages its debt facilities through a combination of bankers' acceptance loans and interest rate swaps. The credit facilities are secured by a \$1.5 billion floating charge demand debenture, a general security agreement and a subordination agreement from the Trust covering all assets and cash flows.

The credit facilities mature in May 2010 and are subject to a review on annual basis. The credit facilities constitute a revolving facility for a 364 day term which is extendible annually for a further 364 day revolving period, subject to a one year term maturity as to lenders not agreeing to such annual extension.

Revolving credit borrowings include bankers' acceptance loans, operating credit facility and prime loan maturing at various dates with a weighted average interest rate of 3.48 percent.

10. ASSET RETIREMENT OBLIGATION

The total future asset retirement obligation was estimated by management based on the Trust's net ownership in all wells and facilities. This includes all estimated costs to reclaim and abandon the wells and facilities and the estimated timing of the costs to be incurred in future periods. The Trust has estimated the net present value of its total asset retirement obligation to be \$68.8 million at December 31, 2008 (December 31, 2007 - \$66.1 million) based on total estimated undiscounted cash flows to settle the obligation \$167.2 million (December 31, 2007 \$153.3 million). These obligations are expected to be settled during the period from 2009 through 2060. The estimated cash flows have been discounted using an average credit-adjusted risk-free rate of return of eight percent and an inflation rate of two percent.

The following table reconciles the asset retirement obligation:

(\$000)	2008	2007
Asset retirement obligation, beginning of year	66,074	45,829
Liabilities incurred	1,569	2,101
Liabilities acquired through capital acquisitions	5,820	16,533
Liabilities disposed through capital dispositions	(1,819)	(965)
Liabilities settled	(2,317)	(1,855)
Changes in prior year estimates	(5,947)	-
Accretion expense	5,374	4,431
Asset retirement obligation, end of year	68,754	66,074

11. UNITHOLDERS' CAPITAL

a) Authorized

An unlimited number of voting trust units has been authorized.

b) Issued and outstanding

The Trust has a distribution reinvestment plan (the "Regular DRIP") and a premium distribution reinvestment plan (the "Premium DRIP"). The Regular DRIP permits eligible unitholders to direct their distributions to the purchase of additional units at 95 percent of the average market price, as defined in the plan. The Premium DRIP permits eligible unitholders to elect to receive 102 percent of the cash the unitholder would otherwise have received on the distribution date. The additional cash distributed to the Premium DRIP unitholders is funded through the issuance of additional trust units in the open market. Participation in the Regular and Premium DRIP is subject to proration by the Trust. Unitholders who participate in either the Regular DRIP or the Premium DRIP are also eligible to participate in the Optional Unit Purchase Plan as defined in the plan.

In December 2007, the Trust announced that as a result of the federal government Safe Harbour Limits on equity issuances for income trusts, the DRIP, Premium DRIP, and Optional Unit Purchase programs would be suspended until further notice beginning with the month of December 2007. The Trust reinstated its DRIP, Premium DRIP and Optional Unit Purchase programs for unitholders of record on December 31, 2008 with payments beginning January 15, 2009.

On January 8, 2008, the Trust and a syndicate of underwriters closed a bought deal equity financing pursuant to which the syndicate sold 5,155,000 trust units for gross proceeds of \$125.0 million (\$24.25 per trust unit).

	2008		2007	
	Number of trust units	Amount (\$000)	Number of trust units	Amount (\$000)
Trust units, beginning of year	113,760,732	1,873,523	69,531,952	1,083,948
Issued for cash	5,155,000	125,009	8,900,000	165,095
Issued on capital acquisitions	5,742,887	135,766	29,784,377	518,961
Issued on vesting of restricted units ⁽¹⁾	433,181	5,619	236,127	4,859
Issued pursuant to the distribution reinvestment plans	-	-	5,308,276	100,660
Trust units, end of year	125,091,800	2,139,917	113,760,732	1,873,523
Cumulative unit issue costs	-	(53,199)	-	(47,100)
To be issued pursuant to distribution reinvestment plans	586,881	13,579	-	-
Total unitholders' capital, end of year	125,678,681	2,100,297	113,760,732	1,826,423

(1) The amount of trust units issued on vesting of restricted units is net of employee withholding taxes.

