

CRESCENT POINT ENERGY TRUST ANNOUNCES FOURTH QUARTER 2006 RESULTS

March 12, 2007, CALGARY, ALBERTA. Crescent Point Energy Trust, (“Crescent Point” or the “Trust”) (TSX: CPG.UN), is pleased to announce its operating and financial results for the fourth quarter and twelve months ended December 31, 2006.

FINANCIAL AND OPERATING HIGHLIGHTS

| (\$000, except trust units, per trust unit and per boe amounts) | Three months ended December 31 | | | Year ended December 31 | | |

| Netback | 27.64 | 32.12 | (14) | 30.08 | 28.74 | 5 |

(1) Cash flow from operations, payout ratio and net debt as presented do not have any standardized meaning prescribed by GAAP and therefore may not be comparable with the calculation of similar measures presented by other entities.

(2) The per unit amounts (with the exception of per unit distributions) are the per unit – diluted amounts.

(3) Net debt includes working capital, but excludes the risk management liabilities and assets. Working capital as at December 31, 2006 includes the \$30.0 million long-term investment in Mission Oil & Gas Inc.

(4) The capital acquisitions include the purchase price and assumed net debt. These amounts differ from the amounts allocated to property, plant and equipment as there were allocations made to goodwill, other assets and liabilities. The development capital expenditures in the table exclude capitalized administration costs. The prior period results have been restated to conform to the current period presentation.

(5) The average selling prices reported are before realized financial instruments.

HIGHLIGHTS

In the fourth quarter of 2006, Crescent Point continued to execute its integrated business strategy of acquiring, exploiting and developing high quality, long life light and medium oil and natural gas properties.

The Trust achieved low 2006 finding and development costs, excluding change in future development costs, of \$9.86 per proved plus probable boe and \$13.06 per proved boe of reserves. This equates to a proved plus probable recycle ratio of 3.5 times. Including change in future development costs, the Trust's 2006 finding and development costs are \$13.53 per proved plus probable boe and \$14.85 per proved boe.

Crescent Point's 2006 finding, development and acquisition costs, excluding change in future development costs, are \$12.34 per proved plus probable boe and \$15.97 per proved boe of reserves. This equates to a proved plus probable recycle ratio of 2.8 times. Including future development costs, the Trust's finding, development and acquisition costs for 2006 are \$13.16 per proved plus probable boe and \$16.36 per proved boe.

The Trust's five year rolling average for finding and development costs, excluding change in future development costs, is \$9.97 per proved plus probable boe, which equates to a proved plus probable recycle ratio of 3.2 times. Crescent Point's five year rolling average for finding, development and acquisition costs, excluding change in future development costs for proved plus probable reserves is \$12.40 per boe which equates to a proved plus probable recycle ratio of 2.7 times.

Crescent Point increased its net asset value ("NAV") per unit to \$21.61 at year end 2006 from \$15.12 at year end 2005, based on independent engineering year-end price forecasts discounted at 5 percent. With the closing of the acquisition of Mission Oil & Gas Inc. on February 9, 2007, the Trust's NAV per unit is \$22.05. Utilizing forward curve prices as of February 9, 2007, the Trust's NAV per unit increases to \$25.66. The Trust has increased NAV per unit every year since inception.

Crescent Point replaced 147 percent of 2006 production, not including reserves added through acquisitions. Including acquisitions, the Trust increased its year end reserve base by 94 percent on a proved basis and 88 percent on a proved plus probable basis. Year end 2006 reserves are 64.0 million boe proved and 90.3 million boe proved plus probable, up from 32.9 million boe proved and 47.9 million boe proved plus probable at the end of 2005. With the acquisition of Mission, the Trust's independently assigned reserve base increased by 15.9 million boe and 25.0 million boe to 79.9 million boe proved and 115.3 million boe proved plus probable, respectively.

Crescent Point increased its proved plus probable reserve life index to 11.9 years from 11.1 years.

The Trust spent \$30.0 million on development capital activities in the fourth quarter, including the drilling of 23 (14.8 net) wells with a 100 percent success rate adding over 900 boe/d of initial interest production.

The Trust exceeded its fourth quarter average daily production target, producing 21,369 boe/d for the quarter. This represents a 55 percent increase from the 13,791 boe/d produced in the fourth quarter of 2005.

Crescent Point's cash flow from operations increased by 31 percent to \$43.8 million in the fourth quarter of 2006, compared to \$33.4 million in the fourth quarter of 2005.

Crescent Point maintained consistent monthly distributions of \$0.20 per unit, totaling \$0.60 per unit for the fourth quarter of 2006. This represents a 2 percent increase from the \$0.59 per unit distributed in the fourth quarter of 2005 and resulted in an overall payout ratio of 94 percent and a 95 percent payout ratio on a per unit – diluted basis. The Trust's overall 2006 payout per unit – diluted was 81 percent and 2007 is forecasted to be 77 percent on a per unit – diluted basis.

The Trust continued to execute its core strategy of managing commodity price risk using a combination of fixed price swaps, costless collars, and put option instruments. As at March 1, 2007, the Trust had hedged 53 percent, 44 percent and 22 percent of production, net of royalty interest, for 2007, 2008 and 2009, respectively.

On November 22, 2006, the Trust's borrowing base was increased to \$470 million. It is anticipated that the base will increase to \$575 million upon renewal in the second quarter of 2007. The Trust's balance sheet remains strong with projected 2007 net debt to 12 month cash flow of less than 1.0 times

There were no acquisitions announced or closed during the fourth quarter. The Trust closed the previously announced Plan of Arrangement ("the Plan") to acquire Mission Oil & Gas Inc. ("Mission") on February 9, 2007. With the closing of the Plan, Crescent Point acquired more than 7,000 boe/d of high quality, long life, light sweet oil and natural gas production, of which more than 5,000 boe/d is from the Viewfield Bakken resource play in southeast Saskatchewan. Crescent Point estimates that the Viewfield Bakken pool is the fifth largest light oil pool discovered in western Canada, containing an estimated 1 billion barrels of original oil in place ("OOIP"). The completion of the Plan increased the Trust's resource base to more than 2.5 billion barrels OOIP and added more than 900 (570 net) low risk development drilling locations.

On October 26, 2006, Crescent Point announced a proposed reorganization of the Trust's structure, which was approved by unitholders at a Special Meeting held on November 27, 2006 and completed on March 1, 2007. The reorganization results in the business of the Trust being carried on through limited partnerships owned by the Trust, similar to reorganizations announced by a number of other trusts. It provides the Trust with a "flow through" structure that is expected to maximize the cash available for distribution.

OPERATIONS REVIEW

Forward-Looking Statements

This report may contain forward-looking statements including expectations of future production, cash flow and earnings. These statements are based on current beliefs and expectations based on information available at the time the assumption was made. By its nature, such forward-looking information is subject to a number of risks, uncertainties and assumptions, which could cause actual results or other expectations to differ materially from those anticipated, including those material risks discussed in our annual information form under "Risk Factors" and in our Management's Discussion and Analysis for the year ended December 31, 2006, under "Business Risks and Prospects". The material assumptions are disclosed in the Results of Operations section of this press release under the headings "Cash Distributions", "Taxation of Cash Distributions", "Capital Expenditures", "Asset Retirement Obligation", "Liquidity and Capital Resources", "Critical Accounting Estimates", "New Accounting Pronouncements", and "Business Risks and Prospects". These risks include, but are not limited to: the risks associated with the oil and gas industry (e.g., operational risks in development, exploration and production; delays or changes in plans with respect to exploration or development projects or capital expenditures; the uncertainty of reserve estimates; the uncertainty of estimates and projections relating to production, costs and expenses, and health, safety and environmental risks), commodity price and exchange rate fluctuations and uncertainties resulting from potential delays or changes in plans with respect to exploration or development projects or capital expenditures. Additional information on these and other factors that could affect Crescent Point's operations or financial results are included in Crescent Point's reports on file with Canadian securities regulatory authorities. Readers are cautioned not to place undue reliance on this forward-looking information, which is given as of the date it is expressed herein or otherwise and Crescent Point undertakes no obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise.

Fourth Quarter Operations Summary

During the fourth quarter of 2006, Crescent Point continued to aggressively implement management's business strategy of creating sustainable, value-added growth in reserves, production and cash flow through acquiring, exploiting and developing high quality, long life light and medium oil and natural gas properties.

Crescent Point achieved another record quarter for production in the fourth quarter. Production averaged 21,369 boe/d, exceeding the Trust's market guidance of 20,500 boe/d. The Trust participated in the drilling of 23 (14.8 net) oil wells, achieving a 100 percent success rate and adding in excess of 900 boe/d of initial interest production.

In mid-October 2006, the Trust halted fourth quarter drilling and focused on production optimization opportunities. The decision was in response to third quarter 2006 drilling exceeding expectations and the anticipated December 1, 2006 closing of the Mission acquisition. Due to the subsequent delay and uncertainty surrounding the Mission acquisition, the Trust then accelerated winter drilling operations in December with most of the associated production being brought on stream in the first quarter of 2007. This increased fourth quarter capital expenditures relative to production additions.

Drilling Results

| Three months ended December 31, 2006 | Gas | Oil | D&A | Service | Standing | Total | Net | % Success |

| Total | – | 102 | – | 1 | – | 103 | 77.4 | 100% |

Southeast Saskatchewan

In the fourth quarter of 2006, Crescent Point participated in the drilling of 9 (6.2 net) oil wells in southeast Saskatchewan, of which 8 (5.8 net) were horizontal wells. The Trust achieved a 100 percent success rate on the wells, which were located primarily in the Trust's core areas of Manor and Glen Ewen. Initial interest production added was approximately 550 boe/d.

The Glen Ewen gas plant was constructed during the quarter and was commissioned in early February 2007 in time for a multi well drilling program scheduled for the first quarter of 2007. 2 (2.0 net) wells of the program were drilled in December.

Revolving restrictions on the Enbridge Pipelines gathering system in southeast Saskatchewan resulted in an average production restriction of approximately 250 boe/d during the fourth quarter.

Southwest Saskatchewan

The Trust continued to optimize waterflood performance at the three operated Battrum units. A total of 9 (3.9 net) wells were drilled achieving a 100 percent success rate and adding initial interest production of 250 boe/d. The wells were completed and tied in through December 2006 and January 2007. Workovers were completed on an additional 17 (7.8 net) wells at a cost of \$0.2 million, adding 100 boe/d at an average on stream cost of \$2,000 per boe/d.

At the Cantuar Unit, 19 (10.5 net) wells drilled to the end of the third quarter were being tied in and evaluated by the operator with expectations of initial production rates of 40 boe/d per well.

South/Central Alberta

At Sounding Lake, gathering and injection line optimization work was completed in the fourth quarter to accommodate additional fluid handling and revised water injection schemes. 4 (4.0 net) oil wells were drilled adding over 100 boe/d of interest production. These infill wells are expected to increase pool recoveries and optimize water flood patterns in the future.

Northeast British Columbia and Peace River Arch, Alberta

At Worsley, the Trust received Good Production Practice ("GPP") approval to remove regulatory production restrictions at the Charlie Lake S pool and at the Charlie Lake Z pool. The Trust applied for GPP at the Charlie Lake T pool in the fourth quarter of 2006 and approval is anticipated in the second or third quarter of 2007. The Trust is also reviewing with other area operators the opportunity to concurrently produce from more than one reservoir in a single well bore. Crescent Point has negotiated an additional 1.0 mmcf/d of processing capacity and continues to work with operators of several area plants to expand and increase existing processing options and capacities. 1 (0.7 net) well was drilled in the Mulligan area and is currently being evaluated. Up to 9 (6.9 net) wells are planned for the 2007 drilling season.

Acquisitions

On September 11, 2006, the Trust announced that Independent Committees of the Boards of Directors of Crescent Point and Mission Oil & Gas Inc. had unanimously approved a proposal pursuant to which the Trust would exchange, by way of Plan of Arrangement, all of Mission's issued and outstanding shares for trust units of Crescent Point.

Under the terms of the Plan, each issued and outstanding Mission share would be exchanged for 0.695 trust units of Crescent Point.

A special meeting of the holders of Mission common shares to approve the Plan was scheduled to be held on November 30, 2006, with closing of the Plan anticipated for December 1, 2006. Due to the uncertainty created by the October 31, 2006 federal government announcement of a proposed tax (the "Proposal") on the distributions of certain income trusts, including Crescent Point, the Independent Committees of the Boards of Directors of Crescent Point and Mission decided to delay the special meeting to further assess the implications of the Proposal.

On December 12, 2006, Crescent Point revised the Plan such that each outstanding common share of Mission would be exchanged for 0.695 trust units of Crescent Point plus \$0.78 cash. On January 12, 2007, the Trust announced that the Independent Committees of the Boards of Directors of Crescent Point and Mission had determined that the revised Plan was, in the case of Crescent Point, in the best interests of the Crescent Point unitholders and, in the case of Mission, in the best interests of the Mission shareholders. The revised Plan was approved by Mission shareholders at a special meeting held on February 8, 2007, and closed on February 9, 2007.

With the closing of the Plan, the Trust acquired more than 7,000 boe/d of production, of which more than 5,000 boe/d is from the Viewfield Bakken resource play in the heart of Crescent Point's core southeast Saskatchewan operating area. Crescent Point estimates that the Viewfield Bakken pool is the fifth largest light oil pool discovered in western Canada, containing an estimated 1 billion barrels of original oil in place ("OOIP"). The completion of the Plan increased the Trust's resource base to more than 2.5 billion barrels OOIP and added more than 900 (570 net) low risk development drilling locations. This resource base extends the Trust's drilling inventory to more than 6 years and positions Crescent Point for significant long term development and reserve growth opportunities.

Summary of Reserves (Escalated Pricing)

As at December 31, 2006 ⁽¹⁾

| Description | RESERVES ⁽²⁾ | | | | | | | | BEFORE TAX NET PRESENT VALUE (\$000) | | | |
|---|-------------------------|--------|-------------|--------|-------------|-----|--------------|--------|--------------------------------------|-----------|-----------|-----------|
| | Oil (mstb) | | Gas (mmscf) | | NGL (mbbls) | | Total (mboe) | | Discount Rate | | | |
| | Gross | Net | Gross | Net | Gross | Net | Gross | Net | Undiscounted | 10% | 12% | 15% |
| Proved producing | 48,439 | 40,200 | 29,520 | 23,784 | 306 | 245 | 53,665 | 44,409 | 1,473,196 | 848,765 | 788,307 | 714,801 |

Finding, Development and Acquisition Costs

(excluding future development costs)

For the year ended December 31, 2006

| | CAPITAL EXPENDITURES ^{(1) (4)} | | RESERVES ⁽³⁾ | | | | FINDING, DEVELOPMENT AND ACQUISITION COSTS ^{(1) (2)} | |
|---------------------------------------|---|-----|-------------------------|-----|----------------------|-----|---|----------------------|
| | \$000 | % | Total Proved | | Proved Plus Probable | | Proved | Proved Plus Probable |
| | | | mboe | % | mboe | % | \$/boe | \$/boe |
| Exploration development and revisions | \$109,995 | 18% | 8,421 | 22% | 11,151 | 22% | \$ 13.06 | \$ 9.86 |
| Acquisitions, net of dispositions | \$ 506,156 | 82% | 30,155 | 78% | 38,791 | 78% | \$ 16.79 | \$ 13.05 |
| Total | \$ 616,151 | | 38,576 | | 49,942 | | \$15.97 | \$12.34 |

(1) Exploration development and revisions exclude the change during the most recent financial year in estimated future development costs relating to proved and proved plus probable reserves respectively. These costs would add \$15.0 million and \$40.9 million respectively, to the proved and proved plus probable reserves categories. Including these changes, the proved and proved plus probable finding, development and acquisition costs are \$16.36 and \$13.16 per barrel respectively.

