# to learn,

## ::: Join A Winning Team

Crescent Point Energy is a conventional oil and gas producer based in Calgary, Alberta and Denver, Colorado. But we're anything but conventional. We're dynamic, disciplined and driven by results. We have high-quality assets across western Canada and the United States and use infill drilling, waterflood implementation and improved technology to maximize our results.

Since 2001, we've grown tremendously but we're nowhere near the finish line. We see many exciting opportunities ahead and we'd love for you to join us.

### We Offer Opportunity

We believe that intern, co-op and summer students are an integral part of the Crescent Point team. That's why we offer outstanding on-the-job training, coaching and mentoring, field tours and plenty more learning and growth opportunities. Ultimately, our goal is to hire our highly skilled students for full-time, permanent positions.

"I started with Crescent Point in 2006 while on my Engineering internship. At that time, we were only 20,000 boe/d and now we're over 150,000 boe/d. Along with this growth, I've been given ample opportunities - from being a Production Engineer when I first started to becoming an Exploitation Engineer in multiple areas. Crescent Point is truly an amazing company!"

**Beth Kesslering**  
Senior Exploitation Engineer

## Here's What To Expect

When you join Crescent Point, you can expect to be a part of a dynamic, challenging and rewarding work environment. We offer competitive pay, a comprehensive rewards package, living allowance (depending on where you're stationed), the opportunity to contribute to a hard-working team, breakfast at the main office in Calgary and much more.

## And Then There Are The Perks

We believe that when you work hard, you should play hard, too. That's why we have a gym and yoga studio at our Calgary office, both of which are available to all employees, interns and students. We have flexible work hours and a generous flex day program. We also make sure to get out and have fun at events, like at our annual Open House. Our unique culture is a big part of the reason we've won multiple awards from Alberta Venture magazine for having the best workplace and outstanding perks.

"I actually started out in the Saskatchewan oil patch as a summer student. It was fantastic - I learned a lot and made some great connections. Here at Crescent Point, we like to give young people the opportunity to learn about the oil and gas industry and our company, and to provide a platform to be considered for long-term roles."

**Scott Saxberg**  
President and CEO

# succeed.

## ::: How to Apply

We're on the lookout for great intern, co-op and summer students to fill roles in departments, such as:

- Engineering
- Land
- Geosciences
- Accounting

If you're interested in joining our team, we'd love to hear from you.

To apply for internship or co-op opportunities, please contact your student career services centre.

To apply for summer student opportunities which we typically post in February, and to learn more about Crescent Point Energy, please visit our website at [www.crescentpointenergy.com](http://www.crescentpointenergy.com).

We hope to hear from you soon!