12. CAPITAL MANAGEMENT

The Trust's capital structure is comprised of unitholders' equity, bank debt and working capital. The balance of each of these items is as follows:

(\$000)	December 31, 2008	December 31, 2007
Bank debt	918,626	595,984
Working capital ⁽¹⁾	(187,694)	54,104
Net debt	730,932	650,088
Unitholders' equity	1,884,812	1,417,003
Total capitalization	2,615,744	2,067,091

(1) Working capital is calculated as current assets less current liabilities, including long term investments and excluding risk management liabilities and assets.

The Trust's objective for managing capital is to maintain a strong balance sheet and capital base to provide financial flexibility, stability to distributions and to position the Trust for future development of the business. Ultimately, the Trust strives to maximize long-term unitholder value by ensuring the Trust has the financing capacity to fund projects that are expected to add value to unitholders and distribute any excess cash to unitholders that is not required for financing projects.

The Trust manages and monitors its capital structure and short term financing requirements using a non-GAAP measure, the ratio of net debt to funds flow from operations. Net debt is calculated as current liabilities plus bank indebtedness less current assets, including long term investments and excluding risk management liabilities and assets. Funds flow from operations is calculated as cash flow from operating activities before changes in non-cash working capital and asset retirement expenditures. The Trust's objective is to maintain a net debt to funds flow from operations ratio of approximately 1.0 times. This metric is used to measure the Trust's overall debt position and measure the strength of the Trust's balance sheet. The Trust monitors this ratio and uses this as a key measure in making decisions regarding financing, capital spending and distribution levels.

The Trust strives to provide stability to its distributions over time by managing risks associated with the oil and gas industry. To accomplish this, the Trust maintains a conservative balance sheet with significant unutilized lines of credit and actively hedges commodity prices using a three and a half year risk management program and hedging up to 65 percent of after royalty volumes using a portfolio of swaps, collars and put option instruments.

Crescent Point is subject to certain financial covenants in its credit facility agreements and is in compliance with all financial covenants as of December 31, 2008.

The Trust's ability to raise new equity will be limited by the Safe Harbour Limit guidelines as announced by the Federal Government. The Federal Government's decision to tax income trusts has created uncertainty in the capital markets regarding the future of the trust sector. However, Crescent Point believes that it has sufficient capital resources to meet its obligations given the Trust's significant unutilized borrowing capacity available and its prior success raising new equity within the guidelines as demonstrated from 2006 through 2008.

13. RESTRICTED UNIT BONUS PLAN

The Trust has a Restricted Unit Bonus Plan. Under the terms of the Restricted Unit Bonus Plan, the Trust may grant restricted units to directors, officers, employees and consultants. Restricted units vest at 33 1/3 percent on each of the first, second and third anniversaries of the grant date. Restricted unitholders are eligible for monthly distributions on their restricted units, immediately upon grant.

On May 30, 2008, at the annual general meeting, the unitholders approved an increase in the maximum number of trust units outstanding under the Restricted Unit Plan from 5,000,000 to 11,000,000 units.

A summary of the changes in the restricted units outstanding under the plan is as follows:

	2008	2007
Restricted units, beginning of year	1,486,050	1,043,628
Granted	1,505,844	898,476
Exercised	(649,000)	(434,557)
Forfeited	(17,592)	(21,497)
Restricted units, end of year	2,325,302	1,486,050

The Trust recorded compensation expense and contributed surplus of \$27.4 million in the year ended December 31, 2008 (2007 - \$14.4 million), based on the amortization of the fair value of the units on the date of grant. Additionally, the Trust recorded \$3.4 million (2007 - \$2.0 million) of cash distributions on restricted units. The total cash and non-cash unit based compensation recorded in the year was \$30.8 million (2007 - \$16.4 million).

A summary of the changes in the contributed surplus is as follows:

(\$000)	2008	2007
Contributed surplus, beginning of year	15,086	9,150
Unit-based compensation	27,554	14,516
Exercised restricted units	(12,781)	(8,442)
Forfeited restricted units	(119)	(138)
Contributed surplus, end of year	29,740	15,086

On June 23, 2008, the Board of Directors approved the issuance effective July 1, 2008 of 551,622 restricted units to employees of the Trust in conjunction with a special bonus award to recognize their efforts contributing to the successful growth and net asset value appreciation of the Trust in the past two and a half years.