(2) Including change in future development costs, finding and development costs are \$14.85 per proved boe and \$13.53 per proved plus probable boe.

(3) Gross Trust interest reserves are used in this calculation (interest reserves, before deduction of any royalties).

(4) The capital expenditures includes the purchase price of corporate acquisitions rather than the amounts allocated to property, plant and equipment for accounting purposes. The capital expenditures also exclude capitalized administration costs and acquisition costs.

Summary of Reserves, Including February 9, 2007 Acquisition of Mission Oil & Gas Inc. (Escalated Pricing)

As at January 1, 2007 ^{(1) (2)}

| Description | RESERVES ⁽³⁾ | | | | | | | | BEFORE TAX NET PRESENT VALUE (\$000) | | | |

(1) Includes acquisition of Mission Oil & Gas Inc. utilizing January 1, 2007 Independent Engineering Escalated Pricing.

UPDATE ON PROPOSAL TO TAX INCOME TRUSTS IN 2011

On October 31, 2006, the Federal Minister of Finance announced a proposal to tax the distributions of certain publicly traded income trusts. Draft legislation regarding the proposal was released by the government in late December 2006 and, in late January 2007, the House of Commons Standing Committee on Finance held special public hearings into the matter. It is not yet known if the proposal will be enacted into law in the form announced, if at all. Should it be enacted into law in its current form, it would apply to Crescent Point after four years and would come into effect in the 2011 tax year.

On December 15, 2006, the federal government announced guidelines with respect to the implementation of the proposed tax on income trust distributions. Included were guidelines setting limits on the expansion of existing income trusts prior to the 2011 tax year. An existing income trust, like Crescent Point, would be allowed to grow by the amount of its Safe Harbour Limit, which was defined as a percentage of the trust's market capitalization as of October 31, 2006. The Safe Harbour Limit was determined to be 40 percent in 2007 and 20 percent for each of 2008, 2009 and 2010 for a total of 100 percent of the Trust's October 31, 2006 market capitalization.

Crescent Point is actively participating in industry initiatives to influence the outcome of this proposed legislation. Despite uncertainty regarding the tax proposal, the Trust continues to aggressively implement its business plan. Crescent Point's key attributes of proven management, high quality, large resource in place assets, and conservative balance sheet and risk management strategy position the Trust well to succeed regardless of the outcome of the income trust taxation debate.

We urge all of our unitholders and concerned individuals to write, email or visit the constituency office of their Member of Parliament to voice their opinion regarding the tax proposal. Member of Parliament contact information can be found on the Crescent Point website at www.crescentpointenergy.com.

OUTLOOK

Crescent Point continues to execute its proven business plan of creating value added growth in reserves, production and cash flow through management's integrated strategy of acquiring, exploiting and developing high quality, long life, light and medium oil and natural gas properties. With another successful year of strong reserve additions in 2006, the Trust has demonstrated year over year growth in per unit net asset value since inception.

Pro forma with Mission, the Trust has more than \$1.1 billion of future development projects and six years of low risk infill development drilling inventory to sustain current production levels. With projected debt to cash flow of less than 1.0 times and an aggressive three year hedge profile, Crescent Point is well positioned to sustain distributions over time as the Trust continues to exploit and develop its asset base and actively identify and evaluate accretive acquisition opportunities.

Crescent Point increased proved plus probable reserves by 88 percent in 2006 and achieved low finding, development and acquisition costs of \$12.34 per boe proved plus probable for the year. Crescent Point demonstrated a fifth consecutive and record year for technical reserve additions and increased the Trust's net asset value to \$22.05 per unit fully diluted, including the Mission assets.

The Trust has more than 2.5 billion barrels of original oil in place and a reserve life index of 11.9 years on a proved plus probable basis. Through infill drilling, production optimization and waterflood implementation, management believes the Trust has the potential to double its proved plus probable reserves over time.

In 2007, the Trust will continue to focus on development drilling at its core properties of Manor, Tatagwa, Battrum/Cantuar, Worsley and Glen Ewen. The Trust commissioned the Glen Ewen gas plant early in the first quarter, in time for the winter drilling program. The Trust will actively implement development activities at the newly acquired Viewfield Bakken play, including expansion of the Viewfield gas plant from 3 mmcf/d to 6 mmcf/d.

Crescent Point's 2007 development capital budget has been set at \$150.0 million, including the drilling of 110.0 net wells, of which approximately 71 (40.0 net) are in the Viewfield Bakken resource play.

Crescent Point's management anticipates crude oil prices to remain strong in 2007. In the fourth quarter of 2006, West Texas Intermediate ("WTI") prices averaged US\$60.22 per barrel, off their third quarter peak of almost US\$80 per barrel. While inventories remain ample in the first quarter of 2007, cold weather in late winter in major consuming areas and geopolitical tensions in Nigeria and Iran have supported strong prices. Canadian differentials in the first quarter of 2007 have been tighter than expected due to strong demand for Canadian crude oil in major US markets including the PADD II market and extending south towards the Gulf Coast. For the balance of 2007, the Trust anticipates WTI prices to remain strong, with seasonal demand helping to support Canadian differentials at current levels. The addition of Mission's high netback light sweet Bakken crude oil production will help mitigate the impact on the Trust of widening winter differentials in late 2007.

The Trust expects continued volatility in natural gas prices in the coming months. Prices were soft in early winter trading due to record inventory levels and mild temperatures. However, cold weather in late winter has led to record storage withdrawals and a retreat from record high inventory levels. Prices are currently stronger than expected with the focus turning to forecasts for summer weather. Crescent Point believes this volatility will continue and that the Trust's solid three year hedging program will provide protection from price weakness and provide opportunities should high quality, long life large oil or gas in place assets become available.

The Trust continues to actively manage its three year commodity hedging program, with more than 53 percent of volumes hedged in 2007, more than 44 percent in 2008, and more than 22 percent in 2009. Hedge instruments utilized in the program include swaps, collars and put options, providing a floor of more than Cdn \$70 per barrel, with upside potential if prices strengthen above current levels. The balance sheet remains strong, with projected net debt of less than 1.0 times current annualized cash flow with significant unutilized credit lines.

The Trust anticipates 2007 cash flow will be in the range of \$314 million, or \$3.11 per unit, fully diluted, based on forecast pricing of US\$60 per barrel WTI, US/Cdn \$0.85 exchange rate, and Cdn \$7.50 per mcf AECO natural gas. Monthly distributions are anticipated to remain at \$0.20 per unit for a payout ratio per unit-diluted of 77 percent. Average daily production is forecast at 26,250 boe/d.

Crescent Point's management believes that with the high quality reserve base and development inventory, excellent balance sheet and solid hedging program, the Trust is well positioned to continue generating strong operating and financial results and delivering sustainable distributions through 2007 and beyond.

2007 Outlook

Crescent Point's 2007 guidance, including Mission, is as follows:

| | |
|---|---------|
| Production | |
| Oil and NGL (bbls/d) | 22,416 |
| Natural gas (mcf/d) | 23,000 |
| Total (boe/d) | 26,250 |
| Cash flow (\$000) | 314,000 |
| Cash flow per unit – diluted (\$) | 3.11 |
| Cash distributions per unit (\$) | 2.40 |
| Payout ratio – per unit – diluted (%) | 77 |
| Capital expenditures (\$000) ⁽¹⁾ | 150,000 |
| Wells drilled, net | 110 |
| Pricing | |
| Crude oil – WTI (US\$/bbl) | 60.00 |
| Crude oil – WTI (Cdn\$/bbl) | 70.59 |
| Natural gas – Corporate (Cdn\$/mcf) | 7.50 |
| Exchange rate (US\$/Cdn\$) | 0.85 |

(1) The projection of capital expenditures excludes acquisitions, which are separately considered and evaluated.

ON BEHALF OF THE BOARD OF DIRECTORS

Scott Saxberg
President and Chief Executive Officer
March 12, 2007

RESULTS OF OPERATIONS

Non-GAAP Financial Measures

Throughout this discussion and analysis, Crescent Point Energy Trust (“Crescent Point” or the “Trust”) uses the terms cash flow from operations, cash flow from operations per unit, cash flow from operations per unit – diluted, distributable cash, payout ratio, payout ratio per unit – diluted, net debt, market capitalization and total capitalization. These terms do not have any standardized meaning as prescribed by Canadian generally accepted accounting principles (“GAAP”) and therefore they may not be comparable with the calculation of similar measures presented by other issuers.

Cash flow from operations is calculated based on cash flow from operating activities before changes in non-cash working capital and asset retirement obligation expenditures. Management utilizes cash flow from operations as a key measure to assess the ability of the Trust to finance distributions, operating activities, capital expenditures and debt repayments. Cash flow from operations as presented is not intended to represent cash flow from operating activities, net earnings or other measures of financial performance calculated in accordance with Canadian GAAP.

The following table reconciles the cash flow from operating activities to cash flow from operations:

| (\$000) | Three months ended December 31 | | | Year ended December 31 | | |
|-------------------------------------|--------------------------------|--------|----------|------------------------|---------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Cash flow from operating activities | 39,313 | 21,731 | 81 | 177,426 | 94,247 | 88 |
| Changes in non-cash working capital | 3,915 | 11,222 | (65) | 10,691 | 14,512 | (26) |
| Asset retirement expenditures | 615 | 471 | 31 | 1,018 | 1,026 | (1) |
| Cash flow from operations | 43,843 | 33,424 | 31 | 189,135 | 109,785 | 72 |

Distributable cash is calculated based on cash flow from operating activities before changes in non-cash working capital and asset retirement obligation expenditures and after deducting reclamation fund contributions. Management utilizes distributable cash as a measure of the total amount of cash available for distribution to unitholders. Payout ratio is calculated as the proportion of cash distributions to cash flow from operating activities before changes in non-cash working capital and asset retirement obligation expenditures. Management utilizes the payout ratio to measure the stability and sustainability of both the Trust and distributions to unitholders.

Net debt is calculated as current liabilities less current assets, excluding risk management assets and liabilities, and including long term investments. Management utilizes net debt as a key measure to assess the liquidity of the Trust. Market capitalization is calculated by applying the period end closing unit trading price to the number of trust units outstanding and issuable for exchangeable shares. Market capitalization is an indication of the enterprise value. Total capitalization is calculated as market capitalization and current liabilities, less current assets and long term investments, excluding the risk management asset and liabilities. Total capitalization is used by management to measure the proportion of net debt in the Trust’s capital structure.

A barrel of oil equivalent (“boe”) is based on a conversion rate of six thousand cubic feet of natural gas to one barrel of oil.

Forward-Looking Information

Certain statements contained in this report constitute forward-looking statements and are based on the Trust’s beliefs and assumptions based on information available at the time the assumption was made. By its nature, such forward-looking information involves known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. The Trust and Crescent Point Resources Inc. (“CPRI”), believe the expectations reflected in those forward-looking statements are reasonable but no assurance can be given that these expectations will prove to be correct and such forward-looking statements should not be unduly relied upon. These statements speak only as of the date of this report.

The material assumptions in making these forward-looking statements are disclosed in this report under the headings “Cash Distributions”, “Taxation of Cash Distributions”, “Capital Expenditures”, “Asset Retirement Obligation”, “Liquidity and Capital Resources”, “Critical Accounting Estimates”, “New Accounting Pronouncements”, and “Business Risks and Prospects”.

This disclosure contains certain forward-looking estimates that involve substantial known and unknown risks and uncertainties, certain of which are beyond Crescent Point’s control, including the impact of general economic conditions; industry conditions including changes in laws and regulations including the adoption of new environmental laws and regulations and changes in how they are interpreted and enforced; increased competition and the lack of availability of qualified personnel or management; fluctuations in commodity prices, foreign exchange or interest rates; stock market volatility and obtaining required approvals of regulatory authorities. In addition, there are numerous risks and uncertainties associated with oil and gas operations and the evaluation of oil and gas reserves. Therefore Crescent Point’s actual results, performance or achievement could differ materially from those expressed in, or implied by, these forward-looking estimates and if such actual results, performance or achievements transpire or occur, or if any of them do so, there can be no certainty as to what benefits Crescent Point will derive there from.

Federal Government Proposal to Tax Income Trusts

On October 31, 2006, the Minister of Finance for the Government of Canada announced a proposal to tax the distributions of certain publicly traded income trusts. Draft legislation regarding the proposal was released by the government in late December 2006 and, in late January 2007, the House of Commons Standing Committee on Finance held special public hearings into the matter. It is not yet known if the proposal will be enacted into law in the form announced, if at all. Should it be enacted into law in its current form, it would apply to Crescent Point after four years and would come into effect in the 2011 tax year.

On December 15, 2006, the federal government announced guidelines with respect to the implementation of the proposed tax on income trust distributions. Included were guidelines setting limits on the expansion of existing income trusts prior to the 2011 tax year. An existing income trust, like Crescent Point, would be allowed to grow by the amount of its Safe Harbour Limit, which was defined as a percentage of the trust's market capitalization as of October 31, 2006. The Safe Harbour Limit was determined to be 40 percent in 2007 and 20 percent for each of 2008, 2009 and 2010 for a total of 100 percent of the Trust's October 31, 2006 market capitalization.

Production

Production increased by 70 percent year-over-year due to twelve acquisitions completed in 2006, the acquisitions completed in the second half of 2005 and the successful 2006 drilling results.

The main acquisitions generating the increase in production include the acquisition of two corporations with properties in the Cantuar and Battrum areas of southwest Saskatchewan in January 2006 which added approximately 5,000 boe/d of initial medium oil production. The acquisition of Bulldog Energy Inc. in November 2005 added approximately 1,925 boe/d of initial light oil production in the Manor area of southeast Saskatchewan and the acquisition of a private consortium of companies with properties in the Glen Ewen area of southeast Saskatchewan in July 2005 added approximately 1,050 boe/d of initial light oil and natural gas production. Lastly, the acquisition of Canex Energy Inc. in May 2006 added approximately 975 boe/d of initial light oil and natural gas production in the Peace River Arch area of northwest Alberta.

The Trust's weighting to oil increased from 76 percent to 84 percent in the year. This increase was largely the result of the acquisitions completed in 2006 which were focused on light and medium oil assets.

| | Three months ended December 31 | | | Year ended December 31 | | |
|----------------------------|--------------------------------|--------|----------|------------------------|--------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Crude oil and NGL (bbls/d) | 17,967 | 10,637 | 69 | 17,417 | 9,196 | 89 |
| Natural gas (mcf/d) | 20,410 | 18,927 | 8 | 19,833 | 17,810 | 11 |
| Total (boe/d) | 21,369 | 13,791 | 55 | 20,723 | 12,164 | 70 |
| Crude oil and NGL (%) | 84 | 77 | 7 | 84 | 76 | 8 |
| Natural gas (%) | 16 | 23 | (7) | 16 | 24 | (8) |
| Total (%) | 100 | 100 | - | 100 | 100 | - |

Marketing and Prices

The Trust's average oil price for the year increased two percent over 2005, while the benchmark WTI price increased by 17 percent. The two percent increase in the corporate price reflects the increase in market prices, offset by widening corporate oil differentials and a stronger Canadian dollar. Crescent Point's oil differential widened from \$9.63 per bbl in 2005 to \$15.25 per bbl in 2006 primarily due to a reduction in the average crude quality of the Trust as a result of the acquisition of properties in the Cantuar and Battrum areas of southwest Saskatchewan in January 2006.

The Trust's realized prices, netbacks, revenues, cash flow from operations and payout ratios are expected to become more seasonal due to the impact of the Cantuar and Battrum properties which typically realize wider price differentials in the first and fourth quarters. This makes comparisons between fourth quarter 2005 and fourth quarter 2006 more difficult. The impact will be offset somewhat in the future due to the acquisition of light, sweet oil properties from Mission Oil & Gas Inc.

The average natural gas price realized by the Trust decreased from \$8.38 per mcf in 2005 to \$6.33 per mcf in 2006. This decrease of 24 percent is mainly attributable to the 26 percent decrease in the benchmark AECO daily natural gas price.

| Average Selling Prices ⁽¹⁾ | Three months ended December 31 | | | Year ended December 31 | | |
|---------------------------------------|--------------------------------|-------|----------|------------------------|-------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |

| WTI crude oil (Cdn\$/bbl) | 68.43 | 70.64 | (3) | 75.28 | 68.20 | 10 |
| AECO natural gas ⁽¹⁾ (Cdn\$/mcf) | 6.98 | 11.45 | (39) | 6.54 | 8.78 | (26) |
| Exchange rate – US\$/Cdn\$ | 0.88 | 0.85 | 4 | 0.88 | 0.83 | 6 |

(1) The AECO natural gas price reported is the average daily spot price.

Financial Instruments and Risk Management

Management of cash flow variability is an integral component of Crescent Point's business strategy. Changing business conditions are monitored regularly and reviewed with the Board of Directors to establish risk management guidelines used by management in carrying out the Trust's strategic risk management program. The risk exposure inherent in movements in the price of crude oil and natural gas, fluctuations in the US/Cdn dollar exchange rate, changes in the price of power and interest rate movements on long-term debt are all proactively managed by Crescent Point through the use of derivatives with reputable, financially sound counterparties. The Trust considers these contracts to be an effective means to manage cash flow.

The majority of the Trust's crude oil and natural gas financial instruments are in Canadian dollars, with the exception of two U.S. dollar oil contracts. The financial instrument contracts are referenced to WTI and AECO, unless otherwise noted. These financial instruments allow the Trust to hedge both commodity prices and fluctuations in the US/Cdn dollar exchange rate.

The Trust's realized financial instrument loss of \$30.3 million for 2006 remained generally consistent with the loss of \$32.9 million incurred in 2005. The primary reason for the slight decrease was due to a significant increase in the financial instrument price for oil. The financial instrument price increased from approximately \$46.00 per bbl in 2005 to \$63.00 per bbl in 2006. This increase in financial instrument prices was partially offset by an increase of approximately Cdn \$7.00 per bbl in the benchmark WTI price and an increase in contracted financial instrument volumes.

The Trust has not designated any of its risk management activities as accounting hedges under the Canadian Institute of Chartered Accountants (the "CICA") accounting guideline 13 and, accordingly, has marked-to-market its financial instruments. This resulted in an unrealized financial instrument gain of \$13.9 million in the year ended December 31, 2006 compared to a loss of \$24.1 million in 2005. The gain in 2006 resulted primarily from the maturity of financial instrument contracts with lower average prices, partially offset by increases in the WTI benchmark forward prices. The \$24.1 million loss in 2005 reflects the approximate Cdn \$14.00 per bbl increase in the WTI benchmark price through 2005.

The following is a summary of the realized financial instrument gains (losses) on oil and gas contracts:

| (\$000, except per boe and volume amounts) | Three months ended December 31 | | | Year ended December 31 | | |
|--|--------------------------------|---------|----------|------------------------|----------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Average crude oil volumes hedged (bbls/d) | 7,500 | 3,750 | 100 | 6,917 | 4,037 | 71 |
| Crude oil realized financial instrument loss | (3,824) | (6,971) | (45) | (30,410) | (32,924) | (8) |
| per bbl | (2.31) | (7.12) | (68) | (4.78) | (9.81) | (51) |
| Average natural gas volumes hedged (GJ/d) | 2,333 | - | - | 917 | - | - |
| Natural gas realized financial instrument gain | 139 | - | - | 87 | - | - |
| per mcf | 0.07 | - | - | 0.01 | - | - |
| Average barrels of oil equivalent hedged (boe/d) | 7,910 | 3,750 | 111 | 7,078 | 4,037 | 75 |
| Total realized financial instrument loss | (3,685) | (6,971) | (47) | (30,323) | (32,924) | (8) |
| per boe | (1.87) | (5.49) | (66) | (4.01) | (7.42) | (46) |

Crescent Point has the following financial instrument contracts in place as of February 28, 2007 (including contracts acquired through the acquisition of Mission Oil & Gas Inc. on February 9, 2007):

| Financial WTI Crude Oil Contracts - Canadian Dollar | | | Average Swap Price | Average Bought Put Price | Average Sold Call Price |

The Trust has a power swap for 3.0 MW/h at a fixed price of \$63.25 per MW/h for the period March 1, 2006 to December 31, 2008.

Revenues

Revenues were \$427.5 million in 2006 compared with \$251.1 million in 2005. The 70 percent increase in sales relates primarily to increases in production from the acquisitions completed in 2005 and 2006, along with higher realized oil prices. Partially offsetting this increase, oil differentials widened reflecting market trends and a reduction of the Trust's crude quality from the southwest Saskatchewan acquisition. Further, natural gas revenues decreased 16 percent due to lower realized gas prices as a result of a decrease in the AECO benchmark price.

| (\$000) ⁽¹⁾ | Three months ended December 31 | | | Year ended December 31 | | |
|-------------------------|--------------------------------|--------|----------|------------------------|---------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Crude oil and NGL sales | 88,855 | 57,111 | 56 | 381,655 | 196,594 | 94 |
| Natural gas sales | 12,105 | 18,824 | (36) | 45,836 | 54,482 | (16) |
| Revenues | 100,960 | 75,935 | 33 | 427,491 | 251,076 | 70 |

(1) Revenue is reported before transportation charges and realized financial instruments.

Transportation Expenses

Transportation expenses increased from \$1.04 per bbl in 2005 to \$1.35 per bbl in 2006. This increase relates to the properties acquired in the past year and their proximity to market, along with pipeline capacity issues in southeast Saskatchewan encountered in the fourth quarter of 2006. Growing production volumes in southeast Saskatchewan and incremental imports from other areas have exceeded the capacity of the area's major oil gathering system, Enbridge Pipelines (Saskatchewan). Efforts to maintain crude sales led to incremental trucking costs in the fourth quarter.

| (\$000, except per boe amounts) | Three months ended December 31 | | | Year ended December 31 | | |
|---------------------------------|--------------------------------|-------|----------|------------------------|-------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Transportation expenses | 3,293 | 1,374 | 140 | 10,175 | 4,619 | 120 |
| Per boe | 1.68 | 1.08 | 56 | 1.35 | 1.04 | 30 |

Royalty Expenses

Royalties were 21 percent of revenue in 2006 compared with 20 percent of revenue in 2005. This increase relates to the acquisitions completed during 2006 which are subject to higher royalty rates, partially offset by royalty incentives associated with successful drilling in southeast Saskatchewan.

Royalties are calculated and paid based on commodity revenue net of applicable costs and before any realized financial instrument losses.

| (\$000, except per boe amounts) | Three months ended December 31 | | | Year ended December 31 | | |
|---------------------------------|--------------------------------|--------|----------|------------------------|--------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Total royalties, net of ARTC | 19,157 | 15,480 | 24 | 90,013 | 50,052 | 80 |
| As a % of oil and gas sales | 19% | 20% | (1) | 21% | 20% | 1 |
| Per boe | 9.74 | 12.20 | (20) | 11.90 | 11.27 | 6 |

Operating Expenses

Operating expenses per boe increased 14 percent in 2006 as a result of higher operating costs associated with the properties acquired in 2005 and 2006, higher overall repairs and maintenance due to facility turnarounds, increased utility costs and cost pressures resulting from higher activity in the oil and gas sector.

| (\$000, except per boe amounts) | Three months ended December 31 | | | Year ended December 31 | | |
|---------------------------------|--------------------------------|--------|----------|------------------------|--------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Operating expenses | 20,475 | 11,369 | 80 | 69,424 | 35,879 | 93 |
| Per boe | 10.42 | 8.96 | 16 | 9.18 | 8.08 | 14 |

Netbacks

Crescent Point's netback after realized financial instruments for the year increased from \$28.74 per boe to \$30.08 per boe as a result higher average financial instrument prices which reduced realized financial instrument losses, partially offset by lower average selling prices and higher royalty, operating and transportation expenses.

The Trust's netbacks are expected to become more seasonal due to the impact of the Cantuar and Battrum properties which typically realize wider price differentials in the first and fourth quarters. This makes comparisons between fourth quarter 2005 and fourth quarter 2006 more difficult. The impact will be offset somewhat in the future due to the acquisition of light, sweet oil properties from Mission Oil & Gas Inc.

| Netback | 32.12 | 3.24 | 30.08 | 28.74 | 5 |

General and Administrative Expenses

General and administrative expenses per boe for the year increased 12 percent. This increase is mainly attributable to the overall growth of the Trust along with industry cost pressures to retain and attract high quality employees. In addition, the Trust incurred legal and professional fees in the year associated with an internal reorganization as described in note 17(b) to the consolidated financial statements.

| (\$000, except per boe amounts) | Three months ended December 31 | | | Year ended December 31 | | |
|-------------------------------------|--------------------------------|-------|----------|------------------------|---------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| General and administrative costs | 4,578 | 2,871 | 59 | 14,863 | 8,177 | 82 |
| Capitalized | (773) | (614) | 26 | (2,591) | (1,740) | 49 |
| General and administrative expenses | 3,805 | 2,257 | 69 | 12,272 | 6,437 | 91 |
| Per boe | 1.94 | 1.78 | 9 | 1.62 | 1.45 | 12 |

Restricted Unit Bonus Plan

The Trust has a Restricted Unit Bonus Plan and under the terms of this plan, the Trust may grant restricted units to directors, officers, employees and consultants. Restricted units vest at 33 1/3 percent on each of the first, second and third anniversaries of the grant date or at a date approved by the Board of Directors. Restricted unitholders are eligible for monthly distributions, immediately upon grant.

On May 31, 2006, at the annual general meeting, the unitholders approved an increase in the maximum number of trust units issuable under the Restricted Unit Bonus Plan from 935,000 units to 5,000,000 units. The Trust had 1,043,628 restricted units outstanding at December 31, 2006 compared with 589,555 units outstanding at December 31, 2005.

The Trust recorded compensation expense and contributed surplus of \$11.3 million for 2006 (2005 - \$4.3 million) based on the fair value of the units on the date of grant. Cash distributions paid on the restricted units granted were \$1.1 million for the year (2005 - \$450,000). The total cash and non-cash unit-based compensation recorded in the year was \$12.4 million (2005 - \$4.7 million). The unit-based compensation increased year-over-year due to the growth of the Trust's operations and industry pressures to retain and attract high quality employees.

Interest Expense

Interest expense per boe increased 48 percent in 2006. This increase is attributable to higher average debt levels resulting from the Trust's growth over the past year, along with increases in lending rates of Canadian chartered banks.

| (\$000, except per boe amounts) | Three months ended December 31 | | | Year ended December 31 | | |
|---------------------------------|--------------------------------|-------|----------|------------------------|-------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Interest expense | 3,602 | 2,118 | 70 | 13,673 | 5,402 | 153 |
| Per boe | 1.83 | 1.67 | 10 | 1.81 | 1.22 | 48 |

Depletion, Depreciation and Amortization

The depletion, depreciation and amortization ("DD&A") rate increased to \$18.31 per boe in 2006 from \$15.04 per boe in 2005. The increase is attributable to the acquisitions completed in the second half of 2005 and the year ended December 31, 2006 which carried a higher cost per barrel than the Trust's existing properties.

| (\$000, except per boe amounts) | Three months ended December 31 | | | Year ended December 31 | | |
|--|--------------------------------|--------|----------|------------------------|--------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Depletion, depreciation and amortization | 35,448 | 23,536 | 51 | 138,511 | 66,790 | 107 |
| Per boe | 18.03 | 18.55 | (3) | 18.31 | 15.04 | 22 |

Taxes

During 2006, there were several proposed amendments to Federal and provincial corporate tax legislation which were substantively enacted. The Federal amendments include the elimination of Large Corporations Tax, effective January 1, 2006, a reduction in the Federal corporate income tax rate from 21 percent (in 2007) to 19 percent over a three year period beginning January 1, 2008 and the elimination of the Corporate Income Surtax, effective January 1, 2008. The Saskatchewan amendments include a reduction in the Saskatchewan corporate income tax rate from 17 percent to 12 percent over a four year period beginning January 1, 2006. The Alberta amendments include a reduction in the Alberta corporate income tax rate from 11.5 percent to 10 percent, effective April 1, 2006.

Capital tax expense increased from \$5.5 million in 2005 to \$11.3 million in 2006 due to the introduction of Saskatchewan Capital Tax and Resource Surcharge on certain entities owned by the Trust effective April 1, 2005, increases in the Trust's Saskatchewan production and an increase in realized oil prices, partially offset by the elimination of Large Corporations Tax.

Future income taxes arise from differences between the accounting and tax basis of certain operating entity's assets and liabilities. In the Trust structure, payments are made between the operating entities and the Trust transferring both the income and tax liability to the unitholders.

Corporate acquisitions completed in 2006 resulted in the Trust recording a future tax liability of \$56.1 million. Crescent Point's future income tax decreased from a recovery of \$27.8 million in 2005 to a \$16.6 million recovery in 2006.

On October 26, 2006, the Trust announced a Special Meeting would be held on November 27, 2006 to obtain conditional approval of a reorganization of the Trust and its subsidiaries. Shareholder approval was received at the Special Meeting and on March 1, 2007 the Trust closed the reorganization. The reorganization resulted in the existing business of the Trust, which was carried on through a limited partnership and corporations, being carried on through limited partnerships indirectly owned by the Trust. The reorganization which is similar to reorganizations completed by a number of other income trusts, has provided the Trust with a "flow through" structure that should maximize the cash available for distribution.