14. DEFICIT

The deficit balance is composed of the following items:

(\$000)	2008	2007
Accumulated earnings	575,146	111,044
Accumulated cash distributions	(860,371)	(535,550)
Deficit, end of year	(285,225)	(424,506)

The Trust has historically paid cash distributions in excess of accumulated earnings as cash distributions are based on cash flow from operating activities before changes in non-cash working capital generated in the current period while accumulated earnings are based on net income.

15. INCOME TAXES

On June 22, 2007, income trust tax legislation was passed resulting in tax on distributions at the federal corporate income tax rate plus a deemed 13 percent provincial income tax at the Trust level commencing in 2011. Currently, distributions paid to unitholders, other than returns of capital, are claimed as a deduction by the Trust in arriving at taxable income whereby tax is eliminated at the Trust level and is paid by the unitholders. As a result of this new legislation, the future tax position of the Trust, the parent entity, is now required to be reflected in the consolidated future income tax calculation.

On February 26, 2008, the Federal Government announced as part of their budget, that the provincial component of trust tax will be based on the general provincial corporate tax rate in each province in which the trust has a permanent establishment instead of the deemed 13 percent provincial tax rate. As the proposed rules were not substantively enacted as of December 31, 2008, the Trust has not reflected a reduced tax rate in the calculation of future income taxes in 2008.

The tax provision differs from the amount computed by applying the combined Canadian federal and provincial statutory income tax rates to income before future income tax as follows:

(\$000)	2008	2007
Income before income taxes	561,441	4,400
Capital and other tax expense	(20,031)	(15,394)
	541,410	(10,994)
Statutory income tax rate	30.81%	33.72%
Expected provision for income taxes	166,808	(3,707)
Internal reorganization	-	(158,817)
Initial recognition of tax liability	-	152,346
Effect of change in corporate tax rates	(7,419)	(23,337)
Income of the Trust not subject to current tax and other	(82,081)	54,688
Future income tax expense	77,308	21,173

The net future income tax liability is comprised of the following:

(\$000)	2008	2007
Future income tax assets:		
Asset retirement obligations	19,210	18,600
Trust unit issue costs	2,586	679
Risk management contracts	298	-
	22,094	19,279
Future income tax liabilities:		
Property, plant and equipment	(335,060)	(263,286)
Risk management contracts	(18,673)	-
	(353,733)	(263,286)
Net future income tax liability	(331,639)	(244,007)

At December 31, 2008, the Trust had tax pools of approximately \$1.3 billion (2007 - \$1.0 billion) consisting of intangible resource pools, tangible pools and trust unit issue costs.

16. PER TRUST UNIT AMOUNTS

The following table summarizes the weighted average trust units used in calculating net income per trust unit:

	Three months ended December 31		Year ended December 31	
	2008	2007	2008	2007
Weighted average trust units	125,091,800	113,136,424	123,993,078	100,670,407
Dilutive impact of restricted units	2,325,663	1,486,714	1,950,679	1,388,254
Dilutive trust units	127,417,463	114,623,138	125,943,757	102,058,661

17. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Trust's financial assets and liabilities are comprised of accounts receivable, investments in marketable securities, the reclamation fund, risk management assets and liabilities, accounts payable and accrued liabilities, cash distributions payable and bank indebtedness. Risk management assets and liabilities arise from the use of derivatives. Discussions of risks associated with financial assets and liabilities, fair values of financial assets and liabilities and summarized information related to risk management positions are detailed below:

a) Risks Associated with Financial Assets and Liabilities

The Trust is exposed to financial risks from its financial assets and liabilities. The financial risks include market risk relating to commodity prices, interest rates and foreign exchange rates as well as credit and liquidity risk.

Market Risk

Market risk is the risk that the fair value or future cash flows of a derivative will fluctuate because of changes in market prices. Market risk comprised of commodity price risk, interest rate risk and foreign exchange risk is discussed below.