On October 31, 2006, the Federal Government announced tax proposals pertaining to taxation of distributions paid by trusts and if the tax legislation becomes substantively enacted as proposed, future income taxes may be adjusted to include temporary differences between the accounting and tax basis of the Trust's assets and liabilities.

| (\$000) | Three months ended December 31 | | | Year ended December 31 | | |
|--------------------------------------|--------------------------------|----------|----------|------------------------|----------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Capital and other tax expense | 2,625 | 2,491 | 5 | 11,314 | 5,527 | 105 |
| Future income tax expense (recovery) | (220) | (15,401) | (99) | (16,560) | (27,800) | (40) |

Cash Flow and Net Income

Cash flow from operations increased 72 percent in 2006 to \$189.1 million from \$109.8 million in 2005. The increase in cash flow is primarily the result of higher production attributable to the acquisitions completed in the second half of 2005 and the year ended December 31, 2006. Cash flow per unit - diluted decreased from \$3.04 per unit - diluted in 2005 to \$2.98 per unit - diluted in 2006. Although corporate operating netbacks increased, cash flow per unit - diluted declined due to increases in general and administrative, interest, capital and other tax expenses relating to the growth of the Trust's operations.

The Trust's realized prices, netbacks, revenues, cash flow from operations and payout ratios are expected to become more seasonal due to the impact of the Cantuar and Battrum properties which typically realize wider price differentials in the first and fourth quarters. This makes comparisons between fourth quarter 2005 and fourth quarter 2006 more difficult. The impact will be offset somewhat in the future due to the acquisition of light, sweet oil properties from Mission Oil & Gas Inc.

Net income increased from \$38.5 million in 2005 to \$68.9 million in 2006 primarily as a result of increases in cash flows from operations and the \$13.9 million unrealized financial instrument gain compared to a \$24.1 million financial instrument loss in 2005. The financial instrument gain resulted primarily from the maturity of lower priced financial instrument contracts.

| (\$000, except per unit amounts) | Three months ended December 31 | | | Year ended December 31 | | |
|--|--------------------------------|--------|----------|------------------------|---------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Cash flow from operations | 43,843 | 33,424 | 31 | 189,135 | 109,785 | 72 |
| Cash flow from operations per unit - diluted | 0.63 | 0.83 | (24) | 2.98 | 3.04 | (2) |
| Net income | 6,918 | 33,453 | (79) | 68,947 | 38,509 | 79 |
| Net income per unit - diluted ⁽¹⁾ | 0.10 | 0.87 | (89) | 1.05 | 1.12 | (6) |

(1) Net income per unit - diluted is calculated by dividing the net income before non-controlling interest by the diluted weighted average trust units.

Cash Distributions

Crescent Point's distributions to unitholders are paid monthly and are dependent upon commodity prices, production levels and the amount of capital expenditures to be funded from cash flow. The Trust reinvests part of its cash flow towards the capital program to provide for more sustainable distributions in the future. The actual amount of the distributions is at the discretion of the Board of Directors. In the event that commodity prices are higher than anticipated and a cash surplus develops during the quarter, the surplus may be used to increase distributions, reduce debt and/or increase the Trust's capital program.

During 2006, the Trust funded cash distributions from its cash flow from operations and expects to continue this practice in the future. Cash flow from operations in excess of distributions requirements is used to fund capital expenditures and reduce bank indebtedness.

The Trust's payout ratio on a per unit – diluted basis increased from 70 percent in 2005 to 81 percent in 2006. The payout ratio for 2006 increased primarily due to the increase in distributions from \$0.17 per unit to \$0.19 per unit in September 2005 and a further increase to \$0.20 per unit in November 2005. Additionally, cash flow from operations per unit – diluted declined in 2006 due to wider oil differentials in the first quarter of 2006 and higher costs incurred managing the growth of the Trust's operations.

The increase in the Trust's payout ratio in fourth quarter 2006 relative to third quarter 2006 and fourth quarter 2005 was due to the reduction in the Trust's average crude quality resulting from the Battrum and Cantuar acquisition along with anticipated seasonality in western Canadian oil differentials. Battrum and Cantuar oil differentials tend to be widest in the first and fourth quarters of the year, leading to decreased prices, netbacks and cash flows and to increased payout ratios in those quarters. The impact of this seasonality will be reduced somewhat in the future due to the acquisition of light sweet oil properties from Mission Oil & Gas Inc.

| (\$000, except per unit and percent amounts) | Three months ended December 31 | | | Year ended December 31 | | |
|--|--------------------------------|--------|----------|------------------------|--------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Cash distributions | 41,322 | 22,835 | 81 | 150,277 | 74,591 | 101 |
| Cash distributions – per unit | 0.60 | 0.59 | 2 | 2.40 | 2.14 | 12 |
| Payout ratio (%) ⁽¹⁾ | 94 | 68 | 26 | 79 | 68 | 11 |
| Payout ratio – per unit – diluted (%) ⁽¹⁾ | 95 | 71 | 24 | 81 | 70 | 11 |

(1) Payout ratio is calculated as cash distributions divided by cash flow from operations. Payout ratio per unit – diluted is calculated as cash distributions per unit divided by cash flow from operations per unit – diluted.

The following table provides a reconciliation of distributable cash:

| (\$000) | Three months ended December 31 | | | Year ended December 31 | | |
|---|--------------------------------|--------|----------|------------------------|---------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Cash flow from operating activities | 39,313 | 21,731 | 81 | 177,426 | 94,247 | 88 |
| Plus: changes in non-cash working capital | 3,915 | 11,222 | (65) | 10,691 | 14,512 | (26) |
| Plus: ARO expenditures | 615 | 471 | 31 | 1,018 | 1,026 | (1) |
| Less: reclamation fund contributions | (390) | (354) | 10 | (2,502) | (1,042) | 140 |
| Distributable cash | 43,453 | 33,070 | 31 | 186,633 | 108,743 | 72 |

Allocation of distributable cash

| | | | | | | |
|---|---------------|--------|------|----------------|---------|-----|
| Cash retained from cash available for distribution ⁽¹⁾ | 2,131 | 10,235 | (79) | 36,356 | 34,152 | 6 |
| Cash distributions declared | 41,322 | 22,835 | 81 | 150,277 | 74,591 | 101 |
| Distributable cash | 43,453 | 33,070 | 31 | 186,633 | 108,743 | 72 |

(1) The Board of Directors determines the cash distributions level which results in a discretionary amount of cash retained. Cash flow from operations in excess of distributions requirements is used to fund capital expenditures and reduce bank indebtedness.

Taxation of Cash Distributions

Cash distributions are comprised of a return on capital portion (taxable) and a return of capital portion (tax deferred). For cash distributions received by Canadian residents outside of a registered pension or retirement plan in the 2006 taxation year, the distributions are 100 percent taxable.

The following is a breakdown of the cash distributions per unit paid or payable by the Trust with respect to the record dates from January 31, 2006 to December 31, 2006 for Canadian tax purposes:

| Record Date | Payment Date | Taxable Amount (Box 26 Other Income) | Tax Deferred Amount (Box 42 Return of Capital) | Total Cash Distribution |
|----------------------|--------------------|---|---|----------------------------|
| January 31, 2006 | February 15, 2006 | \$0.20 | - | \$0.20 |
| February 28, 2006 | March 15, 2006 | \$0.20 | - | \$0.20 |
| March 31, 2006 | April 17, 2006 | \$0.20 | - | \$0.20 |
| April 30, 2006 | May 15, 2006 | \$0.20 | - | \$0.20 |
| May 31, 2006 | June 15, 2006 | \$0.20 | - | \$0.20 |
| June 30, 2006 | July 17, 2006 | \$0.20 | - | \$0.20 |
| July 31, 2006 | August 15, 2006 | \$0.20 | - | \$0.20 |
| August 31, 2006 | September 15, 2006 | \$0.20 | - | \$0.20 |
| September 30, 2006 | October 16, 2006 | \$0.20 | - | \$0.20 |
| October 31, 2006 | November 15, 2006 | \$0.20 | - | \$0.20 |
| November 30, 2006 | December 15, 2006 | \$0.20 | - | \$0.20 |
| December 31, 2006 | January 15, 2007 | \$0.20 | - | \$0.20 |
| Total per trust unit | | \$2.40 | - | \$2.40 |

Long-term Investment

The long-term investment is comprised of shares of Mission Oil & Gas Inc. (refer to Capital Expenditures discussion below). The investment is recorded at carrying value, which is less than the fair value of \$48.1 million at December 31, 2006.

Capital Expenditures

The Trust closed twelve acquisitions and one disposition in the year ended December 31, 2006 for net consideration of approximately \$483.1 million, including closing adjustments (\$566.6 million was allocated to property, plant and equipment). The acquisitions completed in 2006 were focused in the Cantuar and Battrum areas of southwest Saskatchewan, Ingoldsby area of southeast Saskatchewan and Worsley and John Lake areas of Alberta. Closing adjustments on previously closed acquisitions were \$6.6 million in the year ended December 31, 2006.

The Trust's development capital expenditures for 2006 were \$110.0 million compared to \$35.7 million in 2005. In 2006, 103 wells (77.4 net) were drilled with a success rate of 100 percent. The Trust incurred approximately \$11.0 million constructing the Glen Ewen gas plant in southeast Saskatchewan during the fourth quarter of 2006. The plant was commissioned in January 2007, in time for a multi well drilling program in the first quarter of 2007.

On February 9, 2007, the Trust closed the acquisition of Mission Oil & Gas Inc., a publicly traded company with properties in the Viewfield Bakken area of southeast Saskatchewan for total consideration of approximately \$574.1 million, before closing adjustments (based on a trust unit price of \$17.37). The purchase was funded through the Trust's existing bank lines and issuance of approximately 29.2 million trust units. The Trust owned 3,800,000 shares of Mission Oil & Gas Inc. prior to the closing which it purchased for \$7.90 per share or \$30.0 million in November 2005.

The Trust's budgeted capital program for 2007 is approximately \$150.0 million. The Trust does not set a budget for acquisitions. The Trust searches for opportunities that align with strategic parameters and evaluates each prospect on a case by case basis. The Trust's acquisitions are expected to be financed through bank debt, the distribution reinvestment program and new equity issuances.

| (\$000) | Three months ended December 31 | | | Year ended December 31 | | |
|---|--------------------------------|---------|----------|------------------------|---------|----------|
| | 2006 | 2005 | % Change | 2006 | 2005 | % Change |
| Capital acquisitions (net) ⁽¹⁾ | 2,002 | 168,651 | (99) | 573,215 | 326,623 | 75 |
| Development capital expenditures | 30,039 | 8,696 | 245 | 109,995 | 35,720 | 208 |
| Capitalized administration | 773 | 614 | 26 | 2,591 | 1,740 | 49 |
| Other ⁽²⁾ | 29,515 | 469 | 6193 | 31,198 | 10,244 | 205 |
| Total | 62,329 | 178,430 | (65) | 716,999 | 374,327 | 92 |

(1) The capital acquisitions include the amount allocated to property, plant and equipment for corporate and property acquisitions. This differs from the purchase price as there were allocations made to goodwill and other assets and liabilities, including asset retirement obligations.

(2) Other expenditures include office furniture and equipment, asset retirement obligations on development activities and fair value adjustments relating to the conversion of exchangeable shares.

Goodwill

The goodwill balance of \$68.4 million as at December 31, 2006 is attributable to the corporate acquisitions of Tappit Resources Ltd., Capio Petroleum Corporation and Bulldog Energy Inc. during the period 2003 through 2005. The Trust performed a goodwill impairment test at December 31, 2006 and no impairment of goodwill exists.

Asset Retirement Obligation

The asset retirement obligation increased by \$12.6 million during 2006. This increase relates to liabilities of \$10.4 million recorded in respect of twelve acquisitions (net of one disposition) and new wells drilled in the year and accretion expense of \$3.2 million, reduced by actual expenditures incurred in the year of \$1.0 million. The Board of Directors and management review the adequacy of the fund annually and adjust the contributions as necessary.

Liquidity and Capital Resources

The Trust has a syndicated credit facility with seven banks and an operating credit facility with one Canadian chartered bank. The amount available under the Trust's combined credit facilities was increased from \$245.0 million to \$320.0 million on January 9, 2006, from \$320.0 million to \$350.0 million on May 29, 2006 and further increased to \$470.0 million on November 22, 2006 to reflect the additional borrowing base available as a result of the acquisitions which closed up to that date. As at December 31, 2006, the Trust had debt of \$254.4 million, leaving unutilized borrowing capacity in excess of \$215.0 million. The Trust expects to review its borrowing base with the bank syndicate to include year end reserve evaluations and the additional borrowing base available in respect of the Mission acquisition, upon the facility renewal in May 2007.

As at December 31, 2006, Crescent Point was capitalized with 16 percent net debt and 84 percent equity compared to 18 percent net debt and 82 percent equity at December 31, 2005 (based on year end market capitalization). The Trust's net debt to cash flow of 1.2 times at December 31, 2006 reflects the debt financing of the acquisitions completed during the year, while the cash flow reflects only the amounts generated since closing of these acquisitions (December 31, 2005 – 1.8 times). The Trust's projected net debt to 12 month cash flow is less than 1.0 times.

The Trust's ability to raise new equity commencing November 1, 2006, will be limited by the Safe Harbour Limit guidelines as announced by the Federal Government.

The Federal Government's proposal to tax income trusts has created uncertainty in the capital markets regarding the future of the trust sector however, Crescent Point believes that it has sufficient capital resources to meet its obligations given the significant credit facility available and success raising new equity as demonstrated in fiscal 2006 (see Unitholders' Equity discussion below).

| Capitalization Table (\$000, except unit, per unit and percent amounts) | December 31, 2006 | December 31, 2005 |
|--|--------------------------|-------------------|
| Bank debt | 254,438 | 225,710 |
| Working capital ⁽¹⁾ | (26,533) | (31,165) |
| Net debt ⁽¹⁾ | 227,905 | 194,545 |
| Trust units outstanding and issuable for exchangeable shares | 69,531,952 | 43,062,885 |
| Market price at end of year (per unit) | 17.60 | 20.68 |
| Market capitalization | 1,223,762 | 890,540 |
| Total capitalization | 1,451,667 | 1,085,085 |
| Net debt as a percentage of total capitalization (%) | 16 | 18 |
| Annual cash flow from operations | 189,135 | 109,785 |
| Net debt to cash flow ⁽²⁾ | 1.2 | 1.8 |

(1) The working capital and net debt exclude the risk management asset and liability. The working capital and net debt as at December 31, 2006 include the \$30.0 million long-term investment in Mission Oil & Gas Inc.

(2) The net debt reflects the financing of acquisitions, however the cash flow only reflects cash flows generated from the acquired properties since the closing dates of the acquisitions.

Unitholders' Equity

At December 31, 2006, Crescent Point had 69,531,952 trust units issued and issuable for exchangeable shares compared to 43,062,885 trust units at December 31, 2005 (using the exchangeable share ratio in effect at the end of 2005). The increase by more than 26.0 million trust units relates primarily to three bought deal equity financings and two equity issuances in connection with acquisitions completed during the year ended December 31, 2006.