Commodity Price Risk

The Trust is exposed to commodity price risk on crude oil and natural gas revenues as well as power on electricity consumption. As a means to mitigate the exposure to commodity price volatility, the Trust has entered into various derivative agreements. The use of derivative instruments is governed under formal policies and is subject to limits established by the Board of Directors of Crescent Point Resources Inc., the administrator of the Trust.

Crude Oil – To partially mitigate exposure to the crude oil commodity price risk, the Trust enters into option contracts and swaps, which manage the Cdn\$ WTI price fluctuations.

Natural gas – The Trust has partially mitigated the natural gas commodity price risk by entering into AECO natural gas collars, which manage the AECO natural gas price fluctuations.

Power – To manage the Trust's exposure to electricity price changes, the Trust has entered into swaps and fixed price physical delivery contracts which fix the power price.

Interest Rate Risk

The Trust is exposed to interest rate risk on bank indebtedness to the extent of changes in the prime interest rate. Crescent Point partially mitigates its exposure to interest rate changes by entering into both interest rate swap and bankers acceptance transactions as a means of managing the debt portfolio.

At December 31, 2008, a one percent increase or decrease in the interest rate on floating rate debt and interest rate swaps would have amounted to a \$5.7 million impact to net income for the year ended December 31, 2008. At December 31 2008, the Trust's outstanding derivative instruments utilized for interest rate management activities were in an unrealized loss position of \$10.6 million.

Foreign Exchange Risk

Fluctuations in the exchange rates between the U.S. and Canadian dollar can affect the Trust's reported results. Crescent Point's functional and reporting currency is Canadian dollars. To partially mitigate this risk the Trust has fixed crude oil contracts to settle in Cdn\$ WTI.

Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. A substantial portion of the Trust's accounts receivable are with customers in the oil and gas industry and are subject to normal industry credit risks. The Trust monitors the creditworthiness and concentration of credit with customers of its physical oil and gas sales. The Trust is authorized to transact derivative contracts with counterparties rated A (or equivalent) or better, based on the lowest rating of the three ratings providers. Should one of the Trust's financial counterparties be downgraded below the A rating limit, the Chief Financial Officer will advise the Audit Committee and provide recommendations to minimize the Trust's credit risk to that counterparty. The maximum credit exposure associated with accounts receivable and risk management assets is the total carrying value and the maximum exposure associated with the derivative instruments approximates their fair value.

On July 23, 2008, the Trust announced that it has a potential exposure to SemCanada Crude Company ("SemCanada"), a Canadian subsidiary of SemGroup, L.P. ("SemGroup"), relating to the marketing of a portion of the Trust's physical crude oil and liquids production. The contract pertaining to the majority of the production volumes purchased by SemCanada was previously terminated and does not represent an ongoing exposure for the Trust.

SemGroup filed a voluntary petition for reorganization under Chapter 11 of the Bankruptcy Code in the United States Bankruptcy Court for the District of Delaware and SemCanada also filed for creditor protection in Canada under *The Companies' Creditors Arrangement Act*. SemGroup listed assets of \$6.14 billion and liabilities of \$7.53 billion in its US bankruptcy filing.

Crescent Point's exposure is listed in SemGroup's US bankruptcy filing as \$42.5 million based on SemGroup's forecasts of prices and production volumes. The Trust's actual exposure is closer to \$31.1 million based on confirmed production volumes and contract prices. During the fourth quarter of 2008, a provision of \$19.4 million was recorded for amounts considered to be uncollectible relating to this receivable.

The Trust has purchased trade credit insurance to protect the Trust against credit risk with financial counterparties.

Liquidity Risk

Liquidity risk is the risk that the Trust will encounter difficulty in meeting obligations associated with financial liabilities. The Trust manages its liquidity risk through cash and debt management. As disclosed in Note 12, Crescent Point targets a net debt to funds flow from operations ratio of approximately 1.0 times.

In managing liquidity risk, the Trust has access to a wide range of funding at competitive rates through capital markets and banks. At December 31, 2008, the Trust had available unused borrowing capacity of \$231.4 million. The Trust believes it has sufficient funding to meet foreseeable borrowing requirements.