Three bought deal equity financings closed on January 9, 2006, March 23, 2006 and July 20, 2006 whereby the Trust issued 18,546,000 trust units and raised gross proceeds of \$395.4 million (\$21.15 to \$21.80 per trust unit).

On February 6, 2006, the Trust issued 2,080,379 trust units at \$21.15 per unit in conjunction with the acquisition of a partnership owning properties in the Peace River Arch area of northwest Alberta, and on May 30, 2006 Crescent Point issued 2,583,505 trust units at \$22.42 per unit in conjunction with the acquisition of Canex Energy Inc.

Crescent Point's total capitalization increased 34 percent to \$1.5 billion at December 31, 2006 compared to \$1.1 billion at December 31, 2005, with the market value of trust units representing 84 percent of total capitalization. The increase in capitalization is attributable to the three bought deal equity financings and two equity issuances in connection with acquisitions, offset slightly by decreases in the unit trading price as a result of the Federal tax proposals.

During the year ended December 31, 2006, the units traded in the range of \$15.55 to \$23.60 with an average daily trading volume of 360,323 units. The range in the unit trading price reflects the market uncertainty associated with the Federal Government's proposal to tax income trusts.

For the year ended December 31, 2006, the distribution reinvestment and premium distribution reinvestment plans resulted in an additional 2,941,850 trust units being issued at an average price of \$18.77 per unit raising a total of \$55.2 million. Participation levels in these plans are approximately 35 percent. The cash raised through these alternative equity programs is used to reduce bank debt. Crescent Point will continue to monitor participation levels and utilize these funds in the most effective manner.

Non-Controlling Interest

The Trust had recorded a non-controlling interest in respect of the issued and outstanding exchangeable shares of Crescent Point Resources Ltd. ("CPRL"), a corporate subsidiary of the Trust. In 2006, the Trust exercised its redemption call right in respect of all of the issued and outstanding exchangeable shares of CPRL. As a result, the Trust purchased all of the issued and outstanding exchangeable shares from the holders on October 27, 2006. The redemption of the exchangeable shares was satisfied by the delivery to each exchangeable shareholder of 1.46210 trust units per exchangeable share held.

The non-controlling interest was eliminated in the fourth quarter of 2006 (December 31, 2005 – \$7.6 million) as all exchangeable shares were redeemed by the Trust on October 27, 2006. The non-controlling interest on the statement of operations and accumulated earnings for the year ended December 31, 2006 and 2005 of (\$2.4) million and \$1.9 million, respectively, represents the net earnings (loss) attributable to the exchangeable shareholders for these years.

Contractual Obligations and Commitments

The Trust has assumed various contractual obligations and commitments in the normal course of operations. The following table summarizes the Trust's contractual obligations and commitments as at December 31, 2006 (including contractual obligations and commitments acquired through the acquisition of Mission Oil & Gas Inc. on February 9, 2007):

| Contractual Obligations Summary (\$000) | Expected Payout Date | | | | |
|---|----------------------|-------|-----------|-----------|------------|
| | Total | 2007 | 2008-2009 | 2010-2011 | After 2011 |
| Operating Leases ⁽¹⁾ | 21,244 | 3,195 | 5,288 | 4,406 | 8,355 |

(1) Operating leases includes leases for office space and equipment.

Critical Accounting Estimates

The preparation of the Trust's financial statements requires management to adopt accounting policies that involve the use of significant estimates and assumptions. These estimates and assumptions are developed based on the best available information and are believed by management to be reasonable under the existing circumstances. New events or additional information may result in the revision of these estimates over time. A summary of the significant accounting policies used by Crescent Point can be found in Note 2 to the December 31, 2006 consolidated financial statements. The following discussion outlines what management believes to be the most critical accounting policies involving the use of estimates or assumptions.

Depletion, Depreciation and Amortization ("DD&A")

Crescent Point follows the CICA accounting guideline AcG-16 on full cost accounting in the oil and gas industry to account for oil and gas properties. Under this method, all costs associated with the acquisition of, exploration for, and the development of natural gas and crude oil reserves are capitalized and costs associated with production are expensed. The capitalized costs are depleted using the unit-of-production method based on estimated proved reserves using management's best estimate of future prices (see Oil and Gas Reserves discussion below).

Reserve estimates can have a significant impact on earnings, as they are a key component in the calculation of depletion. A downward revision in a reserve estimate could result in a higher DD&A charge to earnings. In addition, if net capitalized costs are determined to be in excess of the calculated ceiling, which is based largely on reserve estimates (see Asset Impairment discussion below), the excess must be written off as an expense charged against earnings. In the event of a property disposition, proceeds are normally deducted from the full cost pool without recognition of a gain or loss unless there is a change in the DD&A rate of 20 percent or greater.

Asset Retirement Obligation

Upon retirement of its oil and gas assets, the Trust anticipates incurring substantial costs associated with asset retirement activities. Estimates of the associated costs are subject to uncertainty associated with the method, timing and extent of future retirement activities. A liability for these costs and a related asset are recorded using the discounted asset retirement costs and the capitalized costs are depleted on a unit-of-production basis over the associated reserve life. Accordingly, the liability, the related asset and the expense are impacted by changes in the estimates and timing of the expected costs and reserves (see Oil and Gas Reserves discussion below).

Asset Impairment

Producing properties and unproved properties are assessed annually, or as economic events dictate, for potential impairment. Impairment is assessed by comparing the estimated undiscounted future cash flows to the carrying value of the asset. The cash flows used in the impairment assessment require management to make assumptions and estimates about recoverable reserves (see Oil and Gas Reserves discussion below), future commodity prices and operating costs. Changes in any of the assumptions, such as a downward revision in reserves, a decrease in future commodity prices, or an increase in operating costs could result in an impairment of an asset's carrying value.

Purchase Price Allocation

Business acquisitions are accounted for by the purchase method of accounting. Under this method, the purchase price is allocated to the assets acquired and the liabilities assumed based on the fair value at the time of acquisition. The excess purchase price over the fair value of identifiable assets and liabilities acquired is goodwill. The determination of fair value often requires management to make assumptions and estimates about future events. The assumptions and estimates with respect to determining the fair value of property, plant and equipment acquired generally requires the most judgment and include estimates of reserves acquired (see Oil and Gas Reserves discussion below), future commodity prices, and discount rates. Changes in any of the assumptions or estimates used in determining the fair value of acquired assets and liabilities could impact the amounts assigned to assets, liabilities, and goodwill in the purchase price allocation. Future net earnings can be affected as a result of changes in future depletion and depreciation, asset impairment or goodwill impairment.

Goodwill Impairment

Goodwill is subject to impairment tests annually, or as economic events dictate, by comparing the fair value of the reporting entity to its carrying value, including goodwill. If the fair value of the reporting entity is less than its carrying value, a goodwill impairment loss is recognized as the excess of the carrying value of the goodwill over the implied value of the goodwill. The determination of fair value requires management to make assumptions and estimates about recoverable reserves (see Oil and Gas Reserves discussion below), future commodity prices, operating costs, production profiles, and discount rates. Changes in any of these assumptions, such as a downward revision in reserves, a decrease in future commodity prices, an increase in operating costs or an increase in discount rates could result in an impairment of all or a portion of the goodwill carrying value in future periods.

Oil and Gas Reserves

Reserves estimates, although not reported as part of the Trust's financial statements, can have a significant effect on net earnings as a result of their impact on depletion and depreciation rates, asset retirement provisions, asset impairments, purchase price allocations, and goodwill impairment (see discussion of these items above). Independent petroleum reservoir engineering consultants perform evaluations of the Trust's oil and gas reserves on an annual basis. However, the estimation of reserves is an inherently complex process requiring significant judgment. Estimates of economically recoverable oil and gas reserves are based upon a number of variables and assumptions such as geoscientific interpretation, commodity prices, operating and capital costs and production forecasts, all of which may vary considerably from actual results. These estimates are expected to be revised upward or downward over time, as additional information such as reservoir performance becomes available, or as economic conditions change.

New Accounting Pronouncements

Accounting Changes in the Current Period

The Trust did not adopt any new accounting standards during the year ended December 31, 2006.

Future Accounting Changes

Financial Instruments

The CICA issued new accounting standards, CICA Accounting Standard Handbook section 3855, "Financial Instruments Recognition and Measurement", section 3865 "Hedges" and section 1530 "Comprehensive Income". These standards prescribe how and at what amount financial assets, financial liabilities and non-financial derivatives are to be recognized on the balance sheet. The standards prescribe fair value in some cases while cost-based measures are prescribed in other cases. It also specifies how financial instrument gains and losses are to be presented. The new standards are effective for fiscal years beginning on or after October 1, 2006. The Trust has not assessed the impact of these standards on its financial statements.

Outstanding Trust Unit Data

As at February 26, 2007, the Trust had 98,979,471 trust units outstanding.

Selected Annual Information

| | 2006 | 2005 | 2004 |
|---|-----------|---------|----------------------------|
| (\$000 except per unit amounts) ⁽¹⁾ | | | (restated ⁽¹⁾) |
| Total revenue | 427,491 | 251,076 | 155,299 |
| Net income ⁽²⁾ | 68,947 | 38,509 | 29,743 |
| Net income per unit ⁽²⁾ | 1.12 | 1.12 | 1.14 |
| Net income per unit-diluted ⁽²⁾ | 1.05 | 1.12 | 1.07 |
| Cash flow from operations | 189,135 | 109,785 | 69,828 |
| Cash flow from operations per unit | 3.07 | 3.20 | 2.66 |
| Cash flow from operations per unit-diluted | 2.98 | 3.04 | 2.49 |
| Working capital ⁽³⁾ | 26,533 | 31,165 | (2,640) |
| Total assets | 1,373,466 | 808,297 | 407,530 |
| Total liabilities | 467,086 | 375,632 | 182,380 |
| Net debt ⁽³⁾ | 227,905 | 194,545 | 95,360 |
| Total long-term financial liabilities | 11,697 | 4,590 | – |
| Weighted average trust units (thousands) ⁽⁴⁾ | 63,569 | 36,086 | 28,084 |
| Cash distributions | 150,277 | 74,591 | 53,877 |
| Cash distributions per unit | 2.40 | 2.14 | 2.04 |

(1) The comparative annual results have been restated for the retroactive impact of the application of the change in accounting policy for exchangeable shares.

(2) Net income and net income before discontinued operations and extraordinary items are the same.

(3) The working capital and net debt exclude the risk management asset and liability. The working capital and net debt as at December 31, 2006 include the \$30.0 million long-term investment in Mission Oil & Gas Inc. The working capital excludes bank indebtedness.

(4) The trust units issuable on conversion of the exchangeable shares reflect the weighted average exchangeable shares outstanding converted at the exchange ratio in effect at the end of the period. For the 2006 amounts, the exchangeable share ratio applied is the one in effect for the October 27, 2006 redemption.

Crescent Point's revenue, cash flow from operations and assets have increased significantly from the year ended December 31, 2004 through the year December 31, 2006 due to numerous corporate and property acquisitions, which have resulted in higher production volumes. This factor combined with favourable commodity prices and the Trust's successful drilling and development program have produced the increases realized in the table noted above.

Summary of Quarterly Results

| (\$000, except per unit amounts) | 2006 | | | | 2005 | | | |
|---|-----------|-----------|-----------|-----------|---------|---------|---------|----------|
| | Q4 | Q3 | Q2 | Q1 | Q4 | Q3 | Q2 | Q1 |
| Revenues | 100,960 | 119,365 | 113,790 | 93,376 | 75,935 | 72,336 | 54,489 | 48,316 |
| Net income (loss) ⁽¹⁾ | 6,918 | 39,588 | 19,260 | 3,181 | 33,453 | 10,506 | 6,534 | (11,984) |
| Net income (loss) per unit ⁽¹⁾ | 0.10 | 0.61 | 0.32 | 0.06 | 0.87 | 0.29 | 0.20 | (0.41) |
| Net income (loss) per unit - diluted ⁽¹⁾ | 0.10 | 0.58 | 0.31 | 0.02 | 0.87 | 0.28 | 0.19 | (0.41) |
| Cash flow from operations | 43,843 | 52,774 | 52,282 | 40,236 | 33,424 | 33,275 | 22,978 | 20,108 |
| Cash flow from operations per unit | 0.64 | 0.81 | 0.88 | 0.76 | 0.87 | 0.93 | 0.69 | 0.68 |
| Cash flow from operations per unit - diluted | 0.63 | 0.78 | 0.85 | 0.73 | 0.83 | 0.88 | 0.66 | 0.64 |
| Working capital ⁽²⁾ | 26,533 | 29,354 | 29,840 | 25,946 | 31,165 | (874) | 4,202 | (3,733) |
| Total assets | 1,373,466 | 1,351,245 | 1,294,214 | 1,188,260 | 808,297 | 579,869 | 512,489 | 427,192 |
| Total liabilities | 467,086 | 448,483 | 503,903 | 452,648 | 375,632 | 266,498 | 238,615 | 230,906 |
| Net debt ⁽²⁾ | 227,905 | 212,073 | 241,371 | 206,991 | 194,545 | 119,110 | 112,934 | 119,977 |
| Total long-term financial liabilities | 11,697 | 8,650 | 18,791 | 16,097 | 4,590 | 11,610 | 13,427 | 11,863 |
| Weighted average trust units (thousands) ⁽³⁾ | 69,764 | 67,810 | 61,372 | 54,958 | 40,464 | 37,645 | 34,820 | 31,349 |
| Capital expenditures ⁽⁴⁾ | 62,329 | 96,689 | 129,637 | 428,344 | 178,430 | 74,638 | 86,019 | 35,240 |
| Cash distributions | 41,322 | 39,890 | 36,123 | 32,942 | 22,835 | 19,329 | 17,340 | 15,087 |
| Cash distributions per unit | 0.60 | 0.60 | 0.60 | 0.60 | 0.59 | 0.53 | 0.51 | 0.51 |

(1) The comparative quarterly results have been restated for the application of the change in accounting policy for exchangeable shares. Net income (loss) per unit – diluted is calculated by dividing the net income before non-controlling interest by the diluted weighted average trust units.

(2) The working capital and net debt exclude the risk management asset and liability. The working capital and net debt as at December 31, 2006 include the \$30.0 million long-term investment in Mission Oil & Gas Inc. The working capital excludes bank indebtedness.

(3) The trust units issuable on conversion of the exchangeable shares reflect the weighted average exchangeable shares outstanding converted at the exchange ratio in effect at the end of the period. For the fourth quarter 2006 amounts, the exchangeable share ratio applied is the one in effect for the October 27, 2006 redemption.

(4) The capital expenditures in the table include asset retirement obligations on development activities and fair value adjustments relating to the conversion of exchangeable shares. The prior quarterly results have been restated to conform with the current presentation.

Crescent Point's revenue has increased significantly due to several property and corporate acquisitions completed in each of the past two years and the Trust's successful drilling program. The overall growth of the Trust's asset base also contributed to the general increase in cash flow from operations. Net income has fluctuated primarily due to unrealized financial instruments gains and losses on oil and gas contracts, which fluctuate with the changes in the market conditions. Capital expenditures fluctuated throughout this period as a result of timing of acquisitions. The general increase in cash flows throughout the last eight quarters has allowed the Trust to maintain stable monthly cash distributions of \$0.17 per unit through August 2005 with increases to \$0.19 per unit in September 2005 and to \$0.20 per unit in November 2005.

Fourth Quarter Review

The following are the main highlights of the fourth quarter of 2006:

The Trust spent \$30.0 million on development capital activities in the fourth quarter, including the drilling of 23 (14.8 net) wells with a 100 percent success rate adding over 900 boe/d of initial interest production.

The Trust exceeded its fourth quarter average daily production target, producing 21,369 boe/d for the quarter. This represents a 55 percent increase from the 13,791 boe/d produced in the fourth quarter of 2005.

Crescent Point's cash flow from operations increased by 31 percent to \$43.8 million in the fourth quarter of 2006, compared to \$33.4 million in the fourth quarter of 2005.

Crescent Point maintained consistent monthly distributions of \$0.20 per unit, totaling \$0.60 per unit for the fourth quarter of 2006. This represents a 2 percent increase from the \$0.59 per unit distributed in the fourth quarter of 2005 and resulted in an overall payout ratio of 94 percent and a 95 percent payout ratio on a per unit – diluted basis. The Trust's overall 2006 payout ratio per unit – diluted was 81 percent and 2007 is forecasted to be 77 percent on a per unit – diluted basis.

The Trust continued to execute its core strategy of managing commodity price risk using a combination of fixed price swaps, costless collars, and put option instruments. As at March 1, 2007, the Trust had hedged 53 percent, 44 percent and 22 percent of production, net of royalty interest, for 2007, 2008 and 2009, respectively.

On November 22, 2006, the Trust's borrowing base was increased to \$470 million. It is anticipated that the base will increase to more than \$550 million upon renewal in the second quarter of 2007. The Trust's balance sheet remains strong with projected 2007 net debt to 12 month cash flow of less than 1.0 times

On October 26, 2006, Crescent Point announced a proposed reorganization of the Trust's structure, which was approved by unitholders at a Special Meeting held on November 27, 2006 and completed on March 1, 2007. The reorganization results in the business of the Trust being carried on through limited partnerships owned by the Trust, similar to reorganizations announced by a number of other trusts. It provides the Trust with a "flow through" structure that is expected to maximize the cash available for distribution.

Internal Controls

Crescent Point has implemented a system of internal controls that it believes adequately protects the assets of the Trust and is appropriate for the nature of its business and the size of its operations. These internal controls include disclosure controls and procedures designed to ensure that information required to be disclosed by the Trust is accumulated and communicated to management as appropriate to allow timely decisions regarding required disclosure. Crescent Point's Chief Executive Officer and Chief Financial Officer have concluded, based on their evaluation that Crescent Point's disclosure controls and procedures are effective to provide reasonable assurance that material information related to the Crescent Point is made known to them and have been operating effectively during 2006. It should be noted that while Crescent Point's Chief Executive Officer and Chief Financial Officer believe that Crescent Point's disclosure controls and procedures provide a reasonable level of assurance that the system of internal controls are effective, they do not guarantee that the disclosure controls and procedures will prevent all errors and fraud. A control system, no matter how well conceived or operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met.

In addition, in accordance with Multilateral Instrument 52-109, the Crescent Point has, under the supervision of its Chief Executive Officer and Chief Financial Officer, designed a process of internal control over financial reporting, which has been effected by Crescent Point's board of directors and management. The process was designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Canadian GAAP and includes those policies and procedures that:

- Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of Crescent Point's assets;
- Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures of the Trust are being made only in accordance with authorizations of management and the board of directors; and
- Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of Crescent Point's assets that could have a material effect on the annual or interim financial statements.

Based on the Chief Executive Officer and the Chief Financial Officer's review of the design of internal controls over financial reporting, the Chief Executive Officer and Chief Financial Officer have concluded that the design of internal controls is adequate for the nature of the Trust's business and size of its operations.

Business Risks and Prospects

Crescent Point is exposed to several operational risks inherent in exploiting, developing, producing and marketing crude oil and natural gas. These risks include:

- Economic risk of finding and producing reserves at a reasonable cost;
- Financial risk of marketing reserves at an acceptable price given market conditions;
- Cost of capital risk to carry out the Trust's operations; and
- The risk of carrying out operations with minimal environmental impact.

Crescent Point strives to manage or minimize these risks in a number of ways, including:

- Employing qualified professional and technical staff;
- Concentrating in a limited number of areas with low cost exploitation and development objectives;
- Utilizing the latest technology for finding and developing reserves;
- Constructing quality, environmentally sensitive, safe production facilities;
- Maximizing operational control of drilling and producing operations;
- Mitigating price risk through strategic hedging; and
- Adhering to conservative borrowing guidelines.

Health, Safety and Environment Policy

The health and safety of employees, contractors, visitors and the public, as well as the protection of the environment, is of utmost importance to Crescent Point. The Trust endeavours to conduct its operations in a manner that will minimize both adverse effects and consequences of emergency situations by:

- Complying with government regulations and standards;
- Conducting operations consistent with industry codes, practices and guidelines;
- Ensuring prompt, effective response and repair to emergency situations and environmental incidents;
- Providing training to employees and contractors to ensure compliance with Trust safety and environmental rules and procedures;
- Promoting the aspects of careful planning, good judgment, implementation of the Trust's procedures, and monitoring Trust activities;
- Communicating openly with members of the public regarding our activities; and
- Amending the Trust's policies and procedures as may be required from time to time.

Crescent Point believes that all employees have a vital role in achieving excellence in environmental, health and safety performance. This is best achieved through careful planning and the support and active participation of everyone involved.

Outlook

The Trust's annual projections for 2007, including Mission, are as follows:

| | |
|---|---------------|
| Production | |
| Oil and NGL (bbls/d) | 22,416 |
| Natural gas (mcf/d) | 23,000 |
| Total (boe/d) | 26,250 |
| Cash flow (\$000) | 314,000 |
| Cash flow per unit – diluted (\$) | 3.11 |
| Cash distributions per unit (\$) | 2.40 |
| Payout ratio – per unit – diluted (%) | 77 |
| Capital expenditures (\$000) ⁽¹⁾ | 150,000 |
| Wells drilled, net | 110 |
| Pricing | |
| Crude oil – WTI (US\$/bbl) | 60.00 |
| Crude oil – WTI (Cdn\$/bbl) | 70.59 |
| Natural gas – Corporate (Cdn\$/mcf) | 7.50 |
| Exchange rate (US\$/Cdn\$) | 0.85 |

(1) The projection of capital expenditures excludes acquisitions, which are separately considered and evaluated.

Additional information relating to Crescent Point, including the Trust's renewal annual information form, is available on SEDAR at www.sedar.com.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

DECEMBER 31, 2006 and 2005 (UNAUDITED)

1. STRUCTURE OF THE TRUST

Crescent Point Energy Trust (“the Trust”) is an open-ended unincorporated investment trust created on September 5, 2003 pursuant to a Declaration of Trust and Plan of Arrangement operating under the laws of the Province of Alberta. Olympia Trust Company is the trustee and the beneficiaries of the Trust are the unitholders.

The principal undertaking of the Trust’s operating companies, Crescent Point General Partner Corp. and Crescent Point Resources Limited Partnership is to acquire, hold directly or indirectly, interests in oil and gas properties.

2. SIGNIFICANT ACCOUNTING POLICIES

a) Principles of Consolidation

The consolidated financial statements include the accounts of the Trust and its subsidiaries. Any reference to “the Trust” throughout these consolidated financial statements refers to the Trust and its subsidiaries. All transactions between the Trust and its subsidiaries have been eliminated.

b) Joint Ventures

Certain of the Trust’s development and production activities are conducted jointly with others through unincorporated joint ventures. The accounts of the Trust reflect its proportionate interest in such activities.

c) Property, Plant and Equipment

The Trust follows the full cost method of accounting for petroleum and natural gas properties and equipment, whereby all costs of acquiring petroleum and natural gas properties and related development costs are capitalized and accumulated in one cost centre. Such costs include lease acquisition costs, geological and geophysical expenditures, costs of drilling both productive and non-productive wells, related plant and production equipment costs and related overhead charges. Maintenance and repairs are charged against income, and renewals and enhancements which extend the economic life of the properties and equipment are capitalized.

Gains and losses are not recognized upon disposition of petroleum and natural gas properties unless such a disposition would alter the rate of depletion by 20 percent or more.

Depletion, Depreciation and Amortization

Depletion of petroleum and natural gas properties is calculated using the unit-of-production method based on the estimated proved reserves before royalties, as determined by independent engineers. Natural gas reserves and production are converted to equivalent barrels of oil based upon the relevant energy content (6:1). The depletion base includes capitalized costs, plus future costs to be incurred in developing proven reserves and excludes the unimpaired cost of undeveloped land. Costs associated with unproved properties are not subject to depletion and are assessed periodically to ascertain whether impairment has occurred. When proved reserves are assigned or the value of the unproved property is considered to be impaired, the cost of the unproved property or the amount of impairment is added to costs subject to depletion.

Tangible production equipment is depreciated on a straight-line basis over its estimated useful life of 15 years. Office furniture, equipment and motor vehicles are depreciated on a declining balance basis at rates ranging from 10 percent to 30 percent.

Ceiling Test

A limit is placed on the aggregate carrying value of property, plant and equipment, which may be amortized against revenues of future periods (the “ceiling test”). The ceiling test is an impairment test whereby the carrying amount of property, plant and equipment is compared to the undiscounted cash flows from proved reserves using management’s best estimate of future prices. If the carrying value exceeds the undiscounted cash flows, an impairment loss would be recorded against income. The impairment is measured as the amount by which the carrying amount of property, plant and equipment exceeds the discounted cash flows from proved and probable reserves.

d) Reclamation Fund

The Trust established a reclamation fund effective July 1, 2004 to fund future asset retirement obligation costs. The Board of Directors has approved contributions of \$0.20 per barrel of production beginning April 1, 2005. Prior to April 1, 2005 contributions of \$0.15 per barrel of production were made. Additional contributions are made at the discretion of management. Contributions to the reclamation fund have been deducted from the cash distributions to the unitholders and cash withheld to fund current period capital expenditures.

e) Asset Retirement Obligation

The Trust recognizes the fair value of an asset retirement obligation in the period in which it is incurred. The obligation is recorded as a liability on a discounted basis when incurred, with a corresponding increase to the carrying amount of the related asset. Over time the liabilities are accreted for the change in their present value and the capitalized costs are depleted on a unit-of-production basis over the life of the reserves. Revisions to the estimated timing of cash flows or the original estimated undiscounted cost would also result in an increase or decrease to the obligation and related asset.

f) Goodwill

The Trust must record goodwill relating to a corporate acquisition when the total purchase price exceeds the fair value for accounting purposes of the net identifiable assets and liabilities of the acquired company. The goodwill balance is assessed for impairment annually at year-end or as events occur that could result in an impairment. Impairment is recognized based on the fair value of the reporting entity ("consolidated Trust") compared to the book value of the reporting entity. If the fair value of the consolidated Trust is less than the book value, impairment is measured by allocating the fair value of the consolidated Trust to the identifiable assets and liabilities as if the Trust has been acquired in a business combination for a purchase price equal to its fair value. The excess of the fair value of the consolidated Trust over the amounts assigned to the identifiable assets and liabilities is the implied value of the goodwill. Any excess of the book value of goodwill over the implied value of goodwill is the impairment amount. Impairment is charged to earnings and is not tax affected, in the period in which it occurs. Goodwill is stated at cost less impairment and is not amortized.

g) Unit-based Compensation

The Trust established a Restricted Unit Bonus Plan on September 5, 2003. The fair value based method of accounting is used to account for the restricted units granted under the Restricted Unit Bonus Plan. Compensation expense is determined based on the estimated fair value of trust units on the date of grant. The compensation expense is recognized over the vesting period, with a corresponding increase to contributed surplus. At the time the restricted units vest, the issuance of units is recorded with a corresponding decrease to contributed surplus and increase to unitholders' equity.

h) Income Taxes

The Trust follows the liability method of accounting for income taxes. Under this method, income tax liabilities and assets are recognized for the estimated tax consequences attributable to differences between the amounts reported in the financial statements of the Trust's corporate subsidiaries and their respective tax base, using substantively enacted future income tax rates. The effect of a change in income tax rates on future tax liabilities and assets is recognized in income in the period in which the change occurs. Temporary differences arising on acquisitions result in future income tax assets and liabilities. The Trust is a taxable entity under the Income Tax Act (Canada) and is taxable only on income that is not distributed or distributable to the unitholders.

i) Financial Instruments

The Trust uses financial instruments and physical delivery commodity contracts from time to time to reduce its exposure to fluctuations in commodity prices, foreign exchange rates and interest rates. Financial instruments that are not designated as hedges under CICA accounting guideline 13 "Hedging Relationships" are recorded on the balance sheet as either an asset or a liability with the change in fair value from the prior period recognized in net earnings. The Trust has not designated any of its risk management activities as accounting hedges under AcG-13, and accordingly has marked-to-market its financial instruments.

j) Non-Controlling Interest

The Trust has recorded a non-controlling interest in respect of the issued and outstanding exchangeable shares of Crescent Point Resources Ltd. ("CPRL"), a corporate subsidiary of the Trust, in accordance with EIC-151. The intent is that exchangeable shares of a subsidiary which are transferable to third parties, outside of the consolidated entity, represent a non-controlling interest in the subsidiary.

The exchangeable shares issued pursuant to the conversion to a trust were initially recorded at their pro-rata percentage of carrying value of CPRL equity, while the exchangeable shares issued pursuant to the acquisition of Tappit Resources Ltd. were recorded at their fair value. When the exchangeable shares recorded at carrying value are converted into trust units, the conversion is recorded as an acquisition of the non-controlling interest at fair value and is accounted for as a step acquisition. Upon conversion of the exchangeable shares, the fair value of the trust units issued is recorded in the unitholders' capital, and the difference between the carrying value of the non-controlling interest and the fair value of the trust units is recorded as property, plant and equipment.

The non-controlling interest on the consolidated balance sheet represents the book value of exchangeable shares plus accumulated earnings attributable to the outstanding shares. The non-controlling interest on the income statement represents the net earnings attributable to the exchangeable shareholders for the period based on the trust units issuable for exchangeable shares in proportion to the total trust units issued and issuable at each period end.

k) Revenue Recognition

Revenues associated with sales of crude oil, natural gas and natural gas liquids are recognized when title passes to the purchaser.

l) Cash and Cash Equivalents

Cash and cash equivalents include short-term investments with a maturity of three months or less when purchased.

m) Investments in Marketable Securities

Investments are recorded at the lower of cost or net realizable value. Any impairment that is other than temporary in nature is written down to the fair value.

n) Measurement Uncertainty

Certain items recognized in the financial statements are subject to measurement uncertainty. The recognized amounts of such items are based on the Trust's best information and judgment. Such amounts are not expected to change materially in the near term. They include the amounts recorded for depletion, depreciation, amortization and asset retirement costs which depend on estimates of oil and gas reserves or the economic lives and future cash flows from related assets.