The timing of cash outflows relating to financial liabilities is outlined in the table below:

(\$000)	1 year	2 years	3 years	Total
Accounts payable and accrued liabilities	118,038	-	-	118,038
Cash distribution payable	15,208	-	-	15,208
Risk management liabilities	5,395	4,205	1,011	10,611
Bank indebtedness	-	918,626	-	918,626

Included in Crescent Point's bank indebtedness of \$918.6 million at December 31, 2008 are obligations of \$750.0 million of bankers' acceptances, obligations of \$172.3 million for borrowings under the operating and syndicated prime loans, partially offset by prepaid interest on banker's acceptances of \$3.7 million. These amounts are fully supported and management expects that they will continue to be supported by revolving credit and loan facilities that have no repayment requirements other than interest.

Throughout the latter part of 2008, global financial markets entered into a period of significant uncertainty marked by high profile bankruptcies of major financial institutions, large increases in stock market volatility, significant downward pressure on equities and overall tightening of credit markets. At December 31, 2008 there was \$231.4 million of credit facilities available.

During this year, Crescent Point was successful in increasing its credit facilities by \$350 million. The financing highlights the high quality nature of the asset base and the robust economics of the opportunities that lie ahead for Crescent Point. Subsequent to December 31, 2008 Crescent Point successfully completed \$115 million offering of trust units (see note 19). The Trust has significant cash available to meet its short and medium term needs.

Crescent Point is well positioned to withstand the current market uncertainty and to take advantage of acquisition opportunities. Crescent Point's balance sheet is strong and its 3½ year risk management program provides cash flow stability.

b) Fair Value of Financial Assets and Liabilities

The fair values of cash, accounts receivable, the reclamation fund, accounts payable and accrued liabilities, cash distributions payable and bank indebtedness approximates their carrying amounts due to their short-term nature and floating interest rate on debt.

Risk management assets and liabilities and investments in marketable securities are recorded at their estimated fair value based on the mark-to-market method of accounting, using third-party market forecasts. The Trust incorporates the credit risk associated with counterparty default, as well as the Trust's own credit risk, into the estimates of fair value.

The following is a summary of the fair value of financial assets and liabilities:

(\$000)	As at December 31, 2008	As at December 31, 2007
	Fair Value	Fair Value
Financial Assets		
Held-for-Trading		
Risk management assets ⁽¹⁾	181,935	451
Investments in marketable securities	538	1,385
Long term investments ⁽²⁾	-	6,386
Loans and Receivables		
Accounts receivable	91,994	102,800
Available for Sale		
Long term investments	20,160	-
Financial Liabilities		
Held-for-Trading		
Risk management liabilities ⁽¹⁾	10,611	123,471
Other Financial Liabilities		
Accounts payable and accrued liabilities	118,038	144,141
Cash distribution payable	15,208	22,752
Bank debt	918,626	595,984

(1) Including current portion.

(2) Excluding equity investment.

c) Risk Management Assets and Liabilities

The Trust entered into fixed price oil, gas, power and interest rate contracts to manage its exposure to fluctuations in the price of crude oil, gas, power, and interest on debt.

The following is a summary of the derivative contracts in place as at December 31, 2008:

Financial WTI Crude Oil Contracts - Canadian Dollar ⁽¹⁾							
Term	Contract	Volume (bbls/d)	Average Swap Price (\$Cdn/bbl)	Average Collar Sold Call Price (\$Cdn/bbl)	Average Collar Bought Put Price (\$Cdn/bbl)	Average Bought Put Price (\$Cdn/bbl)	Average Put Premium (\$Cdn/bbl)
2009	Swap	7,500	83.82				
2009	Collar	5,250		95.48	76.24		
2009	Put	3,250				70.46	(6.03)
2010	Swap	6,313	85.17				
2010	Collar	3,937		96.35	79.74		
2010	Put	2,500				72.90	(4.51)
2011	Swap	4,748	105.74				
2011	Collar	3,626		123.19	95.00		
2012 January - March	Swap	3,000	101.11				
2012 January - March	Collar	500		123.00	90.00		

(1) The volumes and prices reported are the weighted average volumes and prices for the period.