3. EXCHANGEABLE SHARES – NON-CONTROLLING INTEREST

On January 19, 2005, the CICA issued revised draft EIC-151 "Exchangeable Securities Issued by Subsidiaries of Income Trusts" that states that exchangeable securities issued by a subsidiary of an income trust should be reflected as either non-controlling interest or debt on the consolidated balance sheet unless they meet certain criteria. The exchangeable shares issued by Crescent Point Resources Ltd. ("CPRL"), a corporate subsidiary of the Trust, are transferable to third parties. EIC-151 states that if the exchangeable shares are transferable to a third party, they should be reflected as non-controlling interest. Previously, the exchangeable shares were reflected as a component of unitholders' equity.

Effective in the second quarter of 2005, this accounting policy was adopted retroactively and prior period comparative balances have been restated. Adoption of the policy had the following effects on the Trust's consolidated balance sheets:

| (\$000) | December 31, 2005 |
|---|-------------------|
| Increase in property, plant and equipment | 16,940 |
| Increase in future income tax liability | 5,979 |
| Increase in non-controlling interest | 7,565 |
| Decrease in exchangeable shares | (5,598) |
| Increase in unitholders' capital | 12,843 |
| Decrease in accumulated earnings, end of period | (3,849) |

Adoption of the policy had the following effects on Crescent Point's consolidated statements of operations and accumulated earnings:

| (\$000, except per unit amounts) | Three months ended December 31 | | Year ended December 31 | |
|---|--------------------------------|--|------------------------|--|
| | 2005 | | 2005 | |
| Increase in depletion expense | 451 | | 2,177 | |
| Increase in future income tax recovery | (159) | | (766) | |
| Increase in non-controlling interest | 3,009 | | 1,933 | |
| Decrease in net income | (3,301) | | (3,344) | |
| Decrease in accumulated earnings, beginning of period | (548) | | (505) | |
| Decrease in net income per unit | (0.08) | | (0.10) | |
| Decrease in net income per unit-diluted | (0.04) | | (0.04) | |

4. RECONCILIATION OF CASH DISTRIBUTIONS

Crescent Point's distributions to unitholders are paid monthly and are dependent upon commodity prices, production levels and the amount of capital expenditures to be funded from cash flow. The Trust reinvests part of its cash flow towards the capital program to provide for more sustainable distributions in the future. The actual amount of the distributions is at the discretion of the Board of Directors. In the event that commodity prices are higher than anticipated and a cash surplus develops during the quarter, the surplus may be used to increase distributions, reduce debt and/or increase the Trust's capital program.

During 2006, the Trust funded cash distributions from its cash flow from operations and expects to continue this practice in the future. Cash flow from operations in excess of distributions requirements is used to fund capital expenditures and reduce bank indebtedness.

Cash distributions are calculated in accordance with the Trust's indenture. To arrive at cash distributions, cash flow from operations, before changes in non cash working capital and asset retirement obligation ("ARO") expenditures, is reduced by reclamation fund contributions and a portion of capital expenditures.

| (\$000, except per unit amounts) | Three months ended December 31 | | Year ended December 31 | |
|--|--------------------------------|---------|------------------------|---------|
| | 2006 | 2005 | 2006 | 2005 |
| Accumulated cash distributions, beginning of period | 249,120 | 117,330 | 140,165 | 65,574 |
| Cash distributions declared to unitholders ⁽¹⁾ | 41,322 | 22,835 | 150,277 | 74,591 |
| Accumulated cash distributions, end of period | 290,442 | 140,165 | 290,442 | 140,165 |
| Accumulated cash distributions per unit, beginning of period | 6.66 | 4.27 | 4.86 | 2.72 |
| Cash distributions declared to unitholders per unit ⁽¹⁾ | 0.60 | 0.59 | 2.40 | 2.14 |
| Accumulated cash distributions per unit, end of period | 7.26 | 4.86 | 7.26 | 4.86 |

(1) Cash distributions reflect the sum of the amounts declared monthly to unitholders, including distributions under the DRIP and Premium DRIP plans.

5. CAPITAL ACQUISITIONS AND DISPOSITIONS

a) Acquisition of a Partnership (Southeast Saskatchewan Property)

On January 3, 2006, the Trust closed the acquisition of all the outstanding partnership units of a partnership with properties in the corridor between Manor and Ingoldsby, Saskatchewan for total consideration of \$24.5 million (\$25.4 million was allocated to property, plant and equipment). The purchase was paid for with cash and was accounted for as an asset acquisition pursuant to EIC-124.

b) Acquisition of a Corporation (Cantuar/Battrum Property)

On January 9, 2006, the Trust purchased all the outstanding shares of two corporations with properties in the Cantuar and Battrum areas of southwest Saskatchewan for total consideration of \$254.6 million (\$302.3 million was allocated to property, plant and equipment). The purchase was paid for with cash raised from an equity financing of \$220.1 million with the balance financed from the Trust's existing credit facilities.

The transaction was accounted for as an asset acquisition pursuant to EIC-124. The net assets acquired and consideration is allocated as follows:

| | (\$000) |
|----------------------------------|----------------|
| Net assets acquired | |
| Property, plant and equipment | 302,338 |
| Working capital | (1,285) |
| Asset retirement obligation | (1,706) |
| Future income taxes | (44,789) |
| Total net assets acquired | 254,558 |
| Consideration | |
| Cash | 254,473 |
| Acquisition costs | 85 |
| Total purchase price | 254,558 |

c) Acquisition of a Partnership (Peace River Arch Property)

On February 6, 2006, the Trust closed the acquisition of all the outstanding partnership units of a partnership with properties in the Peace River Arch area of northwest Alberta for total consideration of \$55.3 million (\$55.6 million was allocated to property, plant and equipment). The purchase was paid for with cash of \$11.3 million and 2,080,379 trust units and was accounted for as an asset acquisition pursuant to EIC-124.

d) Acquisition of Canex Energy Inc.

On May 30, 2006, the Trust purchased all the issued and outstanding shares of Canex Energy Inc., a public company with properties in the Peace River Arch area of northwest Alberta for total consideration of \$70.6 million (\$100.3 million was allocated to property, plant and equipment). The purchase was paid for with a combination of cash and trust units and was accounted for using the purchase method of accounting. The net assets acquired and consideration is allocated as follows:

| | (\$000) |
|--|---------------|
| Net assets acquired | |
| Working capital | 526 |
| Property, plant and equipment | 100,271 |
| Bank debt | (17,362) |
| Asset retirement obligation | (1,442) |
| Future income taxes | (11,356) |
| Total net assets acquired | 70,637 |
| Consideration | |
| Cash | 12,114 |
| Trust units issued (2,583,505 trust units) | 57,922 |
| Acquisition costs | 601 |
| Total purchase price | 70,637 |

e) Property Acquisitions and Disposals

In the year ended December 31, 2006, the Trust closed eight property acquisitions for total consideration before closing adjustments of approximately \$84.6 million and one property disposition for approximately \$6.4 million (the net amount allocated to property, plant and equipment was \$83.0 million).

f) Acquisition of a Private Consortium (Glen Ewen Property)

On July 26, 2005, the Trust purchased all of the issued and outstanding shares of a group of private companies with common properties located in the Glen Ewen area of southeast Saskatchewan. The purchase was paid for with a combination of cash and trust units and was accounted for using the purchase method of accounting. The net assets and consideration is allocated as follows:

| | (\$000) |
|-------------------------------------|---------|
| Net assets acquired | |
| Cash | 2,000 |
| Working capital | 300 |
| Property, plant and equipment | 56,318 |
| Asset retirement obligation | (1,716) |
| Future income taxes | (9,086) |
| Total net assets acquired | 47,816 |
| Consideration | |
| Cash | 11,443 |
| Trust units (2,000,000 trust units) | 36,300 |
| Acquisition costs | 73 |
| Total purchase price | 47,816 |

g) Acquisition of a Private Company (Tatagwa Property)

On September 13, 2005, the Trust purchased all of the issued and outstanding shares of a private company with properties in the Tatagwa area of southeast Saskatchewan. The purchase was paid for with a combination of cash and trust units and was accounted for using the purchase method of accounting. The net assets and consideration is allocated as follows:

| | (\$000) |
|-----------------------------------|---------|
| Net assets acquired | |
| Cash | 570 |
| Working capital | 77 |
| Property, plant and equipment | 4,665 |
| Asset retirement obligation | (80) |
| Total net assets acquired | 5,232 |
| Consideration | |
| Cash | 647 |
| Trust units (235,000 trust units) | 4,559 |
| Acquisition costs | 26 |
| Total purchase price | 5,232 |

h) Acquisition of Partnership (Tatagwa Property)

On October 28, 2005, the Trust purchased all of the outstanding partnership units of a partnership with properties in the Tatagwa area of southeast Saskatchewan. The purchase was paid for with cash and was accounted for as an asset acquisition pursuant to EIC-124. The net assets acquired and consideration is allocated as follows:

| | (\$000) |
|-------------------------------|---------|
| Net assets acquired | |
| Property, plant and equipment | 39,399 |
| Asset retirement obligation | (1,622) |
| Total net assets acquired | 37,777 |
| Consideration | |
| Cash | 37,423 |
| Acquisition costs | 354 |
| Total purchase price | 37,777 |

i) Acquisition of Bulldog Energy Inc.

On November 29, 2005, the Trust purchased all of the issued and outstanding shares of Bulldog Energy Inc., a public oil and gas company. The purchase was paid for with a combination of cash and trust units and was accounted for using the purchase method of accounting. The net assets and consideration is allocated as follows:

| | (\$000) |
|-------------------------------------|----------------|
| Net assets acquired | |
| Property, plant and equipment | 128,855 |
| Goodwill | 10,203 |
| Working capital deficiency | (7,072) |
| Bank debt | (12,850) |
| Asset retirement obligation | (2,373) |
| Future income taxes | (16,276) |
| Total net assets acquired | 100,487 |
| Consideration | |
| Cash | 1,629 |
| Trust units (4,490,564 trust units) | 97,564 |
| Acquisition costs | 1,294 |
| Total purchase price | 100,487 |

6. PROPERTY, PLANT AND EQUIPMENT

| December 31, 2006 (\$000) | Cost | Accumulated depletion, depreciation and amortization | Net |
|--------------------------------------|------------------|---|------------------|
| Petroleum and natural gas properties | 1,181,422 | 238,401 | 943,021 |
| Production equipment | 300,693 | 31,392 | 269,301 |
| Office furniture and equipment | 3,979 | 2,146 | 1,833 |
| | 1,486,094 | 271,939 | 1,214,155 |

| December 31, 2005 (\$000) | Cost | Accumulated depletion, depreciation and amortization | Net |
|--------------------------------------|---------|---|---------|
| Petroleum and natural gas properties | 617,838 | 117,923 | 499,915 |
| Production equipment | 147,925 | 13,954 | 133,971 |
| Office furniture and equipment | 3,332 | 1,551 | 1,781 |
| | 769,095 | 133,428 | 635,667 |

At December 31, 2006, unproved land costs of \$33.9 million (2005 – \$23.8 million) have been excluded from costs subject to depletion. Future development costs of \$147.3 million (2005 - \$103.1 million) are included in costs subject to depletion.

General and administrative expenses capitalized by the Trust during the year were \$2.6 million (2005 – \$1.7 million). The capitalized administration costs do not include any related unit-based compensation costs.

The ceiling test calculation at December 31, 2006 indicated that the net recoverable amount from proved reserves exceeded the net carrying value of the petroleum and natural gas properties and equipment. The following are the prices that were used in the December 31, 2006 ceiling test:

| | Average Price Forecast ⁽¹⁾ | | | | | | | | | | | |
|------------------|---------------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|-------|----------------------|
| | 2007 | 2008 | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018+ ⁽²⁾ |
| WTI (\$US/bbl) | 62.00 | 60.00 | 58.00 | 57.00 | 57.00 | 57.50 | 58.50 | 59.75 | 61.00 | 62.25 | 63.50 | 2.0% |
| Exchange rate | 0.87 | 0.87 | 0.87 | 0.87 | 0.87 | 0.87 | 0.87 | 0.87 | 0.87 | 0.87 | 0.87 | 0.87 |
| WTI (\$Cdn/bbl) | 71.26 | 68.97 | 66.67 | 65.52 | 65.52 | 66.09 | 67.24 | 68.68 | 70.11 | 71.55 | 72.99 | 2.0% |
| AECO (\$Cdn/mcf) | 7.20 | 7.45 | 7.75 | 7.80 | 7.85 | 8.15 | 8.30 | 8.50 | 8.70 | 8.90 | 9.10 | 2.0% |

(1) The benchmark prices listed above are adjusted for quality differentials, heat content, distance to market and other factors in performing our ceiling test.

(2) Percentage change represents the change in each year after 2017 to the end of the reserve life.

7. RECLAMATION FUND

A reclamation fund was established to fund future asset retirement obligation costs. The Board of Directors has approved contributions of \$0.20 per barrel of production which results in minimum annual contributions of approximately \$1.5 million based on properties owned at December 31, 2006. Additional contributions are made at the discretion of management. The following table reconciles the reclamation fund.

| (\$000) | 2006 | 2005 |
|----------------------------|---------|---------|
| Balance, beginning of year | 241 | 225 |
| Contributions | 2,502 | 1,042 |
| Actual expenditures | (1,018) | (1,026) |
| Balance, end of year | 1,725 | 241 |

8. BANK INDEBTEDNESS

The Trust has a syndicated credit facility with seven banks and an operating credit facility with one Canadian chartered bank. The amount available under the combined credit facilities was increased from \$245.0 million to \$320.0 million on January 9, 2006, from \$320.0 million to \$350.0 million on May 29, 2006 and further increased to \$470.0 million on November 22, 2006. The Trust has letters of credit in the amount of \$310,000 outstanding at December 31, 2006.

The credit facilities bear interest at the prime rate plus a margin based on a sliding scale ratio of the Trust's debt to cash flows. The credit facility is secured by the oil and gas assets owned by the Trust's wholly owned subsidiaries.

The cash interest paid in the year was \$15.2 million (2005 - \$5.2 million).

9. ASSET RETIREMENT OBLIGATION

The total future asset retirement obligation was estimated by management based on the Trust's net ownership in all wells and facilities. This includes all estimated costs to reclaim and abandon the wells and facilities and the estimated timing of the costs to be incurred in future periods. The Trust has estimated the net present value of its total asset retirement obligation to be \$45.8 million at December 31, 2006 (December 31, 2005 - \$33.3 million) based on total estimated undiscounted cash flows to settle the obligation of \$104.0 million (December 31, 2005 - \$67.4 million). The expected period until settlement ranges from a minimum of 2 years to a maximum of 50 years, with the costs expected to be paid over an average of 20 years. The estimated cash flows have been discounted using a credit adjusted risk free rate of eight percent and an inflation rate of two percent.

The following table reconciles the asset retirement obligation:

| (\$000) | 2006 | 2005 |
|---|---------|---------|
| Asset retirement obligation, beginning of year | 33,275 | 21,403 |
| Liabilities incurred | 1,211 | 669 |
| Liabilities acquired through capital acquisitions | 9,141 | 10,229 |
| Liabilities settled | (1,018) | (1,026) |
| Accretion expense | 3,220 | 2,000 |
| Asset retirement obligation, end of year | 45,829 | 33,275 |

10. UNITHOLDERS' CAPITAL

a) Authorized

An unlimited number of voting trust units has been authorized.

b) Issued and outstanding

The Trust has initiated a distribution reinvestment plan (the "Regular DRIP") and a premium distribution reinvestment plan (the "Premium DRIP"). The Regular DRIP permits eligible unitholders to direct their distributions to the purchase of additional units at 95 percent of the average market price, as defined in the plan. The Premium DRIP permits eligible unitholders to elect to receive 102 percent of the cash the unitholder would otherwise have received on the distribution date. The additional cash distributed to the Premium DRIP unitholders is funded through the issuance of additional trust units in the open market. Participation in the Regular and Premium DRIP is subject to proration by the Trust. Unitholders who participate in either the Regular DRIP or the Premium DRIP are also eligible to participate in the Optional Unit Purchase Plan as defined in the plan.

On December 29, 2005, the Trust and a syndicate of underwriters closed a bought deal equity financing pursuant to which the syndicate sold 10,406,000 subscription receipts of the Trust for gross proceeds of \$220.1 million (\$21.15 per subscription receipt). On January 9, 2006, all conditions of this offering were satisfied and the subscription receipts were converted to trust units and the proceeds were released to the Trust.

On March 23, 2006, the Trust and a syndicate of underwriters closed a bought deal equity financing pursuant to which 3,440,000 trust units were issued for gross proceeds of \$75.0 million (\$21.80 per trust unit).

On July 20, 2006, the Trust and a syndicate of underwriters closed a bought deal equity financing pursuant to which the syndicate sold 4,700,000 trust units for gross proceeds of \$100.3 million (\$21.35 per trust unit).

| | 2006 | | 2005 | |
|--|-----------------------|----------------|-----------------------|----------------|
| | Number of trust units | Amount (\$000) | Number of trust units | Amount (\$000) |
| Trust units, beginning of year | 41,745,784 | 502,879 | 29,347,408 | 257,468 |
| Issued for cash | 18,546,000 | 395,424 | 3,930,000 | 75,063 |
| Issued on capital acquisitions | 4,663,884 | 101,923 | 6,725,564 | 138,423 |
| Issued on conversion of exchangeable shares | 1,444,213 | 25,608 | 393,007 | 7,405 |
| Issued on vesting of restricted units ⁽¹⁾ | 190,221 | 2,889 | 90,803 | 1,035 |
| Issued pursuant to the distribution reinvestment plans | 2,604,619 | 49,984 | 1,128,564 | 20,930 |
| To be issued pursuant to the distribution reinvestment plans | 337,231 | 5,241 | 130,438 | 2,555 |
| Trust units, end of year | 69,531,952 | 1,083,948 | 41,745,784 | 502,879 |
| Cumulative unit issue costs | - | (38,019) | - | (14,819) |
| Total unitholders' capital, end of year | 69,531,952 | 1,045,929 | 41,745,784 | 488,060 |

(1) The amount of trust units issued on vesting of restricted units is net of trust units purchased in the market to satisfy the issuance of trust units under the restricted unit bonus plan and employee withholding taxes.

11. EXCHANGEABLE SHARES

The exchangeable shareholders had the option to convert their exchangeable shares of Crescent Point Resources Ltd. into trust units at any time before September 5, 2013. Once the exchangeable shares outstanding reached one million, the Trust could elect to redeem the exchangeable shares for trust units. As the number of exchangeable shares outstanding had reached one million, the Trust exercised its redemption call right in respect of all the issued and outstanding exchangeable shares. As a result, the Trust purchased all of the issued and outstanding exchangeable shares from the holders on October 27, 2006. The redemption of the exchangeable shares was satisfied by the delivery to each shareholder of 1.4621 trust units per exchangeable share held.

For other conversions in the year, the number of trust units issued upon conversion was based on the exchange ratio in effect on the date of conversion. The exchange ratio was calculated monthly based on the distributions declared and the ten day weighted average trust unit trading price preceding the monthly effective date. The exchangeable shares were not eligible for distributions, and were not publicly traded.

| Exchangeable Shares | 2006 | 2005 |
|--|-----------|-----------|
| Balance, beginning of year | 988,073 | 1,307,140 |
| Exchanged for trust units | (988,073) | (319,067) |
| Balance, end of year | - | 988,073 |
| Exchange ratio, end of year | - | 1.333 |
| Trust units issuable upon conversion, end of year | - | 1,317,101 |

| Non-controlling Interest (\$000) | 2006 | 2005 |
|---|---------|---------|
| Non-controlling interest, beginning of year | 7,565 | 7,266 |
| Reduction of book value for conversion to trust units | (5,187) | (1,634) |
| Current period net earnings (loss) attributable to non-controlling interest | (2,378) | 1,933 |
| Non-controlling interest, end of year | - | 7,565 |

12. RESTRICTED UNIT BONUS PLAN

The Trust has a Restricted Unit Bonus Plan. Under the terms of the Restricted Unit Bonus Plan, the Trust may grant restricted units to directors, officers, employees and consultants. Restricted units vest at 33 1/3 percent on each of the first, second and third anniversaries of the grant date. Restricted unitholders are eligible for monthly distributions on their restricted units, immediately upon grant.

At the annual general meeting on May 31, 2006, the unitholders approved an increase in the maximum number of trust units issuable under the Restricted Unit Bonus Plan from 935,000 to 5,000,000 trust units.

A summary of the changes in the restricted units outstanding under the plan is as follows:

| | 2006 | 2005 |
|--------------------------------------|------------------|----------------|
| Restricted units, beginning of year | 589,555 | 400,559 |
| Granted | 848,426 | 406,026 |
| Exercised | (354,967) | (126,852) |
| Forfeited | (39,386) | (90,178) |
| Restricted units, end of year | 1,043,628 | 589,555 |

The Trust recorded compensation expense and contributed surplus of \$11.3 million in the year ended December 31, 2006, (2005 - \$4.3 million) based on the amortization of the fair value of the units on the date of grant. Additionally, the Trust recorded \$1.1 million (2005 - \$450,000) of cash distributions on restricted units. The total cash and non-cash unit based compensation recorded in the year was \$12.4 million (2005 - \$4.7 million).

13. INCOME TAXES

During 2006, there were several proposed amendments to Federal and provincial corporate tax legislation which were substantively enacted. The Federal amendments include the elimination of Large Corporations Tax, effective January 1, 2006, a reduction in the Federal corporate income tax rate from 21 percent (in 2007) to 19 percent over a three year period beginning January 1, 2008 and the elimination of the Corporate Income Surtax, effective January 1, 2008. The Saskatchewan amendments include a reduction in the Saskatchewan corporate income tax rate from 17 percent to 12 percent over a four year period beginning January 1, 2006. The Alberta amendments include a reduction in the Alberta corporate income tax rate from 11.5 percent to 10 percent, effective April 1, 2006. As a result of the rate changes, the Trust's future income tax rate decreased to approximately 30 percent in 2006 (35 percent in 2005) compared to the tax rate of 37 percent applicable for the 2006 income tax year (40 percent for 2005).

The tax provision differs from the amount computed by applying the combined Canadian federal and provincial income tax statutory rates to income before taxes as follows:

| (\$000) | 2006 | 2005 |
|---|----------|----------|
| Income before taxes | 61,323 | 18,169 |
| Statutory income tax rate | 36.53% | 39.70% |
| Expected provision for income taxes | 22,401 | 7,213 |
| Effect of change in corporate tax rates | (5,623) | (1,945) |
| Non-deductible Crown charges | 5,359 | 3,847 |
| Resource allowance | (4,466) | (9,272) |
| Net income of the Trust and other | (34,231) | (27,643) |
| Future income tax recovery | (16,560) | (27,800) |

The cash capital taxes paid during the year were \$13.2 million (2005 - \$3.9 million).

The future tax liability of \$85.9 million is comprised primarily of tax on the differences between the accounting basis and tax basis of certain operating companies' property, plant and equipment and on the differences between certain subsidiaries' accounting basis and tax basis for investments in partnerships.

On October 26, 2006, the Trust announced a Special Meeting would be held on November 27, 2006 to obtain conditional approval of a reorganization of the Trust and its subsidiaries. Shareholder approval was received at the Special Meeting and on March 1, 2007 the Trust closed the reorganization. The reorganization resulted in the existing business of the Trust, which was carried on through a limited partnership and corporations, being carried on through limited partnerships indirectly owned by the Trust. The reorganization which is similar to reorganizations completed by a number of other income trusts, has provided the Trust with a "flow through" structure that should maximize the cash available for distribution.

On October 31, 2006, the Federal Government announced tax proposals pertaining to taxation of distributions paid by trusts and the personal tax treatment of trust distributions. On December 21, 2006, the Minister of Finance released for comment draft legislation concerning the new tax proposals. Currently, Crescent Point does not pay tax on distributions as tax is paid by the unitholders. The proposals would result in a tax at the Trust level. If legislation is enacted, the proposals would apply to the Trust effective January 1, 2011, however the plan has not been enacted at this time. If the tax legislation becomes substantively enacted as proposed, future income taxes may be adjusted to include temporary differences between the accounting and tax basis of the Trust's assets and liabilities.

14. PER TRUST UNIT AMOUNTS

The following table summarizes the weighted average trust units used in calculating net income per trust unit:

| | Three months ended December 31 | | Year ended December 31 | |
|---|--------------------------------|------------|------------------------|------------|
| | 2006 | 2005 | 2006 | 2005 |
| Weighted average trust units | 68,312,948 | 38,557,539 | 61,542,223 | 34,263,054 |
| Trust units issuable on conversion of exchangeable shares ⁽¹⁾⁽²⁾ | 403,437 | 1,317,101 | 1,178,761 | 1,317,101 |
| Dilutive impact of restricted units | 1,047,581 | 589,222 | 847,832 | 505,347 |
| Dilutive trust units and exchangeable shares ⁽²⁾ | 69,763,966 | 40,463,862 | 63,568,816 | 36,085,502 |

(1) The trust units issuable on conversion of the exchangeable shares reflect the weighted average exchangeable shares outstanding converted at the exchange ratio in effect at the end of the period. The exchange rate used for 2006 was the rate in effect on October 27, 2006, immediately prior to the conversion of all remaining exchangeable shares.

(2) The exchangeable shares and restricted units for the fourth quarter of 2005 are not included in the calculation of the net income per unit – diluted as they are anti-dilutive.

15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

a) Fair values

The Trust's financial instruments recognized on the consolidated balance sheet include cash, accounts receivable, the reclamation fund, accounts payable, accrued liabilities and debt. The fair value of these financial instruments approximates their carrying amounts due to their short-term nature.

b) Credit risk

A substantial portion of the Trust's accounts receivable are with customers in the oil and gas industry and are subject to normal industry credit risks.

c) Interest rate risk

The Trust is exposed to interest rate risk on debt instruments to the extent of changes in the prime interest rate.

d) Risk management

The Trust has entered into fixed price oil, gas and power contracts along with interest rate swaps to manage its exposure to fluctuations in the price of crude oil, gas, power and interest rates on debt.

The following is a summary of the financial instrument contracts in place as at December 31, 2006:

| Financial WTI Crude Oil Contracts - Canadian Dollar | | | Average Swap Price | Average Bought Put Price | Average Sold Call Price |
|---|----------|-----------------|--------------------------|--------------------------|-------------------------|
| Term | Contract | Volume (bbls/d) | (\$Cdn/bbl) | (\$Cdn/bbl) | (\$Cdn/bbl) |
| 2007 | | | | | |
| January – March | Swap | 1,000 | 58.72 | | |
| January – June | Swap | 250 | 67.00 | | |
| January – September | Swap | 250 | 74.52 | | |
| January – December | Swap | 2,750 | 75.64 | | |
| April – June | Swap | 1,000 | 72.02 | | |
| July – September | Swap | 1,250 | 71.11 | | |
| October – December | Swap | 1,500 | 73.22 | | |
| January – June | Collar | 250 | | 64.00 | 75.32 |
| January – September | Collar | 250 | | 68.00 | 81.28 |
| January – December | Collar | 1,000 | | 67.61 | 81.39 |

The Trust has a power swap for 3.0 MW/h at a fixed price of \$63.25 per MW/h for the period March 1, 2006 to December 31, 2008. The Trust also has an interest rate swap in the amount of \$40.0 million bearing an interest rate of 4.35 percent (before stamping fees) for the period May 25, 2006 to May 25, 2007.

None of the Trust's commodity or interest rate contracts have been designated as accounting hedges. Accordingly, all commodity and interest rate contracts have been recorded on the balance sheet as assets and liabilities based on their fair values.

The following table reconciles the movement in the fair value of the Trust's commodity and interest rate contracts:

| (\$000) | 2006 | 2005 |
|--|-------|------|
| Risk management asset, beginning of year | - | - |
| Unrealized mark-to-market gain | 1,052 | - |
| Risk management asset, end of year | 1,052 | - |
| Less: current risk management asset, end of year | (586) | - |
| Long term risk management asset, end of year | 466 | - |

| (\$000) | 2006 | 2005 |
|--|----------|----------|
| Risk management liability, beginning of year | 32,085 | 7,898 |
| Unrealized mark-to-market loss (gain) ⁽¹⁾ | (12,807) | 24,187 |
| Risk management liability, end of year | 19,278 | 32,085 |
| Less: current risk management liability, end of year | (7,581) | (27,495) |
| Long term risk management liability, end of year | 11,697 | 4,590 |

(1) The realized financial instrument gain on the income statement for the year ended December 31, 2005 also reflects the amortization of deferred financial instrument gains and losses.

16. COMMITMENTS

At December 31, 2006, the Trust had contractual obligations and commitments for office space and equipment:

| | (\$000) |
|------|---------|
| 2007 | 3,087 |
| 2008 | 2,698 |
| 2009 | 2,589 |
| 2010 | 2,304 |
| 2011 | 2,102 |

17. SUBSEQUENT EVENTS

a) Acquisition of Mission Oil & Gas Inc. (Viewfield Bakken Property)

On February 9, 2007, the Trust closed the acquisition of Mission Oil & Gas Inc., a publicly traded company with properties in the Viewfield Bakken area of southeast Saskatchewan for total consideration of approximately \$574.1 million, before closing adjustments (based on a trust unit price of \$17.37). The purchase was funded through the Trust's existing bank lines and issuance of approximately 29.2 million trust units. The Trust owned 3,800,000 shares of Mission Oil & Gas Inc. prior to the closing which it purchased for \$7.90 per share or \$30.0 million in November 2005.

b) Internal Reorganization

On March 1, 2007, the Trust closed the previously announced reorganization of the Trust and its subsidiaries. The reorganization resulted in the existing business of the Trust, which was carried on through a limited partnership and corporations, being carried on through limited partnerships indirectly owned by the Trust. The reorganization which is similar to reorganizations completed by a number of other income trusts, has provided the Trust with a "flow through" structure that should maximize the cash available for distribution.