Financial Interest Rate Contracts – Canadian Dollar			
Term	Contract	Notional Principal (\$Cdn)	Fixed Annual Rate (%)
January 2009 – February 2009	Swap	50,000,000	4.37
January 2009 – May 2009	Swap	75,000,000	3.16
January 2009 – November 2010	Swap	75,000,000	4.35
January 2009 – November 2010	Swap	50,000,000	1.97
January 2009 – June 2011	Swap	75,000,000	3.89
January 2009 – November 2011	Swap	25,000,000	2.54

Physical Power Contracts – Canadian Dollar			
Term	Contract	Volume (MW/h)	Fixed Rate (\$Cdn/MW/h)
January 2009 – December 2009	Swap	1.0	82.45
January 2009 – December 2009	Swap	3.0	81.25
January 2010 – December 2010	Swap	3.0	80.75

The physical contracts have not been marked-to-market as the power acquired is for the Trust's own use. The unrealized loss on the physical contracts at December 31, 2008 is \$0.1 million.

The following table reconciles the movement in the fair value of the Trust's commodity, power and interest rate contracts:

(\$000)	2008	2007
Risk management asset, beginning of year	451	1,052
Acquired through capital acquisitions	-	2,063
Unrealized mark-to-market gain (loss)	181,484	(2,664)
Risk management asset, end of year	181,935	451
Less: current risk management asset, end of year	(82,782)	(451)
Long term risk management asset, end of year	99,153	-
Risk management liability, beginning of year	123,471	19,278
Acquired through capital acquisitions	-	1,431
Unrealized mark-to-market loss (gain)	(112,860)	102,762
Risk management liability, end of year	10,611	123,471
Less: current risk management liability, end of year	(5,395)	(63,819)
Long term risk management liability, end of year	5,216	59,652

Commodity Price Sensitivities on Derivatives

The following table summarizes the sensitivity of the fair value of the Trust's risk management positions as at December 31, 2008 to fluctuations in commodity prices, with all other variables held constant. When assessing the potential impact of these commodity price changes, the Trust believes 10 percent volatility is a reasonable measure. Fluctuations in commodity prices potentially could have resulted in unrealized gains (losses) impacting net income as follows:

(\$000)	Impact on Net Income	
	Year Ended December 31, 2008	
	Increase 10%	Decrease 10%
Crude oil price	(83,455)	85,014

18. COMMITMENTS

At December 31, 2008, the Trust had contractual obligations and commitments for office space, equipment, vehicles and premiums on put contracts:

(\$000)	
2009	15,574
2010	15,731
2011	9,418
2012	7,784
2013	8,682

⁽¹⁾ Included in the above commitments are recoveries of rent expense on office space the Trust has acquired through various acquisitions and has subleased out to other tenants.

19. SUBSEQUENT EVENTS

a) Equity financing

On January 9, 2009, the Trust and a syndicate of underwriters closed a bought deal equity financing pursuant to which the syndicate sold 5,227,325 trust units for gross proceeds of \$115.0 million (\$22.00 per trust unit).

b) Acquisition of Villanova Energy Corporation

On January 15, 2009, the Trust closed the acquisition of Villanova Energy Corporation, a private company with properties in the Bakken area of southeast Saskatchewan by way of a Plan of Arrangement for total consideration of 4.625 million trust units plus the assumption of approximately \$23.6 million of Villanova debt. Total consideration was approximately \$123.1 million based on a value of \$21.51 per trust unit.

c) Acquisition of Bakken southeast Saskatchewan Assets

On March 4, 2009, the Trust announced the acquisition of the Talisman Energy Inc. assets in southeast Saskatchewan and Montana for cash consideration of approximately \$720 million effective April 1, 2009. Under the terms of the agreement, Crescent Point and TriStar Oil & Gas Ltd. ("TriStar") will jointly and severally acquire the assets. Crescent Point and TriStar have agreed that each party will acquire 50 percent working interests in the assets for approximately \$360 million. The Trust's share of the acquisition will be financed with existing credit facilities and through a \$230 million bought deal financing (10,825,000 trust units at \$21.25 per trust unit).

Crescent Point and TriStar have also entered into an agreement with Shelter Bay, under which Crescent Point and TriStar will sell to Shelter Bay a portion of the Bakken assets (the "Bakken Assets"). Consideration to be received for the Bakken Assets is approximately \$71 million, of which Crescent Point and TriStar will each receive approximately \$35.5 million.

In addition, the Trust announced an intention to convert to a corporation with a \$0.23 monthly dividend.
